The Treaty of Peace between the Allied Powers and Turkey, which was signed at Lausanne on 24 July 1923, defined the European frontier of the new Turkey and to some extent her Asiatic frontiers. This treaty was ratified by the Grand National Assembly in Ankara on 23 Aug. 1923 and entered into force 6 Aug 1924

The Treaty of Lausanne and the conventions attached to it provided for the demilitarization of zones adjoining the European frontier, the Dardanelles and the Bosphorus, subject to the right to maintain a garrison at Istanbul, for the demilitarization of Imroz, Bozcaada (Tenedos) and Tavsan Islands, as well as the islands in the Sea of Marmara with one exception and for a special administrative regime in Imroz and Bozcaada.

On 10 July 1936 a new Straits Convention was signed at Montreux (ratified on 9 Nov 1936) to take the place of the 1923 Convention, whereby Turkey obtained the right of re-militarizing the zone of the Straits, and this area was re-occupied by Turkish troops on 21 July 1936 The International Commission of the Straits

ceased to function on 30 Sept. 1936

By an agreement between the Turkish and French Governments concluded at Ankara on 23 June 1939, the Sanjak of Alexandretta (the Hatay) was incorporated in the Turkish Republic.

#### JUSTICE, RELIGION, EDUCATION AND WELFARE

Justice. The unified legal system consists of (1) justices of the peace (single judges with limited but summary penal and civil jurisdiction), (2) courts of first instance (single judges, dealing with cases outside the jurisdiction of (3) and (4)), (3) central criminal courts (a president and 2 judges, dealing with cases where the crime is punishable by imprisonment over 5 years); (4) commercial courts (3 judges), (5) state security courts, to prosecute offences against the integrity of the state (a president and 4 judges, 2 of the latter being military)

The civil and military Courts of Cassation sit at Ankara

The Council of State is the highest administration tribunal; it consists of 5 chambers Its 31 judges are nominated from among high-ranking personalities in politics, economy, law, the army, etc

The Military Court of Cassation in Ankara is the highest military tribunal. The Military Administrative Court deals with the judicial control of administrative acts and deeds concerning military personnel.

The Constitutional Court, set up under the Constitution, can review and annul legislation and try the President of the Republic, Ministers and senior judges It consists of 15 regular and 5 alternate members.

The Civil Code and the Code of Obligations have been adapted from the corresponding Swiss codes. The Penal Code is largely based upon the Italian Penal Code, and the Code of Civil Procedure closely resembles that of the Canton of Neuchâtel. The Commercial Code is based on the German.

Religion. Freedom of religion is guaranteed by the Constitution Although Islam is not the official state religion of Turkey, Moslems form 98 2% of the population. The administration of the Moslem religious organizations is in charge of the

Presidency of Religious Affairs, attached to the Prime Minister's office The Turkish Republic is a secular state

Istanbul is the seat of the Œcumenical Patriarch, who is the head of the Orthodox Church in Turkey The Armenian Church (Gregorian) is ruled by a Patriarch in Istanbul who is subordinate to the Katholikos of Etchmiadzin, the spiritual head of all Armenians The Armenian Apostolic Church is ruled by the Patriarch of Cilicia The Chaldeans (Nestorian Uniats) have a Bishop at Mardin The Syrian Uniats have a See of Mardin and Amida, but it is united with their Patriarchate of Antioch (residence, Damascus) Greek Uniats (Byzantine Rite) have as their Ordinary in Istanbul, the Titular Bishop of Gratianopolis The Latins have an Apostolic Delegate in Istanbul and an Archbishop in Izmir, but their Patriarch of Istanbul is titular and non-resident There is a Grand Rabbi (Hahambaşi) in Istanbul for the Jews who are nearly all Sephardim

A law passed in Dec 1934 forbids the wearing of clerical garb for those other than religious leaders except in places of worship and during divine service. The constitution forbids the political exploitation of religion or any impairment of the secular character of the republic

In lieu of religious formulae, all citizens take oaths on their honour

Education. Elementary education is compulsory and co-educational and, in state schools, free All children from 7 to 12 are to receive primary instruction, which may be given in state schools, schools maintained by communities, or private schools, or, subject to certain tests, at home The state schools are under the direct control of the Ministry of Education They include primary schools, secondary or middle schools, and lycées or secondary schools of a superior kind There are also training schools for male and female teachers, and technical schools In 1983 there were 27 universities and 109 other institutes of higher education The important non-Moslem communities in Istanbul maintain their own schools, which, like all 'private' schools, are subject to the supervision of the Ministry of Education

## UNION OF SOVIET SOCIALIST REPUBLICS

POST-REVOLUTION HISTORY. Up to 12 March 1917 the territory now forming the USSR, together with that of Finland, Poland and certain tracts ceded in 1918 to Turkey, but less the territories then forming part of the German, Austro-Hungarian and Japanese empires—East Prussia, Eastern Galicia, Transcarpathia, Bukovina, South Sakhalin and Kurile Islands—which were acquired during and after the Second World War, was constituted as the Russian Empire It was governed as an autocracy under the Tsar, with the aid of Ministers responsible to himself and a State Duma with limited legislative powers, elected by provincial

assemblies chosen by indirect elections on a restricted franchise

On 8 March 1917 a revolution broke out The Duma parties, on 12 March, set up a Provisional Committee of the State Duma, while the factory workmen and the insurgent garrison of Petrograd elected a Council (Soviet) of Workers' and Soldiers' Deputies Soviets were also elected by the workmen in other towns, in the Army and Navy and, as time went on, by the peasantry On 15 March 1917 the Tsar abdicated, and the Provisional Committee, by agreement with the Petrograd Soviet, appointed a Provisional Government and, on 14 Sept, proclaimed a republic However, a political struggle went on between the supporters of the Provisional Government—the Mensheviks and the Socialist-Revolutionaries—and the Bolsheviks, who advocated the assumption of power by the Soviets. When they had won majorities in the Soviets of the principal cities and of the armed forces on several fronts, the Bolsheviks organized an insurrection through a Military-Revolutionary Committee of the Petrograd Soviet On 7 Nov 1917 the Committee arrested the Provisional Government and transferred power to the second All-Russian Congress of Soviets This elected a new government, the Council of People's Commissars, headed by Lenin.

On 25 Jan 1918 the third All-Russian Congress of Soviets issued a Declaration of Rights of the Toiling and Exploited People, which proclaimed Russia a Republic of Soviets of Workers', Soldiers' and Peasants' Deputies, and on 10 July 1918 the fifth Congress adopted a Constitution for the Russian Soviet Federal Socialist Republic In the course of the civil war other Soviet Republics were set up in the Ukraine, Belorussia and Transcaucasia These first entered into treaty relations with the RSFSR and then, in 1922, joined with it in a closely integrated Union

AREA AND POPULATION. The total area of the Soviet Union in April 1986 was 22 4m sq. km (8 65m sq miles) The census population on 15 Jan 1970 was 241 7m. (111 4m males, 130 3m females, 136m urban, 105 7m rural). The census population on 17 Jan 1979 was 262 4m (122 3m males, 140 1m females, 163 6m urban, 98 9m rural). The increase of 27.6m in urban population between 1970 and 1979 was due to natural increase and 15 6m. rural dwellers becoming part of the urban population resulting from migration because of the development of industry and transport, and increased farm mechanization, and from the urbanization of large rural centres. Consequently, despite a natural increase of 8 7m. in rural areas, there was a net decrease of 6 9m over this period. Population at 1 Jan. 1985, 276.3m (129 6m. males, 146.7m females, 180 1m. urban, 96.2m. rural).

The Soviet social structure is officially described as consisting of two friendly social classes—workers and collective farm peasantry—and a social stratum, the

intelligentsia, who are engaged in mental rather than manual labour. In 1985 workers (in industry and agriculture) accounted for 61.6% of total population, collective farmers for 12.4% and intelligentsia for 26%.

#### CONSTITUTION

Constituent Republics. The Union of Soviet Socialist Republics was formed by the union of the RSFSR, the Ukrainian Soviet Socialist Republic, the Belorussian Soviet Socialist Republic and the Transcaucasian Soviet Socialist Republic, the Treaty of Union was adopted by the first Soviet Congress of the USSR on 30 Dec. 1922 In Oct. 1924 the Uzbek and Turkmen Autonomous Soviet Socialist Republics and in Dec. 1929 the Tadzhik Autonomous Soviet Socialist Republic were declared constituent members of the USSR, becoming Union Republics.

At the 8th Congress of the Soviets, on 5 Dec 1936, a new constitution of the USSR was adopted The Transcaucasian Republic was split up into the Armenian Soviet Socialist Republic, the Azerbaijan Soviet Socialist Republic and the Georgian Soviet Socialist Republic, each of which became constituent republics of

the Union At the same time the Kazakh Soviet Socialist Republic and the Kirghiz Soviet Socialist Republic, previously autonomous republics within the RSFSR,

were proclaimed constituent republics of the USSR.

In Sept. 1939 Soviet troops occupied eastern Poland as far as the 'Curzon line', which in 1919 had been drawn on ethnographical grounds as the eastern frontier of Poland, and incorporated it into the Ukrainian and Belorussian Soviet Socialist Republics. In Feb, 1951 some districts of the Drogobych Region of the Ukraine and the Lublin Voivodship of Poland were exchanged

On 31 March 1940 territory ceded by Finland was joined to that of the Autonomous Soviet Socialist Republic of Karelia to form the Karelo-Finnish Soviet Socialist Republic, which was admitted into the Union as the 12th Union Republic On 16 July 1956 the Supreme Soviet of the USSR adopted a law altering the status of the Karelo-Finnish Republic from that of a Union (constituent) Republic of the USSR to that of an Autonomous (Karelian) Republic within the RSFSR

On 2 Aug 1940 the Moldavian Soviet Socialist Republic was constituted as the 13th Union Republic It comprised the former Moldavian Autonomous Soviet Socialist Republic and Bessarabia (44,290 sq km, ceded by Romania on 28 June 1940), except for the districts of Khotin, Akerman and Ismail, which, together with Northern Bukovina (10,440 sq km), were incorporated in the Ukrainian Soviet Republic The Soviet-Romanian frontier thus constituted was confirmed by the peace treaty with Romania, signed on 10 Feb 1947 On 29 June 1945 Ruthenia (Sub-Carpathian Russia, 12,742 sq km) was by treaty with Czechoslovakia incorporated into the Ukrainian Soviet Socialist Republic

On 3, 5 and 6 Aug 1940 Lithuania, Latvia and Estonia were incorporated in the Soviet Union as the 14th, 15th and 16th Union Republics respectively. The change in the status of the Karelo-Finnish Republic reduced the number of Union Republic

lics to 15

After the defeat of Germany it was agreed by the governments of the UK, the USA and the USSR (by the Potsdam declaration) that part of East Prussia should be embodied in the USSR. The area (11,655 sq. km), which includes the towns of Konigsberg (renamed Kaliningrad), Tilsit (renamed Sovyetsk) and Insterburg (renamed Chernyakhovsk), was joined to the RSFSR by decree of 7 April 1946.

By the peace treaty with Finland, signed on 10 Feb 1947, the province of Petsamo (Pechenga), ceded to Finland on 14 Oct 1920 and 12 March 1946, was returned to the Soviet Union. On 19 Sept 1955 the Soviet Union renounced its treaty rights to the naval base of Porkkala-Udd and on 26 Jan. 1956 completed the withdrawal of the forces from Finnish territory

In 1945, after the defeat of Japan, the southern half of Sakhalin (36,000 sq. km) and the Kurile Islands (10,200 sq. km) were, by agreement with the Allies, incorporated in the USSR.

1 However, Japan asks for the return of the Etorofu and Kunashiri Islands as not belonging to the Kurile Islands proper. The Soviet Government informed Japan on 27 Ian. 1960 that the Habomai Islands and Shikotan would be handed back to Japan on the withdrawal of the American troops from Japan.

GOVERNMENT. The Soviet Union is a socialist state of the whole people (1977 constitution), the political units of which are the Soviets of People's

Deputies All central and local authority is vested in these Soviets

The economic foundation of the USSR is the socialist system of economy and the socialist ownership of the means of production. There are two forms of socialist property: (1) state property (property of the whole people); (2) co-operative and collective farm (kolkhoz) property (property of individual collective farms and property of co-operative associations). The land, mineral deposits, waters, forests, mills, factories, mines, railways, water and air transport, banks, means of communication, state farms (sovkhozy), as well as municipal enterprises and the principal dwelling-house properties in the cities and industrial localities, are state property, but the land occupied by collective farmers is secured to them in perpetuity so long as they use it in accordance with the laws of the country. The members of the kolkhozy may have small plots of land attached to their dwellings for their own

use Peasants unwilling to enter a kolkhoz may retain their individual farms, but they are not allowed to employ hired labour. The right of personal property of citizens in their income from work and in their savings, in their dwelling houses and auxiliary household economy, their domestic furniture and utensils and objects of personal use and comfort, as well as the right of inheritance of personal property of citizens, are protected by law The constitution recognizes the right of all citizens to work, rest, leisure, education, health protection, housing, maintenance in old age. sickness or incapacity, without distinction of sex race or nationality, and lays down that any direct or indirect restriction of the rights of, or conversely, the establishment of direct or indirect privileges for, citizens on account of their race, or nationality, as well as the advocacy of racial or national exclusiveness, or hatred or contempt, is punishable by law. The franchise is enjoyed by all citizens of the USSR, including members of the Armed Forces, who have reached the age of 18, irrespective of sex, with the exception of the legally certified insane. Candidates for election to the Supreme Soviet of the USSR must be 21 years of age, for all other authorities the minimum age for candidates is 18. A member of any Soviet may be recalled by a decision of a majority of his or her electors if he or she fails to give satisfaction (law on procedure for this, 30 Oct. 1959)

The USSR consists of 15 Union Republics, each inhabited by a major nationality which gives its name to the republic. These are divided into 129 territories and regions, and these again into 3,211 districts and 2,152 towns and 3,968 urban settlements (1 Jan 1985). Within the villages there are 42,176 rural districts (usually each including a number of villages). The territories and regions also include a number of smaller nationalities, forming their own self-governing units-20 Autonomous Soviet Socialist Republics, 8 Autonomous Regions and 10 Autonomous Areas.

The highest legislative organ is the Supreme Soviet of the USSR It consists of two chambers with equal legislative rights, elected for a term of 5 years the Council of the Union and the Council of Nationalities Each has 750 members. The present Supreme Soviet, the 'Eleventh Convocation', was elected on 4 March 1984.

The Council of the Union is elected by the citizens of the USSR on the basis of constituencies with equal populations (approximately I deputy for every 360,000 population) Its Chairman (elected 1984) is L. N. Tolkunov. The Council of Nationalities is elected by the citizens of the USSR on the basis of national-territorial areas (32 deputies from each Union Republic, 11 from each Autonomous Republic, 5 from each Autonomous Region and 1 from each Autonomous Area). Its Chairman (elected 1984) is A. E. Voss. Plenary sessions of the Supreme Soviet are normally held twice a year for two or three days at a time.

Each chamber elects 17 standing commissions mandates, legislative proposals, foreign affairs; planning and budget, industry, power engineering; transport and communications, construction and the building materials industry, agro-industrial complex, science and technology, consumer goods and services, housing and municipal services, health and social security, education and culture, women's work and social conditions and the protection of motherhood and childhood, youth affairs, and conservation and the rational use of natural resources Membership of the commissions presently embraces 1,210 deputies (80 7% of the total)

Deputies are elected by the voters on the basis of universal, equal and direct suffrage by secret ballot. The only legal political party is the Communist Party of the Soviet Union, non-members are classed as non-party citizens. Candidates are selected at preliminary 'constituency electoral consultation' meetings (selection conferences), to which organizations which have put forward nominations send delegates, who discuss the various nominees. As a consequence, to date, a single candidate has been agreed upon in each constituency, whose name appears on the ballot paper to be endorsed (by non-deletion) or struck out as the voter desires. These procedures are governed by the Law on Elections to the Supreme Soviet of the USSR, adopted in April 1978. At the election on 4 March 1984, 184,006,373 electors voted (99.99% of the total), the vote in favour of the single list of candidates was 99.94% and 99.95% in each of the two chambers. The Supreme Soviet

elected on that day consists of 1,071 Communist and 428 non-party deputies, 492 are women, 527 manual workers in industry and state farms, and 242 collective farmers

The highest executive and administrative body of state authority in the USSR is the Council of Ministers of the USSR, which is appointed by the USSR Supreme Soviet at a joint sitting of the two chambers. It consists of a Chairman (in effect the Soviet Prime Minister), First Vice-Chairmen and Vice-Chairmen, Ministers of the USSR, and Chairmen of State Committees of the USSR. Chairmen of the Councils of Ministers of the Union Republics are ex officio members of the USSR Council of Ministers. The Council of Ministers of the USSR had more than 100 members in 1986, and day-to-day co-ordination of governmental matters is accordingly delegated to a smaller body, the Presidium of the Council of Ministers, which meets approximately every week. The Council of Ministers is responsible and accountable to the Supreme Soviet and is required to report regularly to the Supreme Soviet upon its work. Between sessions of the Supreme Soviet the Council of Ministers is responsible to the Presidium of the USSR Supreme Soviet

The Presidium of the Supreme Soviet of the USSR is elected from among the deputies at a joint session of both chambers of the Supreme Soviet. It consists of a chairman (in effect the President of the USSR), a first vice-chairman, 15 vice-chairmen (I from each Union Republic), 21 members and a secretary (39 members in all) The Presidium acts as the supreme state authority between sessions of the Supreme Soviet and is accountable to it for all its actions. The Presidium convenes sessions of the Supreme Soviet and co-ordinates the work of its standing commissions, it interprets the law of the USSR and ratifies and denounces international treaties, it confers medals, orders and other distinctions, it decides matters such as citizenship, amnesties, pardons, martial law and states of emergency, and it appoints the high command of the Soviet Armed forces and Soviet diplomatic representatives. It is empowered to adopt decrees (ukazy) and resolutions (postanovleniva).

Soon after the adoption of the 1936 Constitution all the constituent republics of the Union held their Soviet congresses, at which they adopted their own constitutions based in all essentials upon the Constitution of the Union but adapted where necessary to local requirements. In April 1978 the Supreme Soviets of the Union Republics similarly adopted new republican constitutions based upon the new Constitution of the USSR approved by the Supreme Soviet in Oct. 1977. Article 73 of the 1977 Constitution of the USSR reserves to the central government the spheres of war and peace, diplomatic relations, defence, foreign trade, state security, economic planning, education, the basic principles of legislation, and other matters of 'all-Union significance'. The right of the constituent republics to withdraw from the Union is, however, formally recognized in Article 72. Union Republics have their own Supreme Soviets, Presidiums and Councils of Ministers, and exercise a wide range of devolved powers in local matters.

There are 20 Autonomous Republics in the USSR, which are similarly governed by their own Supreme Soviets, Presidiums and Councils of Ministers exercising devolved powers over local matters. Most (16) are in the RSFSR, 2 are in Georgia and 1 each in Azerbaijan and Uzbekistan. Five Autonomous Regions are in the RSFSR, 1 each in Azerbaijan, Georgia, and Tadzhikistan. All 10 Autonomous Areas are in the RSFSR. Elections are held every five years to the Supreme Soviets of Union and Autonomous Republics. At the most recent elections (Feb 1985), 10,190 deputies were elected, 3,830 (37 6%) were women, 3,495 (34 3%) were non-Party, 3,605 (35 4%) were industrial workers and 1,557 (15 3%) were collective farmers

Regions and territories, districts, towns and rural areas are similarly governed by their own Soviets, elected for a term of 2½ years. At the most recent elections (Feb 1985), 2,304,830 deputies were elected to these Soviets; 1,159,582 (50 3%) were women, 1,317,220 (57 2%) were non-Party, 1,024,675 (44 5%) were industrial workers and 571,450 (24 8%) were collective farmers. On 1 Jan. 1985 there were 53,312 rural and urban Soviets in the USSR with 2.3m deputies and over 30m voluntary co-opted members participating in the work of their standing committees.

Communist Party of the Soviet Union. According to the revised rules adopted by the 27th Congress of the Party in March 1986, the Communist Party of the Soviet Union 'unites, on a voluntary basis, the more advanced, politically more conscious section of the working class, collective-farm peasantry and intelligentsia of the USSR', and represents the 'highest form of socio-political organization, the nucleus of the political system and the leading and guiding force of Soviet society' According to the Party Programme, adopted in a revised version in 1986, the party aims to achieve the 'planned and all-round perfection of socialism', 'further advance to communism through the country's accelerated socio-economic development', and 'peace and social progress'

The Party is built on the territorial-industrial principle. The supreme organ is the Party Congress. Ordinary congresses are convened not less than every 5 years. The Congress elects a Central Committee which meets at least every 6 months, carries on the work of the Party between congresses, and guides the work of central

Soviet and public organizations through Party groups within them

The Central Committee forms a Political Bureau (Polithuro) to direct the work of the Central Committee between plenary meetings, a Secretariat to direct current work and a Party Control Committee to deal with disciplinary matters, it also elects the General Secretary Similar rules hold for the regional, territorial and republican levels of the party organization. The 'basis of the Party', the primary Party organization, exists in factories, state and collective farms, units of the Soviet Army and Navy, in villages, offices, educational establishments etc. where there are at least 3 Party members. There were over 425,000 primary Party organizations in 1986.

The Central Committee elected by the 27th Congress in March 1986 consisted of 308 members and 170 candidate (non-voting) members. Of these 39 6% were drawn from the central and regional party apparatus, and 5 7% were workers or

peasants

In March 1986 the Politburo of the Central Committee consisted of the following members. M. S. Gorbachev, G. A. Aliev, V. M. Chebrikov, A. A. Gromyko, D. A. Kunaev, E. K. Ligachev, N. I. Ryzhkov, V. V. Shcherbitsky, E. A. Shevardnadze, M. S. Solomentsev, V. I. Vorotnikov and L. N. Zaikov and the following candidate (non-voting) members. P. N. Demichev, V. I. Dolgikh, B. N. El'tsin, S. L. Sokolov, N. N. Slyunkov, Yu. F. Solov'ev, N. V. Talyzin.

Zimyanin Chairman of the Party Control Committee M S. Solomentsev Chairman of the Central Auditing Commission G. F. Sizov.

In Jan 1984 the Communist Party had 18,443,521 members (about 9 3% of the adult population) Of these, 44 4% were classified as workers, 12 2% as collective farmers and 43 4% as office workers, 27 9% were women, and 59 7% were Russians. The party's youth wing, the Komsomol (All-Union Leninist Communist Union of Youth), had 42 0m members in 1984 In Dec 1982, V M Mishin was elected First Secretary of its Central Committee

DEFENCE. On 25 Feb 1946 the control of the Soviet Armed Forces was unified under a single Ministry of the Armed Forces On 25 Feb 1950 the Defence Ministry was divided into a War Ministry and a Navy Ministry, on 15 March 1953 a single Ministry of Defence was reconstituted In 1955 the Air Defence Command and in 1960 the Strategic Rocket Forces were established as the 4th and 5th 'branches' of the armed forces beside the army, navy and air force Overall supervision of defence and security matters is exercised by the Defence Council of the USSR, headed by the General Secretary of the CPSU

The direction of Party and political work in the Armed Forces is exercised by the Central Committee of the Communist Party of the Soviet Union through the chief political directorate of the Ministry of Defence. The chiefs of the political departments of military commands, fleets and armies must be Party members of 5 years' standing and the chiefs of political departments of divisions and regiments Party members of 3 years' standing. About 90% of the officers are members of the Communist Party or Young Communist League, and 50% have had an engineering and technical education.

Military service begins at the age of 19 (or 18 for graduates of secondary schools) Active service lasts 2 years for privates in the Army and M V D troops, 3 years for n c o.s in the Army and M V D troops and for privates and n c o s in the Air Force, 4 years for privates and n c o.s in the Coastal Defence, 5 years for ratings in the Navy Reserve service lasts up to the ages of 35, 45 or 50 years according to fitness, family status and other considerations. Conscientious objection is treated as a criminal offence Students in places of higher education are freed from military service, but receive military instruction About half the service personnel have had higher, or 10-year, education and over 80% are members of the Communist Party

Total strength of the armed forces was over 5m. in 1985, with a probable 25m

reserves and a further 500,000 in paramilitary forces.

The estimated expenditure on defence (in 1m rubles) for 1961 was 9,255, 1970, 17,900, 1980, 17,100, 1985, 19,063

Army. The Army is thought to consist of 51 tank, 141 motor rifle, 7 airborne and 16 artillery divisions; 8 air assault brigades, and various independent tank, artillery, missile and engineer units Equipment includes some 35,000 T-54/-55/-62, 9,300 T-64 and 9,800 T-72/-80 main battle tanks Strength (1986) 1 9m (including 1 4m. conscripts)

There are 6 operational rocket armies deploying 1,398 intercontinental ballistic missiles (SS-11,-13,-17,-18,-19), capable of delivering 5,654 nuclear warheads yielding 4,352 megatons. Intermediate range ballistic missiles (SS-20) number 423 There are a further 120 medium range ballistic missiles, but these are being phased out. Personnel number 300,000, with reserves of 520,000

Navy. The Soviet Fleet is steadily expanding and progressively modernizing under a continuity of policy and technology. The overall picture is of an unprecedentedly powerful and well-balanced navy, the capacity of which is increasing annually by scientific application and numerical strength.

There are also 14 other missile-armed light-cruiser size leaders, 57 missile-armed destroyers, 37 gun-armed destroyers, (including 13 in reserve), 32 missile-armed frigates, 48 gun-armed frigates, 3 ocean minelayers, 87 missile-armed

The new construction programme includes another aircraft carrier, considerably larger and nuclear-powered, 4 very large nuclear powered ballistic missile submarines, 2 nuclear powered cruise missile submarines, 6 nuclear powered torpedo-armed submarines, 3 diesel-electric propelled patrol submarines, a third nuclear powered guided missile armed battle cruiser, 10 guided missile cruisers and large anti-submarine leaders, 3 frigates and 4 corvettes

In the progressive forward procurement programme more conventionally propelled aircraft carriers of improved 'follow-on' class are envisaged, together with nuclear powered surface ships, conventionally propelled submarines and specialized support ships, to fit into the Soviet global and strategic maritime pattern

There are 5 shipyards in and near Leningrad, Black Sea yards are at Nikolaiev and Sevastopol, new shipyards are at Molotovsk in the White Sea region and at Komsomolsk on the Amur

The completion of a through canal system between the Baltic and White Seas, allowing regular traffic via the North-East Passage (during the ice-free season), facilitates the navigation of suitable ships between the Baltic and Far East

Estimated number of personnel in 1986 totalled 500,000, including naval aviation, naval infantry, coastal defence, cadets and apprentices (but excluding 75,000 civilians in administration and new construction). Some 25% of naval personnel are volunteers, ie, officers and petty officers, the remainder comprising national service men serving 3 years at sea and 2 if ashoie.

Air Force. The Soviet Air Force (excluding the strategic bomber force and Voyska PVO air defence force) was believed to have a personnel strength, in 1985, of over 315,000 officers and men. To supplement long-range rocket missiles (estimated at 1.398 emplaced ICBM, 600 MRBM/IRBM), the strategic bomber force has still about 105 Tupolev Tu-95 ('Bear')¹ 4-turboprop bombers, 70 Myasishchev M-4 4-jet bombers and flight-refuelling tankers ('Bison'), 500 twin-jet Tupolev Tu-16 ('Badger'), and 135 supersonic Tupolev Tu-22 ('Blinder') bombers, ECM and reconnaissance aircraft, and at least 150 Tupolev ('Backfire') swing-wing bombers All types are used also by the Naval Air Force for long-range maritime reconnaissance; the Tu-16, Tu-95, Tu-22 and 'Backfire' can carry air-to-surface guided self-propelled cruise missiles and all 5 types have provision for flight refuelling A new swing-wing strategic bomber ('Blackjack'), larger and faster than the American B-1, is being flight tested.

The tactical air forces, under local army command in the field, have an estimated total of 6,000 ground attack, air combat, ECM and reconnaissance aircraft, including 2,400 MiG-23/27 ('Flogger') and 600 two-seat Sukhoi Su-24 ('Fencer') supersonic swing-wing aircraft, 150 twin-jet Yakovlev Yak-28 ('Brewer') reconnaissance aircraft, 800 swing-wing Su-17 ('Fitter-C/D/G/H/J'), and 600 MiG-21 ('Fishbed') fighter-bombers, 600 Su-15 ('Flagon'), 200 MiG-25 ('Foxbat') and some MiG-31 ('Foxhound') interceptors, and an increasing number of new Su-25 ('Frogfoot') twin-engined ground attack aircraft supported by 125 MiG-21 and 170 MiG-25 ('Foxbat') reconnaissance aircraft, and 3,500 helicopters, including very large

<sup>&</sup>lt;sup>1</sup> For convenience Soviet aircraft and missiles are usually referred to by invented English names in non-Soviet inilitary writings

M<sub>1</sub>-26 ('Halo') transports and up to 1,000 heavily-armed M<sub>1</sub>-24 ('Hind') assault helicopters, in gunship/transport versions Electronic warfare duties are performed by a variety of aircraft, including Yak-28s and Mi-8 and Mi-17 helicopters. The Voyska PVO defence forces, organized as a separate service, have an estimated total of 1,250 jet interceptors A high proportion of the squadrons are equipped with MiG-23 ('Flogger'), Su-15 ('Flagon'), MiG-25 ('Foxbat') and improved MiG-31 ('Foxhound') all-weather interceptors, armed with air-to-air missiles. The twin-jet Yak-28P ('Firebar') and Tu-28P ('Fiddler') make up the balance of the force Early warning and fighter-control duties are performed by about 10 radarcarrying adaptations of the Tu-114 turboprop transport, redesignated Tu-126 ('Moss'), these are to be replaced by a more effective radar-equipped AWACS version ('Mainstay') of the II-76 transport. Aircraft which have entered service in 1984/85 include the Su-27 ('Flanker') and MiG-29 ('Fulcann') counter-air fighters, each with potential attack capability. Very large numbers of surface-to-air guided missiles are operational, on some 10,000 launchers, including the new highperformance SA-10 (low-altitude) and SA-12 (high-altitude) with capability against cruise and submarine-launched missiles respectively, the older 'Guild', 'Guideline', 'Goa', 'Gainful' and 'Ganef', the long-range 'Gammon' and the 'Galosh' which is deployed around Moscow on 32 launchers and has anti-missile

Soviet Air Force transport squadrons have 400 An-12 ('Cub') 4-turboprop transports and 50 An-24s ('Coke') and An-26s ('Curl'), with 50 An-22s ('Cock'), and 250 Il-76 ('Candid') heavy four-jet freighters. The very large four-jet An-124 ('Condor') is under development to replace the An-22. Training aircraft include the piston-engined Yak-18 primary trainer, the Czech-built L-29 Delfin and L-39 jet basic trainers and versions of operational types such as MiG-21, MiG-23, MiG-25, MiG-15, Su-7, Su-15, Su-17, Yak-28 and Tu-22

Naval Air Force. Operating 1,100 fixed-wing aircraft and helicopters, the Soviet Navy has the world's second largest naval air arm Under the control of the various naval commands, ie, Baltic, Black Sea and Pacific, the Naval Air Arm has an estimated 220 Tu-16 ('Badger') twin-jet bombers, and 100 'Backfire' swing-wing bombers, able to carry air-to-surface missiles, 40 supersonic twin-jet Tu-22 ('Blinder') mantime reconnaissance aircraft, a small number of Su-17 ('Fitter') shore-based fighters, and 80 Beriev M-12 ('Mail') maritime patrol amphibians. For reconnaissance, anti-submarine and electronic warfare there are about 100 Tu-142 ('Bear') 4-engined bombers, 90 Tu-16s, and a few Tu-22s, plus a small number of II-20s ('Coot-A') and 60 II-38s ('May') The Tu-142 also has an important targeting rôle for ships fitted with anti-shipping missile launchers. Over 250 anti-submaring and missile targeting/guidance helicopters, notably the Ka-27 ('Helix') and Ka-25 ('Hormone'), are carried in naval vessels, including 3 aircraft carriers (which also operate Yak-36 ('Forger') VTOL attack/reconnaissance aircraft) and 2 helicopter carriers. Several hundred transport, flight refuelling tanker ('Badger'), utility and training fixed-wing aircraft and Mi-14 ('Haze') shore-based ASW helicopters are also under Navy control

#### **ECONOMY**

Planning. Planning is based on public ownership in industry and trade, and on mixed public and collective (co-operative) ownership in agriculture. The first plandrawn up by Gosplan (the State Planning Commission) was the 'Goelro' drawn up in 1920. This was to be the basis for the economic development of the country and

for the construction of a system of electrical power plants with an aggregate capacity of 1 75m km, in the course of 15 years

For details of Planning 1925–1942 see The Statesman's Year-Book, 1981–82 p. 1226

For details of the fourth 5-year plan, 1946-50, see The Statesman's Yfar-Book, 1952, pp 1424 f The 1950 target of the gross output of industry was exceeded by 2%

On 10 Oct 1952 the 19th Congress of the Communist Party issued directives for the fifth 5-year plan, 1951-55, for details, see Thi Statesman's Year-Book, 1953, pp 1435-36 During Sept and Oct 1953 the Government issued a number of decrees to stimulate the development of agriculture, the output of consumer goods and the expansion of the home trade For details of these decrees, see The Statesman's Year-Book, 1955, pp 1448-50

The directives for the sixth 5-year plan, 1956-60, were adopted by the 20th Congress of the Communist Party on 25 Feb 1956, for details see The Statesman's Year-Book, 1958, p. 1472

In May 1955 Gosplan was reorganized to consist of 2 state commissions for longterm planning (Gosplan) and for current planning (Gosekonomkomissiya), at the same time a committee was set up to improve the application to industry of advanced science and technology (Gostekhnika)

Between 1954 and 1956 considerable changes were made in planning methods. In March 1954 collective farms were given greater authority over planning their own output, only the quantities required by the State in fixed deliveries being determined beforehand, and voluntary sales by contract. In 1955 they were authorized to make changes in their statutes, which had followed a fixed model since 1935. In 1955-57 over 15,000 industrial establishments in various basic industries, previously controlled by the Union Government, and later a number of entire light industries were turned over to the constituent (Union) Republics. By 1962 they controlled from 95 to 100% of all industrial output.

In 1957 a comprehensive plan for decentralization of management of industry was initiated. Industrial establishments responsible for about 71% of all Soviet industrial output were turned over to Economic Councils set up in 104 (in 1963-47) economic administrative areas. These in 1962 controlled 73% of all industrial production. The Ministries previously responsible for the industries concerned were either abolished or transformed into purely planning and supervisory bodies. The State Committee for current planning was abolished, and Gosplan was given wider powers.

In consequence of this change a 7-year plan for 1959-65 was adopted by the 21st Congress of the Communist Party in Feb 1959 Industrial output was to increase by 80%, it was in fact, in 1965, 84% above that of 1959 Capital investments would roughly equal the total for 1917-58 special attention was to be given to mechanization of agriculture and arduous industrial labour, automation and new technological processes, and housing Diesel or electric traction of railway freight was to rise to 85% Real incomes were to rise 40%, the 7-hour day (6 hours for miners) became general in 1960 and the 40-hour week in 1961, and introduction of the 35-hour week (30 hours for miners) began in 1964.

In Oct 1965 the regional and Republic Economic Councils were abolished and also 28 Ministries for various branches of industry (17 Union-Republican,  $\iota e$ , corresponding to similar Ministries in the Union Republics, and 11 all-Union).

A 20-year plan was adopted by the 22nd Congress of the Communist Party on 31 Oct 1961, which envisaged a ninefold growth in electricity output and big increases in production of steel, oil, coal, machinery and cement, and also in grain, milk and meat. Two new iron and steel centres were to be developed in Kazakhstan and in Kursk region. A single deepwater system was to link the main inland waterways in the European USSR. Some rivers in northern Asia were to be diverted south for irrigation purposes. A 6-hour day for a 6-day week or 35 hours for a 5-day week were to be achieved by 1970. Housing, water, gas, heating, public urban transport and school meals were to be free by 1980. These and cognate measures were to provide 'the material and technical basis of communism'.

The 23rd Congress of the Communist Party in April 1966 adopted directives for a 5-year plan for 1966-70 Under these, power output was to reach 830,000-850,000m. kwh.; oil, 345-355m tons; coal, 665-675m. tons, steel, 124-129m. tons; mineral fertilizers, 62-65m tons, machine-tools, 220,000-230,000, cars, 700,000-800,000, tractors, 600,000-625,000, paper, 5-5·3m. tons, cement, 100-105m. tons, fabrics,  $9\cdot5-9$  8m. sq metres; leather footwear, 610-630m. pairs, meat, 5 9-6 2m. tons, butter, 1 2m tons, sugar, 9 8-10m tons The average annual output of grain was to increase by 30%; 7,000 km of new railway line, 63,000 km of new motor roads and 35-40 new airports were to be built; and marine tonnage was to be increased by 50%.

The 9th Five-Year Plan adopted in 1971 provided for an increase in electric power output to 1,065,000m kwh; oil to 496m tons, gas, 320,000m cu metres, steel, 146m. tons, coal, 695m. tons, mineral fertilizers, 90m. tons; tractors, 575,000; passenger cars, 1 26m, and lorries, 750,000 Grain output was to rise to 195m. tons in 1975, meat, approximately 16m tons, milk, 100m tons, textiles, 11,000m sq. metres, leather footwear, 830m pairs Average wages were to increase by 22%, incomes of collective farmers 30-35%, and the average of real incomes by 31% 3,400 miles of new railway tracks were to be built and 3,700 miles electrified, with 17,000 miles of new oil pipelines, and 40% more cargo carried by sea. Over 16m, flats and houses were to be built.

By July 1972, 43,000 industrial plants had been transferred to the new system of decentralized cost-accounting; they produced 94% of total output of Soviet industry and 95% of its total profit. All public establishments in trade and catering and all the state farms have gone over to the new system.

On 29 Oct. 1976, the Supreme Soviet adopted the 10th Five-Year Plan (1976–80). This provided for an increase of industrial output from 104 3% of the 1975 level to 136%, an average annual increase of agricultural output by 16%, freight traffic (all forms) from 105 7% to 132%, state capital investments from 105 1% of the 1975 level in 1976 to 114.6% in 1980, real income per head from 103 7% to 121%, retail commodity turnover from 103 6% to 128.7% 550m sq metres of new housing were to be built Children in pre-school establishments would increase by 104 4% in 1976 and 125 5% in 1980, pupils in day schools from 108 9% to 148 8%, and students in higher education from 100 4% to 105 4%. Hospital beds were to increase from 102 2% in the first year to 109 7% in the final year.

The 11th Five-Year Plan, adopted in 1981, aimed to raise living standards. The focus was Siberia and the Soviet Far East, with their large resources of energy and raw materials, and also Central Asia, with its favourable combination of labour resources and raw materials. Virtually no industries were to be developed in the European part of the USSR and the plan envisages speeding up the development of labour-intensive branches of agriculture, consumer goods and engineering industries in Central Asia. National income (in the Soviet definition) was to increase by 18% between 1981 and 1985, industrial production was to increase by 26%, capital investment by 5.4%, freight traffic by 19.4%, real incomes by 16.5%, agricultural production by 13%, and retail trade in the state and co-operative sectors by 23% over the same period. Pensions were to be raised and the minimum wage was to be increased to 80 rubles a month, and efforts were to be made to increase state assistance to families with young children and to improve the food and care given to them in schools and pre-school institutions.

The 12th Five-Year Plan, adopted in 1986, also places its main emphasis upon raising popular living and cultural standards. This in turn is held to require an acceleration of socio-economic development and an intensification and increase in the effectiveness of production on the basis of scientific-technical progress. The plan covers the period 1986-90 and up to the year 2,000, by which time real living standards are planned to increase by 1 6 to 1 8 times, manual labour should account for no more than 15-20% of all productive work, state and co-operative retail trade should increase by 1 8 times; and health, educational and other social expenditure should double. Over the same period the national income should approximately double and industrial production more than double entirely as a

result of increased productivity, which is planned to increase by 2.3-2.5 times. Greater economy is to be achieved in the use of energy and natural resources, investment is to be concentrated in priority areas; and scientific-technical progress is to be accelerated and related more closely to production. Continued emphasis is placed upon the Energy Programme, the Food Programme and the Complex Programme for the Development of Consumer Goods and Services, which were adopted between 1982 and 1985. In the 5-year period 1986-90 national income is to increase by 19-22%, industrial production by 21-24%, labour productivity by 20-23%, and real incomes by 13-15%

1 Estimate

The 1986 budget allotted 235,713m rubles to the national economy, 19,063m to defence and 131,909m to social and cultural services

The social insurance budget, which is controlled by the Central Council for Trade Unions and its affiliated bodies, was 29,476m, rubles in 1977, 31,179m in 1978, 33,089m, in 1979, 35,296 in 1980 and 46,416m in 1984.

The national income was assessed (in 1,000m rubles) at 145 0 in 1960, 289 9 in 1970, 305 in 1971, 313 6 in 1972, 337 8 in 1973, 354 in 1974, 440 6 in 1979, 462 2 in 1980, 523 4 in 1982 and 569 6 in 1984

Income tax was abolished on 1 Oct 1961 for earnings up to 60 rubles per month and reduced for earnings between 61 and 70 rubles, in Dec 1967 further cuts of 25% were made for earnings from 61 to 80 rubles, in 1972 earnings up to 70 rubles were freed of income tax, and taxes on incomes up to 90 rubles were cut by about 331/4% Capital investment (1984) was 173,600m rubles, including 156,600m by State and co-operative enterprises, 14,500m by collective farms and 2,500m by individuals (on housing)

Currency. As from 1 Jan 1961 the gold content of the *ruble* was raised from 0 222 168 to 0 987 412 gramme The official exchange rates (March 1986) 1 06 rubles = £1,0 72 rubles = US\$1

The gold holdings of the USSR were, in Dec 1955, estimated at about 200m fine oz (US\$7,000m), or about 20% of the world total of monetary gold

The currency in circulation is. (1) State Bank notes in denominations of 10, 25, 50 and 100 rubles, (2) Treasury notes in denominations of 1, 3 and 5 rubles, (3) cupro-nickel coins in denominations of 10, 15, 20 and 50 kopeks and 1 ruble, (4) cupro-zinc coins in denominations of 1, 2, 3 and 5 kopeks

Banking. The State Bank began operations on 16 Nov 1921. By an edict of 7 April 1959 a number of specialized banks for planned long-term investments, which had existed since 1932, were abolished The State Bank, in addition to short-term credits, effects long-term investments in agriculture and in individual rural house building. The Bank for Financing Capital Investments (Stroibank) covers industry, transport, urban housing schemes and public utilities and individual house-building in towns

Deposits in 78,900 savings banks were over 202,100m. rubles to the credit of 164 7m depositors at 1 Jan. 1986

Weights and Measures. The metric system has been in use since 1 Jan. 1927. The Gregorian Calendar was adopted as from 14 Feb 1918

#### **ENERGY AND NATURAL RESOURCES**

Electricity. There were (1983) 57 fuel-burning power stations of over 1m kw.

capacity, and these account for over 80% of the country's electricity.

Hydro-electric stations have been constructed on major rivers. Among them are the Bratsk (4.5m. kw.), completed in 1967 — until recently the world's largest, Ust-Ilimsk, Central Siberia (3.6m. kw.), Krasnoyarsk (6m. kw.) and a 1 26m kw station on the River Pechora (Far North). The Sayano-Shushenskaya hydro-power station, part of the Yenisei chain, and already in part operation, will have a 6 4m kw capacity when completed in 1983. A 245m high dam has to be built before completion, in a gorge in the Sayan Range. Another large hydro-electric station is under construction on the River Kureika, Siberia, to provide energy for the mining and metallurgical centre at Norilsk in the Arctic

Total installed capacity of power stations in 1938 was 8 7m. kw and 303 7m kw. in 1984. Industry consumes about 70% of the total electricity Over 35,000 small rural power stations have been closed in recent years owing to supply from State stations becoming available, but there are still many operating in the countryside. 800 towns and urban settlements were heated by central thermal

plants

The world's first commercial nuclear power station in Obninsk, built in 1954, was followed by the Beloyarsk, Novo-Voronezh, Leningrad, Kursk, Chernobyl, Armenian and Shevchenko nuclear stations Soviet nuclear power plants so far have standard slow 1m kw reactors, but a 15m kw reactor has now been designed. A fast reactor is functioning at Shevchenko.

The general design for a nuclear thermal station has been developed, and practical experience in this field has been obtained at the Bilibino nuclear power station in the Arctic, which supplies electricity and heat to the inhabitants on the Chukchi

Peninsula.

In 1979 a 500,000 kw MHD pilot project was started in Ryazan. This first-generation MHD station will have an efficiency of 50% as against 40% in the best thermal power stations and will consume about 20% less fuel. An experimental tidal energy station is working at Kislaya Guba (Murman coast)

Total electricity output in 1984 was 1,492,075 kwh

The country's integrated power grid is now in operation, covering over 900 power stations, which are handled by a central control panel in Moscow through (in 1983) 852,600 km of cable of 35 kw or greater capacity A unified power grid ('Mir') with all the Socialist countries of eastern Europe was built up between 1962 and 1967

Oil. In the 1930s practically all Soviet oil came from the Caucasian fields, of which the Baku fields yielded 75-80% and the Grozny and Maikop fields between them 15% Since then, the distribution has considerably changed The Ural-Volga area, the 'Second Baku', has 4 large centres in operation, at Samarska Luka (Kuibyshev), Tuimazy (Bashkiria), Ishimbaev (Bashkiria) and Perm, producing nearly 100m tonnes annually

A large new oilfield has been developed in the Trans-Volga area of the Saratov region. The Tyumen (West Siberian) complex now accounts for over 50% of the

USSR's oil output In 1985 the USSR extracted 595 5m tonnes of oil

The total length of pipeline on 1 Jan 1939 was 4,212 km, divided as follows Baku-Batumi, 1,717 km, Grozny-Makhachkala, 150 km, Grozny-Armavir-Tuapse, 618 km; Armavir-Trudovaya, 488 km, Guriev-Orsk, 845 km, and other, 394 km. One pipeline (1,700 km) was completed in 1955, connecting Tuimazy in Bashkiria with the refineries of Omsk. In 1957 the Almetyevsk-Gorky pipeline (580 km) and 479 km of the Stavropol-Moscow pipeline were completed At the end of 1981 there were 70,800 km of pipeline, through which (in 1981) were conveyed 637.7m. tonnes of oil.

The construction of the 'Druzhba' pipeline of about 5,327 km from the oilfields near Kuibyshev to Poland and the German Democratic Republic (northern branch) and to Czechoslovakia and Hungary (southern branch)-separating in Belorussia-begun in 1960, was completed in 1965. Now a double line, it has an

annual throughput of 50m tonnes.

In 1976 the USSR exported 148 5m. tonnes of crude oil and oil products

Meyerhoff, A A, The Oil and Gas Potential of the Soviet Far East Beaconsfield, 1981

Gas. A natural-gas pipeline from Gazli, near Khiva, to Voskresensk, near Moscow (2,750 km), with a planned capacity of 100m cumetres per day, began operating in Oct 1967 Since then it has been extended to Czechoslovakia, where a 1,000 km extension, for transmission of Soviet gas to Austria, Italy and German Democratic Republic and Federal Republic of Germany, is under construction and another to Bulgaria. Another natural-gas pipeline, over 3,000 km from Medvezhye (Tyumen Region) to Moscow, began operating in Oct 1974. A second pipeline from this region, linking the Urengoi deposit with Petrovsky in the Central European area of the USSR, became operational in 1980, and is to be continued to the southern Ukraine, to a total length of 3,000 km. A gas pipeline starting from Orenburg (Urals), passing across the Volga at Kamyshin, and continuing across the Ukraine via Kremenchug and Vinnitsa to Czechoslovakia (2,750 km), reached the Soviet frontier in Jan 1979 When completed, it is to supply Czechoslovakia, Poland, Bulgaria and Hungary with 14,000m cumetres annually and Romania with 1,500m A unified gas-grid exceeding 124,000 km now exists

By Dec 1981 construction work had begun on the 5,000 km Urengoi (West Siberia)-Uzhgorod-West Europe gas pipeline

In 1985, 643,000m cu metres of gas were produced (in 1940, 3,200 m, in 1970, 197,900m)

Minerals. Mining experts are trained in 6 mining, 3 oil and 1 peat institutes, the mining faculties of 17 higher educational establishments, oil faculties of 2 industrial institutes and a peat faculty at the Belorussian Polytechnical Institute

The Soviet Union is rich in minerals. Soviet scientists claim that it contains 58% of the world's coal deposits, 58 7% of its oil, 41% of its iron ore, 76 7% of its apatite, 25% of all timber land, 88% of its manganese, 54% of its potassium salts and nearly one-third of its phosphates

Estimated output (in tonnes) in 1962 Copper, 634,900; zinc, 399,000, lead, 363,000, tungsten, 10,500, antimony, 5,980, silver, 27m fine oz Output in 1963 Barvte, 199,500; magnesium, 31,745; aluminium, 961,400, manganese ore (1977), 8 6m, graphite, 54,000, bauxite, 4 3m; asbestos, 1 3m.; phosphate rock, 3 7m (plus 7 4m apatite), chromite, 1 23m, gold, 12 5m fine oz.; molybdenum, 12 5m lb, cadmium (1956), 160

The main centre of the atomic ore industry is at Ust-Kamenogorsk in the Altai Mountains Uranium deposits are being worked near Taboshar (south-east of Tashkent), Andizhan (in the Tynya-Muyan Mountains), Slyudianka (near Lake Baikal), on the Kolyma River and in Southern Armenia.

Agriculture. The Soviet Union, up to about 1928 predominantly agricultural in character, has become an industrial-agricultural country. Of the gross social product, industry and transport accounted for 42·1% in 1913 and 66 5% in 1983, agriculture for 57·9% in 1913 and 15 9% in 1983. Of the total state land fund of 2,227 5m hectares, agricultural land in use in 1983 amounted to 1,051·9m., state forests and state reserves to 1,109 7m. hectares 20% of all gainfully employed in 1984 were engaged in agriculture and forestry (1913, 75%; 1940, 54%).

The total area under cultivation (including single-owner peasant farms, state farms and collective farms) was (in the same territory) 118 2m hectares in 1913, 150.6m. in 1940, 146 3m in 1950, 203m. in 1960, 206 7m. in 1970, 217 3 in 1980, and 212 6m. in 1984

Collective farms in 1983 possessed 98.6m hectares of cultivated land, of which 58 5m. were under crops of various kinds, state farms and other state agricultural undertakings possessed 114 3m hectares, of which 69 1m were under crops, manual and clerical workers held 4.2m hectares as allotments

In Nov 1969 the Third Congress of collective farmers adopted a new model constitution, considerably enlarging the planning powers of collective farms and making payments to their members a priority

Since 1969 conferences of collective farms have elected 2,417 district collective farm councils with 85,000 members, to study and co-ordinate local experience in methods and finance. Processing and other joint agricultural productive establishments in 1980 numbered 9,638

State procurements (after consumption by farms) were, in 1m tonnes, for the present area of the USSR

Since 1954 grain crops have been measured in 'barn crop' (ie, net quantities delivered to barns) and not in 'gross harvest' or 'biological yield' (ie, calculated as growing crops) as previously Average annual crops (in 1m tonnes) 1909–13, 72 5, 1946–50, 64.8; 1951–55, 88 5, 1956–60, 121 5, 1961–65, 130 3, 1966–70, 167 5; 1971–75, 181 6, 1976–80, 205, 1980, 189 1, 1985 (Western estimate), 190

Other produce (in 1m tonnes) in 1984 Milk, 97 6, sugar-beet, 85 3, potatoes, 85 3, vegetables, 30 7, meat (slaughter weight), 16 7, raw cotton, 8 6, sunflower seed, 4 5; flax, 0 4, wool, 0 5, eggs, 76,000m

In Dec 1963 collective farms comprised 99 7% of all peasant holdings. In 1983 they produced 89% of all sugar-beet, cotton 66%, milk 37%, meat 30%, potatoes 21%, other vegetables 24%, eggs 7%, sunflower seed 74%, wool 30%

Between 1953 and 1 Jan 1985 the number of collective farms was reduced, mainly by amalgamation and partly by transformation into state farms, from 93,300 to 26,200, their cultivated area falling from 132m hectares to 92 0m. The number of state farms rose in the same period from 4,857 to 22,500, their cultivated area from 15 2m hectares to 109 3m.

By 1983 the main field work on state and collective farms and joint inter-farm enterprises (ploughing, sowing of grain, cotton and sugar-beet, and the harvesting of grain and silage crops) was fully mechanized, in 1982, 45% of potato harvesting was mechanized, 95% of sugar-beet pulling, and 50% of cotton-picking

Rural power stations in 1940 had a capacity of 47 5 h p, in 1982, 663 8m h p Energy consumption in 1982 was 28 3 h p per employee In 1982 agriculture consumed 120,506m kwh. of electric power

Investments in agriculture in 1983 were 27,400m rubles by the state and 13,200m, by collective farms. Total agricultural output in 1983 was valued at 135,200m, rubles.

In 1913 the total of irrigated land was 4m hectares, in 1953, 11m, in 1982, 18 6m. The total of land drained was 8 4m, hectares in 1956 and 17 5m in 1982. In 1975 nearly 85m, hectares were treated from the air against weed, pest and disease.

In 1913, 188,000 tonnes of mineral fertilizers were used, in 1950, 5 3m tonnes, and in 1981, 84m. On 1 Jan. 1985 there were 2 7m. tractors, 815,000 grain combine harvesters and 1 1m motorized ploughs in the countryside.

An All-Union Academy of Agricultural Sciences, founded in 1929, has regional branches in Siberia and Central Asia and 310 research institutes.

Forestry. Of the 791 6m hectares of forest land of the USSR, 772 2m, hectares is administered and worked by the State, the remainder, 19 4m, hectares in extent, is granted for use to the peasantry free of charge

The largest forest areas are 515m hectares in the Asiatic part of USSR, 51 4m along the northern seaboard, 25 4m in the Urals and 17 95m in the north-west

On 24 Oct 1948 a plan was published for planting crop-protecting forest belts, introducing crop rotation with grasses and building of ponds and water reservoirs in the steppe and forest-steppe areas of the European part of the USSR By the middle of 1952 some 2 6m hectares had been planted with shelter-belt trees and 13,500 ponds and reservoirs had been built. The planting of the shelter belts in the Kamyshin-Volgograd and Byelgorod-Don areas has in the main been completed. A Volga forest belt has been planted along 1,200 km of railway. Re-afforestation was carried out on 2 2m hectares of land in 1982.

#### INDUSTRY AND TRADE

Industry. The organization of industry in the USSR is based on state ownership and control, administered by a separate ministry for each large industry.

Under the successive 5-year plans, large-scale modern industrial works have been constructed, namely 1st, over 1,500, 2nd, 4,500; 3rd (up to June 1941), 3,000, wartime, 3,500 (apart from reconstruction of destroyed plants), 4th, 6,200, 5th, 3,200, 6th, 2,700, 7th (1959-65), 5,470, 8th (1966-70), 1,870, 9th (1971-75), 2,000, 10th (1976-80), 1,200

<sup>1</sup> Excluding collective farm production <sup>2</sup> Recalculated base

The process of industrial mechanization and the installation of automatic remote control is being pushed ahead. About 93% of Soviet pig-iron and 87% of the

steel is produced in fully automatic furnaces. All hydro-electric plants (in terms of capacity) are fully automatic. Coal production in open-cast mines has been completely mechanized, hydraulic mining is coming into general use. Coal-cutting and underground haulage was over 99% mechanized by the end of 1962 (loading on inclined seams 56%), peat-cutting, 100%, and loading, nearly 80%, timber-cutting, 98%, haulage to loading centres, 93%, and despatch, 97%

Since 1945 the cotton industry has expanded, especially in the Urals, Central Asia and Siberia Large mills have been built at Kamyshin, Kherson, Barnaul, Engels, Alma-Ata, Chernigov and Frunze

Trade Unions and Labour. Trade unions are organized on an industrial basis, all workers, whether manual or brain, in every branch of a given industry being eligible for membership of the same union Collective farmers may join trade unions.

Since 1933 the trade unions have carried out the functions of the former Labour Commissariat, they control and supervise the application of labour laws, introduce new labour laws for approval by the Government and administer social insurance and factory inspection. Social insurance is non-contributory. The All-Union Congress has met at irregular intervals; the 14th Congress met in 1968, the 15th in 1972 and the 18th in 1982.

In 1944 there were 176 unions This number was reduced by amalgamation of unions to 22 in 1958, but increased to 31 by 1986 Contributions range from 0 5 to 6% of wages. There are 173 regional and Republican Trades Councils Membership (1986) 137m.

Chairman, Central Council of Trade Unions S A Shalayev.

Industrial and clerical workers engaged (1984) in the whole national economy were 116.7m., 51% of them women, a further 12 6m. were engaged in collective-farm agriculture. The 7-hour day (6 hours for miners underground and other heavy trades) was generally in operation by the end of 1960. The average working week since 1970 has been 39 4 hours and the working day in industry 6 93 hours. The 5-day week (without reduction of total working hours) was introduced in 1967.

New 'Fundamentals of Labour Legislation', intended to codify and extend labour laws adopted in the last 40 years, were adopted by the Supreme Soviet in July 1970. They lay down, *inter alia*, the right to receive wages irrespective of the income of the enterprise concerned, the right to free vocational and advanced technical training, the right to form trade unions without state registration; the right of trade unions to participate in and supervise management and planning, labour legislation, safety regulation and housing, fixing of working conditions and wages, etc. Pensioners in Jan. 1985 numbered 54 8m, including 38 5m old age Average monthly wages in the state sector were 190 rubles in 1985.

Retail home trade takes three forms—state, co-operative and the free market, ie, sales by individual collective-farm members and by the collective farms of their surplus products, after having fulfilled their statutory deliveries and made their regular allocations to their members

In 1984 retail trade by the State, co-operatives and collective farms totalled 324,500m rubles, of this state and co-operative trade amounted to 316,000m rubles (in 1970, 159,400m and 155,200m rubles respectively) Employees in retail trade were 7 5m in 1983 (annual average), there were 699,900 retail trade outlets with a total floor area of 49 8m sq metres. The state retail price index (1970 = 100) was 108 in 1983. Trade by collective farm markets amounted to 8,300m rubles in 1983, this was 2 8% by value of all retail trade and 5 3% by value of all food sales.

Foreign trade is organized as a state monopoly Importation and exportation of goods are effected under licences issued by the Ministry for Foreign Trade and its respective departments in pursuance of a plan annually sanctioned by the Government The right of purchasing goods for importation, and that of selling Soviet exports abroad, is vested in trade delegations and representatives of the appropriate state corporations in foreign countries

There are 29 state import and export organizations, including chartering and tourist corporations (one, Vostokintorg, dealing with Mongolia, Sinkiang and Afghánistán) The Central Union of Consumers' Societies (Tsentrosoyuz) is also

authorized to conduct foreign trade operations

For foreign trade up to 1938 see The Statesman's Year-Book, 1951, p 1465 Foreign trade is in 1986 conducted with 145 foreign countries (in 1950, 45), and had by 1984 increased 48 times by value since 1950 Exports in 1984 were valued at 74,384m. rubles (42,106m.) to the socialist countries), and imports at 65,327m. rubles (38,220m from the socialist countries)

Soviet imports of machinery and equipment, between 1940 and 1984, rose from 32 4 to 36 6%, ores and concentrates fell from 26 6 to 8 3%, foodstuffs rose from 14 9 to 22 5% and manufactured consumer goods rose from 1 4 to 11 7% by value, exports of fuel and electricity increased from 13 2 to 54 4% and of machinery and equipment from 2 to 12 5% by value over the same period

Tourism. Pre-revolutionary Russia was never a country for any but the most hardy and better-off tourists, as the introductory pages of Baedeker's guide made clear. For her subjects, too, touring was no more inviting. Acute shortage of hotels and boarding-houses, poor roads, lack of ordinary services for visitors were among the least of their difficulties. These have not by any means been fully overcome: but very great efforts to meet them have been made. The first tourist organizations came into existence in 1885–90 in St Petersburg, Tiflis and Odessa; and in 1901 the Russian Society of Tourists was formed (about 5,000 members in 1914). Organized tourism in the Soviet period began in the early 1920s; the Russian Society of Tourists was revived, and other tourist organizations, notably 'Intourist' (founded 1929), were established. The development of tourism on a massive scale is however a development of the post-Second World War period.

Tourist facilities for Soviet and foreign citizens are presently made available under state, trade union and other auspices, all of which come ultimately under the supervision of the State Committee on Tourism which is attached to the USSR Council of Ministers. The number of hotels available to such tourists increased

from 222 in 1960 to 958 in 1983, with a total accommodation of 373,000 (in 1960, 36,000); the number of tourist bases, for the hire of equipment and shorter stays, increased to 6,959, with a total accommodation of 718,000. In 1983 these facilities were used by 26 5m and 3.6m tourists respectively (in 1970, 5m and 1.7m). A total of 45 4m citizens in 1983 made use of all forms of tourist accommodation, including sanatoria and boarding houses (in 1960, 6.7m, in 1970, 16.8m). In 1983 a further 195m, citizens took part in tourist excursions

Visitors to the USSR from foreign countries are catered for by 'Intourist' and its offices in foreign countries. In 1970, the USSR had 2,059,338 foreign visitors (43,490 from the UK, and 66,365 from the USA), in 1980 there were 5,590,000 foreign visitors. Intourist also arranges the visits of Soviet citizens to foreign coun-

tries, and in the 1970s assisted about 2m annually

#### **COMMUNICATIONS**

Roads. By 1940 there were over 1 5m km of constructed roads, of which 143,000 km were suitable for motor traffic. The total length of motor roads in 1984 was 773,000 km. Road freights by lorry amounted to 859m tonnes in 1940 and 25,900m tonnes in 1984. Passengers carried were 590m in 1940 and 45,800m in 1984. In 1984, 22,600 inter-urban bus routes had a total length of 3,410,000 km.

Railways. The length of railways in Jan 1984 was 143,630 km (1913 58,500 km), of which 46,800 km was electrified Diesel and electric traction now account for almost 100% of all movements, with the electrified network handling 56% of the traffic In 1979 60% of all freight traffic and 40% of passengers went by rail (1913 57% and 91% respectively), and railways ran 3,638,900m. tonne-km in 1984

Operations are centred on 32 regions with headquarters at. Baku, Alma-Ata, Tyndin, Minsk, Irkutsk, Gorki, Khabarovsk, Donetsk, Chita, Tbilisi, Aktyubinsk, Novosibirsk, Kemerovo, Krasnoyarsk, Kuibyshev, Lvov, Kishinev, Moscow, Odessa, Leningrad, Riga, Saratov, Dnepropetrovsk, Sverdlovsk, Yaroslavl, Rostov-on-Don, Tashkent, Tselinograd, Voronezh, Kharkov and Chelyabinsk

Extensive railway construction is in progress, including routes northwards from Surgut to Urengoi and Nizhe-Vartovskoye, while the great Baikal-Amur Magistral (BAM) project was completed in 1985. This is a new main line to the east, sited well to the north of the existing Trans-Siberian route to the Pacific ports of Nakhodka and Vladivostok. It runs from Lena, on the Lena river, to Komsomolsk-on-Amur, 3,145 km distant. BAM is intended to become the principal route for export traffic to the eastern ports, easing the very heavy pressure on the Trans-Siberian line, which is only partially electrified and not double-track throughout

BAM was the most arduous railway building project ever tackled by Soviet engineers, and the greatest drawback to development of the region has been its severe geological and climatic conditions. There is permafrost throughout the area, and winter temperatures fall to -60°C. Construction work occupied nearly a decade, and has required over 3,200 bridges, tunnels and culverts.

Underground railways have been built in Moscow, Leningrad, Kiev, Ibilisi, Kharkov, Tashkent, Baku, Gorky, Minsk, Yerevan and Novosibirsk Others are under construction at Omsk, Dnepropetrovsk, Kuibyshev and Sverdlovsk

Aviation. In 1984 total length of internal airlines in the USSR was approximately 865,000 km, 112 3m passengers were carried internally and externally. The Central Asian Airways in some instances provide the only means of communication across the desert and mountainous regions of the local republics. An 8,500-km air service was opened in Feb. 1941 between Moscow and Anadyr (Eastern Siberia), through Archangel, Igarka, Khatanga, Tiksi Bay and Cape Schmidt, i.e., along the entire course of the Northern Sea Route. There are also other Arctic airlines, e.g., Igarka-Gulf of Kozhevnikov; Igarka-Dickson Island, Yakutsk-Tiksi Bay; Yakutsk-Viluisk, Yakutsk-Verkhoiansk.

Direct air services are maintained throughout the year between Moscow and the capitals of all Soviet republics as well as London, New York, Montreal, Tokyo, Delhi, Rangoon, Belgrade, Peking, Pyongyang, Ulan Bator, Kábul, Tirana, Paris, Warsaw, Prague, Budapest, Bucharest, Sofia, Vienna, Berlin, Helsinki, Stockholm,

Copenhagen, Jakarta, Dakar and Gander. Soviet air services reached 87 countries in 1981, and 20 foreign lines have regular services to the USSR, including British Airways, KLM, SAS, Air France, SABENA, Air India, PANAM The first Soviet airbus, the 350-seater IL-86, began flights on civil aviation routes in 1981. The 120-seater YAK-42 will gradually replace the TU-134 and AN-24 on major shorter routes.

Shipping. In 1977 the Soviet mercantile marine comprised 7,000 self-propelled vessels, of which 80% were built between 1957 and 1966 By May 1977 the gross cargo capacity was (including fishing vessels) 20 8m registered tonnes (16m tonnes dead-weight)

Freights carried were In 1913 (present frontiers), 35 Im tonnes, in 1940, 73 9m tonnes, and in 1984, 619m tonnes, 135m passengers were carried The Soviet share in world marine tonnage was 2% in 1960 and 6% in 1977. Deep-sea ports are under construction at Vostochny (Far East) and Grigorevsky (Black Sea) with new deep-sea wharves at Ventspils (Latvia), Murmansk and Archangel (for Arctic traffic). Archangel is kept open by icebreakers all the year round from 1979. Foreign freights in 1977 totalled 14% of all Soviet seaborne trade.

The North Sea route affords convenient communication between the European USSR and the Far East along the Soviet coast, for the produce of the basins of the

Ob, Yenissei, Lena and Kolyma rivers

The length of navigable rivers and canals in exploitation was (1983) 137,900 km, of which the length of floatable rivers is 86,200 km. There are several thousand miles of canals and other artificial waterways, among them the Baltic and White Sea Canal (235 km), the Moscow-Volga Canal (130 km). Goods turnover on inland waterways was 28,900m tonne-km in 1913, 35,900m in 1940, 45,900m in 1950 and 264,600m in 1984.

The Volga-Don Shipping Canal was opened for traffic in 1952. The Volga-Don waterway from Volgograd to Rostov is 540 km long, of which the Volga-Don canal comprises 101 km. The canal has transformed the section of the river from Kalach, where the Don is joined by the Volga-Don canal, to Rostov into a deep-water highway suitable for big Volga shipping. The canal links the White, Baltic, Caspian, Azov and Black Seas into a single water transport system. In Oct. 1964 the 2,430-km Baltic-Volga waterway, linking Klaipeda on the Baltic to Kakhovka at the mouth of the Dnieper and suitable for 5,000-tonne vessels, was begun. Reconstruction of the 18th-century. Mariinsky canal system in north west Russia was completed, providing a through waterway from Leningrad to Rybinsk (on the Upper Volga) and cutting the passage of freight from 18 to 2½ days.

At the end of 1977 the longest train ferry route in the world was opened between the Soviet Union and Bulgaria (Hyichovsk-Varna)

The first section of Vostochny port, in Wrangel Bay on the Pacific coast, is completed. It will be the country's largest deep-sea port.

In 1962 a canal was completed across the Kara-Kum desert in southern Turkmenistan (replacing an earlier project for a more costly scheme across the north of the republic) The canal, from Bussag on the river Amu-Darya to Archnan, northwest of Ashkhabad, through the Murgab oasis, 900 km long, supplies water to an area exceeding 200,000 hectares, suitable for cotton, fruit, vineyards and livestock An extension to the Caspian (500 km) is under construction the complete system will irrigate 1m hectares

An irrigation canal system (250 miles), bringing water from Kakhovka on the Dnieper to the North Crimea, is nearing completion. Work to divert water from the Pechora and Vychegda rivers (flowing into the White Sea) south to the Volga is in progress. Work has begun on a 300-mile canal which will supply water from the Irtysh to Karaganda in Central Kazakhstan, irrigating over 150,000 acres; the first 37 miles were opened in 1965 and another 45 miles in Dec. 1967. Most of the 11 reservoirs required had been completed by 1 Jan. 1972. Other irrigation canals under construction are Kurbyshev (279 km long, to supply over 100,000 hectares)

and Stavropol (481 km, irrigating 200,000 hectares); the second section of the latter went into commission in Nov 1974, 14 months ahead of schedule. In Sept. 1972 the Saratov Canal (irrigating 1 m hectares) went into commission.

Post and Broadcasting. In Jan. 1985 the number of post, telegraph and telephone offices was 91,000 and of general telephones 29 5m

The international radio-telecommunications services are operated by the Ministry of Communications of the USSR. The Great Northern Telegraph Co., Ltd., of Denmark, operates cables connecting Denmark with Leningrad, whence connexion is made by means of a trans-Siberian landline with Vladivostok. From the latter place the Great Northern Telegraph Co. owns cables connecting with Japan, China and Hong Kong. Direct radio and telephone communication with India is provided for in an agreement concluded in 1955.

The State Committee for Broadcasting and Television produces 3 programmes in Moscow, broadcasting throughout the Union. In addition the regional radio stations produce 1, 2 or 3 programmes for the republics as well as local programmes for a town or region. The foreign service from Moscow is beamed to all parts of the world, in 64 languages. Chinese has 28½ hours programme time a day Several republics have their own foreign services. English is broadcast from Moscow, Kiev, Tashkent, Vilnius and Yerevan. There are 117 TV centres in the USSR, several of them producing more than 1 programme. In Moscow there are 4 programmes. Colour programmes are broadcast by the SECAM system. A nationwide system of space telecommunications, consisting of satellites and ground stations, takes TV broadcasts to distant parts of the country

Number of receivers, Jan 1985. radio, 81 2m (1970, 40m), television, 80m (1970, 34.8m).

Cinemas and theatres (Jan. 1985). There were 141,600 permanent and 9,800 mobile cinemas. In Jan. 1985 there were 628 theatres, to which 123.5m visits were made.

Newspapers. In 1984, 8,327 newspapers with a total daily circulation of 185m copies were published in 57 languages of the USSR.

#### JUSTICE, RELIGION, EDUCATION AND WELFARE

Justice. The basis of the judicial system is the same throughout the Soviet Union, but the constituent republics have the right to introduce modifications and to make their own rules for the application of the codes of laws. The Supreme Court of the USSR is the chief court and supervising organ for all constituent republics and is elected by the Supreme Soviet of the USSR for 5 years. Chairman (1986) V. I. Terebilov. Supreme Courts of the Union and Autonomous Republics are elected by the Supreme Soviets of these republics, and Territorial, Regional and Area Courts by the respective Soviets, each for a term of 5 years. At the lowest level are the People's Courts, which are elected directly by the population.

Court proceedings are conducted in the local language with full interpreting facilities as required. All cases are heard in public, unless otherwise provided for by law, and the accused is guaranteed the right of defence.

Laws establishing common principles of legislation in various fields are adopted by the Supreme Soviet and are then enacted in more specific form and implemented by subordinate levels of state and judicial authority.

The Law Courts are divided into People's Courts and higher courts. The People's Courts consist of the People's Judge and 2 Assessors, and their function is to examine, as the first instance, most of the civil and criminal cases, except the more important ones, some of which are tried at the Regional Court, and those of the highest importance at the Supreme Court. The Regional Courts supervise the activities of the People's Courts and also act as Courts of Appeal from the decisions of the People's Court. Special chambers of the higher courts deal with offences committed in the Army and the public transport services

People's Judges and Assessors, who serve on a rota basis, are elected directly by the citizens of each constituency. Judges for 5 years, assessors for 2½. Should a

judge be found not to perform his duties conscientiously and in accordance with

the mandate of the people, he may be recalled by his electors

The People's Assessors are called upon for duty for 2 weeks in a year. The People's Assessors for the Regional Court must have had at least 2 years' experience in public or trade-union work. The list of Assessors for the Supreme Court is drawn up by the Supreme Soviet of the republic.

The Labour Session of the People's Court supervises the regulations relating to the working conditions and the protection of labour and gives decisions on conflicts arising between managements and employees, or the violation of regulations

Disputes between State institutions must be referred to an arbitration commission Disputes between Soviet State institutions and foreign business firms may be referred by agreement to a Foreign Trade Arbitration Commission of the All-

Union Chamber of Commerce

The Procurator-General of the USSR (in 1986, A M Renkunov) is appointed for 5 years by the Supreme Soviet All procurators of the republics, autonomous republics and autonomous regions are appointed by the Procurator-General of the USSR for a term of 5 years. The procurators supervise the correct application of the law by all state organs, and have special responsibility for the observance of the law in places of detention. The procurators of the Union republics are subordinate to the Procurator-General of the USSR, whose duty it is to see that acts of all institutions of the USSR are legal, that the law is correctly interpreted and uniformly applied, he has to participate in important cases in the capacity of State Prosecutor.

Capital punishment was abolished on 26 May 1947, but was restored on 12 Jan 1950 for treason, espionage and sabotage, on 7 May 1954 for certain categories of murder, in Dec 1958 for terrorism and banditry, on 7 May 1961 for embezzlement of public property, counterfeiting and attack on prison warders and, in particular circumstances, for attacks on the police and public order volunteers and for rape

(15 Feb 1962) and for accepting bribes (20 Feb 1962)

In view of criminal abuses, extending over many years, discovered in the security system, the powers of administrative trial and exile previously vested in the security authorities (MVD) were abolished in 1953, accelerated procedures for trial on charges of high treason, espionage, wrecking, etc., by the Supreme Court were abolished in 1955, and extensive powers of protection of persons under arrest or serving prison terms were vested in the Procurator-General's Office (1955) Supervisory commissions, composed of representatives of trade unions, youth organizations and local authorities, were set up in 1956 to inspect places of detention

Further reforms of the civil and criminal codes were decreed on 25 Dec 1958. Thereby the age of criminal responsibility has been raised from 14 to 16 years, deportation and banishment have been abolished, a presumption of innocence is not accepted, but the burden of proof of guilt has been placed upon the prosecutor. Secret trials and the charge of 'enemy of the people' have been abolished Articles 70 and 190 of the Criminal Code, which deal with 'anti-Soviet agitation and propaganda' and 'crimes against the system of administration' respectively, have however been widely used against political dissidents in more recent years

Religion. With the Revolution the Orthodox Church lost its position as the dominant religion and all religions were placed on an equal footing. Article 52 of the 1977 Soviet Constitution reads as follows 'Citizens of the USSR are guaranteed freedom of conscience, that is, the right to profess or not to profess any religion, and to conduct religious worship or atheistic propaganda. Incitement of hostility or hatred on religious grounds is prohibited. In the USSR the church is separated from the state, and school from the church'

By decree of 2 Feb. 1918 the Orthodox Church was disestablished; its property, together with that of all other denominations, was nationalized The congregations themselves have to maintain their churches and clergy, regardless of confession or denomination A minimum of 20 persons may request and receive the use of a

church building, free of charge, except for maintenance, insurance, land taxes, etc About two-thirds of all the churches have been closed since 1917, but about 20,000 churches and 18 religious seminanes were reported to be in operation in 1986. Religious instruction may be given in private, but otherwise only in church classes. The income of religious communities is not subject to taxation. Religious instruction in classes for persons under 18 is forbidden. The state supplies paper and printing facilities to all denominations for producing the Bible, the Koran, prayer books, missals, etc.

Relations between the religious communities of all creeds and the Government are maintained through a Council for Religious Affairs which is attached to the

Council of Ministers of the USSR (Chairman, K Kharchev)

The Russian Orthodox Church, represented by the Patriarchate of Moscow, had, in 1986, about 30m regular worshippers. There are still many Old Believers, whose schism from the Orthodox Church dates from the 17th century. The Russian Church is headed by the Patriarch of Moscow and All Russia, assisted by the Holy Synod, which has 7 members—the Patriarch himself and the Metropolitans of Krutitsy and Kolomna (Moscow), Leningrad and Kiev ex officio, and 3 bishops alternating for 6 months in order of seniority from the 3 regions forming the Moscow Patriarchate. The Patriarchate of Moscow maintains jurisdiction over a few parishes of Russian Orthodox abroad, at Tehrán, Jerusalem, German Democratic Republic, France (1 archbishop), England, North and South America (2 bishops). There are 19 monasteries and nunneries, and 6 Orthodox academies and seminaries with 10 journals.

After the Russian Orthodox Church the next Christian community in importance are the Armenians, their Catholicos (Patriarch), whose seat is at Etchmiadzin, is head of all the Armenian (Gregorian) communities throughout the world There is an Armenian Orthodox academy and a seminary.

The Georgian Orthodox Church has its own organization under a Catholicos (Patriarch) who is resident in Tbilisi and who directs the church's seminary in Mtskheta

Protestantism is represented chiefly by the Evangelical Christian Baptists, with over 512,000 baptized adult members and some 5,000 churches, the Lutherans are concentrated mainly in the Baltic States (350,000 in Estonia, 600,000 in Latvia), the Reformed in the Transcarpathian Region of the Ukraine (70,000) Both Baptists and Lutherans conduct theological courses The Methodist Church functions in Estonia

The Roman Catholics are most numerous in Lithuania and the western Ukraine There are 2 Roman Catholic arch-episcopates and 4 episcopates in Lithuania with 630 churches and a seminary at Kaunas providing a 5-year course. In 1946 some 3 5m Uniates in the USSR were compelled to withdraw their allegiance to Rome and came under the jurisdiction of the Orthodox Patriarchate in Moscow. In Latvia there are an arch-episcopate and 1 episcopate (Riga and Liepaja) of the Roman Catholic Church.

The Moslems (estimate 30m members, mainly Sunnis), are divided into 4 administrative regions, 3 of them (Central Asia and Kazakhstan, European Russia and Siberia, Northern Caucasus) headed by a Musti; the largest (Transcaucasia, with its centre at Baku) by a Sheikh-ul-Islam

There is a Moslem academy and a madrasah in Central Asia Several editions of

the Koran have appeared in recent years.

There are various Jewish communities, the chief being in Moscow and Kiev Large synagogues maintain bakeries for producing unleavened bread. There is a Jewish Yeshiva in Moscow (established 1956) and 180 synagogues as well as several dozen minyans. The Central Buddhist Council of the USSR is headed by a Lama with communities in Buryatia, Tuva, Kalmykia and in the national (minority) areas of the Chita and Irkutsk regions.

Education. Education is free and compulsory from 7 to 16/17. There are 2 types of general schools, with an 8-year or a 10-year curriculum; the minimum school-leaving age is now 17 Pupils who leave an 8-year school continue their education at either a 10-year school or a vocational training school. A 10-year school pupil may also transfer to vocational school after the 8th year. Under directives adopted in 1984, there will be a gradual transition towards an 11-year school system, starting at 6, from 1986 onwards, efforts are also being made to improve pupils' preparation for employment and the status and working conditions of teachers.

In 1984-85 there were 141,000 primary and secondary schools. Pupils in general educational schools numbered 44 6m. (8 2m of them in the ninth and tenth forms) and the teachers 2 8m. Those at vocational and specialized technical secondary schools numbered 9 8m.

At the end of 1940 labour reserve schools (both vocational and industrial) were organized, admitting applicants from 14 to 17 years of age. From 1959 onwards these and other technical schools were reorganized as town and rural vocational and technical schools, at which pupils stay for a year longer than at general schools, combining completion of general secondary education with vocational training From 1940 to 1977 inclusive they trained 35m skilled workers. In 1978, 2.3m graduated from such schools, including 628,000 for agriculture, 600,000 agricultural mechanics were trained in state and collective farms. Over 4,300 vocational training schools existed in 1981, training 2.17m boys and girls, all of whom receive a full secondary education. In 1984, 15.5m. children of from 3 to 7 years of age attended kindergartens. Children in boarding schools numbered over 800,000 in 1972–73.

In 1984-85 there were 4,471 technical colleges with 4 5m students, and 892 universities, institutes and other places of higher education, with 5 3m students (including 1 7m taking correspondence or evening courses) Among the 65 university towns are Moscow, Leningrad, Kharkov, Odessa, Tartu, Kazan, Saratov, Tomsk, Kiev, Sverdlovsk, Tbilisi, Alma-Ata, Tashkent, Minsk, Gorky and Vladivostok

On 1 Jan 1986 there were 1 46m scientific workers in places of higher education, research institutes and Academies of Sciences. There are 33,000 foreign students from 130 countries.

The Academy of Sciences of the USSR had 757 members and corresponding members Total learned institutions under the USSR Academy of Sciences number 244, with 50,711 scientific staff Each Union Republic (other than the RSFSR) has its own Academy of Sciences, with scientific staff numbering 49,079 There are also Siberian, Far Eastern and other branches of the USSR Academy On 1 Jan 1981 there were 96,820 post-graduate students in Academy and other higher educational institutions, 59% studying on a part-time basis

The Academy of Pedagogical Sciences had 14 research institutes with 1,640 staff. In 1985 over 106m people were studying at schools, colleges and training or correspondence courses. 116 per 1,000 of the employed population had a higher education (1939, 13, 1970, 65).

Health and Social Security. All health services are free of charge although payment is required for medicines, but private practice exists. The health service is administered by the Ministry of Health of the USSR, which supervises the work of the Health Ministries of the Union Republics and the Autonomous Republics

In 1944 an Academy of Medical Sciences was formed, it has under its direct control 52 research institutes. In all, there were, in 1984, 393 medical research institutions with 70,000 research staff. Smallpox, trachoma and malaria have been virtually eliminated.

In 1981–82, 98 institutes and medical faculties had a total of 383,800 students taking a 6-year course

In Jan. 1986 there were 23,100 civil hospitals with 3 6m beds. There were 837,000 infants in day nurseries 1,136,000 doctors (including dentists) were in the health service. All confinements in towns and 75% in the country were in hospital

There were 37,000 outpatients' clinics, apart from the 27,500 women's consultation centres and children's clinics

The death-rate in the USSR in 1984 was 10 8 per 1,000, and the birth rate 19 6 per 1,000. Infant death rate was 27 9 (per 1,000 live births) in 1974, compared with 273 in 1913, 184 in 1940 and 81 in 1950. Average expectation of life, 70 (1913, 32)

Social insurance is administered by the trade unions, through social insurance councils elected in places of work and social insurance sub-committees of factory committees about 5m volunteers are engaged in this work 43 4m people went to holiday sanatoria or rest homes in 1984 54 6m people, including 10 3m collective farmers, were receiving state pensions in Jan 1985; of these, 38 3m (9 1m collective farmers) were old-age pensioners

Total number of holiday sanatoria providing toning-up treatment at resorts in 1982 was 2,352, with accommodation for 567,000, in addition, there were 2,766 overnight sanatoria at large plants for treatment of mild disorders without absence from work, accommodating 233,000 There were also 1,208 trade union-managed holiday hotels with a capacity of 380,000, holidays being partly or wholly at trade unions' expense

State expenditure (in 1m rubles) on health services and physical education 1940, 0 9, 1970, 9,300, 1980, 14,800, 1984, 17,149

Between 1950 and 1980 62,766,000 apartments (in towns) and houses (in rural areas) were built. In 1984, 2m apartments and houses were built. Rents in the USSR have not been increased since 1928 and in 1986 account for about 3% of the expenditure of an average worker's family. By the end of 1985, 79% of all urban housing had a gas supply installed, 91% had running water, 88% had central heating and 80% of the urban population lived in individual rather than communal apartments. 57% of total housing space is publicly and 43% is privately owned.

FINANCE. Budget estimates (in 1 m rubles), 1985, 29,596, 1986, 32,225

AGRICULTURE. The Ukraine contains some of the richest land in the USSR It raises wheat, buckwheat, beet, sunflower, cotton, flax, tobacco, soya, hops, the rubber plant kok-sagyz, fruit and vegetables, and in 1983 produced over 23% by value of the USSR's crop production and over 21% by value of its livestock production The area under cultivation was 27 9m hectares in 1913, 27m. in 1939 before the new territories were added, and 33 3m in 1983

Output (in 1m. tonnes) in 1983 (1913 figures in tons in brackets) Sugar-beet, 47·7 (9·3); sunflower seed, 2 1 (0 07); potatoes, 20 7 (8 5); meat and fats, 3 7 (1·1), milk, 22 3 (4 7); wool, 0·028 (0·015); 16,122m. eggs (3,005m).

On 1 Jan 1984 there were 26 0m cattle, 21 2m pigs, 9 2m. sheep and goats. In 1949 silver-fox breeding farms were started.

On 1 Jan. 1985 there were 2,189 state farms and 7,212 collective farms.

Irrigation networks supplied 1 82m. hectares of land, 2.2m. hectares were

Tractors numbered 428,000 at 1 Jan. 1984 and combine harvesters, 101,400.

INDUSTRY. Coal in the Donets field (25,900 sq. km stretching from Donetsk to Rostov), estimated to contain 60% of the bituminous and anthracite-coal reserves of the USSR, yielded, in 1980, 197 1m. tonnes—about 28% of the USSR production. Large new seams have been found near Novo-Moskovsk (Dnepropetrovsk region), Kharkov, Lugansk (beyond the Don) and on the left bank of the Dnieper Within the present frontiers of the Ukraine, coal output was 22 8m tons in 1913. 83 8m tons in 1940, 78m tons in 1950 and 217m, tons in 1977

Combining coal from the Donets field with the iron-ore from the mines in Krivoi Rog has made possible the development of a large ferrous metallurgical industry in the Ukraine. Output of iron oie was 6 9m. tons in 1913, 18 9m tons in 1940 and

123m tons in 1984.

Manganese is also available at Nikopol, output in 1984, 7 2m tons

Pig-iron output was 2 9m tons in 1913, 9 6m tons in 1940, 9 2m tons in 1950 and 46 4m tons in 1975. Steel output (within present frontiers) was 2 4m tons in 1913, 8 9m in 1940, 8 4m in 1950 and 53 7m in 1982

The Ukraine also contains oil, rich deposits of salt and various important chemicals Oil output was 1m tons in 1913 (in present frontiers), 353,000 tons in 1940

and 10 5m. tons in 1977, with 68 7m. cu metres of natural gas.

The Ukraine has highly developed chemical and machine-construction industries producing one-fifth of the total output of machinery and chemicals in the USSR 142,000 tractors and 3,500 main-line diesel locomotives were produced in

In Northern Bukovina there are deposits of gypsum, oil, alabaster, brown coal and timber. Output of mineral fertilizers was 36,000 tons in 1913 and 21 1m tons in 1981, cement output increased in the same years from 269,000 to 22 5m tons (in present frontiers in both cases). Paper output in 1984 was 283,000 tons (1913) 26,900)

Consumer goods and food industries are important. Output of cotton fabrics was (in present frontiers) 4.7m linear metres in 1913, 13 8m in 1940, 20 6m in 1950 and 429 4m in 1975 Granulated sugar output was 1913, 1 1m tons, 1940, 1 6m tons, 1950, 1 8m tons, and 1984, 6 9m tons Leather footwear manufactured in 1940 totalled 40 8m pairs, 1984, 182m

The number of industrial and office workers at the end of 1950 was 6 9m, and

the average in 1983, 20 5m. There were 4 1m. collective farmers in 1983. During the first 5-year plan (1929-32) the Dnieper power-station was built, de-

stroyed during the War, it was restored during the fourth plan (1946-50) Another large hydro-electric station at Kakhovka began operations during the fifth plan (1951–55) Power output (in 1,000m kwh.) increased as follows. 1913, 0.5, 1940, 12 4, 1950, 14 7, 1984, 257

**COMMUNICATIONS.** The total length of railways of the Ukrainian SSR in Jan 1984 was 22,630 km, the navigable rivers, 3,900 km Length of hard-surface motor roads was 192,200 km

Airlines connect Kiev, Lvov, Chernovtsy and Odessa with Crimean and Caucasian spas, Kiev with Tbilisi, Odessa with Riga and Donetsk

Newspapers (1983). Out of 1,751 newspapers, 1,284 were in Ukrainian Daily circulation of Ukrainian-language newspapers, 15 2m., other languages, 7 9m.

**RELIGION.** Several Christian Churches have their adherents in the Ukraine, the chief being the Orthodox Greek Church and the Catholic Church The Western Ukraine Uniate Church, which in 1596 had been forced by the Poles to establish unity with the Roman Church, severed this connexion in March 1946 and joined the Orthodox Church. There are also some Protestants as well as Jews and others.

### BELORUSSIA

### Belaruskaya Sovietskaya Sotsialistychnaya Respublika

HISTORY. The Belorussian Soviet Socialist Republic was set up on 1 Jan 1919 It forms one of the constituent republics of the USSR

AREA AND POPULATION. Belorussia is situated along the Western Dvina and Dnieper It is bounded west by Poland, north by Latvia and Lithuania, east by the RSFSR and south by the Ukraine The area is 207,600 sq km (80,134 sq miles). The capital is Minsk Other important towns are Gomel, Vitebsk, Mogilev, Bobruisk, Grodno and Brest On 2 Nov 1939 western Belorussia was incorporated with an area of over 108,000 sq km and a population of 4 8m. The population (Jan 1985) was 9,941,000; 79 4% of this population in 1979 (census) were Belorussians, 4 2% Poles, 11 9% Russians, 2 4% Ukrainians and 1 4% Jews

Belorussia now comprises the following regions Brest, Gomel, Grodno, Mogilev, Minsk, Vitebsk

CONSTITUTION AND GOVERNMENT. The Supreme Soviet, elected in 1985, consists of 485 deputies (1 per 20,000 population), 328 are Communists and 180 women A new Constitution was adopted in April 1978

At elections to regional, district, urban and rural Soviets (24 Feb. 1985), of 85,569 deputies returned, 42,673 (49 9%) were women, 49,031 (57 3%) non-Party and 58,938 (68 9%) industrial workers and collective farmers

Chairman, Presidium of the Supreme Soviet G Tarazevich Chairman, Council of Ministers M V. Kovalev Foreign Minister A E Gurinovich First Secretary, Communist Party N N Slyunkov

FINANCE. Budget estimates (in 1m rubles), 1985, 7,168, 1986, 7,843.

NATURAL RESOURCES. Belorussia is hilly, with a general slope towards the south. It contains large tracts of marsh land, particularly to the south-west, and valuable forest land wooded with oak, elm, maple and white beech there are over 6,500 peat deposits.

AGRICULTURE. Agriculturally, Belorussia may be divided into three main sections—Northern, growing flax, fodder, grasses and breeding cattle for meat and dairy produce, Central, potato growing and pig breeding, Southern, good natural pasture land, hemp cultivation and cattle breeding for meat and dairy produce. The area under cultivation (in hectares) was 4.5m in 1913, 5 2m. in 1940 and 6 3m. in 1983. There were 7.3m. cattle, 5.1m. pigs and 600,000 sheep and goats on 1 Jan. 1984.

Output of main agricultural products (in 1,000 tonnes) in 1983 (1913 figures in

brackets): Flax, 121 (33); sugar-beet, 1,397 (0), potatoes, 12,061 (4,024), meat, 932

(219), milk, 6 3 (1 4); 3,331m. eggs (413m.), vegetables, 839 (000).

On 1 Jan 1984 there were 1,744 collective farms and 915 state farms. About 2 5m hectares of marsh land had been drained for agricultural use, 828,200 of these for crops. This land has been found to be as rich as the soil of the Black Earth Zone, and yields good harvests of grain, fodder, potatoes, kok-sagyz and other crops In Jan 1984 there were 125,400 tractors and 31,200 grain combine harvesters

INDUSTRY. Industry in this republic was almost completely destroyed during the years 1941–45 By 1956, aggregate industrial output was three times what it had been in 1940 Plants producing tip-lorries, machine-tools and agricultural machinery are prominent

The republic also contains timber works, a match factory in Borisov, building materials, machine, prefabricated house construction, glass-blowing and other factories canneries, creameries and other food industries, chemical, textiles, artificial-

silk, flax-spinning and leather works

The automobile and tractor industry produced 90,900 tractors and 230,000 motor bikes in 1984 Cement output, 33,000 tons in 1913, was 2 17m tons in 1975. Leather footwear output, 9 8m pairs in 1940, was 43 2m. pairs in 1984 Linen fabrics, 13,000 linear metres in 1913, 70 4m tonnes in 1982, paper, 51,000 tonnes in 1940, 198,000 tonnes in 1984

Particular attention has been paid to the development of the peat industry with a view to making Belorussia as far as possible self-supporting in fuel, and in 1939 local peat provided 67 5% of her total requirements of fuel. The average annual output is about 18m tonnes

There are also rich deposits of rock salt. In 1951 the first sugar refinery in Belorussia was opened in Grodno, sugar output in 1984 was 317,000 tonnes

Output of electricity in 1984, 33,100m kwh (508m in 1940) New powerplants have been built in Baranovichi, Grodno, Molodechno and Lida

The number of industrial and office workers in 1983 was 4,188,000.

COMMUNICATIONS. In Jan 1984 there were 5,530 km of railways, 48,100 km of motor roads (39,800 km hard-surface) and 3,900 km of navigable waterways

Newspapers (1983) Of 206 newspapers published 130 were in Belorussian. Daily circulation of Belorussian-language newspapers, 1 5m, other languages, 3 4m

EDUCATION. In 1983-84 there were 183,800 students in 33 places of higher education and 161,300 students in 138 technical colleges. There were 39,100 scientific personnel in 178 institutions, and 340,000 specialists with a higher education employed in the national economy. The Belorussian Academy of Sciences controlled 32 learned institutions with 5,488 scientific staff. The number of children in primary and secondary schools was 489,000 in 1914-15, and 15m. in 1983-84,547,000 children were attending pre-school institutions in Jan. 1984.

HEALTH. In 1983 there were 35,500 doctors and 125,800 hospital beds

FINANCE (in 1m rubles) Budget estimates, 1985, 2,704; 1986, 2,873

AGRICULTURE. The chief agricultural products are grain, cotton, rice, grapes, fruit, vegetables, tobacco and silk. The Mexican rubber plant grayule has been acclimatized. A new kind of high-yielding winter wheat has been produced for use in mountainous parts of the republic.

Livestock on I Jan 1984 Cattle, 1 9m; pigs, 200,000; sheep and goats, 5 4m Output of main agricultural products (in 1,000 tonnes) in 1983 (1913 figures in brackets): Cotton, 846 (4), potatoes, 203 (38); tea, 30 3 (0), meat, 158 (40), milk, 900 (203), wool, 10 7 (4 1); grapes, 1,708; fruit, 308, 875m. eggs (97m.).

Azerbaijan has become an important cotton-growing and sub-tropical base. About 70% of cultivated land is irrigated. On the irrigated land crops of Egyptian and Sea-Island cotton are obtained. Here, too, rice and lucerne are cultivated, and in the mountain valleys there are also orchards, vineyards and silk cultures.

In the south along the coast of the Caspian, where the climate is more moist, there are tea plantations, and citrus fruits and other sub-tropical plants are grown

In 1941 a scientific research institute for sub-tropical research was opened to develop the culture of sub-tropical plants in Azerbaijan and other parts of Transcaucasia. A forestry research institute was opened in 1949

There were on 1 Jan. 1984, 607 collective farms, 794 state farms, 37,900 tractors and 4,400 grain combine harvesters

INDUSTRY. The republic is rich in natural resources oil, iron, aluminium, copper, lead, zinc, precious metals, sulphur pyrites, limestone and salt. Iron and steel and aluminium works have been built at Sumgait.

The most important industry is the oil industry, especially in the Baku region. The output of oil was 7.7m tonnes in 1913, 22.2m, tonnes in 1940 and 16.5m tonnes in 1976. The largest producing area lies along the western shore of the Caspian Sea, north and south of Baku, where the largest refineries are located. Other wells lie west of Baku, and some have been drilled in the Caspian itself, off

the Apsheron Peninsula. Baku is connected by a double pipeline with Batum on the Black Sea. All the oilfields have been electrified and are connected with Baku

Azerbaijan has also copper, chemical, cement and building material, food, timber, salt, textiles and fishing industries. In 1984, 556,000 tonnes of steel pipe were produced, 11.7m. items of knitwear, 500 tonnes of raw silk, 21.3m pairs leather footwear, and 34.7m electric light bulbs.

In addition to Baku, other important industrial centres are Kirovabad, Nukha,

Stepanakert, Nakhichevan, Lenkoran

In 1984 electric power output was 19,800m, kwh Output of gas, which began in 1928 with 176m, cu metres, was 10,989m in 1976 Pipelines from Karadag to Baku and Sumgait supply gas fuel for all oil-cracking factories and most engineering works

Synthetic rubber works (Sumgait), tyre works and a worsted combine (Baku) and

a large textile combine (Mingechaur) have been built

The number of industrial and office workers in 1983 was 1,965,000

COMMUNICATIONS. The first electrical railway (42 km) in the USSR was constructed in Azerbaijan in 1924, in 1949, 27 km was added, and the line now runs Baku-Surakhany-Sabunchi-Buzovny-Baku The capital is also linked by rail with Tbilisi, Yerevan, Derbent, Julfa and Astara Total length, Jan 1984, 1,900 km There were, in Jan 1984, 29,700 km of motor roads (24,700 km hard-surface) and 500 km of inland waterways

Newspapers (1983). There were 139 newspapers, 109 in the Azerbaijani language (circulation 2 1 m.), other languages, 468,000.

EDUCATION. In 1983-84 there were 1 5m pupils in 4,500 elementary and secondary schools and 155,000 children attending pre-school institutions. There were 76 technical colleges with 78,500 students, 18 higher educational institutions, including a state university at Baku, with 110,000 students (including correspondence students)

The Azerbaijan Academy of Sciences, founded in 1945, has 30 research institutions with 4,592 research workers. There are 142 learned and scientific institutions, with 23,000 research workers in all

**HEALTH.** In 1983 there were 23,500 doctors and 63,600 hospital beds. There were also 619 maternity and infant welfare centres.

There are 3 main agricultural areas (1) The moist subtropical area along the Black Sea Coast, where are cultivated tea, citrus fruits (lemons, oranges, mandarins, etc.), the tung tree (which yields special industrial oils), eucalyptus, bamboo, high-quality tobacco; (2) Imeretia (the Kutais region) where the chief cultures are grapes and silk, and (3) Kakhetia, along the Alazani (a tributary of the Kura river), famed for its orchards and wines Land (in hectares) under cultivation was 748,000 in 1913, 896,000 in 1940, 778,000 in 1961, 726,000 in 1983

Output of main agricultural products (in 1,000 tonnes) in 1983 (1913 figures in brackets) Sugar-beet, 111 (0), fruit, 718, grapes, 523, tea in leaf, 556, meat, 150 (49), wool, 5 8 (3 4); milk, 647 (222); vegetables, 565, 752m. eggs (119m)

On 1 Jan. 1984 there were 696 collective farms working over 66% of all agricultural land, 546 state farms working nearly 34% of such land. In the Colchis area 115,000 hectares of extremely rich land have been reclaimed. There are 389,000 hectares of irrigated land. 151,400 hectares of marsh land have been drained Tractors numbered 25,700 on 1 Jan. 1984, grain combines, 1,600

Livestock on 1 Jan 1984: Cattle, 1 6m, pigs, 1 1m, sheep and goats, 2 0m Georgia is rich in forest lands where fine varieties of timber are grown Area covered by forests, 2 4m hectares

INDUSTRY. The most important mining industry of Georgia is the exploitation of the manganese deposits, the richest of which lie in the Chiatura region. Manganese deposits in Georgia are calculated at 250m. tonnes, distributed over an area of 140 sq. km. The most important coal seams are at Tkvarcheli (deposits estimated at 250m tonnes) and Tkibuli (deposits of 80m tonnes) Other important minerals are baryta, the best in the USSR, fire-resisting and other clays, diatomite shale, oil, agate, marble, cement, alabaster, iron and other ores, building stone, arsenic. molybdenum, tungsten and mercury In 1941 a goldfield was discovered Output of coal in 1976 was 1 9m tonnes (625,000 in 1940).

Since the Second World War the Transcaucasian Metallurgical Plant has been built at Rustavi (near Tbilisi) and a motor works at Kutaisi There are modern factories for processing green tea-leaves, creameries and breweries, Georgia has also textile and silk industries

In 1984, 2 8m. tonnes of manganese ore were produced, 515,000 tonnes of steel pipe, 122,000 tonnes of mineral fertilizer, 18,500m cigarettes, 40,100 tonnes of paper, 15 7m. pairs leather footwear, 14,100 colour televisions and 6,500 tonnes of granulated sugar.

Georgia's fast flowing rivers form an abundant source of energy. One of the most powerful stations completed in recent years is Tbilisi (1 m kw). Power output in 1984 was 15,300m. kwh. (742m in 1940).

There were 2,093,000 industrial and office workers in 1983

COMMUNICATIONS. Length of railways in 1984 was 1,470 km The trunk line leading from Batumi through Tbilisi to Baku on the Caspian Sea has several narrow-gauge branches on Georgian territory to the coalmines of Tkibuli, to the port of Poti, to the manganese mines of Chiatura, to the mineral springs of Borjom and the health resort Bakuriani, to the towns Signakh and Telavi, in Kakhetia, and to the Armenian frontier, across the coalmine district of Alaverdi. The last branch divides in Armenia, going on the one side to Tabriz in Iran, and on the other to Erzerum in Anatolia A railway line from Akhal-Senaki along the Black Sea coast, through Sukhumi to Tuapse, was completed in 1946. All lines are electrified or work on diesel traction. In 1984 there were 33,700 km of motor roads, 29,900 km of them hard-surfaced.

EDUCATION. In 1983-84 there were 900,000 pupils in 3,800 primary and secondary schools, 53,500 in 91 technical colleges and 89,600 students in 19 higher educational institutions. Thilisi University has 16,300 students. In towns, 11 years' education is usual. In Abastuman there is an astro-physical observatory. In 1936 a branch of the Academy of Sciences of the USSR was formed in Thilisi, and in Feb. 1941 a Georgian Academy of Sciences was opened, which in 1983 had 42 institutions with scientific staff totalling 5,609. There were in all 194 research institutions with 26,600 scientific staff.

In Jan 1984, 175,000 children were attending pre-school institutions

HEAL ΓH. There were 26,400 doctors and 55,200 hospital beds in 1983

## ABKHAZIAN AUTONOMOUS SOVIET SOCIALIST REPUBLIC

Area, 8,600 sq km (3,320 sq miles), population (Jan 1985), 526,000 Capital Sukhumi This area, the ancient Colchis, included Greek colonies from the 6th century BC onwards. From the 2nd century BC onwards, it was a prey to many invaders—Romans, Byzantines, Arabs, Ottoman Turks—before accepting a Russian protectorate in 1810. However, from the 4th century AD a West Georgian kingdom was established by the Lazi princes in the territory (known to the Romans as 'Lazica') and by the 8th century the prevailing language was Georgian and the name Abkhazia. In March 1921 a congress of local Soviets proclaimed it a Soviet Republic, and its status as an Autonomous Republic, within Georgia, was confirmed on 17 April 1930.

Population (1979 census) Abkhazians, 17-1%, Georgians, 43-9% and Russians, 16-4%

140 deputies were elected on 24 Feb 1980, 57 of them women

The Abkhazian coast (along the Black Sea) possesses a famous chain of health resorts—Gagra, Sukhumi, Akhali-Antoni, Gulripsha and Gudauta—sheltered by thickly forested mountains

The republic has coal, electric power, building materials and light industries. In 1983 there were 89 collective farms and 56 state farms, main crops are tobacco, tea, grapes, oranges, tangerines and lemons. Crop area 43,900 hectares.

Livestock, 1 Jan 1984: 143,300 cattle, 110,700 pigs, 23,400 sheep and goats

95,300 pupils were attending 351 schools in 1980–81. There were 6 technical colleges with 2,600 students, 6,200 students were receiving higher education (including correspondence courses). A university has been opened in Sukhumi

In Jan 1983 there were 2,000 doctors and 6,000 hospital beds, 956 scientific workers were employed in the republic

## ADJARIAN AUTONOMOUS SOVIET SOCIALIST REPUBLIC

Area, 3,000 sq. km (1,160 sq miles), population (Jan 1985), 379,000 Capital, Batumi After a history similar to that of Abkhazia, it fell under Turkish rule in the 17th century, and was annexed to Russia (rejoining Georgia) after the Berlin Treaty of 1878. On 16 July 1921 the territory was constituted as an Autonomous Republic within the Georgian SSR

Population (1979 census) Georgians, 80 1%, Russians, 9 8% and Armenians

110 deputies were elected on 24 Feb. 1980, 43 of them women

The republic specializes in sub-tropical agricultural products. These include tea,

mandarines and lemons, grapes, bamboo, eucalyptus, etc. Livestock (Jan 1983) 128,600 cattle, 8,900 pigs, 10,300 sheep and goats. In 1980 there were 69 collective farms and 21 state farms

There are shipyards at Batumi, modern oil-refining plant (the pipeline from the Baku oilfields ends at Batumi), food-processing and canning factories, clothing, building materials, drug factories, etc

Health resorts are Kobuleti, Tsikhisdziri, Batumi on the coast and Beshumi in the hills. The sub-tropical climate and flora, and the combination of mountains and sea, make this republic (like Abkhazia) a favourite holiday area.

In 1982 there were 77,100 pupils at school, 8 technical colleges with 3,500 students, a pedagogical institute and several research institutions 2,200 students were receiving a higher education

In Jan 1983 there were 1,300 doctors and 3,900 hospital beds, 396 scientific workers were employed in the republic

## SOUTH OSSETIAN AUTONOMOUS REGION

This area was populated by Ossetians from across the Caucasus (North Ossetia), driven out by the Mongols in the 13th century. The region was set up within the Georgian SSR on 20 April 1922. Area, 3,900 sq. km (1,505 sq. miles), population (Jan. 1984), 98,000 (1979 census, Ossetians, 66 4% and Georgians, 28 8%) Capital, Tskhinvali (34,000)

Main industries are mining, timber, electrical engineering and building materials Crop area, chiefly grains, was 21,600 hectares in 1983, other pursuits are sheep-farming (154,000 sheep and goats) and vine-growing. There were 14 collective farms and 18 state farms

There is a pedagogical institute (2,000 students) and 4 technical colleges (900 students). In 1982 there were 23,500 pupils in elementary and secondary schools

In Jan 1983 there were 500 doctors and 1,400 hospital beds

### Haikakan Sovetakan Sotsialistakan Respublika

HISTORY. On 29 Nov 1920 Armenia was proclaimed a Soviet Socialist Republic The Armenian Soviet Government, with the Russian Soviet Government, was a party to the Treaty of Kars (March 1921), which confirmed the Turkish possession of the former Government of Kars and of the Surmali District of the Government of Yerevan From 1922 to 1936 it formed part of the Transcaucasian Soviet Federal Socialist Republic In 1936 Armenia was proclaimed a constituent republic of the USSR.

AREA AND POPULATION. Armenia covers an area of 29,800 sq. km (11,490 sq. miles) It is bounded in the north by Georgia, in the east by Azerbaijan and in the south and west by Turkey and Iran. It is a very mountainous country with but little forest land, has many turbulent rivers and a highly fertile soil, but subject to drought. In Jan 1985 the population was 3,320,000. Census (1979) 89.7% of the population were Armenians, the rest are Russians (2 3%), Kurds (1 7%), Azerbaijanians (5 3%). The capital is Yerevan. Other large towns are Leninakan (218,000) and Kirovakan (159,000).

AGRICULTURE. The chief agricultural area is the valley of the Arax and the area round Yerevan. Here there are considerable cotton plantations as well as orchards and vineyards. Sub-tropical plants, such as almonds and figs, are also grown. Olive groves and pomegranate plantations occupy large areas, experiments are being made to naturalize cork oak. In the mountainous areas the chief pursuit is livestock raising. In 1913 the total cultivated area of Armenia amounted to 346,000 hectares; in 1940, 434,000, in 1965, 400,000, in 1970, 409,000; in 1983, 447,000.

Output of main agricultural products (in 1,000 tonnes) in 1983 (1913 figures in brackets): Vegetables, 467, sugar-beet, 149 (0); potatoes, 253 (47); fruit, 206, grapes, 139, meat, 100 (19), milk, 541 (129); wool, 4 7 (2 3), and 547m eggs (54m)

Area of irrigated land in Armenia in 1982 was 284,000 hectares

There were, on 1 Jan 1984, 281 collective farms, and these together with the 491 state farms tilled 99 9% of the total cultivated area. Livestock included 300,000 pigs, 900,000 cattle and 2 1m sheep and goats All the state farms and collective farms had been electrified by the end of 1960 There were 13,400 tractors and 1,400 grain and cotton combines in Jan 1984

INDUSTRY. Armenia contains large deposits of copper, zinc, aluminium, molybdenum and other metals. It is also rich in marble, granite, cement and other building materials. The mining of these minerals is becoming more and more important. Among other industries are the chemical, producing chiefly synthetic rubber and fertilizers, and the extraction and processing of building materials such as cement, pumice-stone, tuffs, marble, volcanic basalt and fire-proof clay, ginning-and textile-mills, carpet weaving, food, including wine-making, fruit, meat-canning and creameries. Machine-tool and electrical engineering works have also been established. Among the industrial centres are Yerevan, Leninakan, Alaverdi, Kafan, Kirovakan, Daval, Megri and Oktemberyan. Output of electricity in 1984 was 14,800m. kwh. A chain ('cascade') of 8 hydro-electric stations on the river Razdan, as it falls about 3,300 ft from the mountain lake Sevan to its junction with the Arax, has been completed.

In 1984 there were produced 114,200 centrifugal pumps, 185 4m. electric light bulbs, 1 4m. cu metres ferroconcrete, 3 3m. cu metres carpet, 5 1m watches and clocks, 17 3m. pairs leather footwear, 443 1m. cans of preserves, and 317 3m decalitres of mineral water

There were 1,286,000 industrial and office workers employed in the national economy in 1983

COMMUNICATIONS. Length of railways in Jan. 1984, 760 km; motor roads, 10,400 km (hard surface, 9,000); airlines, 570 km

Newspapers (1983). Out of 87 newspapers 77 appeared in Armenian. Daily circulation of Armenian-language newspapers, 1.4m, other languages, 121,000.

EDUCATION. In 1983-84 there were 600,000 pupils in 1,500 primary and secondary schools; 66 technical colleges with 47,900 students, 13 higher educational institutions with 58,000 students (including correspondence students) Yerevan houses the Armenian Academy of Sciences, 43 scientific institutes, a medi-

cal institute and other technical colleges, and a state university. In Jan 1984, 31 learned institutions with 3,056 scientific staff are under the Academy of Sciences, scientific workers in 101 institutions totalled 20,300.

In Jan 1984 there were 144,000 children in pre-school institutions.

**HEALTH.** In 1983 there were 12,000 doctors and 27,200 hospital beds

quarter of the vineyards of the USSR Bessarabia is also rich in fish in the south sturgeon, mackerel, brill

INDUSTRY. There are canning plants, wine-making plants, woodworking and metallurgical factories, a factory of ferro-concrete building materials, and footwear and textile plants. Moldavia takes third place in the USSR in the production of wine, tobacco and food-canning. Production in 1984 included 102,400 centrifugal pumps, 4.9 culmetres carpet, 17.2m pairs leather footwear, 217.9m bricks, 453,900 tonnes granulated sugar, 1,587m cans of preserves, 8,500m cigarettes and 1.6m culmetres ferroconcrete. Meat and dairy produce are rapidly expanding food industries.

There are lignite, phosphorites, gypsum and valuable building materials. In 1983 there were 1,599,000 industrial and office workers working in the national economy. Electricity generated (1984) 17,100m, kwh

COMMUNICATIONS. Length of railways in Jan 1984, 1,150 km There is direct air communication with Leningrad, Moscow, Kiev, Lvov and across the Black Sea There are 16,300 km of motor roads (11,700 hard surface), and 1,100 km of inland waterways

Newspapers (1983). There were 187 newspapers, 80 in Moldavian Daily circulation of Moldavian-language newspapers, 1,121,000, other languages, 955,000

EDUCATION. In 1983-84 there were 700,000 pupils in 1,700 primary, secondary and special schools, 59,100 students in 52 technical colleges and 53,300 students in 8 higher educational institutions including the state university. A Moldavian Academy of Sciences was established in 1961: it had 17 research institutions and a scientific staff of 1,149 in Jan. 1984. In all, there are 68 learned institutions with 9,600 scientific staff. In Jan. 1984 there were 287,000 children attending preschool institutions.

HEALTH. Moldavia has 800 medical centres, many district hospitals, a state medical institute and 9 medical schools with over 2,500 students. Doctors in 1983 numbered 14,400; hospital beds, 50,200

### Eesti Nõukogude Sotsialistlik Vabariik

HISTORY. The workers' and soldiers' Soviets in Estonia took over power on 8 Nov. 1917, were overthrown by the German occupying forces in March 1918, and were restored to power as the Germans withdrew in Nov. 1918, establishing the 'Estland Labour Commune'. It was overthrown with the assistance of British naval forces in May 1919, and a democratic republic proclaimed In March 1934 this regime was, in turn, overthrown by a fascist *coup* 

The secret protocol of the Soviet-German agreement of 23 Aug. 1939 assigned Estonia to the Soviet sphere of interest An ultimatum (16 June 1940) led to the formation of a government acceptable to the USSR, on 21 July the State Duma proclaimed the establishment of an Estonian Soviet Socialist Republic and applied to join the USSR on 6 Aug the Supreme Soviet accepted the application. The incorporation has been accorded de facto recognition by the British Government, but not by the US Government, which continues to recognize an Estonian consulgeneral in New York

AREA AND POPULATION. Estonia is bounded west and north by the

Baltic, east by the RSFSR and south by Latvia. Area, 45,100 sq. km (17,410 sq miles); population, 1,529,000 (Jan. 1985). Census (1979) 64 7% were Estonians, 27.9% Russians, 2 5% Ukrainians and 1 6% Belorussians. The capital is Tallinn Other large towns are Tartu (109,000), Parnu, Narva (78,000). There are 15 districts, 33 towns and 26 urban settlements

CONSTITUTION AND GOVERNMENT. The Supreme Soviet, elected in 1985, consists of 285 deputies (1 per 10,000 population), 102 are women, 192 Communists A new Constitution was adopted in April 1978

At elections to district, urban and rural Soviets (24 Feb. 1985), out of 11,084 deputies returned 5,526 (49 9%) were women, 6,072 (54 8%) non-Party and 7,499 (67 7%) industrial workers and collective farmers

FINANCE. Budget estimates (in 1m rubles), 1985, 1,560; 1986, 1,624

AGRICULTURE. Agriculture and dairy farming are the chief occupations Area under cultivation was 697,000 hectares in 1913, 918,000 hectares in 1940 and 942,000 hectares in 1983. There were 142 agricultural and 8 fishery collectives and 154 state farms in 1984 using 20,100 tractors and 3,600 grain combines 97% of state farms and 70% of collective farms were receiving electric power.

On 1 Jan. 1985 there were 854,100 head of cattle, 158,000 sheep and goats, and 1,103,300 pigs.

Output of main agricultural products (in 1,000 tonnes) in 1983 (1913 figures in brackets). Meat (slaughter weight), 201 (60), milk, 1,182 (415), eggs, 556m (67m), potatoes, 934 (689), vegetables, 125; fruit, 62

INDUSTRY. Some 22% of the territory is covered by forests which provide good material for its sawmills, furniture, match and pulp industries, as well as wood fuel Since the end of the war, 80,000 hectares have been afforested. 966,700 hectares of marsh land had been reclaimed by 1977

Estonia has rich high-quality shale deposits (particularly in the north-east) which are estimated at 3,700m, tons Shale output was 1 9m tons in 1940 and 27 4m, in 1984. A factory for the production of gas from shale and a pipeline (208 km long) from Kohtla-Jarve supplies shale gas to Leningrad and Tallinn Estonian factories are now turning out agricultural and peat-digging machines, complex control and measuring instruments. The 'Volta' factory in Tallinn produces electric motors

In the neighbourhood of Tallinn, phosphorites have been found, and in 1947 a plant for refining and for the production of super-phosphates was started Estonia also contains valuable peat deposits, and some of her electrical stations work on peat. There are 350 rural electric stations Electricity generated (1984) 18,300m kwh. Output of paper in 1984 was 93,400 tonnes; leather footwear, 5 8m pairs, cans of preserves, 327m., felled timber, 2 1m cubic metres, hosiery, 15 2m pairs

In 1983 there were 712,000 industrial and office workers engaged in the national economy

COMMUNICATIONS. Length of railways in 1984, 1,010 km Estonia has 20 ports, but Tallinn handles four-fifths of the total sea-going transport. Inland waterways total 500 km; motor roads, 27,600 km (hard surface, 25,600 km) Airlines link Tallinn with Moscow, Leningrad, Riga and the Estonian islands

Newspapers (1983). There were 45 newspapers, 32 of them in Estonian. Daily circulation of Estonian-language newspapers, 1,043,000, other languages, 193,000.

EDUCATION. Estonia has retained an 11-year school curriculum, when it was reduced to 10 years elsewhere in the USSR. In 1983-84 pupils in 600 primary,

LATVIA 1261

secondary and special schools numbered 200,000. There were 24,800 students in 6 higher educational establishments, including Tartu (Dorpat) University, tounded in 1632, and 22,800 students in 37 technical colleges

The Estonian Academy of Sciences, founded in 1946, had 24 institutions with 1,072 scientific staff in Jan 1984, in all, 6,900 scientific staff were working in 72 institutions

In Jan 1984 there were 87,000 children attending pre-school institutions

# Latvijas Padomju Socialistiska Republika

HISTORY. In the part of Latvia unoccupied by the Germans, the Bolsheviks won 72% of the votes in the Constituent Assembly elections (Nov 1917) Soviet power was proclaimed in Dec 1917, but was overthrown when the Germans occupied all Latvia (Feb 1918). Restored when they withdrew (Dec 1918), it was overthrown once more by combined British naval and German military forces (May-Dec 1919), and a democratic government set up This régime was in turn replaced when a fascist coup took place in May 1934

The secret protocol of the Soviet-German agreement of 23 Aug. 1939 assigned Latvia to the Soviet sphere of interest. An ultimatum (16 June 1940) led to the formation of a government acceptable to the USSR On 21 July a People's Diet proclaimed the establishment of the Latvian Soviet Socialist Republic and applied to join the USSR, whose Supreme Soviet accepted the application on 5 Aug. The incorporation has been accorded de facto recognition by the British Government, but not by the US Government, which continues to recognize the Chargé d'Affaires in Washington, D C

AREA AND POPULATION. Latvia is bounded north by Estonia and the Baltic Sea, west by the Baltic, south by Lithuania and Belorussia and east by the RSFSR Latvia has a total area of 63,700 sq km (25,590 sq miles) Population, Jan 1985, 2,604,000, of whom (1979 census) 53 7% are Latvians and 32 8% Russians There are 26 districts, 56 towns and 37 urban settlements

The chief town is Riga (the capital), other principal towns are Daugavpils (Dvinsk) (122,000), Liepāja (109,000), Jelgava (Mitau) (69,000) and Ventspils (Windau).

CONSTITUTION AND GOVERNMENT. The Supreme Soviet, elected in 1985, consists of 325 deputies (1 per 10,000 population), 115 are women, 219 Communists. A new Constitution was adopted in April 1978

At elections to district, urban and rural Soviets (24 Feb. 1985), of 23,385 deputies returned, 11,672 (49 9%) were women, 12,883 (55 1%) non-Party and 15,781 (67 5%) industrial workers and collective farmers

AGRICULTURE. Latvia is now no longer mainly an agricultural country The urban population, 35% of the total in 1939, was 70% in Jan 1984

Latvian forest lands, state and private (2 4m hectares), produced in 1937–38,

3 4m cu metres of timber, 1983 output, 4 2m cu metres

Area under cultivation was 1.4m. hectares in 1913, 2m in 1940, 1.7m in 1984 1.8m. hectares of marsh land have been drained (1983).

Cattle breeding and dairy farming are the chief agricultural occupations Oats,

barley, rye, potatoes and flax are the main crops

After the establishment of the Soviet regime about 960,000 hectares were distributed among the landless peasants or those with very small holdings. On 1 Jan 1984 there were 244 state farms and 319 collective farms. There were 35,100 tractors and 7,400 grain combine harvesters. By 1 Jan 1964, all state farms and collective farms were using electric power.

Livestock (1 Jan. 1985). Cattle, 1 5m (1939 1 3m), sheep and goats, 192,000

(1939 1 5m), pigs, 1 8m (1939 891,500).

Output of main agricultural products (in 1,000 tonnes) in 1983 (1913 figures in brackets) Meat (slaughter weight), 304 (122), milk, 1,754 (673), eggs, 823m (136m.); sugar-beet, 387 (0), potatoes, 1,456 (645), vegetables, 243, fruit, 103, wool, 0 4 (1 4), flax fibre, 6 (21)

INDUSTRY. Latvia is the main producer of electric railway passenger cars and long-distance telephone exchanges in the USSR, fourth in output of paper and woollen goods, fifth of sawn timber, sixth of mineral fertilizers.

Industrial output in 1984 (in 1,000 tons) included: Paper, 167, hosiery, 75m pairs; knitwear, 44m. garments, leather footwear, 10 4m. pairs, radios, 2 1m, washing machines, 634,000; ferroconcrete, 1.5m. cu. metres, granulated sugar, 246; cans of preserves, 422m. Electricity generated (1984) 3,800m kwh

Peat deposits extend over 645,000 hectares or about 10% of the total area, and it is estimated that total deposits are 3,000-4,000m. tons, output, 1971, 2 3m. tons. There are also gypsum deposits; amber is frequently found in the coastal districts. In 1983 industrial and office workers numbered 1,221,000

COMMUNICATIONS. In Jan. 1984 the length of railways was 2,380 km, and motor roads, 26,100 km (hard surface, 18,200 km) Riga is the largest port in the Baltic after Leningrad.

Newspapers (1983). There were 107 newspapers (64 in Lettish) Daily circulation of Lettish-language newspapers, 1 2m., other languages 486,000

RELIGION. The Latvian Lutheran Church numbered 600,000 members in 1956.

EDUCATION. In 1983-84 there were 900 primary and secondary schools, with a total of 400,000 pupils: 122,000 children attended pre-school institutions. Ten places of higher education had 45,800 students, 56 technical colleges had 40,500 students; there were also 21 music and art schools, 3 teachers' training colleges and an agricultural academy in 1946 an Academy of Sciences was opened which in Jan 1984 had 16 research institutes with a staff of 1,598 scientific workers; there were over 13,200 scientific workers in 101 research institutions.

**HEALTH.** There were 12,000 doctors and 35,500 hospital beds in 1983

## SOVIET CENTRAL ASIA

Soviet Central Asia embraces the Kazakh Soviet Socialist Republic, the Uzbek Soviet Socialist Republic, the Turkmen Soviet Socialist Republic, the Tadzhik Soviet Socialist Republic and the Kiighiz Soviet Socialist Republic.

Turkestan (by which name part of this territory was then known) was conquered by the Russians in the 1860s. In 1866 Tashkent was occupied and in 1868 Samarkand, and subsequently further territory was conquered and united with Russian Turkestan. In the 1870s Bokhara was subjugated, the emir, by the agreement of 1873, recognizing the suzerainty of Russia. In the same year Khiva became a vassal state to Russia. Until 1917 Russian Central Asia was divided politically into the Khanate of Khiva, the Emirate of Bokhara and the Governor-Generalship of Turkestan.

In the summer of 1919 the authority of the Soviet Government became definitely established in these regions. The Khan of Khiva was deposed in Feb. 1920, and a People's Soviet Republic was set up, the medieval name of Khorezm being revived. In Aug. 1920 the Emir of Bokhara suffered the same fate, and a similar regime was set up in Bokhara. The former Governor-Generalship of Turkestan was constituted an Autonomous Soviet Socialist Republic within the RSFSR on 11 April 1921.

In the autumn of 1924 the Soviets of the Turkestan, Bokhara and Khiva Repub-

lics decided to redistribute the territories of these republics on a nationality basis; at the same time Bokhara and Khiva became Socialist Republics. The redistribution was completed in May 1925, when the new states of Uzbekistan, Turkmenistan and Tadzhikistan were accepted into the USSR as Union Republics. The remaining districts of Turkestan populated by Kazakhs were united with Kazakhstan which was established as an ASSR in 1925 and became a Union Republic in 1936. Kirghizia, until then part of the RSFSR, was established as a Union Republic in 1936.

## KAZAKHSTAN

# Kazak Soviettik Sotzialistik Respublikasy

HISTORY. On 26 Aug 1920 Uralsk, Turgai, Akmolinsk and Semipalatinsk provinces formed the Kirgiz (in 1925 renamed Kazakh) Autonomous Soviet Socialist Republic within the RSFSR It was made a constituent republic of the USSR on 5 Dec 1936 To this republic were added the parts of the former Governorship of Turkestan inhabited by a majority of Kazakhs It consists of the following regions Aktyubinsk, Alma-Ata, Chimkent, Dzhambul, Dzhezkazgan, East Kazakhstan, Guryev, Karaganda, Kokchetav, Kustanai, Kzyl-Orda, Mangyshlak, North Kazakhstan, Pavlodar, Semipalatinsk, Taldy-Kurgan, Tselinograd, Turgai, Uralsk

AREA AND POPULATION. Kazakhstan is bounded on the west by the Caspian Sea and the RSFSR, on the east by China, on the north by the RSFSR and on the south by Uzbekistan and Kirghizia. The area of the republic is 2,717,300 sq km (1,049,155 sq miles). It is the next in size to the RSFSR, is far larger than all the other Central Asian Soviet Republics combined and stretches nearly 3,000 km from west to east and over 1,500 km from north to south Population (Jan. 1985) 15,858,000, of whom 55% live in urban areas. The Kazakhs form 36%, Russians 40.8% and Ukrainians 6.1% of the population (1979 census), as a result of the industrialization of the country since 1941 and the opening of virgin lands since 1945. The population includes over 100 nationalities.

The capital is Alma-Ata, formerly Verny, other large towns are Karaganda, Semipalatinsk, Chimkent and Petropavlovsk In all there are 82 towns, 197 urban settlements and 221 rural districts

CONSTITUTION AND GOVERNMENT. The Supreme Soviet, elected in 1985, consists of 510 deputies (1 per 20,000 population), 183 are women, 336 Communists A new Constitution was adopted in April 1978.

At elections to the regional, district, urban and rural Soviets (24 Feb. 1985), out of 130,130 deputies returned, 64,662 (49 7%) were women, 75,523 (58%) non-Party and 89,544 (68 8%) industrial workers and collective farmers.

President, Presidium of the Supreme Soviet S Z Mukashev. Chairman, Council of Ministers N A. Nazarbaev First Secretary, Communist Party D A Kunaev

FINANCE. The budget (in 1 m rubles) balanced as follows 1985, 10,982, 1986, 11,316

AGRICULTURE. Kazakh agriculture has changed from primarily nomad

cattle breeding to production of grain, cotton and other industrial crops. In 1983 the crop area was 35 9m. hectares—over 16% of the total cultivated area of the USSR (1913, 4 2m.; 1940, 6 8m.)

2,047,000 hectares of land have an irrigation network.

The 'Ukrainka' winter wheat has been transformed into a spring wheat suitable for cultivation in Kazakhstan. Tobacco, rubber plants and mustard are also cultivated Kazakhstan has rich orchards and vineyards; 27,000 hectares were under vines and 95,000 under orchards in 1983 Between 1954 and 1959, over 23m hectares of virgin and long fallow land were opened up, 544 new state grain farms being organized for the purpose Grain deliveries to the state were 10 5m tons in 1960, 2 4m. in 1965, 13 4m in 1970, 5 1m in 1975, 8 2m in 1977, 16,784 in 1978

Kazakhstan is noted for its livestock, particularly its sheep, from which excellent quality wool is obtained. The Akharomerino is a newly developed crossbreed of merino sheep and the wild Akhar mountain ram. Livestock on 1 Jan. 1985 included 9m. cattle, 36m. sheep and goats and 2.7m. pigs.

There were, on 1 Jan 1984, 395 collective farms and 2,120 state farms with 243,200 tractors and 116,300 grain combine harvesters. There were 5,293 rural

power stations of 307,800 kwh capacity

Output of main agricultural products (in 1m tonnes) in 1983 (1913 figures in brackets). Meat (slaughter weight), 1 2 (0 44), milk, 4 6 (0 85), eggs, 3,586m (233m), wool, 0 1 (0 04), sugar-beet, 1 6 (0), cotton, 0 3 (0 015), potatoes, 1 9 (0 18), vegetables, 1 2, fruit, 0 3

INDUSTRY. Kazakhstan is extremely rich in mineral resources. Coal and tungsten in Karaganda (in the centre), oil along the river Emba (in the west), copper, lead and zinc—Kazakhstan contains about one-half of the total deposits of these three metals contained in the USSR—Iceland spar (in the south), nickel and chromium in the Kustanai and Semipalatinsk regions, molybdenum and other minerals.

In 1943 big deposits of manganese were found in Eastern Kazakhstan, new coal seams were also discovered there. In South Kazakhstan new copper and bauxite deposits have been found.

Coal, oil, non-ferrous metallurgy, heavy engineering and chemical industries have brought Kazakhstan to the third place among the industrial republics of the USSR Production (1m tonnes) in 1984 included iron ore, 24 0, sulphuric acid, 17, ferroconcrete, 6 3m cu metres, leather footwear, 31 3m pairs, rolled metal, 4 0, cans of preserves, 391 6, coal, 125 5, oil, 20 6, textiles, 244 9 sq. metres, knitwear, 97 9, hosiery, 72 9m pairs The Leninogorsk and Chimkent lead plants, the Balkhash, Irtysh and Karaskpai copper-smelting works and others supply the country with non-ferrous metals. A meat-packing plant has been built in Semi-palatinsk, a fish cannery in Guryev, a chemical plant in Aktyubinsk, a tractor works at Pavlodar, and a superphosphate plant in Dzhambul The oil industry in Emba and Aktyubinsk yields high-quality aviation oil

Aviation plays an important part in agriculture About 14m hectares were in 1984 treated from the air (destruction of pests, surface feeding of sugar-beet plantations, pollination of orchards, etc.).

Among recent enterprises are a large textile combine at Kustanai, hosiery factories at Djezkazgan, Leninogorsk and Aktyubinsk, a sugar factory at Aksu, meat canneries at Djetygar and Kzyl-Orda.

Electric power output in 1984 was 74,600m kwh

There were, in 1983, 6,349,000 industrial and office workers in the national economy

## COMMUNICATIONS

Roads. In 1984 there were 117,400 km of motor roads (89,400 km hard surface)

Railways. A 430-km railway line between the settlements of Mointi and Chu in Kazakhstan to complete the Transkazakh trunk line, connecting Petropavlovsk,

Akmolinsk, Karaganda and Balkhash, was opened in 1953. The new line links the Transkazakh trunk line with the Turkestan-Siberian railway carrying Karaganda coal to South Kazakhstan The Akmolinsk-Pavlodar railway (438 km), a section of the South Siberian line, was opened in Dec. 1953. Other lines in operation are Dzhambul-Chalaktan, Akmolinsk-Kartaly, Uralsk-Iletsk, Guriev-Kandagach In 1984 the total length of railways in operation was 14,310 km. Over 600 km of narrow-gauge line and 700 km of broad-gauge line were built in the virgin lands area in 1951-57.

Inland waterways. Total length 5,500 km

Newspapers (1983) Of 444 newspapers, 165 were in the Kazakh language Daily circulation of Kazakh-language newspapers, 18m, other languages, 37m

EDUCATION. In 1983-84 there were 3 3m pupils at 8,700 elementary and secondary schools, 242 technical colleges with 276,000 students, 55 higher educational institutions with 281,800 students, and 207 research institutes with 39,600 scientific personnel. The Kazakh Academy of Sciences, founded in 1945, had, in 1983, 31 institutions, the scientific staff of which numbered 4,225 950,000 children were attending pre-school institutions.

HEALTH. In 1983 there were 55,000 doctors and 207,500 hospital beds

AGRICULTURE. The main occupation of the people is agriculture, based on irrigation. Turkmenistan produces cotton, wool, Astrakhan fur, etc. It is also famous for its carpets, and produces a special breed of Turkoman horses and the famous Karakul sheep.

There were 343 collective farms and 124 state farms in 1984, with 39,700 tractors and 1,300 grain combines. There were 608 rural power stations.

A considerable area is under Egyptian cotton, and from it has been evolved an original Soviet long fibred cotton.

original Soviet long-fibred cotton

The main grain grown is maize Sericulture, fruit and vegetable growing are also important, dates, olives, figs, sesame and other southern plants are grown. There is fishing in the Caspian. 976,000 hectares were under cultivation in 1983 (1913, 318,000, 1940, 411,000).

Between 1958 and 1970 the Kara-Kum Canal was extended to 860 km In 1971 the fourth section, to reach the Caspian, was begun to reach 1,000 km By 1982 over 1,011,000 hectares had been irrigated

Livestock on 1 Jan. 1985. Cattle, 704,100, pigs, 210,100, sheep and goats, 4 4m Output of main agricultural products (in 1,000 tonnes) in 1983 (1913 figures in brackets): Meat (slaughter weight), 87 (58), milk, 337 (63), eggs, 311m. (18m.), cotton, 1,231 (69), vegetables, 273, fruit, 34, grapes, 73, wool, 14 6 (9 7)

INDUSTRY. Turkmenistan is rich in minerals, such as ozocerite, oil, coal, sulphur and salt. Industry is being developed, and there are now chemical, tailoring, textile, light, food, agricultural implements, cement and other factories, oil refineries, as well as ore-mining

In the Kara-Kum Desert deposits of magnesium, minerals and coal have been discovered, as well as some 50 new saltmines. Here a new oil town, Nebit-Dag, has sprung up On the Kara-Bogaz bay a sulphate industry has been developed Industrial output in 1984 included 6 7m sq. metres window glass, 355,000 tonnes cotton fibre, 5 3m. pairs hosiery, 4 3m pairs leather footwear, 131m bricks Electric power output was 10,079m. kwh in 1984

In 1983 there were 776,000 industrial and office workers in the national economy.

COMMUNICATIONS. Length of motor roads in 1984, 19,800 km (14,400 km hard surface). Motor communication exists between Ashkhabad and Meshed (Iran).

Length of railways, 2,120 km The line Chardzhou-Kungrad crosses the Chardzhou and Tashauz regions of Turkmenia and runs across Uzbekistan Another line connects Chardzhou and Urgench. Inland waterways, 1,300 km.

Airlines connect Leninsk and Tashauz, and Ashkhabad and remote areas in the west, north and east

Newspapers (1983). Of 69 newspapers, 56 were in the Turkmen language. Daily circulation of Turkmenian-language newspapers, 780,000, other languages, 188,000.

EDUCATION. In 1983-84 there were 1,900 primary and secondary schools with 800,000 pupils, 8 higher educational institutions with 39,400 students, 35 technical colleges with 35,700 students, and 11 music and art schools. The Turkmen Academy of Sciences directs the work of 14 learned institutions with a staff of

1,043 scientific staff; there were 58 research institutions in all, with 5,300 research workers, in 1984. A Turkmenian State University was opened in 1951. In Jan. 1984, 144,000 children were attending pre-school institutions.

HEALTH. In 1983 there were 9,500 doctors and 32,600 hospital beds

## UZBEKISTAN

# Ozbekiston Soviet Sotsialistik Respublikasy

HISTORY. In Oct. 1917 the Tashkent Soviet assumed authority, and in the following years established its power throughout Turkestan. The semi-independent Khanates of Khiva and Bokhara were first (1920) transformed into People's Republics, then (1923–24) into Soviet Socialist Republics and finally merged in the Uzbek SSR and other republics.

The Uzbek Soviet Socialist Republic was formed on 27 Oct 1924 from lands formerly included in Turkestan. It includes a large part of the Samarkand region, the southern part of the Syr Darya, Western Ferghana, the western plains of Bukhara, the Kara-Kalpak ASSR and the Uzbek regions of Khorezm. In May 1925 Uzbekistan, by the decision of the Congress of Soviets of the USSR, was accepted as one of the constituent republics of the Soviet Union.

AREA AND POPULATION. Uzbekistan is bordered on the north by the Kazakh Soviet Socialist Republic, on the east by the Kirghiz Soviet Socialist Republic and the Tadzhik Soviet Socialist Republic, on the south by Afghánistán and on the west by the Turkmen Soviet Socialist Republic. The Uzbeks, who form 68 7% (1979 census) of the population, were the ruling race in Central Asia until the arrival of the Russians during the third quarter of the 19th century. The several native states over which Uzbek dynasties formerly ruled were founded in the 15th century upon the ruins of Tamerlane's empire. The Uzbek speak Jagatai Turkish, which is related to Osmanli and Azerbaijan Turkish; many are Sunni Moslems Russians numbered (census 1979) 10 8%, Tadzhiks, 3 9%, Tatars 4 2%.

The area of Uzbekistan is 447,400 sq. km (172,741 sq. miles). The population in

The area of Uzbekistan is 447,400 sq km (172,741 sq. miles) The population in Jan 1985 was 17,989,000 (42% urban) The country comprises the following regions Andizhan, Bukhara, Dzhizak, Ferghana, Kashkadar, Khorezm, Namangan, Navoi, Samarkand, Surkhan-Darya, Syr-Darya, Tashkent and the Autonomous Soviet Socialist Republic of Kara Kalpakia The capital of the Republic is Tashkent; other large towns are Samarkand, Andizhan, Namangan There are 109 towns, 93 urban settlements and 156 rural districts.

On 19 Sept 1963 the Supreme Soviet of the USSR confirmed decisions of the Supreme Soviets of Kazakhstan and Uzbekistan, transferring over 40,000 sq. km from the former to the latter to ensure more efficient use of the 'Hungry Steppe'

CONSTITUTION AND GOVERNMENT. The Supreme Soviet, elected in 1985, consists of 510 deputies (1 per 15,000 population), 183 are women, 346 Communists A new Constitution was adopted in April 1978.

At elections to the regional, district, urban and rural Soviets (24 Feb. 1985), of 104,512 deputies returned, 51,640 (49 4%) were women, 59,140 (56 6%) non-Party and 72,417 (69 3%) industrial workers and collective farmers.

President, Presidium of the Supreme Soviet A Salimov Chairman, Council of Ministers G Kh Kadyrov First Secretary, Communist Party I B Usmankhodjayev

FINANCE. Budget estimates (in 1m rubles), 1985, 7,780; 1986, 8,125

AGRICULTURE. Uzbekıstan ıs a land of intensive farmıng, based on artificial

irrigation It is the chief cotton-growing area in the USSR and the third in the world. About 3 7m. hectares of collective and state farmland have irrigation

networks, totalling over 150,000 km in length, and all are in full use.

In 1939 the Ferghana Canal (270 km) was built During 1940, among the irrigation canals completed were: the North Ferghana Canal (165 km), and Andreyev South Ferghana Canal (108 km) and the first section of the Tashkent Canal (63 km). A canal from the Amu-Darya to Bokhara across the Kzyl-Kum and Ust-Urt deserts (180 km) was completed in 1965 A 200-km canal joining the river Zeravshan with the Kashka Darya at the village of Paruz was completed in Aug 1955, it is part of the Iski-Angara Canal The first section (93 km) of a canal irrigating the southern 'Hungry Steppe' was opened in 1960, 500,000 hectares of this desert were under cultivation in 1967

Agriculture flourishes, particularly in the well-watered, warm, rich oases areas, such as the Ferghana valley, Zeravshan, Tashkent and Khorezm, where cotton, fruit, silk and rice are cultivated. In the higher-lying plains grain is grown, the wide desert and semi-desert area of Western Uzbekistan is mainly given to pasture land and the breeding of the Karakul sheep, there is a Karakul institute at Samarkand

Orchards occupied 213,000 hectares and the vineyards 118,000 hectares in 1982. The Central Asian Branch of the Scientific Research Institute of Viticulture in Tashkent has produced new frost resistant grapes by crossing the wild Amur grape with Central Asian and European types. In 1984 there were 855 collective farms and 1,136 state farms, with 169,700 tractors and 10,900 cotton picking and grain combines. Ploughing, cotton-sowing and cultivation are completely mechanized; cotton picking over 46%

Uzbekistan provides 65% of the total cotton, 50% of the total rice and 60% of the total lucerne grown in the USSR. The area under crops was 2,189,000 hectares in

1913, 3,036,000 hectares in 1940 and 4 118m hectares in 1983

Livestock on 1 Jan 1985: 40m cattle, 9.4m sheep and goats and 719,100

pigs.

Output of main agricultural products (in 1,000 tonnes) in 1983 (1913 figures in tons in brackets). Meat (slaughter weight), 389 (89); milk, 2,533 (231), eggs, 1,751m. (87m.), wool, 25.5 (5 3); cotton, 5,931 (517), potatoes, 373 (46); vegetables, 2,630, fruit, 951; grapes, 689; wool, 25 5 (5 3)

Afforestation over an area of 50,000 hectares has been carried out to protect the Bokhara and Karakul oases from the advancing Kzyl-Kum sands and to stop the sand-drifts in a number of districts of Central Ferghana.

INDUSTRY. Of its mineral resources, in addition to oil and coal, copper and building materials and ozocerite deposits are now also exploited. New very rich coal deposits were discovered in 1944 and 1947 near Tashkent

There are over 1,600 factories and mills. They include a factory of agricultural machinery (in Tashkent), a cement factory, a sulphur-mine, an oxygen factory, a paper-mill, a leather factory, textile-mills, clothing factories, iron and steel works, the Chirchik electro-chemical plant, a superphosphate plant in Kokand and oil refineries, coalmines, etc. Output in 1984 included 26,100 tractors, 1,846m bricks, 319m. sq. metres; cotton fibre, 135 9m sq. metres silk fabrics, 34m. pairs leather footwear, 802m. cans of preserves, 53 2m. pairs hosiery. Gold is being worked at Muruntau, Chadak and Kochbulak.

The Tashkent power station (2m. kw.) was completed in 1971 Power output in 1984 was 44,600m. kwh (481m. kwh. in 1940). Two natural-gas pipelines (Djai-kak-Tashkent, Ferghana-Kokand) and a third from Bokhara to the Urals are operating. Natural gas output (1976) was 36,100m cu metres.

In 1983 there were 4,698,000 industrial and office workers in the national economy.

COMMUNICATIONS. The total length of railway in 1984 was 3,480 km. Branches lead to Karshe-Kitab, Kerki-Termez, Jalai-Abad, Namangan, Andijan and other centres. In 1947-55 a new line was built from Chardzhou to Kungrad.

The Great Uzbek Highway was completed in April 1941. Total length of motor

roads in 1984 was 69,000 km (hard surface, 57,200 km). Inland waterways, 1,100 km.

An airline, serving all of Central Asia, is most developed in Uzbekistan

Newspapers (1983) There were 195 newspapers in the Uzbek language out of a total of 288 Daily circulation of Uzbek-language newspapers, 3 9m, other languages, 1 1m

EDUCATION In 1983-84 there were 9,400 elementary and secondary schools with 4 3m pupils, 42 higher educational establishments with 287,800 students and 238 technical colleges with 261,700 students Uzbekistan has an Academy of Sciences with 30 institutions and 3,993 academic staff, there were 188 research institutes with a scientific staff of 37,300 in Jan. 1984. There are universities and medical schools in Tashkent and Samarkand In Jan 1984, 1,102,000 children were attending pre-school institutions

The Uzbek Arabic script was in 1929 replaced by the Latin alphabet which in

1940 was superseded by one based on the Cyrillic alphabet

HEALTH In 1983 there were 55,500 doctors and 207,100 hospital beds

## **TADZHIKISTAN**

# Respublikai Sovieth Sotsialistii Tojikiston

HISTORY. The Tadzhik Soviet Socialist Republic was formed from those regions of Bokhara and Turkestan where the population consisted mainly of Tadzhiks It was admitted as a constituent republic of the Soviet Union on 5 Dec. 1929

AREA AND POPULATION. Tadzhikistan is situated between 39° 40' and

36° 40′ N. lat. and 67° 20′ and 75° E. long., north of the Oxus (Amu-Darya). On the west and north it is bordered by Uzbekistan and by the Kirghiz Soviet Socialist Republic; on the east by Chinese Turkestan and on the south by Afghánistán It includes three regions (Leninabad, Kurgan-Tyube and Kulyab) and 43 rural districts. 18 towns and 49 urban settlements, together with the Gorno-Badakhshan Autonomous Region. Its highest mountains are Communism Peak (7,495 metres) and Lenin Peak (7,127 metres) Even the lowest valleys in the Pamirs are not below 3,500 metres above sea-level. The huge mountain glaciers are the source of many rapid rivers—the tributaries of the Amu-Darya, which flows from east to west along the southern border of Tadzhikistan. About 58.8% of the population are Tadzhiks. They speak an Iranian dialect, little different from Persian, and they are considered to be the descendants of the original Aryan population of Turkestan Unlike the Persians, the Tadzhiks are mostly Sunnis. Of the rest, 22 9% are Uzbeks living in the north-west of the republic Russians and Ukrainians number 10 4% (1979 census).

The area of the territory is 143,100 sq. km (55,240 sq. miles) Population (Jan 1985), 4,500,000. The capital is Dushanbe. Other large towns are Leninabad (143,000), Kurgan-Tyube, Kulyab.

CONSTITUTION AND GOVERNMENT. The Supreme Soviet, elected in 1985, consists of 350 deputies (1 per 5,000 population), 126 are women and 238 Communists A new Constitution was adopted in April 1978.

At elections to the district, urban and rural Soviets and the regional Soviet of Gorno-Badakhshan (24 Feb 1985), out of 27,754 deputies returned 13,865 (50 0%) were women, 15,870 (57 2%) non-Party and 19,486 (70 2%) industrial workers and collective farmers

Chairman, Presidium of the Supreme Soviet G Pallaev Chairman, Council of Ministers 1 Khaeev. First Secretary, Communist Party K M Makhkamov

FINANCE. Budget estimates (in 1m. rubles), 1985, 1,626, 1986, 1,714

AGRICULTURE. The occupations of the population are mainly farming, horuculture and cattle breeding. Area under crops in 1983 was 809,000 hectares (1913, 494,000, 1940, 807,000). Wine production in 1982 was 5.4m decalitres.

There are 43,000 km of irrigation canals, the irrigation networks cover about 634,000 hectares of land

Tadzhikistan grows many varieties of fruit, including apricots, figs, olives, pomegranates, a local variety of lemons and oranges, and in the south sugar-cane has been grown. Even on the highest mountain plateaux of the Pamirs, 'the roof of the world', the biological station of Tadzhikistan (3,860 metres above sea-level) has succeeded in raising crops of 60 varieties of barley, 10 varieties of oats, 4 of wheat, as well as vegetables Eucalyptus and geranium are grown for the perfumery industry Jute, rice and millet are also grown.

Tadzhikistan contains rich pasture lands, and cattle breeding is a very important branch of its agriculture. Livestock on 1 Jan 1985 1 3m cattle, 3 2m sheep and goats and 183,600 pigs.

The Gissar sheep is famous in the south for its meat and fat, the Karakul sheep is widely bred for its wool

There were 158 collective farms (all with electric power) and 284 state farms in 1984, with 33,500 tractors and 1,500 cotton and grain combine harvesters.

Output of main agricultural products (in 1,000 tonnes) in 1982 (1913 figures in tons in brackets): Meat (slaughter weight), 102 (48), milk, 528 (102); eggs, 397m. (20m.); wool, 5 (2 1); cotton, 880 (32); potatoes, 158 (10); vegetables, 410; fruit, 261; grapes, 218.

INDUSTRY. The original small-scale handicraft industries have been replaced by big industrial enterprises, including mining, engineering, food, textile, clothing and silk factories.

There are rich deposits of brown coal, lead, zinc and oil (in the north of the republic), rare elements, such as uranium, radium, arsenic and bismuth. Asbestos, mica, corundum and emery, lapis lazuli, potassium salts, sulphur and other minerals have been found in other parts of the republic

Industrial output in 1984 included 411,000 tonnes mineral fertilizer, 1,046,000 cu. metres ferroconcrete, 303 8m bricks, 258,900 tonnes cotton fibre, 12 1m

items knitwear, 32 8m. pairs hosiery, 8 8m pairs leather footwear.

There are 80 big electrical stations. The hydro-electric Varzob station began to operate in 1954, that at Kairak-Kum on the Syr Darya River was completed in 1957 and 2 more at Murgab in 1964. Output in 1984 was 15,172m kwh. (in 1940, 62m kwh.).

Construction of an electro-chemical combine, the largest in the USSR, has begun in the Yavan steppe in south Tadzhikistan, and the 3 2m kw. power station in the upper reaches of the Vakhsh River was near completion in 1979

In 1983 there were 1,037,000 industrial and office workers in the national economy

### **COMMUNICATIONS**

Roads. In Jan. 1984 there were 19,800 km of motor roads Of these, 16,000 km are hard surface, including the Osh-Khorog (700 km), Yasui-Bazar-Charm (107 km) and Dushanbe-Khorog in the Pamirs (557 km) roads

Railways. A railway line between Termez and Dushanbe (258 km) connects the republic with the railway system of the USSR. The mountainous nature of the republic makes ordinary railway construction difficult, accordingly 345 km of narrow gauge railways have been constructed (Kurgan-Tyube-Piandzh and Dushanbe-Kurgan-Tyube, connecting Dushanbe with the cotton-growing Vakhsh valley are particularly important). Length of railways, 1984, 470 km

Aviation. Dushanbe is connected by air with Moscow, Tashkent, Baku and the regional and district centres of the republic.

Shipping. A steamship line on the Amu-Darya runs between Termez, Sarava and Jilikulam on the river Vakhsh (200 km)

Newspapers (1983) There were 67 newspapers, 57 in Tadzhik. Daily circulation of Tadzhik-language newspapers, 1,000,000, other languages, 334,000

EDUCATION. In 1983-84 there were 3,100 primary and secondary schools with 1 2m pupils, 10 higher educational institutions with 58,100 students and 38 technical colleges with 38,700 students, the Tadzhik state university had 12,467 students. In Jan 1984, 121,000 children were attending pre-school institutions. In 1951 an Academy of Sciences was established; it has 17 institutions, the scientific staff of which numbers 1,360, there are 61 research institutions in all, with 8,200 scientific personnel in Jan 1984 The Pamir research station is the highest altitude meteorological observatory in the world

In 1940 a new alphabet based on Cyrillic was introduced

**HEALTH.** There are 277 hospitals as well as maternity homes, clinics and special institutes to combat tropical diseases. There were 11,100 doctors in 1983 and 45,000 hospital beds

# GORNO-BADAKHSHAN AUTONOMOUS REGION

Comprising the Pamir massif along the borders of Afghánistán and China, the region was set up on 2 Jan. 1925. Area, 63,700 sq. km (24,590 sq. miles), population (Jan 1984), 143,000 (83% Tadjiks, 11% Kirghiz). Capital, Khorog (14,800). The inhabitants are predominantly Ismaili Moslems.

Mining industries are developed (gold, rock-crystal, mica, coal, salt). Wheat,

fruit and fodder crops are grown and cattle and sheep are bred in the western parts In 1983 there were 71,300 cattle, 347,500 sheep and goats. Total area under cultivation, 18,400 hectares

In 1981–82 42,900 pupils were attending 266 schools.

## **KIRGHIZIA**

# Kyrgyz Sovietik Sotsialistik Respublikasy

HISTORY. After the establishment of the Soviet regime in Russia, Kirghizia became part of Soviet Turkestan, which itself became an Autonomous Soviet Socialist Republic within the RSFSR in April 1921. In 1924, when Central Asia was reorganized territorially on a national basis, Kirghizia was separated from Turkestan and formed into an autonomous region within the RSFSR. On 1 Feb 1926 the Government of the RSFSR transformed Kirghizia into an Autonomous Soviet Socialist Republic within the RSFSR, and finally in Dec. 1936. Kirghizia was proclaimed one of the constituent Soviet Socialist Republics of the USSR.

AREA AND POPULATION. The territory of Kirghizia covers 198,500 sq km (76,460 sq miles), and its population in Jan 1985 was 3,976,000 The republic comprises 3 regions Issyk-Kul, Naryn and Osh There are 18 towns, 31 urban settlements and 40 rural districts Its capital is Frunze (formerly Pishpek) Other large towns are Osh (188,000), Przhevalsk (56,000), Kyzyl-Kiya, Tokmak

Kirghizia is situated on the Tien-Shan mountains and bordered on the east by China, on the west by Kazakhstan and Uzbekistan, on the north by Kazakhstan and in the south by Tadzhikistan The Kirghizians are of Turkic origin and form 47 9% (1979 census) of the population, the rest are Russians (25 9%), Ukrainians (3 1%), Uzbeks (12 1%) and Tatars (2%)

CONSTITUTION AND GOVERNMENT. The Supreme Soviet, elected in 1985, consists of 350 deputies (1 per 5,000 population), 127 are women, 235 Communists A new Constitution was adopted in April 1978

At elections to the regional, district, urban and rural Soviets (24 Feb. 1985), of the 28,014 deputies returned, 14,043 (50 1%) were women, 15,823 (56 5%) non-Party and 19,403 (69 2%) industrial workers and collective farmers

Chairman, Presidium of the Supreme Soviet T Kh Koshoev Chairman, Council of Ministers A Duisheev. First Secretary, Communist Party A M. Masaliev.

FINANCE. Budget estimates (in 1 m rubles), 1985, 1,944, 1986, 2,146

AGRICULTURE. Kirghizia is famed for its livestock breeding. On 1 Jan. 1985 there were 1,051,200 cattle, 319,100 pigs, 10 5m sheep and goats. Yaks are bred as meat and dairy cattle, and graze on high altitudes unsuitable for other cattle Crossed with domestic cattle, hybrids are produced much heavier than ordinary Kirghiz cattle and giving twice the yield of milk. The Kirghizian horse is famed for its endurance, but it is of small stature, it has in recent years been crossed with Don, Arab and other breeds.

On 1 Jan. 1984 there were 181 collective and 255 state farms. Area under crops (1984), 1-3m. hectares (1913, 640,000, 1940, 1,056,000). There were 27,100 tractors and 5,000 grain combine harvesters in 1984, nearly all collective and state farms received electric power

Kirghizia raises wheat sufficient for its own use and other grains and fodder, par-

ticularly lucerne; also sugar-beet, hemp, kenaf, kendyr, tobacco, medicinal plants and rice Sericulture, fruit, grapes and vegetables and bee-keeping are major branches of Kirghiz agriculture. Agriculture is highly mechanized, nearly all the area under crops is worked by tractors. In 1983 irrigation networks in collective and state farms covered 974,000 hectares; practically all were in use. A canal in the western Tien-Shan ranges and a reservoir in the Urto-Tokoi mountains are being constructed.

The health resorts of Jety-Oguz (7,200 ft) and Jalal-Abad are famous for their mild alpine climate and mineral springs

Output of main agricultural products (in 1,000 tonnes) in 1983 (1913 figures in tons in brackets) Meat (slaughter weight), 170 (39), milk, 706 (91), eggs, 461m (19m), wool, 35 2 (4 7); cotton, 53 (28), sugar-beet, 346 (0), potatoes, 309 (19), vegetables, 458, fruit, 219, grapes, 75.

INDUSTRY. Kirghizia contains over 500 large modern industrial enterprises including sugar refineries, tanneries, cotton and wool-cleansing works, flour-mills, a tobacco factory, food, timber, textile, engineering, metallurgical, oil and mining enterprises

Production in 1984 included 391 2m electric lamps, 18m items knitwear, 220,000 washing machines, 893,400 cu metres ferroconcrete, 18 5m pairs hosiery, 10 9m pairs leather footwear, 127 7m cans conserves

Hydro-electric power stations are being built in the Central Tien-Shans and the cotton-growing districts in the Osh Region, the Chui valley and on the shore of Lake Issyk-Kul Power output (1984) was 10,886m kwh

There were, in 1983, 1,191,000 industrial and office workers in the national economy.

COMMUNICATIONS. In the north a railway runs from Lugovaya through Frunze to Rybachi on Lake Issyk-Kul Towns in the southern valleys are linked by short lines with the Ursatyevskaya-Andizhan railway in Uzbekistan Total length of railway (Jan 1984) is 370 km Most of the traffic is by road, there were 28,300 km of motor roads (19,700 hard surface) in 1984 A road tunnel through the Tien-Shan mountains at an altitude of 9,600 ft, connecting Frunze and Osh, is being constructed Inland waterways, 600 km Airlines link Frunze with Moscow and Tashkent

Federal Capital Abu Dhabi Population 1 23m (1984) GNP per capita US\$21,340 (1983)

HISTORY. From Sha'am, 35 miles south-west of Ras Musam dam, for nearly 400 miles to Khor al Odeid at the south-eastern end of the peninsula of Qatar, the coast, formerly known as the Trucial Coast, of the Gulf (together with 50 miles of the coast of the Gulf of Oman) belongs to the rulers of the 7 Trucial States in 1820 these rulers signed a treaty prescribing peace with the British Government. This treaty was followed by further agreements providing for the suppression of the slave trade and by a series of other engagements, of which the most important are the Perpetual Maritime Truce (May 1853) and the Exclusive Agreement (March 1892). Under the latter, the sheikhs, on behalf of themselves, their heirs and successors, undertook that they would on no account enter into any agreement or correspondence with any power other than the British Government, receive foreign agents, cede, sell or give for occupation any part of their territory save to the British Government.

British forces withdrew from the Gulf at the end of 1971 and the treaties whereby Britain had been responsible for the defence and foreign relations of the Trucial States were terminated, being replaced on 2 Dec 1971 by a treaty of friendship between Britain and the United Arab Emirates The United Arab Emirates (formed 2 Dec 1971) consists of the former Trucial States Abu Dhabi, Dubai, Sharjah, Ajman, Umm al Qawain, Ras al Khaimah (joined in Feb 1972) and Fujairah The small state of Kalba was merged with Sharjah in 1952.

AREA AND POPULATION. The Emirates are bounded north by the Gulf, east by Oman, south and west by Saudi Arabia, north-west by Qatar The area of these states is approximately 32,300 sq. miles (92,100 sq. km) The total population at census (1980), 1,040,275 (717,475 male) Estimate (1984) 1,231,000 (831,000 male). #### DEFENCE

Army. The Army consists of 1 Royal Guard brigade, 5 armoured, 9 infantry, 3 artillery and 3 air defence battalions Equipment includes 100 AMX-30 and 18 Lion OF-40 Mk 1 main battle tanks The strength was (1985) 46,000.

Navy. The naval flotilla includes 6 new German-built missile armed fast attack craft, 9 British-built patrol craft, 1 maintenance craft and 2 tenders. Personnel in 1986 numbered 1,200 officers and ratings.

The Coast Guard flotilla comprises 11 armed coastal patrol craft, 18 armed small patrol cutters, 26 light launches, 1 amphibious craft, 2 diving tenders, 1 water carrier and 5 tugs

Air Force. Formation of an air wing in Abu Dhabi, to support land forces, began in 1968 with the purchase of some light STOL transports and helicopters Expansion has been rapid Current equipment includes 25 Mirage 5 supersonic fighterbombers, 3 Mirage 5R tactical reconnaissance aircraft and 2 Mirage 5D 2-seat trainers (to be replaced by Mirage 2000s, with delivery of first 18 to begin in 1986), 4 C-130 Hercules and 4 Buffalo turboprop transports, 4 CASA C-212 Aviocar ECM/elint aircraft, about 40 Gazelle, Alouette III, Puma, Super Puma and Agusta-Bell 205 helicopters, 14 PC-7 Turbo-Trainers and 16 Hawk light attack/ trainers. Initial personnel were mostly British but considerable assistance is now being received from Arab countries and from Pakistan. The air wing became the Air Force of Abu Dhabi in 1972, in which year 3 JetRanger helicopters were transferred to the air wing of the Union Defence Force, since combined with the Dubai Police Air Wing to form a single component of the United Emirates Air Force. Current equipment of the Dubai Air Wing of the UEAF, bought mainly in Italy, comprises 5 Aermacchi MB 326K jet light attack aircraft, 1 Aeritalia G222 twinturboprop transport, 1 piston-engined SF 260W armed basic trainer, 5 SF 260TP turboprop trainers, and 2 MB 326L, 2 MB 339 and 8 Hawk jet trainers, 4 Bell 205A-1, 3 Bell 212 and 6 JetRanger helicopters and 1 Cessna 182 liaison aircraft, plus 2 L-100-30 Hercules transports and a variety of other types for VIP use.

## INTERNATIONAL RELATIONS

Membership. The UAE is a member of UN and of the Arab League.

#### **ECONOMY**

Planning. The first 5-year plan (1981-85) envisages expenditure of UD 13,000m

**Budget.** Revenue is principally derived from oil-concession payments. The federal budget (1984) was DH 17,239m

Currency. The UAE issued its own currency in 1972 based on the dirham 1 UAE dirham = 10 dinar = 1,000 fils. There are notes of 1, 5, 10, 50, 100 and 1,000 dirham and coins of 1, 5, 10, 25, 50 and 100 fils. Rate of exchange, March 1986. £1 = 5 28 dirham, US\$1 = 3.67 dirham.

Banking. The Union Bank of the Middle East took over the Emirates National Bank in Jan 1985 and the Dubai Bank in April 1985. Three of Abu Dhabi's largest local banks (Khaleej Commercial Bank, Emirates Commercial Bank and Federal Commercial Bank) merged in May 1985 to form Abu Dhabi Commercial Bank, with authorized capital of 1,500m dirhams and paid-up capital of 1,250m dirhams. 60% of its shares are owned by the Abu Dhabi government and the balance by private investors. The National Bank of Abu Dhabi had a paid-up capital of 880m dirhams at the end of 1984.

## **ENERGY AND NATURAL RESOURCES**

Oil. Total production of crude oil (1983) 311m bbls Reserves (1984) 32,400m bbls

Abu Dhabi Until the end of 1972 production was in the hands of 2 major companies, the Abu Dhabi Petroleum Co and the Abu Dhabi Marine Area The Government has acquired a 60% interest in both companies Ownership in 1976 was as follows. ADPC, 60% Government; 9 5% BP, 9 5% Shell, 9 5% CFP, 4 75% Mobil, 2% Partex ADMA, 60% Government, 26 7% BP/Japan Oil Development Co., 13 3% CFP A Japanese company, Abu Dhabi Oil Co (ADOCO) began production from its Mubarraz field in 1973 There are other companies which have concessions in the State: Japan's Middle East Oil, a US consortium led by Pan Ocean Oil and Sunningdale Oils of Canada A State Petroleum Co., the Abu Dhabi National Oil Co. (ADNOC), was formed in 1971 and began to set up its own tanker fleet known as the Abu Dhabi National Tankers Co. (ADNATCO) At the end of 1972 Abu Dhabi signed a participation agreement which would have given it an immediate 25% interest in the companies, rising to 51% by 1982 Oil production, 1985, 39m tonnes

Dubai. In July 1975 Dubai decided to take full control of all foreign oil and gas operations in the State. The companies were to remain however. A Dubai producing group was set up to comprise the foreign interests—US and continental companies. Dubai Petroleum Co (DPC—a subsidiary of Continental Oil) has a 30% interest in this group; the other members are Dubai Marine Areas (Compagnie Française des Pétroles) with 50%, Deutsche Texaco with 10%; Dubai Sun Oil 5%, and Delfzee Dubai Petroleum (Wintershall) 5%

Sharjah In Sharjah the concession is given to Crescent Oil, its shareholders are Ashland Oil, Skelly Oil, Kerr-McGee, Cities Services and Juniper Other oil concessions have recently been given to the Crystal Oil Co. of USA and the Reserves Oil and Gas Co Oil production, 1985, 3 2m tonnes.

Ajman An oil concession was awarded to United Refining in 1974.

Umm al Qawain. The concession here was given to US Occidental Petroleum, another was awarded to a consortium led by the US company United Refinery.

Ras al Khaimah. The Dutch oil firm Vitol took over Union's concession in 1973 Shell began prospecting in 1969 but pulled out in 1971 A concession in the same area was awarded to Peninsula Petroleum, a subsidiary of the US California Time Group, in 1973.

Gas. Abu Dhabi has reserves of natural gas, nationalized in 1976. The Abu Dhabi Gas Liquefaction Plant at Das Island (51% ADNOC) has a capacity of 2m. tons

LNG, 1m. tons LPG, 220,000 tons of light distillate and 230,000 tons of pelletized sulphur. Gas exports (1983) DH5,000m

Water. Consumption is 1,060m cu metres of water annually With storage from rain water not exceeding 180m cu metres, leaving a shortfall of some 880m cu metres to be covered by desalination units and the general water reserve.

Agriculture. The fertile Buraimi Oasis, known as Al Ain, is largely in Abu Dhabi territory, but owing to lack of water and good soil there is little agriculture in the rest of UAE Cultivated area (1984) 285,000 donums Production (1984) Red meat, 8,000 tonnes, poultry, 5,000 tonnes; eggs, 150m.; dates, 80,000 tonnes

Livestock (1984) Cattle, 30,000, camels, 70,000, sheep, 150,000, goats, 450,000

Fisheries. Sharjah exports shrimps and prawns, a fishmeal plant is operating in Ras al Khaimah and plants are planned for Ajman and Sharjah Catch (1984) 74,000 tonnes

#### INDUSTRY AND TRADE

Industry. Main industries in Abu Dhabi relate to the construction industry and to oil and gas extraction; there is also a steel rolling mill Dubai has a cement factory of 500,000 tons annual capacity, and a dry dock. Twenty companies are now fully operational at the complex in Jebel Ali consisting of a liquefied petroleum gas plant. An aluminium smelter with power station and desalination plant was opened in Feb. 1979. Sharjah has a cement factory and various manufacturing estates. Ras al Khaimah also produces cement and crushed rock.

Commerce. Imports in 1984 for UAE were DH29,727m Exports and re-exports (non-oil) totalled DH7,595m Oil exports accounted for DH45,307m and gas DH5,000m

## **COMMUNICATIONS**

Roads. In 1984 there were 2,200 km of roads and 230,000 vehicles

Aviation. In 1984 there were 5 international airports handling 7m passengers A number of cargo airlines also fly regularly to the country's major airports. An airtaxi service, Emirates Air Services, flying between Abu Dhabi and Dubai, began in June 1976.

Shipping. In 1984 there were 14 commercial sea ports. Abu Dhabi has dry docks and there are smaller ports at Sharjah and Ras al Khaimah Jebel Ali is a port and industrial estate 35 km south-west of Dubai city and had (1982) 66 berths.

In 1976, the Government of the UAE joined with Qatar, Bahrain, Saudi Arabia, Kuwait and Iraq in forming the United Arab Shipping Co.

Post and Broadcasting. In 1983 there were 319,246 telephones, of which 113,629 were in Abu Dhabi and 98,010 in Dubai. In Sharjah a new telephone company has been formed and the other Northern States are now linked by telephone. The new Cable and Wireless Station at Jebel Ali in the State of Dubai links the system with the international communication network.

Television stations are at Abu Dhabi and Dubai, with extension of the service

well advanced to the rest of the Emirates. Stations for The Voice of the Gulf Cooperation Council, a 6-state radio station, began broadcasting from Abu Dhabi in Aug 1985. Estimated radios (1976) 50,000 and television sets over 16,000.

Newspapers (1985) There are a number of daily and weekly publications mostly in Arabic, but some in English, notably *The Emirates News* of Abu Dhabi, *The Gulf News*, a daily, published in Dubai and the *Khaleej Times* (daily), also published in Dubai

## JUSTICE, RELIGION, EDUCATION AND WELFARE

Justice. UAE subjects and citizens of all Arab and Moslem states are subject to the jurisdiction of the local courts. In the local courts the rules of Islamic law prevail. A new code of law is being produced for Abu Dhabi. In Dubai there is a court run by a qadi, while in some of the other States all legal cases are referred immediately to the Ruler or a member of his family, who will refer to a qadi only if he cannot settle the matter himself. In Abu Dhabi a professional Jordanian judge presides over the Ruler's Court. The 95th article of the provisional Constitution of 1971 provided for the setting up of a Union Supreme Court and Union Primary. Tribunals

Religion. Nearly all the inhabitants are Moslem of the Sunni and Shi'ite sects

Education In 1984–85 there were 30,012 pupils in kindergarten, 138,628 in primary schools, 38,148 in preparatory schools and 18,662 in secondary schools. Capital London Population 55 78m (1981) GNP per capita US\$9,050 (1983)

'Great Britain' is a geographical term describing the main island of the British Isles which comprises England, Scotland and Wales (so called to distinguish it from 'Little Britain' or Britany). By the Act of Union, 1801, Great Britain and Ireland formed a legislative union as the United Kingdom of Great Britain and Ireland Since the separation of Great Britain and Ireland in 1921 Northern Ireland remained within the Union which is now the United Kingdom of Great Britain and Northern Ireland The United Kingdom does not include the Channel Islands or the Isle of Man which are direct dependencies of the Crown with their own legislative and taxation systems

Emigration and Immigration During the last hundred years the UK has most often been a net exporter of population. Throughout the period 1881-1931 there was a consistent net loss from migration, though the fifteen years 1931-46 brought a reversal of the trend as a result of immigration from Europe Since the Second World War the loss has largely continued. However, during the five years 1956-1961, increased immigration particularly from the new Commonwealth and Pakistan, resulted in a net gain. There were also net gains in 1979 and 1983 but these were due to decreased emigration. The latest year, 1984, shows a net gain of 37,000 due to further reduction in emigration

Since 1964 migration figures have been available from the International Passenger Survey. This is a sample survey conducted by the Office of Population Censuses and Surveys, covering all the principal air and sea routes between the UK and overseas, except those to and from the Republic of Ireland For the years 1964–73 the survey shows an average annual net loss for the UK of 63,000 During the decade 1974–1983 the annual net outflow has been an average of 37,000

The table below, derived from the International Passenger survey, summarizes migration statistics for 1984 (in 1,000).

CLIMATE. The climate is cool temperate oceanic, with mild conditions and rainfall evenly distributed over the year, though the weather is very changeable because of cyclonic influences. In general, temperatures are higher in the west and lower in the east in winter and rather the reverse in summer Rainfall amounts are greatest in the west, where most of the high ground occurs

The Queen's legal title rests on the statute of 12 and 13 Will III, ch. 3, by which the succession to the Crown of Great Britain and Ireland was settled on the Princess Sophia of Hanover and the 'heirs of her body being Protestants'. By proclamation of 17 July 1917 the royal family became known as the House and Family of Windsor On 8 Feb 1960 the Queen issued a declaration varying her confirmatory declaration of 9 April 1952 to the effect that while the Queen and her children should continue to be known as the House of Windsor, her descendants, other than descendants entitled to the style of Royal Highness and the title of Prince or Princess, and female descendants who marry and their descendants should bear the name of Mountbatten-Windsor. For the Royal Style and Titles of Queen Elizabeth see Commonwealth section

By letters patent of 30 Nov 1917 the titles of Royal Highness and Prince or Princess are restricted to the Sovereign's children, the children of the Sovereign's

sons and the eldest living son of the eldest son of the Prince of Wales.

Provision is made for the support of the royal household by the settlement of the Civil List soon after the beginning of each reign (For historical details, see The Statesman's Year-Book, 1908, p 5, and 1935, p 4). According to the Civil List Act of 1 Jan 1972 and the Civil List (Increase of Financial Provision) Order 1975, the Civil List of the Queen, after the usual surrender of hereditary revenues, was (1986) £4,136,000.

The Civil List of 1986 provides for an annuity of £124,800 to the Princess Anne, £200,300 to Prince Philip, £359,100 to Queen Elizabeth (the Queen Mother), £121,500 to the Princess Margaret, £20,000 to Prince Andrew, £20,000 to Prince Edward

CONSTITUTION AND GOVERNMENT. The supreme legislative power is vested in Parliament, which in its present form, as divided into two Houses of Legislature, the Lords and the Commons, dates from the middle of the 14th century

Parliament is summoned by the writ of the sovereign issued out of Chancery, by advice of the Privy Council, at least 20 days previous to its assembling. A Parliament may last up to 5 years, normally divided into annual sessions. A session is ended by prorogation, and all public Bills which have not been passed then lapse. A Parliament ends by dissolution, either by will of the sovereign (that is, on the advice of the Prime Minister) or by lapse of the 5-year period. A dissolution is commonly followed by a general election.

Under the Parliament Acts 1911 (1 and 2 Geo V, ch 13) and 1949 (12, 13 and 14 Geo. VI, ch 103), all Money Bills (so certified by the Speaker of the House of Commons), if not passed by the House of Lords without amendment, may become law without their concurrence on the Royal Assent being signified within 1 month Public Bills, other than Money Bills or a Bill extending the maximum duration of Parliament, if passed by the House of Commons in 2 successive sessions, whether of the same Parliament or not, and rejected each time, or not passed, by the House of Lords, may become law without their concurrence on the Royal Assent being signified, provided that 1 year has elapsed between the second reading in the first session of the House of Commons and the third reading in the second session All Bills coming under this Act must reach the House of Lords at least 1 month before the end of the session.

The House of Lords consists of (1) 789 hereditary peers and peeresses sitting by virtue of creation or descent, other than those who have disclaimed their titles for life under the provisions of the Peerage Act, 1963, (2) life peers being (a) 19 Lords of Appeal (active and retired), under the Appellate Jurisdiction Act, 1876, as amended; (b) (30 Dec 1985) 339 life peers (including 45 women peers) under the Life Peerages Act, 1958. (3) 2 archbishops and 24 bishops of the Church of England (as long as they hold their sees)

The full House thus consists of 1,173, and the average attendance is about 320, at the end of Dec 1985 141 peers were on leave of absence and 95 peers (including 5 minors) were without writs of summons

The House of Commons consists of members (of both sexes) representing constituencies determined by the Parliamentary Boundary Commissions. Persons under 21 years of age, Clergy of the Church of England and of the Scottish Episcopal Church, Ministers of the Church of Scotland, Roman Catholic clergymen, civil servants, members of the regular armed forces, policemen, most judicial officers and other office-holders named in the House of Commons (Disqualification) Act are disqualified from sitting in the House of Commons No English or Scottish peer can be elected to the House of Commons unless he has disclaimed his title for life under the Peerage Act, 1963, but Irish peers and holders of courtesy titles, who are not members of the House of Lords, are eligible

In Aug. 1911 provision was first made for the payment of a salary of £400 per annum to members, other than those already in receipt of salaries as officers of the House, as Ministers or as officers of Her Majesty's household. As from 1 Jan. 1986 the salaries of members are £17,702 per annum, with income-tax relief on expenses incurred in the course of parliamentary duties. There is a secretarial allowance of up to £13,211 per annum and a living allowance, for an additional home, of up to £6,518 per annum. Members of the House of Lords are unsalaried but may recover expenses incurred in attending sittings of the House within maxima for each day's attendance of £19 for day subsistence, £47 for night subsistence and £19 for secretarial and research assistance or general office expenses. Additionally, Members of the House who are disabled may recover the extra cost of attending the House incurred by reason of their disablement. In connection with their attendance at the House and for parliamentary duties within the UK Lords may also recover the cost of travelling to and from their main place of residence.

Select Committees consisting of 10-15 Members of all parties exist in order to investigate most areas of public policy.

The Representation of the People Act 1948, abolished the business premises and

University franchises, and the only persons entitled to vote at Parliamentary elections are those registered as residents or as service voters. No person may vote in more than one constituency at a general election. Persons may apply on certain grounds to vote by post or by proxy

All persons over 18 years old and not subject to any legal incapacity to vote and who are either British subjects or citizens of Ireland are entitled to be included in the register of electors for the constituency containing the address at which they were residing on the qualifying date for the register and are entitled to vote at elections held during the period for which the register remains in force.

Members of the armed forces, Crown servants employed abroad, and the wives accompanying their husbands, are entitled, if otherwise qualified, to be registered as 'service voters' provided they make a 'service declaration'. To be effective for a particular register, the declaration must be made on or before the qualifying date for that register.

The Representation of the People Act 1969, abolished the occupier's qualification for voting in Local Government elections

The House of Commons (Redistribution of Seats) Acts 1944, 1949 and 1958, provided for the setting up of Boundary Commissions for England, Wales, Scotland and Northern Ireland. The Commissions are required to make general reports at intervals of not less than 10 and not more than 15 years and to submit reports from time to time with respect to the area comprised in any particular constituency or constituencies where some change appears necessary. Any changes giving effect to reports of the Commissions are to be made by Orders in Council laid before Parliament for approval by resolution of each House. The electorate of the United Kingdom and Northern Ireland in the register in 1985 numbered 43,130,535, of whom 35,937,374 were in England, 2,142,609 in Wales, 3,967,943 in Scotland and 1,082,609 in Northern Ireland.

At the general election held in June 1983, 650 members were returned, 523 from England, 72 from Scotland, 38 from Wales and 17 from Northern Ireland Every constituency returns a single member

The executive government is vested nominally in the Crown, but practically in a committee of Ministers, called the Cabinet, which is dependent on the support of a majority in the House of Commons.

The head of the Ministry is the Prime Minister, a position first constitutionally recognized, and special precedence accorded to the holder, in 1905. His colleagues in the Ministry are appointed on his recommendation, and he dispenses the greater portion of the patronage of the Crown.

European Parliament. On 14 June 1984 Great Britain elected 81 representatives to the European Parliament, of which 66 came from England, 8 from Scotland and 4 from Wales, each constituency returning a single member by a first past the post system. Northern Ireland returned 3 members by single transferable vote The seats were won as follows. Conservative 45, Labour 32, Scottish Nationalists 1, Ulster Unionists 1, Democratic Unionists 1, Social, Democratic and Labour Party

andustries (coal, electricity, gas, public transport and the wsi office; finity authorities such as water authorities; and (iv) the system of local government described below. The phrase 'local government' has come to mean that part of the local administration conducted by elected councils

There are two separate systems, one for England and Wales and one for Scotland, but both systems are financed by a species of tax on property, tevied locally, supplemented by government grants. This local tax is called 'the rate' The system of financing local government was the subject of a major review in 1975

Local Government: England and Wales—Outside London England and Wales have slightly differing systems Each country has three types of councils namely, county, district and English parish or Welsh Community Councils In addition,

England has some metropolitan district councils

Councillors are elected by their local electors for 4 years. The chairman of the council is one of the councillors elected by the rest. In a district with the status of city or borough his title is mayor, or in a few famous places. Lord Mayor. Any parish or community council can by simple resolution adopt the style 'town council' and the status of town for the parish or community. The chairman of the council will be known as the town mayor.

Counties and Districts There are 47 non-metropolitan counties (of which 8 are in Wales) and 6 metropolitan counties (Greater Manchester, Merseyside, South Yorkshire, Tyne and Wear, West Yorkshire and West Midlands) Within the counties there are 369 districts (36 metropolitan and 333 non-metropolitan, of which 37 are in Wales)

Parishes and Communities There are some 10,000 parishes within the English districts, of which 7,000 or so have councils About 300 are former small boroughs or urban districts which became successor parishes

In Wales, parishes are known as communities. Unlike England, where many areas are not in any parish, communities have been established for the whole of Wales. There is one for each former parish, county borough, borough or urban district (or part thereof where the former area is divided by a new boundary). There are about 1,000 communities altogether, of which 800 or so have councils

The Local Government Act 1972 laid down the boundaries for all the counties and districts in England and Wales except the English non-metropolitan districts.

Permanent Local Government Boundary Commissions for England and for Wales advise the Secretaries of State on boundaries and electoral arrangements

A council has only those powers which have been conferred upon it expressly by Act of Parliament, and no more The relationship between the different types of council is one of specialization, not of hierarchy. The larger do not supervise the smaller, each being, within its own sphere, entitled to make its own decisions Government sanction, however, is required to borrow money and to sell land below its market value, and certain types of land use are subject to planning control

Councils are kept within the law by a system of publicly regulated audit, and in the last resort they can be restrained from exceeding their powers by the courts.

Local government functions may be classified into county, district and parish or community functions, but whereas county and district functions are distinct, the parish and community functions are mostly concurrent with those of the districts. Arrangements may, however, be made so that any council may discharge functions of any other as its agent

The following is the classification of powers given above Parish and Community Functions Allotments, burial and cremation, halls, meeting places and entertainments, facilities for exercise and recreation, public lavatories, street lighting, off-street vehicle parking, footpaths, the support of local arts and crafts, the encouragement of tourism and the right to be consulted by the district council on planning applications and certain byelaws District Functions In addition to the Parish and Community functions, aerodromes, civic restaurants, housing, markets, refuse collection, the administration of planning control, the formulation of local plans,

sewerage, on behalf of the water authority, museums, the licensing of places of entertainment and refreshment, and the constitutional oversight of parishes and communities *County Functions*. The formulation of structure plans, traffic, transportation and roads, education, public libraries and museums, youth employment and social services.

There are, in addition, a number of special arrangements. Four district councils in Wales are designated as library authorities and Welsh district councils have powers in relation to allotments currently with community councils. The county councils in England and Wales separately or jointly appoint the fire and police authorities, and the bodies responsible for national parks. In Metropolitan counties, there are no county councils and all functions are performed by the districts (in some cases jointly). The total number of local government electors in England and Wales was 37,950,002 in 1984.

Greater London Since 1965 London has been governed by the Greater London Council covering the whole metropolitan area, and by 32 London Boroughs and the City of London, each with responsibilities in its own area. The GLC was abolished on 31 March 1986 In the City and the 12 boroughs covering the inner part of Greater London education is the responsibility of the Inner London Education Authority, a special Committee of the GLC but independent of it, while in the 20 outer boroughs the London Borough Council is the education authority Other functions were divided between the GLC and the boroughs. The main responsibilities of the GLC were strategic planning, major roads, housing, major parks and open spaces, the fire service, refuse disposal and Thames flood prevention. The boroughs are the primary housing authorities in their own areas, while the GLC was concerned with matters affecting the whole of London The City has preserved a large measure of independence and has its own powers regarding police, justice, bridges, sanitation, etc. Except in the City the police authority covering the whole of Greater London is the Metropolitan Police, which is responsible direct to the Central Government.

Estimated population of Greater London in June 1985 was 6,756,038, and rate able value at 1 April 1985 was £2,044,917,167. Estimated gross revenue expenditure of the GLC in 1985-86 was £2,307 4m. (including £1,077 2m for the ILEA). Estimated gross capital expenditure, 1985-86 was £312m., including ILEA £23m. and £12·1m. for housing loans. The GLC outstanding debt at 1 April 1985 was £1,721·2m. (including 201 5m for the ILEA)

Scotland. Under the system, which came into effect in 1975, the Scots mainland is divided into 9 regions, and in addition there are the 3 islands areas of Orkney, Shetland and the Western Isles. There is no equivalent to the English metropolitan county. The regions are divided into districts which total 53. All these units have a council consisting of councillors elected for 4 years and a chairman elected by the councillors for 4 years. Community councils have been established under schemes submitted by district and islands councils. These community councils cannot claim public funds as of right, nor do they have powers directly conferred by Statute: consequently they are not local authorities in the sense that Welsh Community Councils are.

As in England and Wales a permanent Local Government Boundary Commission advises the Secretary of State on Local Authority Boundaries and electoral arrangements

On the mainland, functions are allocated between regional and district authorities, in the same way (with minor exceptions) as they are allocated between English counties on the one hand and English districts and parishes on the other, but the councils of the islands areas, which have no districts, perform both sets of functions.

Despite differences of nomenclature the effect of the reforms of 1972 (England) and 1973 (Scotland) is to assimilate the systems of mainland Scotland and of England and Wales more closely than has been the case in the past.

The total number of local government electors in Scotland was 3,954,390 in 1984.

Complaints Under both systems, complaints, by members of the public, of maladministration may be investigated by a Commissioner for Local Administration Initially a complaint must be referred to him through a councillor, but a direct approach to him is possible if this fails. He can deal only with matters for which there is no other remedy, he reports to the council concerned and may publish his report

DEFENCE. The Defence Council was established on 1 April 1964 under the chairmanship of the Secretary of State for Defence, who is responsible to the Sovereign and Parliament for the defence of the realm. Vested in the Defence Council are the functions of commanding and administering the Armed Forces. The Secretary of State heads the Ministry of Defence as a Department of State. There are 4 subordinate Ministers, 3 Ministers of State and 1 Parliamentary Under Secretary of State.

Defence Council membership comprises the Secretary of State, 3 Ministers of State, the 1 Parliamentary Under-Secretary, the Chief of the Defence Staff, the 3 single Service Chiefs of Staff, the Vice-Chief of Defence Staff, the Chief of Defence Procurement, the Chief of Defence Equipment Collaboration, the Chief Scientific Adviser, the Permanent Under-Secretary of State and the Second Permanent Under Secretary of State

There are 3 Service Boards, each of which enjoys delegated powers for the administration of matters relating to the naval, military and air forces respectively

Defence policy decision making is a collective Governmental responsibility Important matters of policy are considered by the full Cabinet or, more frequently, by the Defence and Oversea Policy Committee under the chairmanship of the Prime Minister Other members of this Committee include the Secretary of State for Defence, the Foreign and Commonwealth Secretary and the Home Secretary

Logistics Services Since the inception of a unified Ministry of Defence in 1964, progress has been made in the rationalization of the logistics services of the Royal Navy, the Army and the Royal Air Force. The Air Force Department is responsible for accommodation stores for maintenance and for the initial furnishing of new buildings; the Army Department is the single management authority for the design, development, procurement and inspection of clothing other than certain specialized clothing, the Navy Department has for some time been responsible for ration policy provisioning, procurement, storing and distribution of food to main depots and to Army forward supply depots in BAOR and is responsible for water transport to its tri-service responsibilities. The supply of Naval air stores has been integrated with those of the RAF.

The Procurement Executive An important development in 1971 was the creation of a Procurement Executive to combine the Defence Procurement responsibilities of the Ministry of Defence and the former Ministry of Aviation Supply

Service Strengths at 30 Nov 1985, all ranks, males and females, UK personnel only Royal Navy and Royal Marines, 68,672, Army, 163,586, Royal Air Force, 93,334, total, 325,592. The Ministry of Defence employed 171,871 civilians in Dec 1985.

Defence Budget Estimates 1986-87, £18,525m.; 1987-88, £18,820m.; 1988-89, £18,990m

Army. Control of the British Army is vested in the Defence Council and is exercised through the Army Board. The Secretary of State for Defence is Chairman of the Army Board. The other civilian members are the Ministers of State for the Armed Forces and Defence Procurement, Minister of State (Defence Support) and

the Under Secretary of State for Defence Procurement; the Chief of Establishments and Research Nuclear and the Second Permanent Under Secretary of State

The Military members of the Army Board are the Chief of the General Staff, the Adjutant-General, the Quartermaster-General and the Master-General of the Ordnance. The Chief of the General Staff is the professional head of his Service and the professional adviser to Ministers on the Army aspects of military problems. He is responsible for the fighting efficiency of his Service, for Army advice on the conduct of operations, and for the issuing of such single Service operational orders as may be appropriate resulting from defence policy decisions. He is also responsible for the Territorial Army. The Chief of the General Staff is a member of the Chiefs of Staff Committee which is collectively responsible to HM Government for professional advice on strategy and military operations and on the military implication of defence policy. This advice is tendered to the Secretary of State for Defence by the Chief of the Defence Staff The Adjutant-General is responsible for Army manpower within the policy set up by the General Staff, for recruiting and selection, for the administration and individual training of military personnel, for the discipline of the Army, for pay and allowances and pensions; for legal services, for the veterinary and remount services, for the Army Cadet Forces, for questions of Army welfare and education including school children overseas, and for resettlement and sports The Quartermaster-General is responsible for logistic planning for the Army; for the storage, distribution, maintenance, repair and inspection of equipment, stores and ammunition; for development of stores, for supply, transport and accommodation, for the development, production and inspection of clothing, for military movements and transportation, for the Army postal, catering, salvage and fire services, and for questions connected with canteens, institutes and military labour The Master General of the Ordnance is a member of both the Army Board and of the Procurement Executive Management Board. He is responsible to the Chief of Defence Procurement for the financial and technical management of the approved programme for the procurement of land service equipment for the Armed Services, and to the Army Board for the co-ordination of the Army's total equipment programme.

Headquarters United Kingdom Land Forces at Wilton commands all Army units in UK except Ministry of Defence controlled units. The Ministry of Defence retains direct operational control of units in Northern Ireland. Command by HQ United Kingdom Land Forces is exercised through 9 district headquarters. There are 3 major overseas Commands. Land Forces Cyprus, Hong Kong and the British Army of the Rhine. There are also garrisons in Berlin, Gibraltar, Falkland Islands and Belize.

The air element is an independent corps with 370 helicopters (120 Lynx, 190 Gazelle, 50 Scout and 10 Alouette) and about 20 fixed-wing aircraft for liaison and training.

The strength of the Regular Army (less the Brigade of Gurkhas and locally enlisted personnel) on 1 Jan 1985 was 156,300 men and 6,700 women. Strength of reserve forces were Regular reserves, 148,500, territorial army, 72,200.

The Territorial Army role is to provide a national reserve for employment on specific tasks at home and overseas and to meet the unexpected when required, and, in particular, to complete the Army Order of Battle of NATO committed forces and to provide certain units for the support of NATO Headquarters, to assist in maintaining a secure UK base in support of forces deployed on the Continent of Europe and to provide a framework for any future expansion of the Reserves. In addition, men who have completed service in the Regular Army normally have some liability to serve in the Regular Reserve. All members of the TA and Regular Reserve may be called out by a Queen's Order in time of emergency of imminent national danger and most of the TA and a large proportion of the Regular Reserve may be called out by a Queen's Order when warlike operations are in preparation or in progress. There is a special reserve force in Northern Ireland, the Ulster Defence Regiment, 6,500 strong, which gives support to the regular army.

Men, women and juniors enlist in the Ariny for 22 years' active and reserve

service However, under a scheme introduced in May 1981 they are entitled to give 12 months' notice (18 months' for women) to leave active service provided they serve for a minimum of 3 years. Alternatively, they can agree to serve for 6 or 9 years to receive the benefit of higher rates of pay. Those enlisting in certain technical trades must agree to serve for a minimum of 6 years. Recruits under the age of 17½ on reaching the age of 18 are entitled either to confirm their original engagement or to reduce their period of service to 3 years.

Women serve in both the Regular Army and the TA in the Queen Alexandra's Royal Army Nursing Corps, the Ulster Defence Regiment and the Women's Royal Army Corps, the latter's employments including communications, motor transport, clerical and catering duties. Some officers of the Women's Royal Army Corps are employed on the staffs of military headquarters.

Navy. Control of the Royal Navy is vested in the Defence Council and is exercised through the Admiralty Board, which consists of 7 civilian and 4 service members. The Secretary of State for Defence is chairman of the Admiralty Board. The other civilian members are the Ministers and Under Secretaries of State for the Armed Forces and for Defence Procurement, the Second Permanent Under Secretary of State, the Controller, Research and Development Establishments, Research and Nuclear. The duties of the civilian members of the Admiralty Board are as described in the section on the Army

The naval members are the Chief of Naval Staff and First Sea Lord (professional head of the Royal Navy) responsible for fighting efficiency, planning and operations advice, the chief of Naval Personnel and Second Sea Lord, responsible for the manning of the Fleet, service conditions, training, discipline and welfare, the Controller of Navy, responsible for research and development, design, production, inspection, repair and maintenance of ships, their weapons and equipment, the Chief of Fleet Support, responsible for the provision of naval armament, victualling and medical stores and fuels, and for the movement of material, transport of persons, and head of the naval dockyard organization and servicing the Fleet and of the Royal Fleet Auxiliary.

The Commander in Chief Fleet at Northwood exercises Command of the Fleet Naval Air Stations and units at non-naval Air Stations and establishments in the United Kingdom are commanded by the Flag Officer Naval Air Command Command of all other naval establishments in the UK, except Ministry of Defence-controlled units including Royal dockyards and the Naval Air Repair Organization, and those under the full command of the Commandant General Royal Marines, is exercised by the C-in-C Naval Home Command at Portsmouth through Area Flag Officers.

The Royal Naval Reserve (RNR) and the Royal Marines Reserve (RMR) currently have provision for 5,500 and 1,500 personnel respectively. The role of the RNR is to provide a reserve of trained personnel who will be available in times of war to undertake such duties as Naval Control of Shipping, Mine Counter-Measures, HQ Command and Communications, and Rotary Wing Aircrew. The main roles of the RMR are to provide reinforcements and to carry out other specialist tasks with the UK-Netherlands Amphibious Force. In addition, men who have completed service in the Royal Navy and the Royal Marines have a liability to serve in the Royal Fleet Reserve. All members of the RNR, the RMR and the Royal Fleet Reserve have a liability to be called out under the provisions of the Reserve Forces Act 1980. Officers of the Retired and Emergency Lists and Pensioners also have a Reserve liability.

Royal Navy ratings enlist to complete 22 years' active service with the option to leave at 18 months notice on completion of a minimum of 2½ years' productive service. Those who leave before completing 22 years have a liability for up to 3 years' service in the Royal Fleet Reserve. Royal Marine ranks, WRNS ratings and QARNNS ratings enlist to complete an initial 9 year engagement but they may apply to re-engage to complete 14 years and 22 years Servicewomen have no reserve liability

Women serve in both the WRNS and the QARNNS, and their reserves. In the former, they are employed on a wide range of duties including communications, stores accounting, catering, education, training support and motor transport.

The following is a summary of the more important units

There are also 2 helicopter support ships, 2 assault ships, 1 repair ship, 2 maintenance ships, 4 ice patrol ships, 17 patrol vessels of corvette size, 9 surveying vessels, 24 minehunters, 11 coastal minesweepers, 6 deep minesweepers, 1 mine countermeasures support ship, 1 large seabed operations vessel, 4 trials ships, 1 submarine tender, 6 patrol craft, 19 coastal craft, 11 mooring, salvage and boom vessels, 10 fleet support and supply ships, 14 fleet oilers, 60 other auxiliaries, 7 logistic landing ships, 50 minor landing craft, 14 fleet tugs, 46 other tugs, and 60 tenders.

In the following table the principal surface warships are grouped in classes, in descending order of modernity

Com- pleted	\\ame	Standard displacement Lons	Ancratt	1rmament	Shaft horse-Speed power knots
			Aucraft Carriers	Twin 'Sea Dart'	
1982	Ark Royal Illustrious <sup>1</sup> Invincible <sup>2</sup>	16,000	5 Sea Harriers, 9 Sea King helicopters	surface-to-air missile launchers, 2 Phalanx guns, (3 in Aik Royal), 2 20 mm guns	112,000 28 0 (gas)
1959	Hermes ' (reserve)		Latterly carried 5 Sea Harriers, 9 Sea King helicopters	2 quadruple 'Seacat' missile launchers	78,000 28 0 (steam)

<sup>1</sup>Two AFW (airborne early warning) Sea Kings added to complement – to be increased to three in each ship

<sup>2</sup>Originally designed as 'Command Cruiser', subsequently re-rated as 'Through-deck Cruiser' (meaning long underdeck hangar with flat-top or near full-length flight deck) and later designated 'Anti-Submarine Cruiser' Officially listed as anti-submarine warfare carrier in 1980 Slightly angled deck and 7 degree ski-jump ramp, like Illustrious, but 4rk Royal has 12 degree ski-jump for Harriers During the Falklands campaign Invincible embarked ten Harriers and nine Sea Kings

<sup>3</sup>Refitted 1980 with 7-5 degree 'ski-jump' ramp for launching Harrier aircraft. She carried 37 aircraft during the Falklands campaign. Rehabilitated early 1984 as harbour training ship and standby for operational contingency. She is being kept in a high state of reserve until the probable sale or disposal in 1986.

Note For disposals of the large fixed-wing aircraft carriers Ark Royal and Eagle, the original sister ships of Hermes (Bulwark, Albion and Centaur) and the rebuilt Victorious, the helicopter cruisers Blake and Tiger, original sister ship Lion, and the other orthodox cruisers Belfast (museum ship on the Ihames), Ceylon, Newfoundland, Birmingham, Jamaica, Superh, Kenya, Swiftsure, Bermuda, Mauritius, Sheffield and Gambia, see 1983-84 and earlier editions

Air Force. In May 1912 the Royal Flying Corps first came into existence with military and naval wings, of which the latter became the independent Royal Naval Air Service in July 1914 On 2 Jan 1918 an Air Ministry was formed, and on 1 April 1918 the Royal Flying Corps and the Royal Naval Air Service were amalgamated, under the Air Ministry, as the Royal Air Force.

In 1937 the units based on aircraft carriers and naval shore stations again passed to the operational and administrative control of the Admiralty, as the Fleet Air In 1964 control of the RAF became a responsibility of the Ministry of

Defence

The Royal Air Force is administered by the Air Force Board, of which the Secretary of State for Defence is Chairman. The Minister of State for the Armed Forces is Vice-Chairman, and normally acts as Chairman on behalf of the Secretary of State. Other members of the Board are the Minister of State for Defence Procurement, the Under-Secretary of State for the Armed Forces, the Under-Secretary of State for Defence Procurement, the Chief of the Air Staff, Air Member for Personnel, Air Member for Supply and Organization, Controller of Aircraft, Second Permanent Under-Secretary of State and Controller R & D Establishments, Research and Nuclear. The RAF is organized into commands

Home Commands Strike and Support Commands. The Air Training Corps and the Air Sections of the Combined Cadet Force are under the administrative control of Support Command and functionally controlled by the Ministry of Defence.

The RAF College, which trains general-duties, engineering, and supply and secretarial graduates for permanent commissions, is at Cranwell. The RAF Staff College is at Bracknell The Department of Air Warfare is at Cranwell. The RAF Central Flying School is at Scampton. Estimated strength in Nov. 1985, including WRAF and boys, was 93,334

Strike Command is made up of 3 Groups Nos 1 and 38 Groups merged in late 1983 to form a new No 1 Group, responsible for the strike/attack, reconnaissance, tanker, battlefield support and transport forces. The Tomado GR I and Jaguar provide the strike/attack and reconnaissance Victor and Hercules tanker aircraft are being supplemented by ex-civil VC10s and TriStars converted to air refuelling

Battlefield support forces comprise Harrier GR3s, and Chinook, Puma and Wessex support helicopters. The strategic and tactical transport force comprises VC10s and Hercules, and communications aircraft. No 11 Group controls the air defence forces: Lightning and Phantom supersonic all-weather intercepters, Bloodhound surface-to-air missiles, and ground environment radars, the associated communication systems, and the Ballistic Missile Early Warning System at Fylingdales No 11 Group also controls the Hawks of the Tactical Weapons Units which, in war, would supplement air defence fighters at bases throughout the UK. UK air defence is undergoing major improvements. The Tornado F2 entered service in Nov 1984 and will gradually replace the Lightning and some Phantoms. Nimrod AEW3 will enter service in 1987-88, replacing the Shackleton, and in the ground environment, there are new radars and communications systems entering service No 18 Group is responsible for maritime air operations ASW is the duty of the Nimrod Mk 2, which also has a capability against surface ships, although Buccaneers provide the main offensive force against a maritime surface threat. No 18 Group also operates Canberras in a multitude of roles, including photo-reconnaissance, target towing and ECM training, as well as Nimrod special-purpose aircraft Search and rescue units are equipped with Sea King and Wessex helicopters. RAF Regiment short-range air defence squadrons, armed with Rapier, and the field squadrons form part of 1 Group, as does The Queen's Flight, which is receiving 2 BAe 146s to replace 3 Andovers, and also has 2 Wessex helicopters. The Military Air Traffic Operations organization also has the status of a Group Strike Command has NATO commitments, but is available for overseas reinforcement. The training element of RAF Support Command utilizes Bulldog and Chipmunk primary trainers, Jet Provost basic trainers (to be replaced by turboprop Tucanos), Hawk advanced trainers, Jetstreams for multi-engine pilot training, twin-jet Dominies for training navigators and other non-pilot aircrew, and Gazelle and Wessex helicopters

Overseas Commands Royal Air Force Germany. Small units in Gibraltar, the

Falkland Islands, Belize, Cyprus and Hong Kong.
Squadrons of RAF Germany, which form part of NATO's 2nd Allied Tactical Air Force under SACEUR, have Tornado GR1, Harrier and Jaguar attack and reconnaissance aircraft, Phantom fighters, Chinook and Puma Helicopters, Pembroke communications aircraft, and Rapier surface-to-air missile squadrons of the RAF Regiment.

A squadron of Phantom aircraft and a flight of Harriers and Chinooks, together with detachments of Hercules tankers and search and rescue Sea Kings, are based in the Falkland Islands; a squadron of Wessex helicopters is based in Hong Kong

Deductions of tax under PAYE extend over the full range of unified tax rates and not merely the basic rate. Similarly, assessment on business profits and on other income which was directly assessed to tax, such as rents and interest on bank deposits, are made by reference to the full scale of rates, including where appropriate the investment income surcharge

The standard rate of 29% is the rate at which tax is deducted from payments of interest, etc., and corresponds under the corporation tax system, to the tax credit on dividends. Where an individual's total income is such that he is liable on this taxed investment income at rates exceeding 29%, or if his investment income is high enough to make him liable to the surcharge, the higher rate or surcharge liability on this taxed investment income will in general be assessed separately after the end of the tax year.

Corporation Tax Corporation Tax applies, with certain exceptions, to trades or businesses carried on by bodies corporate or by unincorporated societies or other bodies and this tax came into force from April 1966 replacing Profits Tax. Corporation Tax for companies was 35% for 1986-87 Small companies rates, 1986-87, 29%.

Capital Gains Tax Gains resulting from the disposal of capital assets (other than British Government and Government guaranteed securities and certain exempted forms of property such as a private car and personal residences) are taxed under the Finance Act 1965. In 1986–87 exemption was granted for all gains made in a financial year which in total did not exceed £6,300 and most trusts on the first £3,150

Inheritance Tax Formerly Capital Transfer Tax. From 18 March 1986 there is no lifetime charge on gifts between individuals.

Value Added Tax Value Added Tax was introduced from 1 April 1973 at the rate of 10% on the supply of goods (with certain exceptions) and services. From 18 June 1979 the rate of tax was fixed at 15%.

Local Taxation The rateable value on which rates were leviable in England and

Wales on 1 April 1984 was £7,731 m. In England and Wales, the average amount of the rates collected per £ of rateable value was £0 34 in 1913–14, and estimated to be 179 5p for 1984–85 In Scotland the rateable value on which rates are leviable on 1 April 1983 was £1,184 m and the average amount per £ of rateable value of the rates was 124.9p. The average domestic water rate was 9p in the £.

Under the Local Government Planning and Land Act 1980, the Government gives general financial assistance to local authorities by means of rate support grants. The Rate Support Grant Supplementary Report (England) 1983–84 deals with the distribution of these grants to local authorities in England only. The grants for 1984–85 contain (i) Block Grant £8,179m, the object of which is to give authorities sufficient grant to put them in a position where they can provide similar standards of service for a similar rate in the £, and (ii) Domestic Grant £692m, which will provide a relief of 18½p for domestic ratepayers except for those in the Cities of London and Westminster where the relief provided is 36.5p and 26.5p respectively. There is also provision in the 1980 Act for payment of National Parks Supplementary Grant (£5.5m) to county councils with all or part of a national park in their area, and Transport Supplementary Grant (£400m) payable to county councils and the Greater London Council Grants are also payable on revenue expenditure for specific services, including police and housing, and capital expenditure on certain services also attracts grant.

In Scotland, rate support grants are paid under the Local Government (Scotland) Act 1966 as amended The total rate support grant and the amounts of the component parts for the local authority financial year 1986–87, as prescribed in the Rate Support Grant (Scotland) (No 4) Order 1985 are as follows total £1,761 35in comprising needs element £1,484 85m, resources element £185 2m, domestic element £91 3m. The needs element is designed to provide varying levels of support to take account of variations in the demand for services and the cost of providing them with a similar degree of efficiency per head of population in different areas. The resources element, by compensating for deficiencies in local rating resources, enables local authorities receiving it to raise the same amount in rates per head of population for the same rate poundage. The domestic element is paid to rating authorities to offset the cost of reducing by 7p in the £ rates payable on domestic properties. As in England and Wales capital and revenue grants are also payable on expenditure for certain specified services.

National Economic Development Council The NEDC (Neddy), which first met in 1962, is the national forum for economic consultation between government, management and unions It includes leading representatives of the Government, CBI and TUC and also chairmen of nationalized industries and independent members. It meets usually under the chairmanship of the Chancellor of the Exchequer although the Prime Minister takes the chair from time to time Discussions at the monthly council meetings are normally based on papers, presented by the participating parties, which deal primarily with questions of medium-term national economic performance and prospects, besides seeking to agree on ways of improving industrial efficiency Council meetings are held in private to encourage the frank exchange of views between members, and discussions are summarized at a press conference taken by the Director-General of the National Economic Development Office (NEDO) following each meeting. The Economic Development Committees (Little Neddies), like the NEDC, bring together representatives of management and unions and officials from Government, who use this neutral meeting place to study the efficiency and prospects of individual industries and sectors and to suggest ways in which these could be improved. The National Economic Development Office (NEDO) provides the professional staff for the NEDC and the EDCs

Currency. The monetary unit of Great Britain is the *pound sterling* A gold standard was adopted in 1816, the sovereign or twenty-shilling piece weighing 7 98805 grammes 0.916½ fine. Currency notes for £1 and 10s were first issued by the Treasury in 1914, replacing the circulation of sovereigns. The issue of £1 and 10s notes was taken over by the Bank of England in 1928 The issue of 10s notes ceased on the issue of the 50p coin in 1969.

Following the post-war fluctuations in the value of the pound, Great Britain returned to the Gold Standard in 1925 with the pound fixed at the pre-war parity of US\$4.8665. But the world financial crisis of 1931 forced the country off the Gold Standard again, and in the following year the Exchange Equalization Account was set up for the purpose of checking undue fluctuations in the exchange value of the pound. With the relative stability of the pound which followed, a 'Sterling Bloc' emerged consisting of most Empire countries and those others who voluntarily pegged their currencies to the pound

The Bloc was superseded at the outbreak of the Second World War by the 'Sterling Area'. The pound was then fixed at \$4 03 and remained at that rate until Sept. 1949, when it was devalued to \$2 80 On 18 Nov. 1967 it was further devalued to \$2.40. Following the general international currency re-alignment of Dec 1971, the rate for the pound, in terms of the US\$, was fixed at £1 = \$2 6057 but in June 1972 the pound was allowed to float March 1986, £1 = US\$ 1.47.

When the pound was floated in June 1972 measures were also introduced to control payments between the 'Scheduled Territories' (i.e., the UK including the Channel Islands, the Isle of Man and Ireland), and the rest of the Sterling Area as well as the rest of the world Exchange control restrictions were lifted in Oct 1979 except for Rhodesia (Zimbabwe) and these were lifted in Dec. 1979

Coinage. The sovereign (£1) weighs 123 27447 grains, or 7 98805 grammes, 0 916½ (or eleven-twelfths) fine, and consequently it contains 113 00159 grains or 7 32238 grammes of fine gold. On 15 Feb 1971 (Decimalization Day) a decimal currency system was introduced retaining the pound sterling as the major unit but now divided into 100 new pence instead of 240 old pence. The decimal coins are the £1 (22 5 mm diameter, 9 5 grammes weight); 50p (equilateral curve heptagon, 30 mm diameter, 13 5 grammes); 20p (equilateral curved heptagon 21.4 mm diameter, 5 grammes); 10p (28 5 mm, 11 31 grammes); 5p (23 6 mm, 5 65 grammes); 2p (25 9 mm, 7 12 grammes) and 1p (20 3 mm, 3 56 grammes). The ½p was demonetized on 31 Dec. 1984 The Decimal Currency Act, 1967 and the Proclamation of 27 Dec 1968 required that the 50p, 10p and 5p be made of cupro-nickel and the 2p, 1p and ½p of mixed metal; copper, tin and zinc (bronze) The Decimal Currency Act, 1969, provided that the coins of the Queen's Maundy Money should continue to be made in silver to a millesimal fineness of 925

By Proclamation dated 28 July 1971, which came into force on 30 Aug. 1971, the crown, double-florin, the florin, the shilling and the sixpence are to be treated as coins of the new currency and as being of the denominations respectively of 25, 20, 10, 5 and 2½ new pence. The sixpence was demonetised on 30 June 1980

The Coinage Act, 1971, specified that the legal tender limits for coins were: Gold coins, for payment of any amount, coins of cupro-nickel and silver of denominations of more than 10p, for payment of any amount not exceeding £10, coins of cupro-nickel and silver of not more than 10p, for payment of any amount not exceeding £5; coins of bronze, for payment of any amount not exceeding 20p. The £1 coin is legal tender to any amount

UK coins issued in the 12 months up to March 1985 totalled £607m.

It is estimated that the following coins were in circulation in the UK at 31 March 1985, in millions £1 305, 50p 804, 20p 910, 10p 1,690, 5p 1,960, 2p 2,500, 1p 3,800, ½p 1,800 The ½p was withdrawn from circulation on 31 Dec. 1984.

Bank-notes The Bank of England issues notes in denominations of £5, £10, £20 and £50 for the amount of the fiduciary note issue. Under the provisions of the Currency and Bank Notes Act, 1954, which came into force on 22 Feb 1954, the amount of the fiduciary note issue was fixed at £1,575m., but this figure might be altered by direction of HM Treasury after representations made by the Bank of England.

All Bank of England notes are legal tender in England and Wales. The banks in Scotland and Northern Ireland have certain note-issuing powers

The total amount of Bank of England notes issued at 31 Dec. 1985 was £12,810m., of which £12,863m. were in the hands of other banks and the public and £7m in the Banking Department of the Bank of England.

Banking. The Bank of England, Threadneedle Street, London, is the Government's banker and the 'banker's bank'. It has the sole right of note issue in England and Wales and manages the National Debt The Bank operates under royal charters of 1694 and 1946 and the Bank of England Act, 1946. The capital stock has, since 1 March 1946, been held by the Treasury.

The statutory return is published weekly End-Dec. figures for the past 5 years are as follows (in £1 m.).

Total net profits from the operations of the main 4 London clearing bank groups in 1985 amounted to £1,424m, of which £364m, in gross dividends, £1,060m transferred to reserves.

The clearing banks cover all aspects of banking business in UK including corporate business, and are also actively involved in international banking.

Trustee Savings Banks. Trustee Savings Banks started in Scotland in 1810. They operate under the terms of the Trustee Savings Bank Act 1981. There are 4 banks with a network of 1,624 branches throughout the UK and the Channel Islands. The banks are supervised by the TSB Central Board, a statutory body established by the TSB Act 1976.

On 20 Nov. 1984 the funds of all Trustee Savings Banks totalled £9,001 m, the total number of accounts exceeded 13 m.

## **ENERGY AND NATURAL RESOURCES**

Electricity. The electricity industry was vested in the British Electricity Authority on 1 April 1948 Following the re-organization of the electricity supply industry after the passing of the Electricity Act, 1957, the statutory bodies comprising the electricity service in England and Wales are the Electricity Council, the Central Electricity Generating Board and the 12 Area Electricity Boards.

The Electricity Council has functioned from Jan. 1958 as the central council for the supply industry in England and Wales for consultation on, and formulation of, general policy, its main functions are to advise the Secretary of State for Energy on all matters affecting the supply industry, and to promote and assist the maintenance and development by the Central Electricity Generating Board and the Area Boards (known collectively as Electricity Boards) of an efficient, co-ordinated and economical system of electricity supply. The Council can also perform services for the Boards, and, in addition, has certain specific functions, particularly in matters of finance, research and industrial relations

The Central Electricity Generating Board is responsible for the generation and bulk supply of electricity to the 12 Area Boards in England and Wales. It therefore plans the provision of new generating and transmission capacity, including the siting and construction of new generating stations, both conventional and nuclear, and is responsible for the operation and maintenance of generating stations and the main transmission system

Area Electricity Boards. Each of the 12 Area Electricity Boards acquires bulk supplies of electricity from the Generating Board and is responsible for distribution networks and sales of electricity to its Area consumers. Thus distribution and utilization of electricity, and also the contracting and sale of appliances side of the industry, are their responsibilities.

The number of power stations owned by the Generating Board in England and Wales on 31 March 1985 was 81 with a total output capacity, of 51,127 mw. Total number of customers in England and Wales on 31 March 1985 was 21,265,176 (on 31 March 1984, 21,047,102).

Electricity sold in England and Wales in 1984–85 amounted to 202,984m. units Operating profit/loss before MWCA in 1984–85 was (-)£1,277m. Coal used for electricity generation in 1984–85 amounted to 40 5m. tonnes (77 2m. tonnes in 1983–84) Total fuel (coal equivalent) used in 1983–84 amounted to 95 5m tonnes and in 1984–85 to 97 2m. tonnes Nine nuclear stations of total output capacity 4,499 mw provided 17 3% of total units supplied in 1984–85. Eight of these are gas cooled graphite-moderated stations using natural uranium fuel canned in magnesium alloy (Magnox) and 1 is an advanced gas-cooled station (AGR) With 4 AGR stations under construction, output capacity will reach 10,350 mw by Dec. 1988.

The number of persons employed by the Generating Board, the Electricity Council and Area Boards at the end of March 1985 was 133,718.

The North of Scotland Hydro-Electric Board, established under the Hydro-Electric Development (Scotland) Act 1943, is the nationalized authority responsible not only for generating and transmitting electricity but also for distributing and selling it to over 570,000 consumers.

The Board's district covers a quarter of the land mass of Great Britain and lies generally north and west of a line joining the firths of Clyde and Tay as well as all the island groups extending to the Outer Hebrides, Orkney and Shetland. Over 99% of potential consumers have now been provided with supply. On the main-

land the Board operates generating stations with a total installed generating capacity of 3,216 mw consisting of 1,762 mw of hydro power and pumped storage, together with 1,320 mw of steam Diesel stations with a total installed capacity of 102 mw supply the principal island groups together with 32 mw gas turbine A 1,320 mw of oil/gas fired thermal plant is now operating at Peterhead

The main transmission system consists of 5,097 circuit km of 275 kv and 132 kv lines linking the power stations and the bulk supply points serving the distribution networks. The system control centre at Pitlochry co-ordinates the operation of the transmission system and power stations together with the continuous interchange of power with the South of Scotland Electricity Board. The number of staff at the

end of the year was 3,830.

The South of Scotland Electricity Board was established in April 1955 by the Electricity Reorganisation (Scotland) Act 1954, replacing in South Scotland 2 Electricity Boards and 2 Divisions of the British Electricity Authority. The area of Scotland served by the Board lies south of a line from the Firth of Clyde to the Firth of Tay and extends to about 8,000 sq. miles (21,000 sq. km), including the industrial belt of Scotland, with a population of 4m By special arrangement a small part of North-East England is also supplied The remainder of Scotland is served by the North of Scotland Hydro-Electric Board

The Board differs from those established in England and Wales in that its responsibilities cover not only the distribution of electricity and retail sale of electrical appliances but also the generation and transmission of bulk power within

South Scotland.

At 31 March 1985 the Board operated 17 generating stations (including 2 nuclear and 8 hydro-electric stations) with a total output capacity of 6,250 mw (total effective capacity however, has been reduced by placing 1,284 mw of plant at 1 station in storage for an indefinite period) In 1984-85 the Board sold 17,537m units to more than 1 6m. consumers and had a total revenue of £806m. The number of staff employed at the end of the year was 12,019.

Production 1984, in 1,000 tonnes (1983 in brackets) Throughput of crude and process oils, 79,117 (76,876); refinery use, 5,350 (5,297); gases, 1,656 (1,538), naphtha, 3,206 (3,550), motor spirit, 22,236 (21,053), kerosene, 7,418 (6,493), diesel oil, 21,547 (21,029); fuel oil, 13,071 (13,483), lubricating oils, 1,108 (936). bitumen, 1,795 (1,798) Total output of refined products, 73,187 (70,927)

Gas. The British gas industry, nationalized in 1949, was reorganized as the British Gas Corporation on 1 Jan. 1973. Under the terms of the Gas Act 1972, the Corporation has the general duty 'to develop and maintain an efficient, co-ordinated and economical system of gas supply' The chairman and members of the Corporation are appointed by the Secretary of State for Energy British Gas explores for and produces natural gas, manufactures substitute natural gas, transmits, distributes and sells gas, and sells, installs and maintains gas appliances

Gas Council (Exploration) Ltd and Hydrocarbons Great Britain Ltd, wholly owned subsidiaries of British Gas, have been involved in exploration for oil and gas in the Irish Sea, the English Channel and Celtic Sea and, in partnership with oil companies, in the North Sea and onshore. British Gas is a partner in gasfields in the southern North Sea and discovered the Morecambe gasfield in the Irish Sea.

In 1984–85, British Gas sold 17,744m. therms of gas. There were 15.9m. domestic customers, who used 9,278m. therms, 83,000 industrial customers, who used 5,966m. therms, and 499,000 commercial customers, who used 2,500m therms Gas sales continued to increase, the industry winning 293,000 new customers. Between 1980–81 and 1984–85 the Corporation's total operating costs per therm of gas sold have fallen in real terms by 19%.

The turnover of British Gas in 1984-85 was £6,913m. and net assets employed at current cost £16,643m. Current cost operating profit was £651m. before tax. In March 1985, there were 93,118 people employed directly by the industry.

Minerals. Coal. The number of National Coal Board producing collieries on 31 March 1985 was 169. Statistics of the coalmining industry (including licensed mines) for recent years are as follows:

<sup>1</sup>Finished steel (ci ude steel equivalent)

Exports of finished steel products were 4m. tonnes in 1984 and 4 7m tonnes in 1985 Imports were 3 6m tonnes in 1984 and 3 7m tonnes in 1985

The industry is divided between the 'public sector' and the 'private sector'

The British Steel Corporation, which was established by the Iron and Steel Act 1967, took over the 14 largest UK iron and steel making concerns (and their subsidiaries) in July 1967 and merged them into a single publicly owned business. With a turnover of more than £3,736m and a liquid steel output of 13m, tonnes in 1984–85, the British Steel Corporation ranks as one of Britain's major manufacturing industries and is one of the world's largest steel makers. The number of employees at the end of 1985 was 64,000. A substantial part of the British steel industry remains in private ownership and there were in 1985 a number of significant producers in mixed public/private ownership. Although responsible for only 15% of UK crude steel production, companies other than the British Steel Corporation produce much higher proportions of steel in finished form. For some products such as wire rod, reinforcement steel, bright bars, wire, open-die forgings and high speed and tool steels, they cover nearly all UK production and hold approximately 25% of the total UK demand for finished steel products.

Iron Castings Production of iron castings was 1 4m tonnes in 1984 (1 5m tonnes in 1983)

Production of non-ferrous metals in 1984 (in 1,000 tonnes) Refined copper, 136 8 (144-3 in 1983), refined lead, 331 3 (322 2), tin metal, 13 3 in 1983, virgin aluminium, 287 9 (252-5), slab zinc, 85 6 (87 7).

Agriculture. The total land area of the UK is 24m hectares, of which 18 72m (1984) is agricultural.

Distribution of the cultivated area in the UK (in 1,000 hectares):

The number of workers employed in agriculture, forestry and fishing in the UK was, in June 1984, 340,000, 320,000 were solely engaged in agriculture, there were also (June 1984) 620,000 farmers, partners and directors

Forestry. On 31 March 1985 the area of productive woodland in Britain was 2,037,000 hectares of which the Forestry Commission managed 892,000 hectares and the private sector 1,145,000 hectares.

The Forestry Commission employed 6,275 staff in 1985. In addition a further 10,900 were employed in private forestry with an estimated 8,100 engaged in the

wood processing industry.
In 1984-85 a total of 4 77m cu metres of timber was thinned and felled New Planting (1984–85) 21,200 hectares (5,200, Forestry Commission, 16,000, private woodlands).

Labour. The distribution of total manpower in Great Britain was in June 1984 (in 1,000). Total working population, 26,360 (15,784 males, 10,576 females) Total employed in armed forces and women's services, 326. Total in civil employment. 20,690, including agriculture, 311; energy and water supply, 621 (of which coalmining, 230); manufacture, 5,415, public administration and defence, 1,523, transport and communications, 1,282, construction, 960, distributive trades, 3,004; insurance, banking, business services, 2,775; education, 1,530, medicine, 1,290.

The average monthly numbers (based on claimants in 1,000) of registered unemployed in Great Britain were: 1979, 1,234 (887 males, 347 females); 1980, 1,591 (1,129, 461); 1981, 2,422 (1,773, 649); 1982, 2,809 (2,056; 753); 1983, 2,988 (2,134,854), 1984, 3,038 (2,110; 929).

Trade Unions. In Dec. 1983 there were 102 unions affiliated to the Trades Union Congress with a total membership of 10,510,157 (including about 3 5m women) The unions affiliated to the TUC in 1983 ranged in size from the Transport and General Workers' Union, with 1,632,957 members, to the Cloth Pressers' Society with 16 members Non-manual workers accounted for nearly a third of the total TUC membership

The TUC's executive body, the General Council, is elected at the annual Congress It is composed of 51 members made up of 34 members nominated by unions with a membership of over 100,000, entitled to automatic representation in proportion to their size, 11 members elected by and from unions smaller than 100,000 and 6 members elected by Congress as a whole to represent women workers.

The General Secretary is elected by the Congress but is not subject to annual reelection

The TUC General Council appoints committees, which draw upon the services of specialist departments in preparing policies on economic, education, international, employment, industrial organization, and social questions

The TUC is affiliated to the International Confederation of Free Trade Unions, the Trade Union Advisory Committee of OECD, the Commonwealth Trade Union Council and the European Trade Union Confederation. The TUC provides a service of trade union education. It provides members to serve, with representatives of employers, on joint committees advising the Government on issues of national importance (e.g., National Economic Development Council and various Royal Commissions) and on the managing boards of such bodies as the Health and Safety Commission, Advisory, Conciliation and Arbitration Service, and Manpower Services Commission.

The following table is a statistical summary relating to trade disputes for recent years

Commerce. Value of the imports and exports of merchandise (excluding bullion and specie and foreign merchandise transhipped under bond) of the UK for 6 recent years (in £1,000)

	Total imports	Total exports		Iotal imports	Total exports
1980	51,650,267	49 510,791	1983	65,993,096	60,533,692

1982	56.940.267	55.538.408	1985	84.789.605	78.331.360

The value of goods imported is generally taken to be that at the port and time of entry, including all incidental expenses (cost, insurance and freight) up to the landing on the quay. For goods consigned for sale, the market value in this country is required and recorded in the returns. For exports, the value at the port of shipment (including the charges of delivering the goods on board) is taken. Imports are entered as from the country whence the goods were consigned to the UK, which may, or may not, be the country whence they were last shipped Exports are credited to the country of ultimate destination as declared by the exporters.

For details of imports and exports for 1984 and 1985, see pp. 1315–19. Trade according to countries for 1984 and 1985 (in £1,000).

Roads. Central government responsibility for highways in England rests with the Secretary of State for Transport. His responsibilities are administered by the Department of Transport through a number of Directorates at Headquarters together with 9 Regional Offices. For Welsh and Scottish roads central government responsibility rests with the Secretaries of State for Wales and Scotland respectively.

The Secretary of State is the highway authority responsible for all trunk roads. Under the local government system introduced in 1974, the highway authority for local roads are the County Councils. In London responsibility is shared between the Greater London Council, the London Boroughs and the Common Council of the City of London.

The Secretary of State has powers to provide roads designed for limited classes of motor traffic, and to confirm schemes for the provision of such special roads by local authorities. The former have the status of trunk roads; the latter principal roads. They are generally referred to as motorways. 2,353 km of motorways in England were open to traffic in 1983 and some 122 km of trunk motorway are under construction.

The design and supervision of the construction of major trunk road schemes is carried out by firms of consulting engineers and by local authorities which act as the Secretary of State's agents. The Regional Offices ensure that schemes progress in accordance with the Secretary of State's statutory and financial responsibilities. Directors (Transport) are responsible for smaller trunk road schemes and for the maintenance of all trunk roads, including motorways. Local authorities can act as the Secretary of State's agents for construction and maintenance. The work is carried out by them or by contractors on their behalf and the cost borne by Central Government.

Aid to local authorities' transport expenditure is now given through Rate Support Grant and through Transport Supplementary Grant; the latter is paid to County Councils on capital expenditure on roads and traffic regulation accepted by the Secretary of State as being of more than local importance.

Public highways in Great Britain in 1983, excluding lengths of unsurfaced roads (green lanes), totalled 343,978 km (England, 262,293 km, Wales, 32,382 km, Scotland, 50,343 km). There were 12,653 km of all-purpose trunk roads, 2,709 km of trunk and principal motorways, 34,587 km of principal roads (excluding motorways) and 295,361 km of other roads

Motor vehicles for which licences were current under the Vehicles (Excise) Act, 1971, at 31 Dec. 1983, numbered 20.22m, including 17 16m private cars and private vans, 1 29m mopeds, scooters and motor cycles, 113,000 public transport

vehicles and 2 2m goods vehicles

New vehicle registrations in 1983 numbered 2 3m

Road casualties in Great Britain numbered in 1983, 309,000 including 5,445 killed; in 1982, 334,000 including 5,934 killed

Railways. The British Railways Board as a public authority owns and manages British Rail, the national rail network, British Rail Engineering Ltd, British Rail Property Board, Freightliners Ltd, Transportation Systems and Market Research Ltd. (Transmark) and Travellers-Fare. The role of the Board is to determine policies and objectives, establish the organisation to carry them out, monitor performance and take major decisions

The Group turnover in 1984-31 March 1985 was £3,557m and just over 180,669 staff were employed, of which 147,219 were involved in the railway business

The management of the railways is the responsibility of the Vice-Chairman He establishes plans and budgets for the achievement of objectives set by the Board, monitors and achieves results against the plans and budgets, and directs the organisation and deployment of manpower resources. He is assisted by other Board members with responsibility for functions such as Engineering, Research, Finance and Planning, Marketing, Operating, Productivity and Personnel

From 1 Jan 1984 to 31 March 1985, British Rail carried 96 8m tonnes of

freight and parcels and 490 8m. passenger journeys were made.

The rail business is split into 5 sectors and directors act on behalf of the Vice-Chairman to control policy. The sectors are InterCity, London and South East Services, Provincial Services, Freight and Parcels. A director is responsible for efficient operation and budgeting within his sector, each of which bears its fair share of the fixed costs of operation, such as signalling and track maintenance. The day-to-day running of the rail network is the responsibility of 5 regional managers to whom local area and station managers report.

The London Regional Transport (formerly London Transport Executive) is the

authority responsible for the operation of the capital's Underground and bus services. Overall policy and financial control is exercised by the Secretary of State for Transport. In Jan. 1985, London Transport had 241 route miles of railway open for traffic and also operated over 10 route miles owned by British Rail. Rolling stock owned: Underground, 3,875 (2,475 motor cars, 1,400 trailer cars), buses, 4,940 Number of train miles run in passenger service (1984) was 29 3m., number of bus miles run in passenger service (1984) was 169 lm. The number of passengers carried in 1984 was. Underground 651m; buses 1,174m

Gross receipts in 1980 for these Boards were British Railways Board, from 1975 the Railways Act 1974 introduced, *inter alia*, new arrangements for the financial support of the railway passenger system and provided for the reconstruction of the finances of the Board (1981) £1,664.8 m <sup>1</sup>; London Transport. Aviation. Pursuant to the Civil Aviation Act 1980, the business and undertaking of British Airways Board was transferred to and vested in a limited liability company, British Airways Plc, with effect from 1 April 1984. Although HM Government will initially hold all the shares in the new company, it is the Government's intention, pursuant to its 'privatization' polices, to introduce private capital into the company at the earliest suitable opportunity.

British Airways is engaged in the provision of air transport services for passengers, cargo and mail worldwide, both on scheduled and charter services. It operates long and short haul international services, as well as an extensive domestic network. In 1984–85, it carried 15.9m passengers, and at 31 March 1985 it had a fleet of 189 aircraft (including 31 helicopters) and it employed 38,240 personnel

In addition to British Airways, there were in 1984 about 43 independent air transport operators, the principal ones being British Caledonian Airways, Britannia Airway and British Midland Airways In recent years there has been a significant expansion of the independent operators.

Following the Civil Aviation Act 1971, the Civil Aviation Authority was established as an independent public body responsible for the economic and safety regulation of British civil aviation. It took over the responsibilities of the former Air Transport Licensing Board and Air Registration Board, and also runs the National Air Traffic Services in conjunction with the Ministry of Defence.

In addition to the public transport operators there are a number of companies engaged in miscellaneous aviation activities such as crop-spraying, aerial survey and photography, and flying instruction.

The operating and traffic statistics of the UK airlines on scheduled services during the calendar year 1984 (and 1983) are as follows: Aircraft km flown, 351m (325m.), revenue passengers carried, 22 6m. (20 4m.), cargo (freight and mail) carried 363,461 (294,247) tonnes.

Traffic between the UK airports and places abroad in 1984 (and 1983) on all services included 566,319 (526,509) air transport aircraft movements.

There were 7,283 civil aircraft registered in the UK at 31 Dec. 1984.

Shipping. The UK flag merchant fleet in July 1985 totalled 20.9m. DWT (dry cargo, 8.9m. DWT; tankers 12.1m. DWT) representing 3.2% of the world fleet. The total number of UK flag ships was 1,074. The number of UK nationality seafarers was about 33,000 as at 31 Dec. 1985.

Capital investment in new tonnage and facilities by British shipping companies 1978-84 (inclusive) was over £2,300m. In 1984 capital expenditure was an estimated £431m. The average age of UK owned and registered tonnage in mid-1984 was 9 9 years.

Total gross earnings by UK owned and registered ships in 1984 amounted to £2,363m. The net contribution to UK balance of payments was £704m and, in addition, there were gross import savings of £603m

On 30 Nov 1985, 55 UK flag ships (2 2m DWT) were laid up out of a world total of 1,212 ships (54 4m. DWT).

Inland Waterways. There are approximately 2,500 miles of navigable canals and locked river navigations in Great Britain. Of these, the British Waterways Board is responsible for some 350 miles of commercial waterways (maintained for freight traffic) and some 1,200 miles of cruising waterways (maintained for pleasure cruising, fishing and amenity) The Board is also responsible for a further 600 miles of canals, some of which are no longer navigable and whose future is being considered in conjunction with local authorities, a number of these lengths have been restored for cruising or as local amenities. The Board's gross receipts for the 15 months to 31 March 1985 were £21 3m. The total freight for the same period was 3.3m. tonnes.

The most important of the river navigations and canals under other authorities include the rivers Thames, Great Ouse, Nene and Yorkshire Ouse, the Norfolk Broads and the Manchester Ship Canal

The Port of Manchester was opened to maritime traffic in 1894 by the construction of the Manchester Ship Canal, which is 35¼ miles in length and owned and operated by the Manchester Ship Canal Company. The entrance lock is 80 ft (24.38 metres) wide and the maximum width of other locks within the canal is 65 ft (19.81 metres). Ships up to 28 ft 10 in. (8.78 metres) freshwater draught can navigate to Ince Oil Berth; ships up to 24 ft (7.31 metres) draught can navigate to Manchester docks but within these docks draught is limited to 22 ft (6.70 metres).

The Port of Manchester includes the Queen Elizabeth II Oil Dock at Eastham (separate entrance lock 100 ft wide), the oil docks at Stanlow and a considerable number of public and private wharves and installations along the canal, as well as the container terminal at Ellesmere Port Total sea-borne and barge traffic in 1985 amounted to 9 75m tonnes, operating revenue, £21 2m, loss after tax, £1 85m The total issued share capital at 31 Dec 1985 was £8m

Broadcasting. Radio and television services are provided by the BBC and by the Independent Broadcasting Authority and its programme contractors. The BBC, constituted by Royal Charter until 31 Dec. 1996, has responsibility for providing domestic and external broadcast services, the former financed from the television licence revenue, the latter by Government grant. The domestic services include 2 national television services, 4 national radio network services and an expanding local radio service.

The IBA constituted until 31 Dec. 1996 by the Broadcasting Act 1981 provides an independent television service on a regional basis, with programmes provided by its programme contractors. The 1981 Act provided for the establishment of the fourth television channel and of the Welsh Fourth Channel Authority (WFCA) which provides a Welsh service on that channel in Wales; they started broadcasting in Nov. 1982. The IBA also provides independent local radio services. All these services are financed by the sale of broadcast advertising time

The BBC's domestic radio services are available on LF, MF and VHF; those of the IBA on MF and VHF. The television services of the 2 authorities BBC1, BBC2, ITV, and Channel 4 are broadcast at UHF in 625-line definition and in colour.

The broadcasting authorities, whose governing bodies are appointed (by HM the Queen in the case of the BBC and by the Home Secretary in the case of the IBA and WFCA) as trustees for the public interest in broadcasting, are independent of government in matters of programme content and are publicly accountable to Parliament for the discharge of their responsibilities

In 1981 the Broadcasting Complaints Commission was set up to consider and adjudicate upon complaints of unfair or unjust treatment in broadcast programmes or of unwarranted infringement of privacy in or in the making of programmes. The number of broadcast receiving licences in force on 30 Sept 1985 was 18 7m., including 15.9m. for colour.

Cinemas. In 1984 there were 1,200 screens in 70 cinemas and there were 55m admissions.

Newspapers. In 1983 there were 11 national dailies.

## JUSTICE, RELIGION, EDUCATION AND WELFARE

Justice. England and Wales The legal system of England and Wales, divided into civil and criminal courts has at the head of the superior courts, as the ultimate court of appeal, the House of Lords, which hears each year a number of appeals in civil matters, including a certain number from Scotland and Northern Ireland, as well as some appeals in criminal cases. In order that civil cases may go from the Court of Appeal to the House of Lords, it is necessary to obtain the leave of either the Court of Appeal or the House itself, although in certain cases an appeal may lie direct to the House of Lords from the decision of the High Court. An appeal can be brought from a decision of the Court of Appeal or the Divisional Court of the Queen's Bench Division of the High Court in a criminal case provided that the Court is satisfied that a point of law 'of general public importance' is involved, and either the Court or the House of Lords is of the opinion that it is desirable in the public interest that a further appeal should be brought. As a judicial body, the House of Lords consists of the Lord Chancellor, the Lords of Appeal in Ordinary, commonly

called Law Lords, and such other members of the House as hold or have held high judicial office. The final court of appeal for certain of the Commonwealth countries is the Judicial Committee of the Privy Council which, in addition to Privy Counsellors who are or have held high judicial office in the UK, includes others who are or have been Chief Justices or Judges of the Superior Courts of Commonwealth countries.

Civil Law The main courts of original civil jurisdiction are the county courts for less important cases, and the High Court for the more important ones

There are about 300 county courts located throughout the country, grouped in districts, and each presided over by a circuit judge. They have a general jurisdiction to determine all actions founded on contract or tort involving sums of not more than £5,000 and can also deal with other classes of case, such as landlord and tenant, probate, equity and admiralty, up to certain limits. Certain matters, such as actions of libel and slander, are entirely reserved for the High Court. In addition, certain designated county courts have jurisdiction in matrimonial proceedings. Divorce proceedings must now commence in these courts and, subject to being transferred to the High Court upon becoming defended, are determined in the county court.

The High Court has both appellate and original jurisdiction, covering virtually all civil causes not determined in the county court. The judges of the High Court are attached to one of its 3 divisions. Chancery, Queen's Bench, and Family, each with its separate field of jurisdiction. There are 77 such judges, called puisne judges For the hearing of cases at first instance, the High Court judges sit singly Appellate jurisdiction is usually exercised by Divisional Courts consisting of 2 (sometimes 3) judges, though in certain circumstances a judge sitting alone may hear the appeal.

The Restrictive Practices Court was set up in 1956 under the Restrictive Trade Practices Act, and is responsible for deciding whether a restrictive trade agreement is in the public interest. It is presided over by a High Court judge, but laymen sit on the bench also. Another specialist court is the Employment Appeal Tribunal, with similar composition, which hears appeals in employment cases from lower tribunals.

The Court of Appeal (Civil Division) hears appeals in civil actions from the High Court and county courts and certain special courts such as the Restrictive Practices Court and the Employment Appeal Tribunal. Its President is the Master of the Rolls, aided by 18 Lords Justices of Appeal sitting in 6 or 7 divisions of 2 or 3 judges each

Civil proceedings are instituted by the aggrieved person, but, as they are a private matter, they are frequently settled by the parties to a dispute through their lawyers before the matter actually comes to court. In some cases, at the instance of either party, a jury may sit to decide questions of fact and award of damages

Criminal Law At the base of the system of criminal courts in England and Wales are the magistrates' courts which try over 97% of criminal cases. In general, in exercising their summary jurisdiction, they have power to pass a sentence of up to six months imprisonment and to impose a fine of up to £2,000. They also deal with the preliminary hearing of cases triable only at the Crown Court. In addition to dealing summarily with over 2m. cases, which include thefts, assaults, road traffic infringements, drug abuse, etc, they also have a limited civil jurisdiction.

Magistrates' courts normally comprise three lay justices. Although unpaid they are entitled to loss of earnings and travel and subsistence allowance. They undergo training after appointment and they are advised by a professional justices' clerk. In central London and in some provincial areas full-time stipendiary magistrates have been appointed. They possess the same powers as the lay bench, but they sit alone On 1 Jan. 1986 the total strength of the lay magistracy was 27,687 including 11,264 women. Justices are appointed on behalf of the Queen by the Lord Chancel-

lor, except in Greater Manchester, Merseyside and Lancashire where they are appointed by the Chancellor of the Duchy of Lancaster

Specially qualified justices sit in juvenile courts to deal with cases involving persons under 17 years of age charged with criminal offences (other than homicide and other grave offences) or brought before the court as being in need of care or control These courts normally sit with three justices, including at least one man or one woman, and are accommodated separately from other courts

Justices also sit in Domestic Proceedings courts which deal with matrimonial applications, custody, guardianship and maintenance of children, affiliation and adoption These courts normally sit with three justices including at least one man or one woman

The Employment Appeal Tribunal The Employment Appeal Tribunal which is a superior Court of Record with the like powers, rights, privileges and authority of the High Court, was set up in 1976 to hear appeals on questions of fact and law against decisions of industrial tribunals and of the Certification Officer The appeals are heard by a High Court Judge sitting with 2 members (in exceptional cases 4) appointed for their special knowledge or experience of industrial relations either on the employer or the trade union side, with always an equal number on each side Industrial tribunals are responsible for deciding questions under Employment Protection (Consolidation) Act, 1978, Equal Pay Act, 1970, Sex Discrimination Act 1975, Employment Protection Act 1975, Employment Act 1980, Race Relations Act, 1976, and Employment Acts 1980 and 1982 The great bulk of their work is concerned with the problems which can arise between employees and their employers. The Certification Officer is responsible for deciding questions under the Trade Union Act 1913, the Trade Union (Amalgamations, etc.) Act 1964, the Trade Union and Labour Relations Act 1974 and the Employment Protection Act 1975

Military Courts Offences by persons subject to service law against the system of military law created under the powers of the Army Act, Air Force Act or Naval Discipline Act are dealt with either summarily or by courts-martial. Petitions may be made to the Defence Council Subsequent appeals lie to a Courts-Martial Appeals Court, and from that court an appeal may lie to the House of Lords.

The Personnel of the Law All judicial officers except the Lord Chancellor (who is a member of the Cabinet) are independent of Parliament and the Executive. They are all appointed by the Crown on the advice of the Prime Minister or the Lord Chancellor and hold office until retiring age. The legal profession is divided, barristers, who advise on legal problems and conduct cases in court, usually act for the public only through solicitors, who deal directly with the legal business brought to them by the public Most judicial appointments are made from barristers of long standing, though solicitors are eligible for appointment as Recorders, who may, after 3 years, be appointed Circuit Judges

Legal Aid Broadly there are 3 kinds of legal aid. Firstly there is legal advice and assistance, otherwise known as the 'Green Form' scheme. This includes advice and help on any question of English law, both civil and criminal, but does not normally cover any form of representation before a court or tribunal. As an extension of the scheme, however, assistance by way of representation has been available for certain proceedings, chiefly civil, in magistrates' courts. Secondly, under Part I of the Legal Aid Act 1974, there is legal aid for civil court proceedings. Under the provisions of the Act, aid is available to those of low or moderate means either free or subject to a contribution, depending on means. In 1984–85 there were over 953,000 payments for advice and assistance under the Legal Advice and Assistance Scheme and over 222,000 civil legal aid certificates were issued. The cost of legal aid in civil cases is met from (a) contributions from assisted persons; (b) the operation of the statutory charge which gives the Law Society a first charge on money or property recovered or preserved for an assisted person to the extent of that person's liability for his own costs; (c) costs recovered from opposing parties and (d) a grant from the

Exchequer. The net cost of civil legal aid to the state in the year 1984-85 amounted to £99 5m and the cost of the legal advice and assistance scheme was £45 4m of which £11.4m was accounted for by assistance by way of representation.

Under Part II of the Legal Aid Act 1974 a court dealing with criminal proceedings may order legal aid to be given if it considers it is desirable in the interests of justice and if it also considers that the defendant (or appellant) requires financial assistance in meeting the costs he may incur. The interests of justice are not statutorily defined but may include, for example, situations where the defendant is in real danger of going to prison or losing his job, where substantial questions of law are to be argued or where the defendant is unable to follow the proceedings and explain his case due to inadequate knowledge of English, mental illness or other mental or physical disability. Legal aid must be granted, subject to means, in the following circumstances, where a person is committed for trial on a charge of murder, where the prosecutor appeals or applies for leave to appeal from the criminal division of the Court of Appeal or the Courts-Martial Appeal Court to the House of Lords, and in certain circumstances where the court is considering depriving a defendant of his liberty.

The costs of legal aid in criminal proceedings are paid by the central government, but courts have power to require legally aided persons to contribute towards the cost of legal aid given to them. The net cost of legal aid in criminal proceedings in the year 1984-85 was £134 2m., £67 4m. of this was for legal aid in the higher courts which is paid for out of the Lord Chancellor's vote and £66 8m for legal aid in the magistrates' courts which is paid from the legal aid fund.

Under the Parliamentary Commissioner Act, passed 22 March 1967, M.P.s may refer to the Parliamentary Commissioner complaints received from the public regarding improper or inequitable administration in most spheres of central government affairs Generally, other available remedies (such as legal action) must be exhausted before a complaint can be investigated. If a complaint is found to require a remedy the Parliamentary Commissioner makes a report to Parliament

Commissions for Local Administration in England and Wales were set up under the Local Government Act 1974 The Commissioners carry out similar functions in relation to local government bodies to those the Parliamentary Commissioner discharges with regard to maladministration in central government.

Police. The authorized establishment of the police force in England and Wales in Dec. 1985 was 122,457: the actual strength was 109,399 men and 11,303 women In addition there were 16,161 special constables (including 4,611 women) Total police net expenditure (estimated) in England and Wales for 1984-85 was £2,742,875,000.

SCOTLAND. The High Court of Justiciary is the supreme criminal court in Scotland and has jurisdiction in all cases of crime committed in any part of Scotland, unless expressly excluded by statute. It consists of the Lord Justice-General, the Lord Justice-Clerk and 21 other judges, who are the same judges as of the Court of Session, the Scottish supreme civil court One judge is seconded to the Scottish Law Commission The Court, which is presided over by the Lord Justice-General, whom failing, the Lord Justice-Clerk, exercises an appellate jurisdiction as well as one of first instance, sits as business requires in Edinburgh both as a Court of Appeal (the quorum being 3 judges) and as a court of first instance and on circuit as a court of first instance The decisions of the Court in either case are not subject to review by the House of Lords. One judge sitting with a jury of 15 persons can, and usually does, try cases, but 2 or more (with a jury) may do so in important or complex cases. It has a privative jurisdiction over cases of treason, murder, rape. deforcement of messengers and breach of duty by magistrates. It also, in practice, is the only court which tries cases of incest, sodomy and other serious or aggravated crimes against person or property and generally those cases in which a sentence greater than imprisonment for 2 years may be imposed either under statute or common law Moreover, the Court has inherent power to try and to punish all acts

which are plainly criminal though previously unknown and not dealt with by any statute.

The appellate jurisdiction of the High Court of Justiciary extends to all cases tried on indictment, whether in the High Court or the Sheriff Court, and persons so convicted may appeal to the Court against conviction or sentence or both except that there is no appeal against any sentence fixed by law The Lord Advocate may refer a point of law which has arisen during a trial on indictment in which accused has been acquitted for the opinion of the Court By such an appeal, a person may bring under review of the High Court of Justiciary any alleged miscarriage of justice including any alleged miscarriage of justice on the basis of the existence and significance of additional evidence which was not heard at the trial and which was not available and could not reasonably have been made available at the trial It is also a court of review from courts of summary criminal jurisdiction, and on the final determination of any summary prosecution either party may appeal to the Court by way of stated case on questions of law, procedure, etc., but not on questions of fact, except in relation to a miscarriage of justice alleged by the person accused on the basis of the existence and significance of additional evidence which was not heard at the trial and which was not available and could not reasonably have been made available at the trial. A further or complementary form of process of review which can be resorted to by convicted persons in these courts is by Bill of Suspension (and Liberation), but it is of strictly limited application. A prosecutor in cases tried on indictment or under summary criminal procedure may also bring under review a decision in law, prior to final judgment of the case, by way of Bill of Advocation The Court also hears appeals under the Courts-Martial (Appeals) Act 1951.

The Sheriff Court has an inherent universal criminal jurisdiction (as well as an extensive civil one) limited in general to crimes and offences committed within a sheriffdom (a specifically defined region), which has, however, been curtailed by statute or practice under which the High Court of Justiciary has exclusive jurisdiction in relation to the crimes above-mentioned. This Court is presided over by a Sheriff-Principal or Sheriff, and when trying cases on indictment sits with a jury of 15 persons. His power of awarding punishment involving imprisonment is restricted to 2 years in the maximum, but he may under certain statutory powers remit the prisoner to the High Court for sentence The Sheriff also exercises a wide summary criminal jurisdiction and when doing so sits without a jury, and he has concurrent jurisdiction with every other court within his Sheriff Court District in regard to all offences competent for trial in summary courts. The great majority of offences which come before the courts are of a minor nature and, as such, are disposed of in the Sheriff Courts. In cases to be tried on indictment either in the High Court of Justiciary or in the Sheriff Court, the judge may, and in some cases must, before the trial, hold a Preliminary Diet to decide questions of a preliminary nature, whether to the competency or relevancy or otherwise. Any decision at a preliminary diet can be the subject of an appeal to the High Court of Justiciary prior to the trial

District Courts in each local authority district have jurisdiction in minor offences occurring within the district. These courts are presided over by lay magistrates, known as justices, and have limited powers of fine and imprisonment.

The Court of Session, presided over by the Lord President (the Lord Justice-General in criminal cases), is divided into an Inner House comprising 2 divisions of 4 judges each with mainly appellate function, and an Outer House comprising 15 single judges, sitting individually at first instance, it exercises the highest civil jurisdiction in Scotland, with the House of Lords as a court of appeal.

Police The police forces in Scotland at the end of 1984 had an authorized establishment of 13,371, the strength was 12,415 men and 722 women. There were 2,453 part-time special constables. The total police net expenditure in Scotland was £250 4m, for 1983-84.

Religion. The Anglican Communion has originated from the Church of England and parallels in its fellowship of autonomous churches the evolution of British influence beyond the seas from colonies to dominions and independent nations. There is no terrestrial head of the Anglican Communion, the Archbishop of Canterbury presides as primus inter pares at the decennial meetings of the bishops of the Anglican Communion at the Lambeth Conference. The next Conference will be held in Canterbury in 1988.

The Anglican churches, in addition to the Church of England, comprise the churches, councils, and provinces in communion with the see of Canterbury, which are situated in Wales; Ireland, Scotland, United States of America, Canada, Australia, New Zealand; West Indies, Brazil, South Africa; Cential Africa, West and East Africa, Jerusalem and the Middle East, South East Asia, Burma; Sri Lanka, Japan, South America, China; Indian Ocean, South Pacific

In addition to the dioceses included within the Provinces of Canterbury and York, there are several dioceses overseas over which the Archbishop of Canterbury exercises metropolitical jurisdiction, while Church of England chapitancies in North and Central Europe formerly under the jurisdiction of the Bishop of London now form the diocese of Europe There are also two small Iberian churches which have been accepted into membership

England and Wales The established Church of England, which baptizes about 35% of the children born in England (i.e. excluding Wales but including the Isle of Man and the Channel Islands), is Protestant Episcopal Civil disabilities on account of religion do not attach to any class of British subject. Under the Welsh Church Acts, 1914 and 1919, the Church in Wales and Monmouthshire was disestablished as from 1 April 1920, and Wales was formed into a separate Province

The Queen is, under God, the supreme governor of the Church of England, with the right, regulated by statute, to nominate to the vacant archbishoprics and bishoprics. The Queen, on the advice of the First Lord of the Treasury, also appoints to such deaneries, prebendaries and canonities as are in the gift of the Crown, while a large number of livings and also some canonities are in the gift of the Lord Chancellor.

There are 2 archbishops (at the head of the 2 Provinces of Canterbury and York), and 42 diocesan bishops including the bishop of the diocese of Europe, which is part of the Province of Canterbury. Each archbishop has also his own particular diocese, wherein he exercises episcopal, as in his Province he exercises metropolitan, jurisdiction In Dec. 1985 there were 64 suffragan and assistant bishops, 40 deans and provosts of cathedrals and 105 archdeacons. The General Synod, in England, consists of a House of Bishops, a House of Clergy and a House of Laity, and has power to frame legislation regarding Church matters. The first two Houses

consist of the members of the Convocations of Canterbury and York, each of which consists of the diocesan bishops and elected representatives of the suffragan bishops, 6 for Canterbury province and 3 for York (forming an Upper House), deans, provosts, and archdeacons, and a certain number of proctors elected as the representatives of the inferior clergy, together with, in the case of Canterbury Convocation, 4 representatives of the Universities of Oxford, Cambridge, London and the Southern Universities and in the case of York 2 representatives for the Universities of Durham and Newcastle and the other Northern Universities; the chaplains in the Forces and 2 representatives of the Religious Communities (forming the Lower House). The House of Laity is elected by the lay members of the Deanery Synods but also includes 3 representatives of the Religious Communities and ex-officio Church Commissioners and Ecclesiastical Judges Parochial affairs are managed by annual parochial church meetings and parochial church councils. Every Measure passed by the General Synod must be submitted to the Ecclesiastical Committee, consisting of 15 members of the House of Lords nominated by the Lord Chancellor and 15 members of the House of Commons nominated by the Speaker This committee reports on each Measure to Parliament, and the Measure receives the Royal Assent and becomes law if each House of Parliament resolves that the Measure be presented to the Oueen.

At 31 Dec 1984 there were 13,420 ecclesiastical parishes, inclusive of the Isle of Man and the Channel Islands These parishes do not, in many cases, coincide with civil parishes. Owing to the pastoral re-organization, although most parishes have their own churches, not every parish nowadays can have its own incumbent or minister, so that in some areas one or more parishes may be served by a clergyman, who must be in priest's orders, and in these cases he holds the parishes in plurality or as part of a united benefice. In Dec 1985 there were 6,952 beneficed clergymen excluding dignitaries, 1,294 other clergymen of incumbent status and 1,729 assis-

tant curates working in the parishes

Private persons possess the right of presentation to over 2,000 benefices, the patronage of the others belongs mainly to the Queen, the bishops and cathedrals, the Lord Chancellor, and the universities of Oxford and Cambridge In addition to the 9,975 parochial incumbents and assistant curates, there were (1985) 375 dignitaries, 296 non-parochial clergymen working within the diocesan framework and approximately 2,000 non-parochial clergymen outside the framework

In 1983 there were estimated to be 1 7m Easter and 1 8m Christmas Com-

municants.

Of the 40,448 churches and chapels registered for the solemnization of marriages at 30 June 1984, 16,627 belonged to the Established Church and the Church in Wales and 23,821 to other religious denominations. Of the 349,186 marriages celebrated in 1984 (344,334 in 1983), 34% were in the Established Church and the Church in Wales, 18% in churches or chapels of other denominations and 49% were civil marriages in a Register Office

Roman Catholics in England and Wales were 4,208,696 in 1985. There were 5 archdioceses and 16 dioceses, 6,718 clergy and 2,684 parish churches and 1,250

other churches open to the public Convents, 1,272.

The Unitarians have about 250 places of worship and 8,000 members. The Salvation Army, had, in British Territory, 1985, over 2,000 officers. They operate 40 eventide homes, 52 centres for the homeless, 12 homes for children and adolescents and 9 alcoholic rehabilitation centres

The following is a summary of recent statistics of certain churches

There were (1985) about 333,000 Jews in the UK with about 295 synagogues.

Scotland The Church of Scotland (established in 1560 at the Reformation and re-established in 1688 as part of the Revolution Settlement) is Presbyterian, the ministers all being of equal rank. There is in each parish a kirk session consisting of the minister and a number of laymen called elders. There are presbyteries (formed by groups of parishes), meeting frequently throughout the year, and these are again grouped in synods, which meet half-yearly and can be appealed to against the decisions of the presbyteries.

The supreme court is the General Assembly, which now consists of some 1,250 members, half clerical and half lay, chosen by the different presbyteries. It meets annually in May (under the presidency of a Moderator appointed by the Assembly, the Sovereign being present or represented by a Lord High Commissioner, appointed by the Queen on the nomination of the Government of the day), and sits for 7 days Any matters not decided during this period may

be left to a Commission which will sit if required

On 2 Oct 1929 the Church of Scotland and the United Free Church of Scotland were reunited under the name of The Church of Scotland, and the two bodies met in General Assembly in Edinburgh as one The united Church had, in Scotland, on 31 Dec 1983, 1,780 congregations, 902,714 members; 18,633 teachers and 104,552 scholars in attendance in Sunday schools The Church courts are the General Assembly, 12 synods, 46 presbyteries in Scotland, 1 in England and 2 on the Continent Income in 1981 was £41,740,070 There are divinity faculties in 4 Scottish universities of Edinburgh, Glasgow, Aberdeen and St Andrews, with 60 professors and lecturers who are mostly ministers of the Church of Scotland.

The Episcopal Church of Scotland is a province of the Anglican Church and is one of the historic Scottish churches. It consists of 7 dioceses. As at 31 Dec. 1985 it had 271 churches and missions, 263 clergy and 62,840 members, of whom 37,684 were communicants.

There are in Scotland some small outstanding Presbyterian bodies and also

Baptists, Congregationalists, Methodists and Unitarians

The Roman Catholic Church which celebrated the centenary of the restoration of the Hierarchy in 1978, had in Scotland (1985) 1 cardinal, 2 archbishops and 9 bishops, 1,110 clergy, 477 parishes, and 808,000 adherents.

The proportion of marriages in Scotland according to the rites of the various Churches in 1984 was Church of Scotland, 39 7%, Roman Catholic, 13 7%, Episcopal, 1 3%; United Free, 0 4%; others, 4 5%; civil, 40 7%.

Education. The Publicly Maintained System of Education England and Wales. Compulsory schooling begins at the age of 5 and the minimum leaving age for all pupils is 16. No tuition fees are payable in any publicly maintained school (but it is open to parents, if they choose, to pay for their children to attend other schools) The post-school stage, which is voluntary, includes universities, polytechnics and other further education establishments (including those which provide courses for the training of teachers), as well as adult education and the youth service. Financial assistance is generally available to students on higher education courses in the university and non-university sectors and to some students on other courses in further education.

Nursery Education Children under 5 may be provided for in nursery schools and nursery classes in primary schools. In the public sector no fees are payable. There were (1985) 561 nursery schools accommodating 49,613 children while some 4,074 primary schools contained nursery classes accommodating 217,323 children. Over 84% of all these children attend on a part-time basis. There are also 245,629 children under 5 attending maintained primary schools.

Primary Schools. Children normally begin primary school when they are 5 Nearly half of the 19,734 primary schools take the complete age-range from 5 upwards. About 3,100 take infants only, up to about 7 years; the rest take juniors only, from 7 or 8 on. The great majority of primary schools take both boys and girls. Nearly 13,500 of these schools had between 100 and 300 pupils each, of the remainder, over two-thirds had 100 pupils or less.

There are 1,822 primary schools in Wales. In those primary schools (and some secondary schools) which are in the predominantly Welsh-speaking areas, the main language of instruction is Welsh There are also 'Welsh', or, more accurately, bilingual schools in mainly English-speaking parts of Wales Generally children transfer from primary to secondary schools at 11

As a result of the Education (School Leaving Dates) Act 1976, one of the two former leaving dates was amended. This means that pupils whose dates of birth fall between 1 Feb and 31 Aug. (inclusive) cease to be of compulsory school age on the Friday before the last Monday in May Some of these pupils will leave school before their 16th birthdays. Pupils whose dates of birth fall between 1 Sept. and 31 Jan (inclusive) remain of compulsory school age until the end of the Easter term following their 16th birthdays

Middle Schools In some areas middle schools have been developed. These cover the age-ranges 8 to 12, 9 to 12, 9 to 13, 10 to 13 or 10 to 14. In Jan 1985 there were 1,285 middle schools, 48 fewer than in 1984, this stabilizing of numbers comes after a decade of rapid growth (there were only 15 middle schools in 1969)

Secondary Education In some areas, pupils are still selected at 11 for grammar schools on the basis of ability. The grammar schools, of which there were 171 at Jan. 1985, provide a mainly academic course from age 11 to 18. There were also a small number of technical schools which are the academic equals of grammar schools but can specialize to a greater or lesser extent in technical studies. Modern schools provide a general education up to the minimum school leaving age, though some pupils can, and increasingly do, stay on beyond that age. At Jan. 1985 there were 281 of these schools. There are also a small number of other schools which are

various combinations of grammar, technical and modern schools.

All authorities now operate some comprehensive schools to which pupils are admitted without reference to ability or aptitude. In Jan. 1985 there were 3,249 fully comprehensive schools with under 3m. pupils, in comparison with 221 such schools with about 210,000 pupils in 1965. With the development of comprehensive education various patterns of secondary school organization have come into operation, of which the main ones are all through schools with an age-range of 11-18 or 11-16 (with possible transfer to an 11-18 school or to a sixth form college (*i e*, 16–19) for further studies), 3-tier systems, which incorporate middle schools with a transfer age of 12, 13 or 14, and corresponding 12-18, 13-18 or 14-18 schools, or a system of junior and senior comprehensive schools, catering for the 11-18 age group with a transfer age of 13 or 14

Direct Grant Grammar Schools These schools receive grants direct from the Department of Education and Science for their secondary departments (or 'upper schools') and are independent of local education authorities. With the phasing out of the direct grant system now in its final stages, however, there were (1985–86) only 2 grammar schools receiving grant in respect of pupils attending them. It is expected that direct grant payments to grammar schools will cease in 1987

Assisted Places Scheme In order to give able children a wider range of educational opportunity the government set up, iii 1981, the assisted places scheme to give help with tuition fees at independent schools to parents who could not otherwise afford them. In the school year 1985-86, the 226 participating schools offered a total of 5,516 assisted places, 4,495 for entry at age 11, 12 or 13, and 1,021 for entry at sixth form level.

Special Education Since 1971, when the education of severely mentally handicapped children became the responsibility of the education service, the right to

education of all handicapped children has been recognised

The Education Act 1981, which came into force in April 1983, switched the focus of attention from a child's disability to his or her special educational needs The Act restated the Government's policy that no child should be placed in a special school if his or her needs can be met in an ordinary school and many children with special educational needs are being educated in ordinary schools. The Act provided that local education authorities should maintain 'statements' on children whom they had assessed as having special educational needs and for whom they were of the opinion that they should determine the special educational provision which should be made to meet these needs - that is, the more severely affected children.

The majority of children with statements of special educational needs attend special schools, of which there are at present around 1,530, including hospital special schools Some 100,000 pupils with statements are educated in special schools, of whom around 2,000 are in hospital special schools. Additionally, around 6,000 pupils with statements are educated in independent schools under arrangements made by local education authorities.

Of maintained special schools, 1,131 are day schools, 204 are mainly boarding schools and there are 98 hospital special schools. Attendance is compulsory from 5–16 In addition, the Act's definition of special educational needs applies to children under 5 who are likely to have a learning difficulty when over this age, or whose learning difficulty would be likely to persist if special educational provision were not made for them. Authorities also have a duty to make special educational provision either in a school or in a college of further education for children aged 16–18 who have been assessed as being in need of, and who want, such provision. In addition to the provision in ordinary and special schools, authorities can make special arrangements for educating children at home, in small groups or in hospitals. There are also some establishments which provide further education, P.E. vocational training and for assessment for employment purely for handicapped school leavers.

The statistics in the preceding paragraphs on special education are for England only and were valid at Jan 1985. The figures are not comparable with those given for 1984 (when transitional arrangements were in force) or previous years because of changes in the way statistics are collected as a result of the 1981 Act.

Ancillary Services Local education authorities may provide registered pupils at any school maintained by them with milk, meals and refreshment and they may make such charges as they think fit for anything they provide. For pupils whose parents are in receipt of supplementary benefit or family income supplement, however, authorities are required to ensure that such provision is made for the pupil at mid-day as appears to them to be requisite and anything which is provided must be free of charge. Authorities are also required to remit the whole or part of any charge for anything they provide for other pupils if having regard to their circumstances, they consider it appropriate to do so. Facilities must also be provided, free of charge, for consuming any meals or other refreshments which pupils bring to school themselves.

Local education authorities also have power to provide milk, meals and refreshment for pupils in non-maintained schools, if they wish to do so, under such terms as may be agreed with the proprietors as long as the cost does not exceed what it would have been if the pupils had been at a school maintained by an authority.

Further and Higher Education (Non-University) In Nov 1984 there were about 498 institutions in England and Wales providing courses of further education, ranging from shorthand instruction to degree-level, postgraduate work and courses of teacher-training. Course enrolments numbered 574,918 full-time (including 74,470 sandwich students) and 1 45m part-time and evening (including 471,753 students released by their employers) There were in addition 3,684 adult education centres (formerly known as evening institutes), and youth clubs which provided mainly part-time courses of non-advanced general education and were attended by 1,577,088 students The major providers of higher education, outside the university sector, are the 29 polytechnics. These are engaged mainly in higher education, offering degrees of a standard comparable to those of universities, professional qualifications and courses in a wide range of disciplines leading to awards of the Business and Technician Education Council Many other colleges of further education are however involved to a greater or lesser extent in the higher education sector of further education. Most polytechnics and further education colleges cater for a mixture of full and part-time students, and also sandwich students whose periods of study at college alternate with periods of practical training in industry or other employment. The Secretary of State receives advice on the funding and management of advanced further education from the National

Advisory Body for Public Sector Higher Education (NAB) whose remit covers almost all non-university provision at this level, most of which is maintained by local education authorities.

Courses were also provided by the Workers' Educational Association (8,188), the University extramural departments (8,684) and the Welsh National Council of YMCAs (65). The total number of students registered at these courses was 306,004.

Education at institutions of further education is not free, but fees are generally low, and are remitted for most students under the age of 18 by the local authority.

The Youth Service A wide range of facilities for the leisure-time recreation and informal social education of young people primarily of post-school age is provided by local education authorities and voluntary youth organizations. A duty is laid upon local education authorities by the provisions of the 1944 Education Act to secure the adequacy of such facilities for young people in their area; to this end they either provide, maintain and staff youth clubs, centres and other facilities themselves or assist voluntary agencies to do so.

Grants to voluntary agencies to help meet the cost of regional and national capital projects and to national voluntary bodies towards their headquarters and training expenses are made by the Government.

Awards to Students Local education authorities are responsible for making mandatory awards to suitably qualified students taking first-degree and comparable courses, courses of initial teacher-training and certain other advanced level courses. These awards cover fees and maintenance but the maintenance grants are subject to the income of the student and his parents or spouse. In addition scholarships may be available both from universities and other sources. The authorities may also give discretionary awards to students who do not qualify for mandatory awards including those taking non-degree level courses.

In 1983-84 there were 431,659 full value awards current in all, 46% at university and 31,034 were for teacher-training courses. Lesser value awards, for which the maximum rate of grant payable is below the full cost of the student's fees and maintenance, were also made by the authorities. There were 94,616 such awards taken up in the academic year 1983-84.

The Research Council gave over 6,800 new awards in 1985-86 and there were more than 14,300 current awards in that academic year. The British Academy and the Department gave 1,497 new awards (870 state studentships and 627 state bursaries) in 1984-85 and in 1985-86 awards totalled 1,497.

Teachers In order to qualify for work in maintained schools, most teachers take a course of professional training. Graduates and holders of some specialist qualifications obtained before 1 Jan. 1970 are regarded as qualified to teach without training, but anyone obtaining these qualifications after that date is obliged to take a training course before being appointed for the first time to a primary or special school, and since 1 Jan. 1974 before first appointment to a secondary school.

In 1985 there were some 62 non-university institutions (including 19 polytechnics) and 30 university departments of education providing courses of initial teacher-training in England and Wales.

In Nov. 1985 there were about 30,000 students on initial teacher-training courses

On 30 Sept. 1985, 409,000 full-time teachers were employed by local education authorities in maintained nursery, primary and secondary schools in England and Wales.

Finance. Total current and capital expenditure on education in England (including Universities GB, and Mandatory Awards England and Wales) from public funds is estimated at £13,880m for 1985–86 as compared with £13,411m for 1984–85.

Scotland. The statistics on schools relate to education authority and grant-aided schools. From 1974-75 all teachers employed in these schools require to be qualified; figures given are full-time equivalents.

Nursery Education In Sept 1983 there were 552 nursery schools and departments, with a total enrolment of 36,883 pupils

Primary Education In Sept 1983 there were 2,481 primary schools and departments and the number on the registers was 454,156.

In Sept 1983, 22,374 teachers were employed in primary schools and departments

Secondary Education In Sept 1983 there were 464 secondary schools with 401,423 pupils Of these schools, 383 were all-through comprehensive establishments providing the full range of Scottish Certificate of Education courses and also non-certificate courses. A further 60 schools were comprehensive in intake and provided both non-certificate and certificate courses, the latter however only up to Ordinary grade. Of the remaining 21 schools, these were selective in intake, 19 provided certificate courses only (Ordinary grade and Higher grade) and 2 non-certificate and certificate courses, the latter again not extending beyond Ordinary grade. Pupils who start their secondary education in schools which do not cater for courses beyond Ordinary grade may in the light of their performance, or for other reasons, be transferred at the end of their second or fourth year to schools providing Higher grade courses.

There were 28,732 teachers in secondary schools at Sept 1983

Special Schools In Sept 1983 there were 330 special schools and departments. The total number of handicapped children under instruction was 11,509, of which 5,267 had general learning difficulties, 1,975 had social and emotional handicaps, 1,939 were physically handicapped, 673 had visual handicap and 759 had hearing difficulties, and 896 were otherwise handicapped

At Sept 1983 there were 19 'List D' schools (these establishments correspond to Community Homes in England and Wales) with a total enrolment of 841

Further Education Centres and colleges for formal further education numbered 199 in 1983-84

The student population was 232,584, of whom 54,005 attended full-time (advanced courses, 27,779, non-advanced, 26,226) and 178,579 part-time (advanced courses, 30,247; non-advanced, 148,332)

Teacher-Training In Nov. 1983 there were 3,362 students in 7 colleges of education on pre-service courses of teacher-training

Finance Total expenditure on education met from revenue in 1983-84 was £1,452m (excluding university education and loan charges)

Independent Schools Outside the state system of education there were in England nearly 2,311 independent schools in Jan 1985, ranging from large 'public' schools to small local ones There were (Jan. 1985) 501,422 full-time and 14,723 part-time pupils in these schools. In Wales 11,013 full-time pupils attended 67 independent schools. Fees are charged by all these schools, which receive no grant from central government sources. All independent schools in England are required to be registered by the Department and are liable to the inspection by HM Inspector The term 'public schools' refers to independent schools in membership of the Headmasters' Conference, Governing Bodies Association or the Governing Bodies of Girls' Schools Association Qualifications under which a school may be represented at the Headmasters' Conference include the measure of independence enjoyed by the governing body and the amount of advanced courses undertaken. Some of these schools are for boarders only, but the majority include non-resident 'daypupils' In Scotland there were 85 independent schools, with a total of 15,396 pupils in Sept 1984. A small number of the Scottish independent schools are of the 'public school' type but they are not known as 'public schools' since in Scotland this term is used to denote education authority (i e, state) schools.

The earliest of the schools were founded by, and attached to, the medieval churches Many were founded as 'grammar' (classical) schools in the 16th century, receiving charters from the reigning sovereign. Reformed mainly in the middle of the 19th century, these schools now provide the highest form of English pre-

university education. Among the most well-known independent schools are Eton College, founded in 1440 by Henry VI, with 1,250 boys; Winchester College, 1394, founded by William of Wykeham, Bishop of Winchester, 600 boys, Harrow School, founded in 1560 as a grammar school by John Lyon, a yeoman, 740 boys; Charterhouse, 1611, 670 boys. Among the earliest foundations are King's School, Canterbury, founded 600; King's School, Rochester, 604, St Peter's, York, 627.

Universities. In England there are 34 traditional degree-giving universities. In addition there are the London and Manchester Business Schools and the Open University Eight new universities have been established since 1961 and 8 former Colleges of Advanced Technology gained university status in the 1960's.

In Wales there is I university, the University of Wales, with colleges at Aberystwyth, Bangor, Cardiff, Lampeter and Swansea. The Welsh National School of Medicine is a school of the University, and the University of Wales Institute of Science and Technology became a constituent college in Nov. 1967.

In Scotland there are 8 universities, St Andrew's, Glasgow, Aberdeen and Edinburgh Universities date from the 15th and 16th centuries while the others, Strathclyde, Heriot-Watt, Stirling and Dundee have been formally established since the early 1960s.

All these universities and colleges are independent, self-governing institutions, although they receive substantial aid from the State (in the case of the Open University by direct grant from the Department of Education and Science, and the traditional universities through the University Grants Committee). The UGC is a committee appointed by the Secretary of State for Education and Science designed to advise the Government on the needs of the universities, and to prepare plans for future development. The members are drawn from education and industry. The Government receives advice on the universities' requirements for central computing facilities from the Computer Board for the Universities and Research Councils whose members are also drawn from the universities and industry.

The Royal College of Art and the Cranfield Institute of Technology are primarily postgraduate institutions which award higher degrees under charters granted in 1967 and 1969 respectively. They receive grants direct from the Department of Education and Science.

The local education authorities have no responsibility for universities.

The Open University received its Royal Charter on 1 June 1969 and is an independent, self-governing institution, awarding its own degrees. It is financed by the Government through the Department of Education and Science and by the receipt of students' fees.

Tuition is by means of correspondence textbooks, radio and television broadcasts and summer schools. Students can also attend one of 260 local study centres. No formal qualifications are required for entry to undergraduate or associate student courses.

Anyone resident in the UK aged 18 or over may apply There are 134 undergraduate courses; many are available on a one-off basis to associate students

In 1985 it had 67,443 undergraduates, about 58,399 continuing education students and clients and some 914 postgraduate students. The university has 2,600 full-time staff working at its Milton Keynes headquarters and in 13 regional offices throughout the country. There are 5,000 part-time tutors and counsellors.

The University of Buckingham offers two-year degree courses. The academic year commencing in Jan. and consisting of four ten-week terms. There are four Schools of Studies: Accounting, Business, and Economics; Humanities; Law; and Sciences. A number of postgraduate courses are also offered. In 1985, there were 570 full-time students. Opened in 1976, the University of Buckingham received its Royal Charter in March 1983.

All universities charge fees, but financial help is available to students from several sources.

The universities themselves provide scholarships of various kinds and all local education authorities have a system of awards to help suitable students to attend university.

The amount of aid given generally depends upon the parents' means. The majority of the students at the English and Welsh universities are in receipt of some form of financial assistance.

Awards known as state studentships are offered on a competitive basis by the Department from among candidates considered by the universities and other higher education institutions to be qualified for postgraduate studies in the humanities, similar awards, tenable at universities or other higher education institutions, are offered by the Research Councils to students studying topics within the broad spectrum of agriculture and food, the biological sciences, man's natural environment, science and engineering and the social sciences at post-graduate level

The following table gives the number of professors, lecturers, etc., and students (full-time and sandwich courses) for 1984–85.

The British Council. The British Council was established in Nov. 1934 and incorporated by Royal Charter in 1940. Its aims are the promotion of an enduring understanding and appreciation of Britain in other countries through cultural, educational and technical co-operation

The Council's expenditure in 1984–85 amounted to £203 8m. Funds were provided by a grant-in-aid of £47 5m. from the Overseas Information (Foreign and Commonwealth Office) Vote and a contribution of £26 3m. from the Overseas Aid Vote. A further £76 6m was provided by the Overseas Development Administration to cover the cost of administration of, and the reimbursement of sums expended on technical co-operation schemes, together with £6m. provided by the Foreign and Commonwealth Office. The balance of £47 4m. was derived from Council earnings and from international agencies, overseas governments, etc. for educational services.

The Council is governed by a board consisting of up to 30 members, 2 of whom

are nominated by Ministers. There are advisory committees for Scotland and Wales and also advisory committees for the main branches of the Council's work. In Feb. 1986 the Council had staff in 82 countries.

The Council is designated by the British Government to carry out over 30 bilateral cultural agreements, including that with the Soviet Union. The Council's work broadly divides into English language teaching; education and training; the development of university links and interchange, the promotion of wider use and availability of British books and periodicals; the development of personal contacts and the provision of information abroad on British experience and resources in the fields of education, medicine, science, technology and the arts

The general policy in the field of English language teaching is to advise and assist education authorities overseas, particularly in curriculum and materials development and the training of local teachers of English, courses are provided in Britain and abroad for the further training of English language teaching experts from overseas In many countries the Council runs its own English teaching centres. The Council acts as a centre for the dissemination of information about British educational thought and practice at all levels and, through its complement of education specialists working overseas, it has become closely involved with the administration of aid on behalf of the Overseas Development Administration. It assists in producing English teaching and other educational television and radio programmes overseas and arranges overseas consultancies and training in TV, radio and the application of media to development both in Britain and overseas A prominent aspect of its education work is the assistance given in developing countries to the adoption of modern and locally relevant methods of science and mathematics teaching in schools Following the merger with TETOC in 1982, the Council is responsible for advising ODA on its policies in the fields of technical education, industrial training, agricultural education, public administration and management development. Over 1,500 teachers of English or advisers, recruited by the British Council are working overseas. The Council is concerned to promote closer international academic collaboration through a variety of interchange and linking schemes, and through the provision of information and advice on educational institutions, it also administers the British Government's Technical Co-operation Training Programme and scholarship programmes on behalf of a large number of international organizations, notably UN and EEC. It administers examinations on behalf of a number of British examining boards

During recent years the Council has collaborated with British educational institutions and firms in designing and implementing a wide range of education projects, for which overseas authorities or multilateral agencies pay the full cost.

The sciences, including medicine, technology and agriculture, form an increasingly important part of Council work. Contacts are built up and information collected and distributed through the specialist departments in London and the qualified scientists serving overseas, who also advise on training in Britain and the provision of experts abroad.

The importance of the arts as a medium for fostering cultural relations is reflected in the Council's encouragement of the appreciation of British achievements in the performing and the visual arts, both by supporting local activity and by sending theatre and ballet companies, orchestras and chamber groups, and exhibitions both of fine arts, crafts and photographs, from Britain on tours overseas. The Council also produces booklets, records and tapes on a wide range of literary and artistic subjects and in addition makes extensive use of films and video cassettes in support of its arts and educational work.

The Council runs, or is associated with, over 100 libraries in the countries in which it is represented. It arranges touring exhibitions of new British books and periodicals. Additional publicity for British books is provided by the publication *British Book News*, and the distribution of specialized book lists. The Council also administers ODA funds for the presentation of books to educa-

tional institutions in developing countries and the subsidized publication of low-priced books for students under the imprint of the English Language Book Society.

The Council arranges short advisory tours overseas by British experts In a number of countries it is also the overseas administrative arm of the British Volunteer Programme. It awards scholarships and bursaries and arranges study programmes for some 30,000 visitors a year in Britain. It administers central government funds for youth exchanges with other countries.

In Britain the Council administers the programmes of award schemes for overseas students, meets many students on arrival from overseas, and provides an accommodation service for students from overseas for whom it has a special responsibility. The Council runs offices in Britain, mainly in university cities, for these purposes

The Council is increasingly called on to administer training schemes and educational services financed by overseas authorities, or by multilateral agencies, on a contractual basis. The Council's specialist courses and summer schools provide advanced study in a number of fields, notably medicine, science, literature and the arts, English language and education. Payment is made by the student, or his parent organization, or by some other sponsor.

The Council produces the following periodicals Studying in Britain, Media in Education and Development and British Book News Other publications include the series Writers and their Work, Notes on Literature, British Education, British Books and Libraries and a number of booklets including Scholarships Abroad, Introducing Wales, How to Live in Britain and Statistics of Overseas Students in the United Kingdom. The Council has sponsored two major series of literature recordings, The Complete Works of Shakespeare and The English Poets from Chaucer to Yeats.

Arts Council of Great Britain. The Arts Council is an independent organization established by Royal Charter in 1946, and is the principal channel for British Government and to the arts. The Council's objects are to develop and improve the knowledge, understanding and practice of the arts, to increase their accessibility to the public, and to advise and co-operate with government departments, local authorities and other organizations.

The Council consists of a Chairman and not more than 19 other members who are appointed by the Minister for the Arts, after consultation with the Secretaries of State for Scotland and Wales The Council is advised by panels and committees concerned with different aspects of the arts. With the approval of the appropriate Minister, the Council appoints committees for Scotland and Wales known respectively as the Scotlish Arts Council and the Welsh Arts Council

The Council receives a grant-in-aid from the Government voted annually by Parliament. The grant-in-aid for 1986 is £135.6m (inclusive of an earmarked sum of £25m. as replacement after the abolition of the GLC and other metropolitan counties).

As well as giving financial help and advice to several hundred artistic organizations from the major opera, dance, drama companies, orchestras and festivals, to the smallest touring theatre and experimental group, the Council encourages such diverse interests as contemporary dance, photography, art films, and helps professional creative writers, dramatists, poets, musicians, composers, artists and photographers by means of bursary and award schemes. The Council provides funds for specialist training courses in the arts, and gives advice on projects for the construction of new buildings, or improvements to existing ones under its 'Housing the Arts' scheme

A growing proportion of the Council's funds is channelled to the network of regional arts associations which practically covers the whole of England and Wales. The regional arts associations are not branches of the Arts Council, but are autonomous bodies, financed by a combination of Arts Council, local authority and private funds.

The Council is responsible for the administration of the South Bank Arts

complex including the Hayward Gallery, the Wigmore Hall and Serpentine Gallery The Council mounts art exhibitions at the Hayward and Serpentine and other galleries in London and also in the regions. Other direct promotions include tours of opera and drama companies, of the Council's own films on the arts and of music groups under the Contemporary Music Network scheme. The Council has a library of contemporary British poetry at its headquarters and library and information service covering cultural policy, also administration and funding

National Insurance. The National Insurance Act, 1946, came into operation on 5 July 1948, repealing the existing schemes of health, pensions and unemployment insurance. This Act, along with later legislation, was consolidated as the National Insurance Act, 1965.

The Social Security Act 1975 introduced, from 6 April 1975, a new system of national insurance contributions to replace the previous system of flat-rate and graduated contributions. Since 6 April 1975, Class 1 contributions have been related to the employee's earnings and are collected with PAYE income tax, instead of by affixing stamps to a card. Class 2 and Class 3 contributions remain flat-rate, but, in addition to Class 2 contributions, those who are self-employed may be liable to pay Class 4 contributions, which for the year 1986–87 will be at the rate of 6.3% on profits or gains between £4,450 and £14,820, which are assessable for income tax under Schedule D. The non-employed and others whose contribution record is not sufficient to give entitlement to benefits are able to pay a Class 3 contribution voluntarily to qualify for a limited range of benefits. Class 2 weekly contributions for 1985–86 for men and women were £4.75 up to 5.0ct 1985 and £3.50 from 6.0ct. 1985 onwards. Class 3 contributions were £4.65 a week up to 5.0ct. 1985 and £3.40 from 6.0ct. 1985 onwards. Class 4 contributions were unchanged.

From 6 April 1978 the Social Security Pensions Act 1975 introduced earnings-related retirement, invalidity and widows' pensions. Employee's national insurance contribution liability depends on whether he is in contracted out or not contracted out employment. Prior to 6 Oct 1985 the not-contracted out employee paid 9% on all earnings up to £265 a week. The employer's rate was 10 45%. An employee's contracted-out contribution was 9% of the first £35.50 a week of earnings and 6 85% of earnings between £35.50 and £265 a week. The employer's contribution was 10 45% of the first £35.50 of weekly earnings and 6 35% of earnings between £35.50 and £265 a week.

The changes effective in Class I standard contributions from 6 Oct 1985 have been more involved Since that date for non contracted-out employment. On earnings between £35 50 and £54 99 a week, employee and employer both pay 5%, on earnings between £55 and £89 99 a week, employee and employer both pay 7%; on earnings between £90 and £129.99 a week, employee and employer both pay 9%, on earnings between £130 and £265 a week the employee pays 9% and the employer pays 10.45%, on earnings of over £265 a week the employee pays 9% of £265 but the employer pays 10 45% on all earnings. Since 6 Oct. 1985 for contracted-out employment: On earnings between £35.50 and £54 99 a week the employee pays 5% on the first £35.50 and 2 85% on the remainder and the employer pays 5% on the first £35.50 and 0.9% on the remainder; on earnings between £55 and £89.99 a week the employee pays 7% on the first £35.50 and 4 85% on the remainder and the employer pays 7% on the first £35.50 and 2 9% on the remainder; on earnings between £90 and £129 99 a week the employee pays 9% on the first £35.50 and 6 85% on the remainder and the employer pays 9% on the first £35.50 and 4.9% on the remainder; on earnings between £130 and £265 a week the employee pays 9% on the first £35.50 and 6.85% on the remainder and the employer pays 10 45% on the first £35 50 and 6 35% on the remainder; on earnings exceeding £265 a week the employee pays 9% on the first £35.50 and

6 85% on earnings between £35.50 and £265 and the employer pays 10.45% on the first £35.50, 6 35% on earnings between £35.50 and £265 and 10 45% on the remainder.

The State supplements the contributions paid by contributors and employers, from general taxation. Contributions and supplement together with interest on investments form the income of the National Insurance Fund from which benefits are paid.

Statutory Sick Pay (SSP) The Social Security and Housing Benefits Act 1982 provides that, since 6 April 1983, employers are responsible for paying statutory sick pay (SSP) to their employees for up to 8 weeks of sickness absence in a tax year SSP replaces the employee's entitlement to State sickness benefit which will not be payable as long as any employer's responsibility for SSP remains. From 6 April 1986, SSP will be payable for a maximum of 28 weeks in any period of sickness (periods separated by 8 weeks or less will count as one)

Benefits Qualification for any benefit depends upon fulfilment of the appropriate contribution conditions. Persons who are incapable of work as the result of an industrial accident may get sickness benefit followed by invalidity benefit without having to satisfy the contributions conditions. Employed persons may qualify for all the benefits, self-employed may not qualify for unemployment benefit.

Suckness Benefit From 29 Nov 1985 the rate is £29 15 a week plus £18 00 a week for an adult dependant

Unemployment Benefit is paid through the local unemployment benefit offices of the Department of Employment The rate is £30 80 a week plus £19 a week for an adult dependant

Invalidity Benefit replaces sickness benefit after 168 days of entitlement (or 120 days where maximum entitlement to 8 weeks SSP has run out and incapacity for work follows on immediately or within 57 days from the date on which maximum entitlement to SSP runs out) It comprises a basic invalidity pension of £38 30 weekly and an invalidity allowance of £8 05 if incapacity began before age 40 £5 10 it incapacity began between 40 and 50 or £2 55 if it began between 50 and 60 (55 for women) Increases are. £23 00 for an adult dependant plus £8 05 for each child for whom child benefit is payable Since 16 Sept 1985, invalidity allowance is reduced or extinguished by the amount of any additional invalidity pension and/or guaranteed minimum pension to which there is title

Maternity Benefit For a confinement a woman may receive a maternity grant of £25 and, where 2 or more children are born at the confinement, a further grant of £25 for each additional child who is alive 12 hours after its birth. There are no contribution conditions. The grant is paid on the satisfaction of a simple 'presence in Great Britain' test by the mother. From April 1987, maternity grant will be increased and subject to a means test. If the woman has been gainfully employed or self-employed, and has paid sufficient full-rate national insurance contributions in the relevant income tax year, she may receive a maternity allowance of £29.15 a week normally payable for 18 weeks commencing 11 weeks before the expected week of confinement, but not for any part of that period she does any paid work. From April 1987, title will depend on a revised work test and will be paid either by the State or the employer depending on the claim and status. Maternity allowance may be increased in certain circumstances in respect of dependants in the same way as sickness and unemployment benefits.

Widow's Benefit On her husband's death a widow normally qualifies for 26 weeks for an allowance of £53 60 a week for herself plus an increase of £8 05 a week for each child for whom child benefit is payable. At the end of the 26 weeks she may qualify for a widowed mother's allowance of £38.30 for herself, and the increases for the children for whom child benefit is payable continue at the same rate as for the first 26 weeks of widowhood. She may also receive her allowance at the personal rate of £38.30 a week if she has living with her a son or daughter who is under 19. The child increase for widow's allowance and widowed mother's allowance is.

generally speaking, payable only in respect of a child for whom child benefit is payable.

A widow's pension may be paid to: (i) A widow after the termination of her widow's allowance, if she does not qualify for widowed mother's allowance and was aged 40 or more when her husband died; (ii) A widow after she ceases to be entitled to a widowed mother's allowance if she is then aged 40 or more The standard rate of this pension is £38 30 a week if the widow was 50 or more when her husband died or when her entitlement to widowed mother's allowance ended If she was between 40 and 50, however, the standard rates of total pension range in 7% steps from 93% of the full age-50 rate (i.e., £35 62 a week) for the widow who was 49 at that time to 30% (i.e., £11 49 a week) for the widow who was then 40

Child's Special Allowance An allowance may be payable for the children of divorced parents where the father has died. It is payable to the mother if she has not remarried and her former husband was contributing, or legally liable to contribute, at least 25p a week towards the children's support in cash or kind or if she took reasonable steps to enforce maintenance and she was entitled to child benefit for the child(ren) when her former husband died or it is her child by her former husband and he was entitled to child benefit for the child(ren) when he died It is similar to the increases for widow's children and is payable at the same rates

Guardian's Allowance A person who is responsible for an orphan child may be entitled to a guardian's allowance of £8.05 a week in addition to the amount of child benefit payable in respect of that child Normally both the child's parents must be dead but when the child is illegitimate, or the parents were divorced, or one parent is missing, or serving a long sentence of imprisonment, the allowance may, in certain circumstances, be paid on the death of one parent only

Returement Pension. In order to receive a retirement pension, men between 65 and 70, and women between 60 and 65 must have retired from regular employment From 6 April 1979 a woman divorced over the age of 60 must satisfy the retired conditions before a pension is payable. The standard rates of basic pensions are £38 70 a week for a man or woman on his or her own contributions and £23 60 for a married woman through her husband's contributions. Proportionately reduced pensions are payable where contribution records are deficient. For a person who reaches pension age on or after 6 April 1979, additional pension may also be payable. This is based on the earnings on which he or she has paid Class 1 contributions in each complete tax year between April 1978 and pension age. If the person has been a member of a contracted-out occupational pension scheme, that scheme will be responsible for paying the whole or part of the additional pension. An increase of £23 00 a week may be payable for a dependent wife. If she resides with the beneficiary the increase is gradually reduced for earnings over £45 a week. This tapered earnings rule does not apply to new claims from 16 Sept. 1985. From that date the following earnings rule will apply in these circumstances. When the spouse/woman looking after the claimant's child is living with the claimant an adult dependant's allowance will only be payable if the dependant's earnings do not exceed the standard rate of unemployment benefit for a person under pensionable age (currently £30.45). If she does not reside with the beneficiary an increase is not payable if she earns more than £23.00 a week. In addition £8 05 a week may be payable for each child for whom child benefit is payable. In certain circumstances an increase of £23.00 a week may be payable for a woman having care of the pensioner's children. In addition, a man who had paid graduated contributions receives 5p per week for every £7.50 of graduated contributions paid, and a woman 5p per week for every £9 paid. Although no further graduated contributions have been paid after April 1975, pension already earned will be paid along with the basic pension in the normal way. If, after being awarded a retirement pension, a man under 70 or a woman under 65 earns more than £75 in a calendar week the pension for the next pension week, including any increase for dependants, will be reduced by 5p for every 10p earned between £75 and £79 and by 5p for every 5p earned over £79. If retirement is postponed after minimum pension age increments of basic

pension can be earned for periods of deferred retirement. From 6 April 1979 increments are earned at the rate of one-seventh penny per £1 of basic pension for every 6 days (excluding Sundays) for which pension has been foregone. Any days for which another benefit has been paid will not count. These increments must be at least 1% of the pension rate unless the minimum was earned under the arrangements which applied before 6 April 1979. For periods between 6 April 1975 and that date, the rate was one-eighth penny per £1 of the basic pension rate for every 6 days and for periods of deferred retirement before 6 April 1975 increments were based on the number of contributions paid as an employed or self-employed person At age 70 for a man (65 for a woman) the pension for which a person has qualified may be paid in full whether a person continues in work or not irrespective of the amount of earnings. At the age of 80 an age addition of £0.25 a week is payable. In addition non-contributory pensions are now payable, subject to residence conditions, to persons aged 80 and over who do not qualify for a retirement pension or qualify for one at a low rate. The rates of these pensions, which are financed by Exchequer funds, are £21 50 a week for a single person and £12 85 for a married woman These amounts do not include the £0 25 age addition From 22 Dec. 1984 the lower rate of category D retirement pension payable to married women was abolished

Death Grant This is a lump sum paid on the death of an insured person or his close relative. The normal amount of the payment is For an adult, £30; for a child aged 6 but under 18, £22, 50, for a child aged 3 but under 6, £15, for a child under 3, £9 For the death of a person who was within 10 years of pensionable age on 5 July 1948 (i.e., a man over 55 and a woman over 50 on that date) only half the standard amount is payable. No grant is payable for the death of a person who was over the pensionable age on 5 July 1948.

The Industrial Injuries Provisions of the Social Security Act, 1975. The Industrial Injuries Act, which also came into operation on 5 July 1948, with its later amending Acts, was consolidated as the National Insurance (Industrial Injuries) Act, 1965. This legislation was incorporated in the Social Security Act, 1975. The scheme provides a system of insurance against 'personal injury by accident arising out of and in the course of employment' and against certain prescribed diseases and injuries due to the nature of the employment. It takes the place of the Workmen's Compensation Acts and covers persons who are employed earners under the Social Security Act. There are no contribution conditions for the payment of benefit. Three types of benefit are provided.

(1) Disablement benefit This is payable where, as the result of an industrial accident or prescribed disease, there is a loss of physical or mental faculty. The loss of faculty will be assessed as a percentage by comparison with a person of the same age and sex whose condition is normal. If the assessment is 20%, or more, benefit will be a pension varying according to the assessment, from £12 50 a week to £62.50 a week. If the assessment is under 20% benefit will normally be a gratuity of an amount not exceeding £4,150. Unemployability supplement plus age additions similar to invalidity allowance, may be payable to a disablement pensioner who, as a result of the relevant loss of faculty is incapable of work and likely to remain permanently so incapable. Increases for dependants at the same rates as for invalidity pension are also payable to a disablement pensioner who is entitled to unemployability supplement. The supplement cannot be paid at the same time as certain other benefits payable under the Social Security Act or out of public funds Other increases of disablement benefit may be payable (1) where the loss of faculty causes special hardship, i e, it prevents the beneficiary from undertaking his regular job or one of an equivalent standard of earnings; (ii) there is a need for constant attendance; (iii) there is exceptionally severe disablement and the need for constant attendance is likely to be permanent; or (iv) disablement is assessed at less than 100% and the beneficiary is in hospital for treatment for his injury or prescribed disease. Pensions for persons under 18 are at a reduced rate. When injury benefit was abolished for industrial accidents occurring and prescribed diseases commencing on or after 6 April 1983, a common start date was introduced for the payment of disablement benefit 90 days (excluding Sundays) after the date of the relevant accident or onset of the disease.

(2) Death Benefit On the death of a person as the result of an industrial accident or a prescribed disease, certain dependants may qualify for benefit. Benefit for a widow is a pension normally of £53 60 weekly for the first 26 weeks and thereafter £38 85, depending on such factors as age, entitlement to a child's allowance and permanent incapacity for self-support. If the conditions for pension at the higher rate are not satisfied the widow may receive a pension of £11 49 a week Child allowances may be payable to the widow, or other person, entitled to child benefit for children of the deceased For widows, these allowances are usually at the rate of £8 05 a week for each child; other persons do not normally qualify for these allowances. An allowance of £1 is payable to a woman having care of a child of the deceased. Benefit for widowers, parents and certain other relatives takes the form of pensions, allowances or gratuities according to the relationship to, and degree of maintenance by, the deceased.

War Pensions The number of beneficiaries in receipt of war (1914–18) pensions or allowances as at 30 Sept. 1985 was 16,550. The number of beneficiaries in receipt of war (1939–45 and later) pensions or allowances in payment as at 30 Sept. 1985 was 277,000. The expenditure for both wars for 1984–85 was £544m The expenditure is exclusive of administrative expenses.

National Insurance Fund At 1 April 1984 the balance of the National Insurance Fund amounted to £4,603,840,000 Income during the period 1 April 1984 to 31 March 1985, consisting of contributions from insured persons and employers, payments from the Exchequer and interest on investments, etc., was £22,118m. Payments of benefit in respect of unemployment were £1,577,608,000, sickness, £275,186,000, invalidity, £2,153,255,000, maternity, £161m, widows, £786m; guardian's allowance and child's special allowance, £1 7m, retirement pension, £15,302,313,000, death grants, £17,089,000, injury benefit, £330m, disablement benefits, £381,203,000, death benefit, £55m Included in these figures are the following estimated amounts of graduated retirement benefit, £320m, additional component, £210m., earnings related supplement having ceased. Administrative and other payments cost approximately £1,034,180,000 The balance at 31 March 1985 was £4,977,510,000

From 1 April 1975 the National Insurance Reserve Fund and the Industrial Injuries Fund were merged with the National Insurance Fund. All basic scheme contributions payable under the 1975 Social Security Act are paid into the single fund out of which the existing range of benefits will continue to be financed. The new national insurance fund will continue to receive a Treasury Supplement set at a level of 13% of total contribution income.

Child Benefit Child benefit is a tax-free cash allowance for all children. The weekly rate for each child is £7 10 from April 1986 Child benefit is payable for all children under age 16 and for those under age 19 receiving full-time non-advanced education at a college or school One Parent Benefit. This is a tax-free cash allowance for certain people bringing up children alone. It is payable for the first or only child in the family in addition to child benefit. The weekly rate from Nov. 1985 is £4.55

Family Income Supplement Family income supplement is payable to families with at least 1 dependent child where the man or woman is in remunerative work for at least 30 hours a week (24 hours for lone parents), and where the family's normal gross weekly income (but excluding child benefits) is below a prescribed amount. The prescribed amount for families is currently £86 per week plus an amount of £11.50, £12.50 or £13.50 according to the age of each dependent child. The weekly rate of benefit payable is one-half of the difference between the prescribed amount and the family's normal income, subject to a maximum weekly payment of £22.50 plus an amount of £2.50, £3.00 or £3 50 according to the age of each dependent child. Benefit is usually payable for 52 weeks and is not affected by changes in circumstances.

Autendance allowance. This is a tax-free non-contributory allowance for severely

disabled people, including children aged 2 or over, who require a lot of help from another person. There are 2 rates, the higher rate of £30 60 a week for those who require attention or supervision by day and night, and the lower rate of £20.45 a week for those who need the attendance either by day or night. In addition to the medical requirements a simple test of residence and presence in Great Britain must also be satisfied.

Invalid Care Allowante This is a non-contributory taxable benefit which may be paid to those under pensionable age who stay at home to care for a person who is receiving attendance allowance or constant attendance allowance. In general married women do not qualify for this benefit. Current rate £23 00 a week, with increases for dependants

Supplementary Benefit. Under the Supplementary Benefits Act, 1976, as amended by the Social Security Act 1980, benefit is payable to any persons in Great Britain aged 16 years or over (excluding persons at school or college or anyone directly involved in a trade dispute) who are not in full-time remunerative work and who are without resources, or whose resources (including national insurance benefits) need to be supplemented in order to meet their requirements. A person who is excluded from benefit under the normal rules may, nevertheless, receive payments to meet urgent need. The general standards by reference to which supplementary benefit is granted are determined by statutory regulations approved by Parliament. Persons who are dissatisfied with the amount of benefit granted to them may appeal to an independent Appeal Tribunal established under the Act.

During the financial year 1984-85 net payments on supplementary benefit amounted to £6.452.034

National Health. The National Health Service in England and Wales started on 5 July 1948 under the National Health Service Act, 1946. There is a separate Act for Scotland and also one for Northern Ireland, where the Health Services are run on similar lines to those in England and Wales.

The National Health Service, which is available to every man, woman and child, is a charge on the national income in the same way as the armed forces and other facilities

Every person normally resident in this country is entitled to use any complete part of the services, and no insurance qualification is necessary. Most of the cost of running the service is met from the national exchequer, i e, from taxes.

Since Sept. 1957 a small weekly National Health Service contribution has been payable by contributors and where applicable by their employers. For convenience this contribution is collected with the National Insurance contribution and for 1982–83 is estimated to be £1,618m. for Great Britain

Organization Under the provisions of the NHS Act 1977 and the Health Service Act 1980, the administration of the National Health Service in England and Wales is organized under a system of regional and district health authorities accountable to the Secretary of State for the Social Services and the Secretary of State for Wales In Scotland the National Health Service is administered under the National Health Service (Scotland) Act 1978, by 15 Health Boards and a Common Services Agency all accountable to the Secretary of State for Scotland.

There are 191 district health authorities in England responsible for the administration and development of health services in their district. Fourteen regional health authorities, each consisting of a number of health districts, are responsible for allocating resources between the district health authorities in their regions and for monitoring their performance. The regional authorities are responsible for developing strategic plans and priorities and for carrying out certain executive functions

Services The National Health Service broadly consists of hospital and specialist services, general medical, dental and ophthalmic services, pharmaceutical services, community health services and school health services. All these services are free of charge except for such things as prescriptions, spectacles, dentures and dental treat-

ment, amenity beds in hospitals and for some of the community services, for which charges are made with certain exemptions

The total cost of the Health and Personal Social Services (Great Britain) is estimated at £17,483m. for 1982-83 and the estimated net expenditure by the Exchequer (except for the Local Authority Personal Social Services, where the rates and the Exchequer grants are estimated at about £2,341m.) in 1982-83 is £12.651m

The provisional number of abortions performed in 1984 under the provisions of the Abortion Act, 1967, was 169,993, of which 136,388 related to England and Wales residents Of these 136,388 abortions, 81,097 (59 5%) were to single women, 38,651 (28 3%) were to married women, and 16,640 (12 2%) were to widowed, divorced or separated women and to women who did not state their marital status

The number of abortion notifications received in Scotland in 1984 under the provisions of the Abortion Act 1967, was 9,107, of which 9,093 related to Scottish residents. Of these 9,107 notifications, 5,529 (60.7%) were to single women, 2,494 (27.4%) were to married women, and 1,084 (11.9%) were to widowed, divorced of separated women and to women who did not state their marital status.

In 1977 there were 26,810 general medical practitioners, 13,564 general dental practitioners and 219,900 qualified nurses and midwives. There were (1977) 469,849 allocated hospital beds

Personal Social Services. Under the Local Authority Social Services Act 1970 and in Scotland the Social Work (Scotland) Act 1968 the welfare and social work services provided by local authorities were made the responsibility of a new local authority department—the Social Services Department in England and Wales, and Social Work Departments in Scotland headed by a Director of Social Work. The social services thus administered include the fostering, care and adoption of children, welfare services and social workers for the mentally disordered, the disabled and the aged, and accommodation for those needing residential care services. In Scotland the social work departments' functions also include the supervision of persons on probation, of adult offenders and of persons released from penal institutions or subject to fine supervision orders.

The number of supported residents in residential accommodation for the elderly and younger disabled was as follows.

CONSTITUTION AND GOVERNMENT. Northern Ireland is part of the United Kingdom. As such it is subjected to the fundamental constitutional provisions which apply to the rest of the United Kingdom. However, in the Northern Ireland Constitution Act 1973 and the Northern Ireland Act 1982, Parliament provides for a measure of devolved government in Northern Ireland. This can only be introduced if both Houses of Parliament agree that the arrangements for devolution are likely to command widespread acceptance throughout the community in Northern Ireland.

Such matters as the Crown, Parliament, international relations, the armed forces and the raising of taxes cannot be devolved in any circumstances and remain the responsibility of the UK Parliament and Government. In the event of agreement on widely-acceptable arrangements for devolution, powers over a range of social and economic matters would be devolved first. The Northern Ireland Assembly would have power to make laws on these subjects and Members of the Assembly would be appointed as heads of the relevant Northern Ireland government depart-

ments Such powers were devolved on 1 Jan 1974, following an agreement among the Northern Ireland political parties to form a power-sharing Executive This collapsed on 28 May 1974 and there had been no devolution by 31 Dec. 1985

In the interim and in the absence of devolved arrangements which command widespread acceptance, Northern Ireland is governed by 'direct rule' under the provisions of the Northern Ireland Act 1974. This provides for Parliament to approve all laws for Northern Ireland and places the Northern Ireland departments under the direction and control of a UK Cabinet Minister, the Secretary of State for Northern Ireland.

The 78-member Assembly was elected by proportional representation in 1982. The present party balance is Ulster Unionist Party (UUP), 26 seats, Democratic Unionist Party (DUP), 20 seats, Social Democratic and Labour Party (SDLP), 13 seats, Alliance Party, 10 seats, Sinn Fein, 5 seats; others (Independent Unionists), 4 seats. Since 1982 the SDLP Members have declined to take their seats in the Assembly as presently constituted. Sinn Fein has said that it will not take part in Assembly proceedings under any circumstances.

The Assembly has, pending agreement on the devolution of powers, important consultative and scrutinising functions. By Dec. 1985 it had produced 118 reports, considered 32 proposals for draft Orders in Council, and in addition some 720 pieces of subordinate legislation had been referred to it. As a result of the Assembly's work, direct rule has been made more responsive to local needs. In May 1984 the Assembly set up a Committee on Devolution to consider and report on how the Assembly might be strengthened and progress made towards legislative and selective devolution. The Committee's third report was published in Oct. 1985.

In Nov 1985 the governments of the UK and the Republic of Ireland entered into a formal Agreement which is designed to promote peace and stability in Northern Ireland, help to reconcile the two major traditions in Ireland, create a new climate of friendship and co-operation between the people of the two countries and improve co-operation in combating terrorism. Under the Agreement an Intergovernmental Conference was established in which the Irish Government will put forward views and proposals concerning stated aspects of Northern Ireland affairs, in which the promotion of cross-border co-operation will be discussed; and in which determined efforts will be made to resolve any differences between the two governments. A Secretariat was also established by the two governments to service the Conference.

What began ostensibly as a Civil Rights campaign in 1968 escalated into a full-scale offensive designed to overthrow the State. This offensive was originally mounted by an illegal organization, the Irish Republican Army (not to be confused with the legitimate Army of the Republic of Ireland). At times counter-measures have required the services of over 20,000 regular troops, in addition to the Royal Ulster Constabulary, the RUC Reserve and the part-time Ulster Defence Regiment.

Secretary of State for Northern Ireland Right Hon Tom King, MP

Local Government Northern Ireland has a single-tier system of 26 district councils based on main centres of population.

The district councils are responsible for the provision of a wide range of local services including refuse collection and disposal, street cleansing, litter prevention, consumer protection, environmental health, miscellaneous licensing including dog control, the provision and management of recreational and cultural facilities, the promotion of tourist development schemes, the enforcement of building regulations and gas supply. They have in addition both a representative role in which they send forward representatives to sit as members of statutory bodies including the Northern Ireland Housing Council, the Fire Authority and the Area Boards for health and personal social services and education and libraries; and a consultative role under which the Department of Environment (NI) and the Northern Ireland Housing Executive, among others, have an obligation to consult them regarding the provision of the regional services for which these bodies are responsible

The Government's policy for the future development of the Province is contained in the Regional Physical Development Strategy 1975-95 which was pub-

lished in May 1977. Basically the policy advocates that the main town in each District Council area should be developed to fulfil its function as the prime centre in the district and for any other specialized rôles it may have such as an industrial centre, port or tourist resort. The Strategy also recognizes that the smaller towns and villages have an important rôle to play, depending on the availability of services, as locations for smaller scale industries service centres and as dormitory centres for people not wishing to live in the towns where they find employment

The Regional Strategy provides a framework within which development plans can be prepared for all the districts Since its adoption of the Strategy the Department has been engaged in formulating the detailed policies and proposals for future communications, the location of industry, housing and major services in the light

of anticipated population growth and distribution

A development plan sets down the broad policies and proposals for the development or other use of land in the area covered by the plan over a period of up to 15 years ahead. Development plans covering almost all of Northern Ireland have been published and work is progressing on the remaining areas; together with review of some earlier plans

FINANCE. There exists a separate Northern Ireland Consolidated Fund from which is met the expenditure of Northern Ireland Departments. Its main sources of revenue are: (i) The Northern Ireland attributed share of UK taxes, (ii) A non-specific grant in aid of Northern Ireland's revenue, payable by the Secretary of State for Northern Ireland, (iii) Rates and other receipts of Northern Ireland Departments.

The general principle underlying the financial arrangements is that Northern

Ireland should have parity of taxation and services with Great Britain.

Since the financial year 1983-84 the income of the Northern Ireland Consolidated Fund has been as follows (in £ sterling)

	1983 <del>–</del> 84	1984–85	<i>1985</i> –86

The public debt at 31 March 1985 was as follows: Ulster Savings Certificates, £172,901,000; Ulster Development Boulds, £357,200, borrowing from UK Government, £924,735,825, borrowing from Northern Ireland Government Funds, £375,899,778, short term borrowing from external sources, £5 7m, borrowing from building societies, £4m; European Investment Bank Loan, £18,027,730; total, £1,501,621,533.

The above amount of public debt is offset by equal assets in the form of loans from Government to public and local bodies and of cash balances.

#### ENERGY AND NATURAL RESOURCES

Electricity. The planning, generation and distribution of electricity supplies are the responsibility of the Northern Ireland Electricity Service

The installed capacity of the system is 2,400 mw largely provided from 4 thermal

power-stations

The total sales of electricity in Northern Ireland in the year ended 31 March 1985 amounted to 4,776m. units supplied to a total of 555,581 consumers.

Water Supplies and Sewerage. The Department of the Fnvironment Water Service is responsible for water supply and sewerage. Some 691 megalitres of water are

<sup>&</sup>lt;sup>2</sup> Including final adjustment for 1982–83

<sup>&</sup>lt;sup>3</sup> Provisional

supplied throughout Northern Ireland per day to approximately 97% of the population. Approximately 92% of the population live in property which is connected to sewers or modern septic tanks.

The Department is also responsible for the conservation and planned development of the water resources of Northern Ireland

Minerals. The output of minerals (in 1,000 tonnes) during 1984 was approximately Basalt and igneous rock (other than granite), 6,856, grit and conglomerate, 2,578, limestone, 3,707, sand and gravel, 3,506, and other minerals (rocksalt, flint, sandstone, diatomite, granite, chalk, clay and shale), 629 Lignite has been discovered near Crumlin in County Antrim and in some other areas

#### INDUSTRY AND TRADE

Industry. In 1985 (Sept.) employment in manufacturing and construction amounted to 123,540, just under 26.7% of the total workforce. Of this number, 30,060 (24 3%) were engaged in the engineering and allied industries, which include ship-building and aircraft manufacture. The former predominance of shipbuilding has diminished, and the engineering sector now produces an impressive variety of goods; from textile machinery, air-conditioning plant and oilfield equipment to automobile and aero-engine components, data-processing equipment, and electronic components. The textile industry, with a workforce of 12,280 includes longer established sectors such as spinning and weaving as well as more recently established activities such as the production of carpets, man-made fibres and hosiery

The related clothing and footwear sector employs 16,450 people. Taken together, food, drink and tobacco account for 19,440 jobs, the remainder of the manufacturing sector comprising a multiplicity of activities, such as chemicals, rubber and plastic goods, and furniture accounting for 22,460. The construction industry

employs 22,850 people.

In Dec. 1985 the average number of unemployed was 121,470, this represents 20 9% of all employees. The Department of Economic Development provides an all-age guidance and placement service through a network of jobmarkets situated in the principal towns of Northern Ireland. They maintain registers of persons voluntarily seeking employment (either full- or part-time) and those already in employment who wish to change their job. In the financial year 1984–85 26,435 persons (adult and young people) were placed into employment in Northern Ireland by the Employment Service. A further 16,733 persons were placed into training

The Government offers a comprehensive range of incentives to encourage the establishment of new and the expansion of existing industry. At 30 Sept. 1985 there were 212 new projects and 203 expansions of existing projects giving employment to 71,147 workers.

Through the Department of Economic Development, there are various employment and training grants available to assist employers with recruitment and training of workers. These grants cover a wide spectrum of industry, age groups, and types of training

Assistance is available to employers who transfer key workers temporarily or permanently to Northern Ireland from other countries or within Northern Ireland in connection with the establishment or expansion of an industrial undertaking

The Department of Economic Development maintains a register of disabled persons who are in the employment field and under the provisions of the Disabled Persons (Employment) Acts (NI) 1945 and 1960, makes efforts to find suitable work for those who are unemployed Employment rehabilitation courses are provided at the Employment Rehabilitation Unit at Felden House, Newtownabbey and training courses at various locations are available to assist unemployed disabled persons to readjust themselves to working conditions and to enhance their prospects of obtaining suitable employment. Allowances are paid to persons attending these courses

The Department of Economic Development and the Department of Education co-ordinate jointly a Youth Training Programme to assist all 16 and 17 year olds to make the transition from school to adult working life and acquire a range of basic skills and knowledge The programme provides.

- (a) a guaranteed year of training with work experience and further education for young people aged 16 who do not wish to continue their education full-time,
- (b) a combination of training and work experience for 17 year olds either as private sector employees or as unemployed trainees with voluntary bodies; and
- (c) additional vocational preparation for young people remaining in full-time education.

In 1986-87 the Programme will provide some 8,750 training places in a variety of schemes. Provision is also made for up to 5,000 entrants to YTP Workscheme, a scheme which encourages employers to recruit and train 17 year old employees

Enterprise Ulster is an independent statutory body whose objective as a direct labour organization is to recruit workers from the unemployed register. Work is carried out mainly for public bodies and projects are of a community and amenity nature such as play areas, parks, playing fields, etc. In Jan. 1986, 120 projects were providing employment for 1,060 employees.

The Action for Community Employment Scheme, which came into operation in April 1981, provides temporary employment for long-term unemployed adults by funding projects which are of benefit to the community. In Jan. 1986 some 1,300 such projects were operational, providing employment for 4,150 people

There are 12 Training Centres in Northern Ireland which provide over 3,000

training places and an annual output of over 5,000 trainees.

Training Centres contribute to the Youth Training Programme having up to

1,640 places available for 16–17 year olds who have been unable to find employment. A special six-month broad-based modular course provides basic training in a wide variety of skills and the six-month craft skill courses provide initial apprentice training. Advanced vocational training is available to young people who have completed the basic training course and have been unable to obtain a place in an apprentice course. The remaining places are for adult trainees.

To supplement the Training Centres facilities, arrangements have been made for the use of spare training capacity in industry and commerce to attach people to firms for training courses. By this means a wide variety of training is made available and this has been further supplemented by use of spare capacity in other training

agencies and in Colleges of Further Education.

The Department of Economic Development administers an Entry to Management Programme for unemployed trainees and a Management Development Programme for private sector firms. The former Programme contains training opportunities schemes for those wishing to enter or re-enter management or to set up new businesses – at the peak time of the training year up to 200 people can be in training. The latter Programme is designed to encourage companies to develop management structures and to train individual managers to a high level of competence. Each year about 2,000 grants are awarded to support training courses or training places in companies. Also, about 2,000 places were available in the financial year 1985–86 under the Enterprise Allowance Scheme, to encourage unemployed people to set up in business, by paying them £40 a week for up to 52 weeks as a business receipt to compensate for loss of unemployment or supplementary benefit

Labour. The main sources of statistics in Northern Ireland are the census of employment which was last conducted in 1981 and the quarterly employment enquiry. In Sept. 1985 there were 463,250 jobs for employees in Northern Ireland, of which 245,220 were taken up by males.

TOURISM. Tourism earns a substantial amount of revenue for Northern Ireland and total spending by some 908,000 visitors in 1984 was 77 7m. Altogether tourism provides over 7,000 full-time jobs. The Northern Ireland Tourist Board has the main responsibility for promoting tourist traffic in Northern Ireland.

Scenic beauty, scientific and nature interest, and wildlife are protected by the Department of the Environment under the Access to the Countryside (NI) Order 1983, the Nature Conservation and Amenity Lands (NI) Order 1985 and the Wildlife (NI) Order 1985. The Department is advised by the Ulster Countryside Committee and the Committee for Nature Conservation. Eight Areas of Outstanding Natural Beauty and 48 Areas of Scientific Interest have been designated, where special attention is given respectively to the amenity and scientific aspects of planning applications. Country Parks have been established at Crawfordsburn, Redburn and Scrabo, Co Down, at the Roe Valley and Ness Wood, Co Derry, and at Castle Archdale, Co Fermanagh At The Birches in N. Armagh a Peatlands Park is being developed. The Lagan Valley between Belfast and Lisburn is Northern Ireland's first Regional Park Forty-one National Nature Reserves have been declared, and more are being acquired.

The Department is advised by the Historic Monuments Council on the exercise of its powers under the Historic Monuments Act (NI) 1971 in respect of the conservation of historic monuments and the preservation of objects of archaeological or historic interest. At present there are some 160 monuments in State care and approximately 588 are scheduled. The Department, advised by the Historic Buildings Council, is also responsible for listing buildings of special architectural or historic interest and for designating areas of similar interest the character or appearance of which it is desirable to preserve or enhance. To date some 6,800 buildings have been listed and 24 conservation areas have been designated. Grants are payable by the Department to assist in the repair or maintenance of listed buildings and for schemes of enhancement in conservation areas.

#### COMMUNICATIONS

Road and Rail. All train services are operated by the Northern Ireland Railways Co. Ltd which is a subsidiary of the Northern Ireland Transport Holding Co The number of track miles operated is 357; passenger route miles, 210. In 1984-85 railways carried 5 6m. passengers Most bus services are operated by two other subsidnaries, Ulsterbus Ltd and Citybus Ltd. Ulsterbus runs services outside the Belfast area (except for a few services provided by 2 privately owned bus undertakings) while all the services within the Belfast area are run by Citybus.

The Department of the Environment (NI) administers a licensing system for professional hauliers with the objective of maintaining standards and conditions necessary for the safe operation of vehicles and fair competition between hauliers The level of services provided and the rates charged by the industry are determined by the normal economic forces of supply and demand At 31 March 1985 there were 1,475 professional hauliers and 2,286 vehicles licensed to engage in road

haulage

The number of motor vehicles licensed at 31 Dec. 1984 was 506,698, comprising private cars, 446,100; motor cycles, 15,700, hacking vehicles, 2,780, goods vehicles, 18,970, agricultural tractors, 9,840. In addition, there were 13,208

vehicles which were not subject to licence duty

The Department of the Environment (NI) is responsible for the provision and maintenance of all public roads, bridges and street lighting in the Province, the provision and operation of car parks, and for the operation of the Strangford Ferry In addition to Headquarters Division the Roads Service of the Department operates through Divisional Offices in Ballymena, Belfast, Coleraine, Craigavon, Downpatrick and Omagh and smaller offices in other centres

At I April 1985 the total mileage of roads was 14,709, graded for administrative purposes as follows Motorway 70 miles, all purpose trunk, 299 miles, Class I, 1,066 miles; Class II, 1,773 miles; Class III, 2,945 miles, unclassified, 8,556 miles.

Aviation. Northern Ireland Airports Ltd is responsible for the operation of Belfast International Airport. A major 4-stage development programme was started in 1977; 2 stages have been completed. Stage 3 is under way. The completion of the programme will leave the airport better equipped to handle traffic growth in the foreseeable future Passenger and freight services operate between Belfast International Airport and airports throughout the UK. In 1984-5, 1 6m passengers and 30,000 tonnes of freight and mail were handled.

Scheduled air services are available from Belfast (Harbour) Airport to 5 destinations in the UK

There are 3 other licensed airfields in Northern Ireland and apart from some scheduled services during the summer months, these airfields are used principally by flying clubs, by private owners and by expanding air taxi businesses flying to destinations in Ireland, the UK and continental Europe

Shipping. Passenger services operate between Belfast and Liverpool and between Larne and (1) Cairnryan and (11) Stranraer Conventional cargo services have given way in many cases to container, unit load and drive on/drive off services. The latter type of service now operates between Belfast and Larne to various ports in UK.

#### JUSTICE, RELIGION, EDUCATION AND WELFARE

Justice. The Lord Chancellor has responsibility for the administration of all courts in Northern Ireland through the Northern Ireland Court Service, and is responsible

for the appointment of judges and resident magistrates

The court structure in Northern Ireland has 3 tiers—the Supreme Court of Judicature of Northern Ireland (comprising the Court of Appeal, the High Court and the Crown Court), the County Courts and the Magistrates' Courts There are 25 Petty Sessions districts which when grouped together for administration purposes form 7 County Court Divisions and 4 Circuits

The County Court has general civil jurisdiction subject to an upper monetary limit of £5,000. Appeals from the Magistrates' Courts lie to the County Court, while appeals from the County Court lie to the High Court or, on a point of law, to

the Court of Appeal by way of case stated. Circuit Registrars have jurisdiction to deal with most defended actions up to £5,000 They also deal, by an informal arbitration procedure, with small claims whose value does not exceed £300. An appeal from the decision of a Circuit Registrar lies to the High Court other than in small claims cases

Police The police force consists of the Royal Ulster Constabulary, supported by the Royal Ulster Constabulary Reserve, a mainly part-time force

Religion. According to the census of 1981 of the total enumerated population of 1,481,959 there were. Roman Catholics, 414,532; Presbyterians, 339,818, Church of Ireland, 281,472, Methodists, 58,731 Those belonging to other Churches and of no stated denomination numbered 387,406 18 5% of the enumerated population failed to answer the voluntary question on religion.

Education. Education in Northern Ireland is administered centrally by the Department of Education and locally by 5 education and library boards. The Department is concerned with the whole range of education from nursery education through to higher education and continuing education, for sport and recreation, for youth services; for the arts and culture (including libraries) and for community relations and community development. District councils are the main providers of sport, recreation and community facilities and the education and library boards have a responsibility where the facilities are intended primarily for education and youth service activities. The Department assists with grants as far as the district councils are concerned and meets the full cost in relation to education and library boards

The 5 education and library boards which took over responsibility for the local administration of the education and library services on 1 Oct. 1973 are required to ensure that there are sufficient schools of all kinds to meet the needs of their area. They provide primary and secondary schools, special schools for handicapped pupils and institutions of further education. The boards also make contributions towards the cost of maintaining voluntary schools, award university and other scholarships, meet the tuition fees of the great majority of pupils attending grammar schools, provide milk and meals, free books and transport for pupils, enforce school attendance, regulate the employment of children and young people and secure the provision of recreational and youth service facilities. They are also required to develop a comprehensive and efficient library service for their areas. The following are the statistics for the 1984–85 academic year.

Universities. Northern Ireland now has 2 Universities of Higher Education, the Queen's University of Belfast (QUB) and the newly-established University of Ulster (UU) The Queen's University of Belfast (founded in 1849 as a college of the Queen's University of Ireland and reconstituted as a separate university in 1908) had 98 professors, 242 readers and senior lecturers, 615 lecturers and tutors and 6,936 full-time students in 1984–85 The University of Ulster, formed on 1 Oct 1984 by the merger of the New University of Ulster and the Ulster Polytechnic has campuses in Belfast, Coleraine, Jordanstown and Derry In 1984–85 the University had 45 professors, 170 readers and senior lecturers, 514 lecturers and demonstrators and 7,475 full-time students.

Secondary Education 78 grammar schools with 58,348 pupils and 3,646 full-time teachers, 182 secondary (intermediate) schools with 101,837 pupils and 6,781 full-time teachers

Primary Education 1,013 primary schools with 180,978 pupils and 7,745 teachers, 84 nursery schools with 4,642 pupils and 154 teachers

Further Education 26 institutions of further education with 2,157 full-time and 2,065 part-time teachers and an enrolment of 14,191 full-time, 19,920 part-time day and 20,124 evening students on vocational courses, and 43,561 students on non-vocational (mostly evening) courses

Special Educational Treatment 33 special schools, including hospital schools with 2,869 pupils and 353 teachers

Teachers There were 20,797 full-time teachers (8,520 men and 12,277 women) in grant-aided schools and institutions of further education. The principal initial teacher-training courses are the Bachelor of Education (3 year and 4 year honours), general or honours BA and BSc. degrees with education (3, 4 and 5 year) and the one year Certificate of Education for graduates. There were 1,563 students (399) men and 1,164 women) in training at the 2 Colleges of Education and the 2 Universities during 1984–85.

Expenditure Expenditure by the Department of Education in 1984-85 was £583.3m

Health and Personal Social Services. Under the provisions of the Health and Personal Social Services (NI) Order 1972, the Department of Health and Social Services is responsible for the provision of integrated health and personal social services in Northern Ireland, designed to promote the physical and mental health of the people of Northern Ireland through the prevention, diagnosis and treatment of illness, and also to promote their social welfare Four Health and Social Services Boards, Eastern, Northern, Southern and Western, established under the above Order, administer health and personal social services, as the Department directs, within their designated areas

Social Security. The social security schemes in Northern Ireland are similar to those in force in Great Britain

National Insurance During the year ended 31 March 1985, £12 2m sickness benefit was paid to an average of 8,870 persons and £48 4m unemployment benefit was paid to an average of 30,110 persons. Widows' benefits amounting to £27 7m were paid to 13,550 persons and retirement pensions totalling £336 6m were paid to an average of 204,250 persons. Invalidity pensions and allowances totalling £93 9m were paid to approximately 36,330 persons Industrial disablement benefit amounting to £11m was paid to an average of 5,240 persons Maternity benefit totalling £5 9m was paid to approximately 12,160 persons Receipts, of the Northern Ireland Insurance Fund in the year ended 31 March 1985 were £587 4m and payments were £563 6m

Child Benefit During the year ended 31 March 1985, £165 4m. was paid to an average of 215,790 families

Supplementary Benefity In 1984–85, £272m was paid to an average of 181,080 persons

Vital Statistics: Vital statistics are based on records of births, deaths, fœtal deaths, marriages and divorces filed with registration officials of states and cities. Figures for the US include Alaska beginning with 1959 and Hawaii beginning with 1960.

Annual collection of mortality records from a national death-registration area was inaugurated in 1900. A national birth-registration area was established in 1915 These areas, which at their inception comprised 10 states and the District of Columbia, expanded gradually until 1933, when both the birth- and deathregistration areas covered the entire continental US. Marriage and divorce statistics are compiled from reports furnished by state and local officials. Data on annulments are included in the divorce statistics. The marriage-registration area was established in 1957 with 30 states and 3 other areas. The divorce-registration area was established in 1958 with 14 states and 2 other areas. In Jan. 1980 the marriage-registration area included 42 states and DC, and the divorce-registration area ciuded 30 states

<sup>8</sup> Provisional

The crude birth rate, based on total live-birth estimates per 1,000 total population, fell from 29 5 in 1915 to 18 4 in 1933, it ruse to a peak of 26 6 in 1947—its highest for 25 years. This peak reflects demobilization (1945-46), the record marriage rate that followed, and the high levels of employment and income. The decrease in the following 3 years was moderate. In 1951 the rate moved upward and levelled off in 1957 at about 25 per 1,000 population Since 1957 the crude birth rate declined every year to 18 4 live births per 1,000 population in 1966 The crude birth rate for 1984 was 15 7 Estimated number of illegitimate births in 1983 was 737,893, a ratio of 202 8 illegitimate births per 1,000 registered live births.

Deaths, excluding feetal deaths (per 1,000 population), declined from 17.2 in 1900 to 10 in 1946. The death rate has been below 10 per 1,000 since 1947, fluctuating slightly from year to year, mainly under the impact of occurrences of outbreaks of severe respiratory diseases. The rate for 1970, 9 5; 1980, 8 8; 1981, 8 6, 1982, 8 6; 1983, 8 6, 1984, 8 7.

Leading causes of death, 1984, per 100,000 population: Diseases of heart, 324 4, malignant neoplasms, 191 6; cerebrovascular diseases, 65 6, accidents, 40 1, suicides, 12 3; homicides, 8 3.

The marriage rate per 1,000 population for selected years are: 1920, 12; 1932, 7 9, 1946, 16 4; 1951, 10 4, 1961, 8 5, 1970, 10·6; 1975, 10; 1980, 10·6; 1981, 10 6, 1982, 10 8; 1983, 10·5, 1984, 10 5 The divorce rates per 1,000 population for selected years are: 1920, 1 6, 1946, 4 3; 1951, 2.5; 1961, 2.3; 1971, 3.7; 1979, 5 3, 1980, 5 2, 1981, 5 3; 1982, 5-1, 1983, 5, 1984, 4 9

Maternal mortality rates (deaths of mothers from conditions associated with deliveries and complications of pregnancy, childbirth and the puerperium) per 100,000 live births, were 1915–19, 727 9 and thereafter declined 493 9 for 1935–39; 376 for 1940, 207 2 for 1945, 83 3 for 1950, 47 for 1955, 37 1 for 1960, 31.6 for 1965; 21 5 for 1970, 12.8 for 1975. 9 2 for 1980; 8.5 for 1981, 8.9 for 1982, 8 for 1983. The 1983 rate for white women was 5.9 and for all other women 16.3

The infant mortality rates, per 1,000 live births were: 1915–19, 95 7, 1920–24, 76 7; 1925–29, 69; 1930–34, 60 4; 38 3 in 1945, 29 2 in 1950, 26.4 in 1955; 26 in 1960; 20 in 1970; 16.1 in 1975, 12 6 in 1980, 11 9 in 1981, 11 2 in 1982, 10.9 in 1983, 10 6 in 1984 In 1983 the rate for whites was 9 7, for all other, 16 7.

Immigration The Immigration and Nationality Act, as amended, provides for the numerical limitation of most immigration Public Law 96–212, the Refugee Act of 1980, reduced the worldwide numerical limitation to 280,000 for 1980 and 270,000 thereafter, with a maximum of 20,000 visas available for one country. The colonies and dependencies of a foreign state are limited to 600 per year, chargeable to the country limitation of the mother country. Visas are allocated under a system of 6 preference categories, 4 of which are designed to reunite close relatives of US citizens and resident aliens of the US, and 2 for skilled and professional workers. Visa numbers not used in the preference categories are made available to qualified non-preference immigrants. The non-preference category has not been available since 1978 due to high demand in other categories. Immigrants not subject to any numerical limitation are spouses, children, and parents of US citizens, who are 21 years of age or older; certain former US citizens, ministers of religion, certain long-term US government employees, and refugees adjusting to immigrant status.

The total number of immigrants admitted from 1820 up to 30 Sept 1984 was 50,361,547, this included 7,018,842 from Germany (GDR and FRG), and from Italy 5,320,515.

Aliens coming to the US for temporary periods of time are classified as non-immigrants. During fiscal year 1984, a total of 9,200,113 non-immigrants were admitted. This is inclusive of multiple entry documents and excludes border crossers, crewmen and insular travellers. Tourists, primarily from Mexico, Japan, the UK, the Caribbean, Germany (GDR and FRG) and Canada numbered 3,771,461 (total tourists, 6,594,575). There were 930,539 aliens expelled during fiscal year 1984. Of this number, 18,006 were deported and 912,533 were required to depart without formal orders of deportation.

In accordance with the Immigration and Nationality Act, 5,381,106 aliens reported their address in Jan 1980. Of this total, 4,532,647 were permanent residents and 848,459 were aliens here temporarily. Of the permanent resident aliens who reported the best represented nationalities were the following Mexico, 992,765, Canada, 301,085, Cuba, 279,100; UK, 273,521, Philippines, 223,743, Italy, 163,700; Germany (GDR and FRG), 147,647. Over 76% of the permanent resident aliens reported their states of residence as California, 1,261,069; New York, 690,383, Texas, 411,163; Florida, 335,457, Illinois, 256,091, New Jersey, 238,883, Massachusetts, 152,916, and Michigan, 118,588.

In the year ended 30 Sept 1983, 178,948 persons became US citizens through naturalization, this includes, 154,990 naturalized under the general provisions of 5-year residence in the US, 20,631 spouses and children of US citizens, 3,196 military and 57 who were naturalized under other provisions. Of the total, there were 10,365 former nationals of Cuba, 22,103 of the Philippines, 11,952 of China and Taiwan, 12,808 of Korea, 7,882 of UK, 3,685 of Italy, 12,594 of Mexico and 3,938 of Jamaica

CLIMATE. For temperature and rainfall figures, see entries on individual states as indicated by regions, below, of mainland USA.

Pacific Coast The climate varies with latitude, distance from the sea and the effect of relief, ranging from polar conditions in North Alaska through cool to warm temperate climates further south The extreme south is temperate desert Rainfall everywhere is moderate See Alaska, California, Oregon, Washington

Mountain States Very varied, with relief exerting the main control, very cold in the north in winter, with considerable snowfall. In the south, much higher temperatures and aridity produce desert conditions. Rainfall everywhere is very variable as a result of rain-shadow influences See Arizona, Colorado, Idaho, Montana, Nevada, New Mexico, Utah, Wyoming.

High Plains A continental climate with a large annual range of temperature and moderate rainfall, mainly in summer, although unreliable. Dust storms are common in summer and blizzards in winter See Nebraska, North Dakota, South Dakota

Central Plains A temperate continental climate, with hot summers and cold winters, except in the extreme south. Rainfall is plentiful and comes at all seasons, but there is a summer maximum in western parts See Mississippi, Missouri, Oklahoma, Texas

Mid-West Continental, with hot summers and cold winters. Rainfall is moderate, with a summer maximum in most parts. See Indiana, Iowa, Kansas.

Great Lakes Continental, resembling that of the Central Plains, with hot summers but very cold winters because of the freezing of the lakes Rainfall is moderate with a slight summer maximum. See Illinois, Michigan, Minnesota, Ohio, Wisconsin.

Appalachian Mountains The north is cool temperate with cold winters, the south warm temperate with milder winters Precipitation is heavy, increasing to the south but evenly distributed over the year. See Kentucky, Pennsylvania, Tennessee, West Virginia

Gulf Coast Conditions vary from warm temperate to sub-tropical, with plentiful rainfall, decreasing towards the west but evenly distributed over the year See Ala-

bama, Arkansas, Florida, Louisiana

Atlantic Coast Temperate maritime climate but with great differences in temperature according to latitude. Rainfall is ample at all seasons, snowfall in the north can be heavy See Delaware, District of Columbia, Georgia, Maryland, New Jersey, New York, North Carolina, South Carolina, Virginia

New England Cool temperate, with severe winters and warm summers. Precipitation is well distributed with a slight winter maximum Snowfall is heavy in winter. See Connecticut, Maine, Massachusetts, New Hampshire, Rhode Island,

Vermont. See also Hawaii and Outlying Territories

**CONSTITUTION AND GOVERNMENT.** The form of government of the USA is based on the constitution of 17 Sept. 1787.

By the constitution the government of the nation is composed of three co-ordi-

nate branches, the executive, the legislative and the judicial

The National Government has authority in matters of general taxation, treaties and other dealings with foreign Powers, foreign and inter-state commerce, bank-ruptcy, postal service, coinage, weights and measures, patents and copyright, the armed forces (including, to a certain extent, the militia), and crimes against the USA; it has sole legislative authority over the District of Columbia and the possessions of the US.

The 5th article of the constitution provides that Congress may, on a two-thirds vote of both houses, propose amendments to the constitution, or, on the application of the legislatures of two-thirds of all the states, call a convention for proposing amendments, which in either case shall be valid as part of the constitution when ratified by the legislatures of three-fourths of the several states, or by conventions in three-fourths thereof, whichever mode of ratification may be proposed by Congress. Ten amendments (called collectively 'the Bill of Rights') to the constitution were added 15 Dec 1791, two in 1795 and 1804, a 13th amendment, 6 Dec 1865, abolishing slavery, a 14th in 1868, including the important 'due process' clause; a 15th, 3 Feb 1870, establishing equal voting rights for white and coloured, a 16th, 3 Feb. 1913, authorizing the income tax, a 17th, 8 April 1913, providing for popular election of senators; an 18th, 16 Jan. 1919, prohibiting alcoholic liquors, a 19th, 18 Aug. 1920, establishing woman suffrage, a 20th, 23 Jan. 1933, advancing the date of the President's and Vice-President's inauguration and abolishing the 'lameduck' sessions of Congress, a 21st, 5 Dec 1933, repealing the 18th amendment; a 22nd, 26 Feb. 1951, limiting a President's tenure of office to 2 terms, or to 2 terms plus 2 years in the case of a Vice-President who has succeeded to the office of a President; a 23rd, 30 March 1961, granting citizens of the District of Columbia the right to vote in national elections; a 24th, 4 Feb 1964, banning the use of the poll-tax in federal elections, a 25th, 10 Feb. 1967, dealing with Presidential disability and succession, a 26th, 22 June 1970, establishing the right of citizens who are 18 years of age and older to vote

National flag Seven red and 6 white alternating stripes, horizontal, with a blue canton, extending down to the lower edge of the 4th red stripe from the top, and displaying 50 white 5-pointed stars, one for each state. The stars have one point directed vertically upward, and they are arranged in 6 rows of 5 each, alternating with 5 rows of 4 each. On the admission of additional states, stars are added, effective on 4 July following the date of admission. Congress, by law of 22 Dec 1942, has codified 'existing rules and customs' pertaining to the display of the flag, for civilians.

National anthem The Star-spangled Banner, 'Oh say, can you see by the dawn's early light' (words by F. S. Key, 1814, tune by J. S. Smith, formally adopted by Congress 3 March 1931).

National motto 'In God we trust', formally adopted by Congress 30 July 1956.

Presidency. The executive power is vested in a president, who holds office for 4 years, and is elected, together with a vice-president chosen for the same term, by electors from each state, equal to the whole number of senators and representatives to which the state may be entitled in the Congress. The President must be a natural-born citizen, resident in the country for 14 years, and at least 35 years old.

The presidential election is held every fourth (leap) year on the Tuesday after the first Monday in November. Technically, this is an election of presidential electors, not of a president directly, the electors thus chosen meet and give their votes (for the candidate to whom they are pledged, in some states by law, but in most states by custom and prudent politics) at their respective state capitals on the first Monday after the second Wednesday in December next following their election, and the votes of the electors of all the states are opened and counted in the presence of both Houses of Congress on the sixth day of January. The total electorate vote is one for each senator and representative

If the successful candidate for President dies before taking office the Vice-President-elect becomes President, if no candidate has a majority or if the successful candidate fails to qualify, then, by the 20th amendment, the Vice-President acts as President until a president qualifies. The duties of the Presidency, in absence of the President and Vice-President by reason of death, resignation, removal, inability or failure to qualify, devolve upon the Speaker of the House under legislation enacted 18 July 1947. And in case of absence of a Speaker for like reason, the presidential duties devolve upon the President *pro tem* of the Senate and successively upon those members of the Cabinet in order of precedence, who have the constitutional qualifications for President

The presidential term, by the 20th amendment to the constitution, begins at noon on 20 Jan of the inaugural year. This amendment also installs the newly elected Congress in office on 3 Jan instead of—as formerly—in the following December. The President's salary is \$200,000 per year, plus \$50,000 to assist in defraying expenses resulting from official duties. Also he may spend up to \$100,000 non-taxable for travel and \$20,000 for official entertainment. The office of Vice-President carries a salary of \$91,000, plus \$10,000 allowance for travel, all taxable.

The President is C-in-C of the Army, Navy and Air Force, and of the militia when in the service of the Union The Vice-President is *ex-officio* President of the Senate, and in the case of 'the removal of the President, or of his death, resignation, or inability to discharge the powers and duties of his office', he becomes the President for the remainder of the term

President of the United Stales Ronald Reagan, of California, born at Tampico, Illinois, in 1911, Governor of California, 1967-75.

At the Presidential election on 6 Nov 1984 total vote cast, including men and women in the armed services, was 92,267,879, of which Ronald Reagan (R) received 54,455,075 (59%), Walter Mondale (D) 37,577,185 (41%) and David Bergland (Libertarian Party) 235,619 Electoral college votes Reagan 525, Mondale 13, Bergland 0

Cahinet The administrative business of the nation has been traditionally vested in several executive departments, the heads of which, unofficially and ex officio, formed the President's Cabinet Beginning with the Interstate Commerce Commission in 1887, however, an increasing amount of executive business has been entrusted to some 60 so-called independent agencies, such as the Veterans Administration, Housing and Home Finance Agency, Tariff Commission, etc

All heads of departments and of the 60 or more administrative agencies are appointed by the President, but must be confirmed by the Senate

The Cabinet consisted of the following (March 1986)

- 1. Secretary of State (created 1789). George P. Shultz; businessman, Secretary of Labor, 1969–70, Secretary of the Treasury, 1972–74, born 1920
- 2 Secretary of the Treasury (1789) James Addison Baker III, of Texas, lawyer, Presidential Chief of Staff 1981-85, born 1930.
- 3. Secretary of Defense (1947). Caspar Weinberger, Vice-President of the Bechtel Power Corporation, lawyer, former Secretary of Health, Education and Welfare, born 1918.
- 4 Attorney-General (Department of Justice, 1870). Edwin Meese, of California, lawyer and special counsellor to the President; born 1931
- 5 Secretary of the Interior (1849) Donald P. Hodel, of Oregon, lawyer, former Secretary of Energy, born 1935.
- 6. Secretary of Agriculture (1889) Richard E Lyng, of California, farming consultant, Deputy Secretary of Agriculture 1981–85, born 1918
- 7. Secretary of Commerce (1903) Malcolm Baldridge, of Connecticut; manufacturer, born 1922
- 8 Secretary of Labor (1913) William Emerson Brock, Chairman, Republican National Committee 1977–80, Special Trade Representative 1981–85; born 1930.
- 9. Secretary of Health and Human Services (1953) Otis R. Bowen, of Indiana, physician, Governor of Indiana 1973-81, born 1918
- 10. Secretary of Housing and Urban Development (1966). Samuel J. Pierce, of New York; lawyer, born 1922.

- 11 Secretary of Transportation (1967) Elizabeth H. Dole, of North Carolina, lawyer, Federal Trade Commissioner 1973–79, President's public liaison assistant, 1981; born 1936.
- 12. Secretary of Energy (1977) John Herrington, of California, lawyer, formerly special assistant to the President; born 1939
- 13. Secretary of Education (1979) William Bennett, chairman of National Endowment of the Humanities 1981–85, born 1943

Each of the above Cabinet officers receives an annual salary of \$80,100 and holds office during the pleasure of the President

Congress The legislative power is vested by the Constitution in a Congress, consisting of a Senate and House of Representatives

Electorate By amendments of the constitution, disqualification of voters on the ground of race, colour or sex is forbidden Accordingly, the electorate consists theoretically of all citizens of both sexes over 18 years of age, but the franchise is not universal There are requirements of iesidence varying in the several states as to length from 6 months to 2 years and differing requirements as to registration. In 20 states the ability to read (usually an extract from the constitution) is required—in Alaska the ability to read English, in Hawaii, English or Hawaiian; in Louisiana, English or one's native tongue In Alabama the voter must take an 'anti-Communist oath' and fill out a questionnaire to the satisfaction of the registrars. In some southern states voters are required to give a reasonable explanation of what they read. In most states convicts are excluded from the franchise, in some states duellists and fraudulent voters

Legislation designed to discourage the rise of third parties has been adopted in a few states. In Illinois a new party must present a petition signed by at least 25,000 voters, including at least 200 in each of 50 of the 102 counties

The method of balloting varies greatly Seventeen states use different ballots for federal, state and local elections in Delaware and South Carolina the various political parties furnish their own ballot-papers to the voters as he or she enters the polling-booth

Senate The Senate consists of 2 members from each state, chosen by popular vote for 6 years, one-third retiring or seeking re-election every 2 years. Senators must be no less than 30 years of age, must have been citizens of the USA for 9 years, and be residents in the states for which they are chosen. The Senate has complete freedom to initiate legislation, except revenue bills (which must originate in the House of Representatives); it may, however, amend or reject any legislation originating in the lower house The Senate is also entrusted with the power of giving or withholding its 'advice and consent' to the ratification of all treaties initiated by the President with foreign Powers, a two-thirds majority of senators present being required for approval (However, it has no control over 'international executive agreements' made by the President with foreign governments, such 'agreements', representing an important but very recent development, cover a wide range and are actually more numerous than formal treaties) It also has the power of confirming or rejecting major appointments to office made by the President, but it has no direct control over the appointment by the President of 'personal representatives' or 'personal envoys' on missions abroad Members of the Senate constitute a High Court of Impeachment, with power, by a two-thirds vote, to remove from office and disqualify any civil officer of the USA impeached by the House of Representatives, which has the sole power of impeachment

The Senate has 16 Standing Committees to which all bills are referred for study, revision or rejection. The House of Representatives has 22 such committees. In both Houses each Standing Committee has a chairman and a majority representing the majority party of the whole House, each has numerous sub-committees. The jurisdictions of these Committees correspond largely to those of the appropriate executive departments and agencies Both Houses also have a few special Committees with limited duration, there were (1986) 4 Joint Committees

House of Representatives The House of Representatives consists of 435 members elected every second year. The number of each state's representatives is determined by the decennial census, in the absence of specific Congressional legislation affecting the basis. The states, in 1984, had the following representatives.

Alabama	7	Indiana	10	Nebraska	3	South Carolina	6
Alaska	1	lowa	6	Nevada	2	South Dakota	1
Arizona	5	Kansas	5	New Hampshire	2	Tennessee	9

The Supreme Court decided on 17 Feb 1964, that the federal constitution requires congressional districts within each state to be substantially equal in population. By almost invariable custom the representative lives in the district from which he is elected.

Representatives must be not less than 25 years of age, citizens of the USA for 7 years and residents in the state from which they are chosen. The District of Columbia, Guam, American Samoa and the Virgin Islands have one non-voting delegate each. The House also admits a 'resident commissioner' from Puerto Rico, who has the right to speak on any subject and to make motions, but not to vote, he is elected in the same manner as the representatives but for a 4-year term. Each of the two Houses of Congress is sole 'judge of the elections, returns and qualifications of its own members', and each of the Houses may, with the concurrence of two-thirds, expel a member. The period usually termed 'a Congress' in legislative language continues for 2-years, terminating at noon on 3 Jan.

The salary of a senator is \$75,100 per annum, with tax-free expense allowance and allowances for travelling expenses and for clerical hire. The salary of the Speaker of the House of Representatives is \$97,900 per annum, with a taxable allowance. The salary of a Member of the House is \$75,100.

No senator or representative can, during the time for which he is elected, be appointed to any *civil* office under authority of the USA which shall have been created or the emoluments of which shall have been increased during such time, and no person holding *any* office under the USA can be a member of either House during his continuance in office. No religious text may be required as a qualification to any office or public trust under the USA or in any state

The 99th Congress (1985-89) was constituted (Jan 1986) as follows Senate, 53 Republicans, 47 Democrats, House of Representatives, 253 Democrats, 182 Republicans

Indians By an Act passed on 2 June 1924 full citizenship was granted to all Indians born in the USA, though those remaining in tribal units were still under special federal jurisdiction. Those remaining in tribal units constitute from one-half to three-fourths of the Indian population. The Indian Reorganization Act of 1934 gave the tribal Indians, at their own option, substantial opportunities to self-government and of self-controlled corporate enterprises empowered to borrow money, buy land, machinery and equipment, these corporations are controlled by democratically elected tribal councils; by 1945 roughly a third of the Indians had taken advantage of this Act. Recently a trend towards releasing Indians from federal supervision has resulted in legislation terminating supervision over specific tribes. Indian lands (1981) amounted to 52,473,000 acres, of which 41,062,000 was tribally owned and 10.96m in trust allotments. Indian lands are held free of taxes. Total Indian population at the 1980 census was 1,418,195, of which Oklahoma, Arizona, California and New Mexico accounted for 628,400.

State and Local Government The Union comprises 13 original states, 7 states which were admitted without having been previously organized as territories, and

30 states which had been territories—50 states in all. Each state has its own constitution (which the USA guarantees shall be republican in form), deriving its authority, not from Congress, but from the people of the state Admission of states into the Union has been granted by special Acts of Congress, either (1) in the form of 'enabling Acts' providing for the drafting and ratification of a state constitution by the people, in which case the territory becomes a state as soon as the conditions are fulfilled, or (2) accepting a constitution already framed, and at once granting admission

Each state is provided with a legislature of two Houses (except Nebraska, which since 1937 has had a single-chamber legislature), a governor and other executive officials, and a judicial system. Both Houses of the legislature are elective, but the senators (having larger electoral districts usually covering 2 or 3 counties compared with the single county or, in some states, the town, which sends 1 representative to the Lower House) are less numerous than the representatives, while in 38 states their terms are 4 years, in 12 states the term is 2 years. Of the 4-year senates, Illinois, Montana and New Jersey provide for two 4-year terms and one 2-year term in each decade. Terms of the lower houses are usually shorter, in 45 states, 2 years.

Members of both Houses are paid at the same rate, which varies from \$200 per biennium (New Hampshire) to \$46,800 per year (Alaska) The trend is towards annual sessions of state legislatures, in 1984, 36 were constitutionally required to meet annually (in 1939, only 4), the other 14 holding biennial sessions, 12 in the odd-numbered and 2 in the even-numbered years. Of these 14, 6 met annually in practice by invoking flexible constitutional powers to reconvene at intervals during the biennium.

The Governor has power to summon an extraordinary session, but not to dissolve or adjourn. The duties of the two Houses are similar, but in many states money bills must be introduced first in the Lower House. The Senate sits as a court for the trial of officials impeached by the other House, and often has power to confirm or reject appointments made by the Governor

State legislatures are competent to deal with all matters not reserved for the federal government by the federal constitution nor specifically prohibited by the federal or state constitutions. Among their powers are the determination of the qualifications for the right of suffrage, and the control of all elections to public office, including elections of members of Congress and electors of President and Vice-President, the criminal law, both in its enactment and in its execution, with unimportant exceptions, and the administration of prisons, the civil law, including all matters pertaining to the possession and transfer of, and succession to, property, marriage and divorce, and all other civil relations, the chartering and control of all manufacturing, trading, transportation and other corporations, subject only to the right of Congress to regulate commerce passing from one state to another, labour, education, charities, licensing; fisheries within state waters, and game laws (apart from the hunting of migratory birds, which is a federal concern under treaties with Canada and Mexico). Taxes on income were left to the states until 1913, when the 16th amendment authorized the imposition of federal taxes on income without regard to apportionment

The Governor is chosen by direct vote of the people over the whole state His term of office varies in the several states from 2 to 4 years, and his salary from \$40,000 (Nebraska) to \$100,000 (New York). His duty is to see to the faithful administration of the law, and he has command of the military forces of the state He may recommend measures but does not present bills to the legislature. In some states he presents estimates. In all but one of the states (North Carolina) the Governor has a veto upon legislation, which may, however, be overridden by the two Houses, in some states by a simple majority, in others by a three-fifths or two-thirds majority. In some states the Governor, on his death or resignation, is succeeded by a Lieut.-Governor who was elected at the same time and has been presiding over the state Senate. In several states the Speaker of the Lower House succeeds the Governor.

The chief officials by whom the administration of state affairs is carried on (secretaries, treasurers, members of boards of commissioners, etc.) are usually chosen

by the people at the general state elections for terms similar to those for which governors hold office.

Local Government The chief unit of local government is the county, of which there were (1982) 2,992 with definite functions; in addition, Rhode Island has 5 'counties' which have no functions; Alaska does not have 'counties' as such and, since Oct 1960, there has been no active county government in Connecticut. Louisiana has 64 'parishes'. The counties maintain public order through the sheriff and his deputies, who may, in a crisis, be drawn temporarily from willing citizens; in many states the counties maintain the smaller local highways; other functions are the granting of licences and the apportionment and collection of taxes. In a few states they also manage the schools

The unit of local government in New England is the rural township, governed directly by the voters, who assemble annually or oftener if necessary, and legislate in local affairs, levy taxes, make appropriations and appoint and instruct the local officials (selectmen, clerk, school-committee, etc.) Townships are grouped to form counties. Where cities exist, the township government is superseded by the city government

The District of Columbia, ceded by the State of Maryland for the purposes of government in 1791, is the seat of the US Government. It includes the city of Washington, and embraces a land area of 61 sq. miles. The Reorganization Plan No 3 of 1967 instituted a Mayor Council form of government with appointed officers In 1973 an elected Mayor and elected councillors were introduced, in 1974 they received power to legislate in local matters. Congress retains power to enact legislation and to veto or supersede the Council's acts. Since 1961 citizens have had the right to vote in national elections. On 23 Aug 1978 the Senate approved a constitutional amendment giving the District full voting representation in Congress This has still to be ratified

The Commonwealth of Puerto Rico, American Samoa, Guam and the Virgin Islands each have a local legislature, whose acts may be modified or annulled by Congress, though in practice this has seldom been done Puerto Rico since its attainment of commonwealth status on 25 July 1952, enjoys practically complete self-government, including the election of its governor and other officials. The conduct of foreign relations, however, is still a federal function and federal bureaux and agencies still operate in the island

General supervision of territorial administration is exercised by the Office of Territories in the Department of Interior

### **DEFENCE.** The President is C -in-C. of the Army, Navy and Air Force

The National Security Act of 1947 provides for the unification of the Army, Navy and Air Forces under a single Secretary of Defense with cabinet rank. The President is also advised by a National Security Council and the Office of Civil and Defense Mobilization

The major components of the Department of Defense are the Office of the Secretary of Defense and the Joint Chiefs of Staff, who provide immediate staff assistance and advice to the Secretary, the departments of the Army, Navy and Air Force, each separately organized under a civilian head (not of cabinet rank), and the unified and specified commands.

# Army. Secretary of the Army John O. Marsh Jr.

Central Administration The Secretary of the Army is the head of the Department of the Army. Subject to the authority of the President as C -in-C and of the Secre-

tary of Defense, he is responsible for all affairs of the Department

The Secretary of the Army is assisted by the Under Secretary of the Army, 5 Assistant Secretaries of the Army (Civil Works, Financial Management, Installations and Logistics, Manpower and Reserve Affairs, Research Development and Acquisition), Chief of Public Affairs, Chief of Legislative Liaison, General Counsel, Administrative Assistant, and the Army Staff headed by the Chief of Staff, US Army The office of the Under Secretary of the Army includes a Deputy Under Secretary (Operations Research).

The Chief of Staff is the principal military adviser of the Secretary of the Army, and performs his duties under the direction of the Secretary of the Army, except as otherwise prescribed by law, by the President or by the Secretary of Defense He has supervision of all members and organizations of the Army. The Vice Chief of

Staff assists and advises the Chief of Staff

The Army General Staff is the principal element of the Army Staff and includes the offices of the Chief of Staff, Deputy Chief of Staff for Operations and Plans, Deputy Chief of Staff for Personnel, Deputy Chief of Staff for Logistics, Deputy Chief of Staff for Research, Development and Acquisition, the Comptroller of the Army, the Assistant Chief of Staff for Intelligence, and Assistant Chief of Staff for Information Management. Other elements of the Army Staff are the offices of the Judge Advocate General, Surgeon General, Adjutant General, Inspector General and Auditor General, Chief of Chaplains, Chief, Army Reserve, Chief, National Guard Bureau, and Chief of Engineers.

The Army consists of the Regular Army, the Army National Guard of the US, the Army Reserve and civilian workforce; and all persons appointed to or enlisted into the Army without component; and all persons serving under call or conscription, including members of the National Guard of the States, etc., when in the

service of the US

The strength of the Army was (1985) 776,576 (including some 78,810 women)

The US Army Forces Command, with headquarters at Fort McPherson, Georgia, commands the continental US Armies and all assigned Active Army and US Army Reserve troop units in the continental US, Alaska, Hawaii, Panama, Guam, Johnston Island, the Commonwealth of Puerto Rico, and the Virgin Islands of the USA. The headquarters of the continental US Armies are: First US Army, Fort George G Meade, Maryland; Fifth US Army, Fort Sam Houston, Texas, Sixth US Army, Presidio of San Francisco, California The US Army Training and Doctrine Command, with headquarters at Fort Monroe, Virginia, co-ordinates and integrates the total combat development effort of the Army as well as developing, managing and supervising the training of individuals of the US Army and authorized foreign nationals. The US Army Health Services Command, with headquarters at Fort Sam Houston, Texas, provides health services in the continental US for the US Army and provides professional education and training for medical personnel of the US Army and authorized foreign national personnel. The US Army Materiel Command, with headquarters in Alexandria, Virginia, is responsible for all US Army operations dealing with equipment development, procurement, delivery, supply and maintenance The US Army Communications Command, with headquarters at Fort Huachuca, Arizona, provides worldwide communication to the Department of the Army and supports the Defense Communications Systems. The US Army Military District of Washington, with headquarters at Fort McNair, Washington, D C provides support to the Department of the Army and the Department of Defense at the seat of Government

Some 40% of the Army is deployed overseas. Two divisions, two-thirds of which are located in the USA, keep equipment in the Federal Republic of Germany and can be flown there in 48-72 hours. Headquarters of US Seventh and Eighth Armies.

are in Europe and Korea respectively

Operational Commands and Weapons The larger commands are the theater army and the corps The typical theater army may consist of a variable number of corps, combat forces of armour and infantry, air defense artillery (Patriot and Hawk and short-range missile battalions), field artillery and Pershing missile battalions, combat support forces of aviation, engineer and signal elements, and combat service support forces A typical corps consists of a variable number and mixture of infantry, mechanized infantry, armoured, air assault, and airborne divisions; one or more separate infantry brigades, one or more armoured cavalry regiments, corps artillery (155-mm howitzer, 8-in howitzer, 175-mm gun, Lance missile battalions), an air defense element of a size commensurate with the hostile air threat (Patriot, Hawk and Chaparral/Vulcan battalions), and a target acquisition unit, combat support and combat service support forces.

US Army Divisions have a common base (containing command, aviation, divisional artillery, combat, combat support units and combat service support units) and a varying mixture of 'combat manoeuvre battalions' (usually 10 in number in 3 brigades) to make up airborne, infantry, armoured, mechanized infantry and airassault divisions. Divisions can in this way be 'tailored' to fit a variety of strategic oi tactical situations. An infantry division, with about 18,600 soldiers, may have 8 infantry battalions, an armoured battalion and a mechanized infantry battalion. a mechanized infantry division, with about 17,100 soldiers, may have 5 mechanized infantry battalions and 5 armoured battalions, an armoured division, with about 16,800 soldiers, may have 4 mechanized infantry battalions and 6 armoured battalions, an airborne division, with 13,100 soldiers, may have 9 infantry (airborne) battalions

The newly created 10,800-man light divisions consist of infantry, airborne or air assault forces. All offer rapid strategic force projection, especially the airborne division. Infantry divisions can operate in all environments and are general purpose forces. The air assault division is a highly specialized force capable of battlefield helicopter operations for infantry, artillery and necessary support forces.

Small arms include the M-16, which fires a 5 56-mm cartridge. The standard general-purpose machine-gun is the M-60 (23 lb, 550 rounds of 7 62-mm per minute). Infantry weapons also include M-203 grenade launcher attachment for the M16A1 rifle, which fire a 40-mm grenade up to 400 metres, the *Tow* and *Dragon* anti-tank missile system, and the M-72 rocket, a light anti-tank weapon.

Combat vehicles of the US Army are the tank, armoured personnel carrier (infantry fighting vehicle), armoured reconnaissance airborne assault vehicle and the armoured command vehicle. The first-line tanks are the M1 Abrams tank, and the M-60A3 with 105-mm main armament. The standard armoured infantry personnel carrier is the Bradley Fighting Vehicle (BFV), it carries a mechanized infantry squad, a 25-mm Bushmaster gun and Tow missile launchers. The BFV is also being utilized as the ground scout vehicle in armoured cavalry regiments, squadrons and in scout platoons of armoured and mechanized infantry battalions

The approved calibres of artillery are: light, 105-mm howitzer, medium 155-mm

howitzer, the heavy, 8-in howitzer The 4 2-in. mortars and the 81-mm mortar are used by combat manoeuvre elements. The *Tow* is the primary anti-tank weapon *Chaparral*, *Vulcan* and *Stinger*, forward-area air-defence weapons, provide the

capability of low-altitude defence against high-performance aircraft.

The Army has two categories of missiles—surface-to-surface (field artillery) and surface-to-air (air defence artillery) Surface-to-surface missiles are *Pershing II*, terminally guided, nuclear warhead, range about 1,000 miles (1,800 km) operational; *Lance*, guided, nuclear warhead, storable, liquid propellant, operational Surface-to-air missiles, for air defence, are. *Patriot*, guided, field or fixed installation, conventional warhead, operational, *Hawk*, homing type, low-to-midaltitude, field, operational (an improved system has replaced the basic *Hawk*), *Chaparral*, infra-red homing, low-altitude, forward area, operational (improvements to the basic system are under development), *Stinger*, hand-held, infra-red homing, low-altitude, forward area, operational. Anti-tank missiles are *Tow*, tube launched, optically tracked, wire guided, anti-armour, forward area, operational, *Hellfire*, terminal homing under development and *Dragon*, light wire guided, anti-armour, forward area, operational

The Army employs rotary- and fixed-wing aircraft as organic elements of its ground formations where their use is required on a full-time basis and their immediate and constant availability is essential. The front line commander exploits the benefits of aviation technology to perform traditional land battle tasks in the third dimension. This concept of airmobility for ground formation utilizes aerial vehicles as a highly integrated team to perform all five functions of land combat reconnaissance, command and control, logistics and that inseparable combination, firepower and manoeuvre

The Army has nearly 9,000 aircraft, all but about 500 of them helicopters. The principal types are 3,700 UH-1 Iroquois and 650 UH-60 Black Hawk transport helicopters, 1,900 OH-58 Kiowa observation helicopters, 1,050 AH-1 HueyCobra anti-armour helicopters, and 450 Chinook medium-lift helicopters

Enlistment, Terms of Service Since 1974 the Army has operated a 'zero draft' system making it, in effect, an all-regular force. Terms of service may be 2, 3, 4, 5 or 6 years. Men and women who enlist incur a 6-year obligation and must serve in the

reserve any part of the period not served on active duty

The Army National Guard is the only reserve military component with a dual mission: a state and federal rôle. Enlistment is voluntary. The members are recruited by each state, but are equipped and paid by the federal government (except when performing state missions). Training is supervised by the active Army (FORSOM), and unit organization parallels that for the active army; training facilities are made available by the USA and each state. As the organized militia of the several states, the District of Columbia, Puerto Rico and the Territories of the Virgin Islands and Guam, the Guard may be called into service for local emergencies by the chief executives in those jurisdictions, and may be called into federal service by the President to thwart invasion or rebellion or to enforce federal law. In its role as a reserve component of the Army, the Guard is subject to the order of the President in the event of national emergency.

The Army Reserve is designed to supply qualified and experienced units and individuals in an emergency. US Army Forces Command is charged with the command, support and training supervision of US Army Reserve units. Members of units are assigned to one category, the Ready Ready. The Ready Reservists is subject to call by the President in case of national emergency without declaration of war by Congress. The Standby Reserve and the Retired Reserve may be called only after declaration of war or national emergency by Congress.

Navy. Secretary of the Navy Hon. John H. Lehman, Jr.

The Department of the Navy is administered under the Secretary of Defense by the Secretary of the Navy, assisted by the Under Secretary; 4 Assistant Secretaries,

for Financial Management; for Shipbuilding and Logistics, for Manpower and Reserve Affairs; and for Research, Engineering and Systems, as well as by the Chief of Naval Operations and the Commandant of the Marine Corps The 3 divisions of the Department of the Navy are

Navy Department, comprised of staff offices of the Secretary for Legislative Affairs, Information, the Judge Advocate General, Auditor General, Program Appraisal, General Counsel, Naval Research and Comptroller; offices of the Chief of Naval Operations which include the Vice Chief, the Assistant Vice Chief/Director of Naval Administration, 6 Deputy Chiefs and 8 Directors; Naval Inspector General, the Surgeon General; Bureau of Naval Personnel, and Headquarters U.S Marine Corps

The Shore Establishment comprises commands dealing with air, electronic, facilities engineering, sea (including ordnance) and supply systems, and other commands Space, Medical, Education and Training, Data Automation, Telecommunications, Intelligence, Oceanography, Legal Service, Security Group, and Investigative Service; as well as supporting establishment of the Marine Corps and Marine Corps Reserve.

The Operating Forces are the Military Sealist Command, U S Naval Forces Europe, the Atlantic and Pacific Fleet including Fleet Marine Forces, operating forces of the Marine Corps, the Mine Warfare Command, Operational Test and Evaluation Force, Naval Forces Southern and Central Commands, and the Naval Reserve Forces

Major shore activities include 8 shipyards, 45 air stations and facilities, 2 amphibious bases, 5 submarine bases and 29 naval stations and bases. By agreement dated 2 Sept. 1940, Britain granted leases for naval and air bases in Newfoundland, Bermuda, Bahamas, Jamaica, St Lucia, Trinidad, Antigua and Guyana, but these are not all now active.

Naval appropriations in recent fiscal years 1980, \$47,084m, 1981, \$57,834m, 1982, \$68,792m, 1983, \$81,936m, 1984, \$81,999m, 1985, \$95,549m, 1986 (planned) \$104,877m

The active personnel on duty on 31 July 1985 was 583,229 Navy officers and enlisted men, plus 197,895 Marine Corps officers and men

1946	Albany	13,700	deck for utility helicopters	{ 2 twin 'Tartar' launchers } } 2 5-in	120,000	32

Originally rated as guided missile destroyers. Ticonderoga, DDG 47, was redesignated

For conversions and disposals of other cruisers of the 'Oregon City', 'Baltimore', 'Cleveland' and 'Juneau' classes see 1981-82 and earlier editions

CG47 in 1980 when the new type were reclassified as guided cruisers

\* Sister ship Newport News was stricken from the Navy List on 31 July 1978

Albany and Chicago were to have been disposed of in 1980 but in 1981 it was planned to retain these ships in reserve for a minimum of three years and Oklahoma City retained for logistic support but she was again listed for disposal in 1984 (possible naval memorial)

For conversions and disposals of other cruisers of the 'Oregon City' 'Baltimore' 'Cleveland'

Completion - '726' or 'Ohio' class in 1981-86 (three more to follow in 1987-90), '640' or 'Benjamin Franklin' class 1965-67, '616' or 'Lafayette' class in 1963-64 '608' or 'Ethan Allen' class (formerly Polaris armed) in 1961-63, '598' or 'Creorge Washington' class (formerly Polaris armed) in 1959-61. All ballistic missile armed submarines also have four 21-inch torpedo tubes.

Of the '608' or Lihan Allen class reclassified as flect submarines. Lihan Allen (608) stricken in 1983 (target), Thomas 4. Edison and Thomas Jefferson deleted in 1985.

Three of 598' or George Washington class converted to fleet submarines (of which George Washington and Patrick Henry have been stricken) and two scrapped, Theodore Roosevett (600) and Abraham Lincoln (602) both targets

In addition to the above named principal surface ships there are 140 nuclear-powered submarines (including the ballistic missile armed vessels in the table), 5 conventionally propelled submarines, 83 destroyers, 112 frigates, 21 ocean mine-sweepers, 4 patrol vessels, 6 hydrofoil missile patrol craft, 1 fast patrol boat 70 amphibious warfare ships, 150 landing craft, 40 replenishment ships, 100 sealift ships, 130 fleet support ships and auxiliaries, 60 oilers, 100 minor landing craft and 1,000 service craft.

Ships under construction include 9 submarines of 18,700 tons submerged with nuclear propulsion and ballistic missiles, 18 nuclear propelled attack (fleet) submarines of 6,900 tons submerged, the giant nuclear propelled aircraft carriers. Theodore Roosevelt, Abraham Lincoln and George Washington each of 93,500 tons full load; 12 guided missile cruisers, 3 destroyers and 14 guided missile frigates.

<sup>&</sup>lt;sup>2</sup> The 'Leahy' class comprises Dale, England Gridley Halsey Harry E. Yarnell Leahy Reeves, Richmond K. Turner and Worden

Projected new construction includes 7 more 'Ohio' class nuclear propelled deterrent or 'strategic' submarines; 12 more nuclear propelled fleet or 'attack' submarines, 11 guided missile cruisers, 55 guided missile destroyers and 5 frigates.

Naval Aviation. The official figures given in the total aircraft inventory are 6,049 in the Navy and the Marine Corps of which 5,265 are active and 4,439 are operating. The main fighters are the F-14 Tomcat, F-4 Phantom, and F-18 Hornet, the A-4 Skyhawk, A-6 Intruder, A-7 Corsair and AV-8 Harrier are assigned to strike missions; the E-2 Hawkeye is used for airborne early warning; the P-3 Orion for maritime patrol, the SH-2 Seasprite, SH-3 Sea King and SH-60 Sea Hawk helicopters for anti-shipping and ASW, transports include the C-130 Hercules, C-2 Greyhound and C-9 Skytrain II aircraft, plus UH-1 Iroquois, CH-46 Sea Knight and CH-53 Sea Stallion helicopters; the T-34C Turbo-Mentor, T-39 Sabreliner, T-44 King Air, F-5E/F Tiger II and conversion models of front-line aircraft are used for training, alongside TH-57 Sea Ranger training helicopters. There are 826 naval aircraft in the pipeline

The US Coast Guard operates under the Department of Transportation in time of peace and as a part of the Navy in time of war or when directed by the President. The act of establishment stated the Coast Guard 'shall be a military service and branch of the armed forces of the United States at all times' The Coast Guard did operate as part of the Navy during the First and Second World Wars. It also had some units serving in Vietnam It comprises 245 ships including cutters of destroyer, frigate, corvette and patrol vessel types, powerful icebreakers, and paramilitary auxiliaries and tenders, plus over 2,000 rescue and utility craft. It also maintains 65 fixed-wing aircraft and 105 helicopters. The Coast Guard missions include maintenance of aids to navigation, enforcement of maritime laws, enforcement of international treaties, environmental protection (especially waterway pollution), commercial vessel safety programmes, recreational boating safety, and search and rescue efforts. In the new construction programme are 8 cutters of frigate size and utility each capable of carrying a helicopter and 15 patrol craft. The strength of personnel on 1 Jan 1986 was 5,180 officers, 1,450 warrant officers and 31,320 enlisted personnel and 730 cadets. A few ships had several women assigned as permanent members of the crew

Air Force. Secretary of the Air Force Russell A. Rourke.

The Department of the Air Force was activated within the Department of Defense on 18 Sept. 1947, under the terms of the National Security Act of 1947. It is administered by a Secretary of the Air Force, assisted by an Under Secretary and 3 Assistant Secretaries (Research, Development and Logistics, Financial Management, and Manpower, Reserve Affairs and Installations) The USAF, under the administration of the Department of the Air Force, is supervised by a Chief of Staff, who is a member of the Joint Chiefs of Staff. He is assisted by a Vice Chief of Staff, Assistant Vice Chief of Staff, and 5 Deputy Chiefs of Staff (Manpower and Personnel; Programs and Resources; Research, Development and Acquisition, Plans and Operations, and Logistics and Engineering)

The USAF consists of active duty Air Force officers and enlisted personnel, civilian employees, the Air National Guard and the Air Force Reserve. For operational purposes the service is organized into 13 major commands, 16 separate operating agencies and 5 direct reporting units. The Strategic Air Command, equipped with long-range bombers based both in the USA and overseas, and with intercontinental ballistic missiles, is maintained primarily for strategic air operations anywhere on the globe. Tactical Air Command is the Air Force's mobile strike force, able to deploy US general-purpose air forces anywhere in the world for tactical air combat operations. The Military Airlift Command provides air transportation of personnel and cargo for all military services on a worldwide basis, and is also responsible for Air Force audio-visual products, weather service, and aerospace rescue and recovery operations.

The other major commands are the Air Force Systems Command, Air Force Logistics Command, Air Force Communications Command, Electronic Security Command, Air Training Command, Alaskan Air Command, Pacific Air Forces, Space Command, United States Air Forces in Europe, and Air University. The Alaskan, Pacific and European commands conduct, control and co-ordinate offen-

sive and defensive air operations according to tasks assigned by their respective theatre commanders.

The separate operating agencies are the Air Force Accounting and Finance Center, Air Force Audit Agency, Air Force Commissary Service, Air Force Engineering and Services Center, Air Force Inspection and Safety Center, Air Force Intelligence Service, Air Force Office of Security Police, Air Force Manpower and Personnel Center, Air Force Office of Medical Support, Air Force Management Engineering Agency, Air Force Service Information and News Center, Air Force Legal Services Center, Air Force Office of Special Investigations, Air Force Operational Test and Evaluation Center, Air Force Reserve, and Air Reserve Personnel Center. Air Force direct reporting units are the Air Force Academy, Air National Guard, Air Force Technical Applications Center, Air Force District of Washington, D.C and USAF Historical Research Center

Of the fighter and interceptor aircraft in service, the F-15 Eagle, F-5 Tiger II, F-16 Fighting Falcon, F-106 Delta Dart, F-111 and F-4 Phantom II fly faster than the speed of sound in level flight and can carry a variety of armament. The E-3 Sentry (AWACS) is a large long-range airborne warning and control aircraft, the EF-111A Raven is a tactical electronics jamming aircraft produced by conversion of the F-111A fighter. The subsonic A-7 Corsair II, the A-10 Thunderbolt and the AC-130H are close air support aircraft. The O-2A, OA-37 and the OV-10 are observation aircraft Strategic bombers are the B-52 Stratofortress and the B-1B heavy bombers and the 'swing-wing' FB-111A. The Strategic Air Command also operates the KC-10A Extender and the KC-135 Stratotanker for aerial refuelling and the SR-71 Blackbird and the U-2 for reconnaissance Primary transports include the C-141 Starlifter the C-5 Galaxy, KC-10A Extender and the turboprop-powered C-130 Hercules. Intercontinental ballistic missiles in USAF service are Titan II, being phased out, and the Minuteman II and III United States Air Forces in Europe operates the TR-1 for reconnaissance and the Ground Launched Cruise Missiles

In 1986, the Air Force had about 604,000 military personnel The service operates approximately 9,500 aircraft in the active Air Force, the Air National

Guard and the Air Force Reserve

On 31 Aug 1919 gross debt reached its First World War (1914–18) peak of \$26,596,702,000, which was the highest ever reached up to 1934, on 31 Dec 1930 it had declined to \$16,026m, the lowest it has been since the First World War On the 30 Nov 1941, just preceding Pearl Harbor, debt stood at \$61,363,867,932 The highest Second World War debt was \$279,764,369,348 on 28 Feb 1946

<sup>2</sup> Per capita figures, beginning with 1960, have been revised, they are based on the Census Bureau's estimates of the total population of the US, including Alaska and Hawaii

State and Local Finance Revenue of the 50 states and all local governments (82,688 in 1982) from their own sources amounted to \$486,878m in fiscal year 1982-83, in addition they received \$89,983m in revenue from fiscal aid, shared revenues and reimbursements from the federal government, bringing total revenue from all sources to \$593,586m Of the revenue from state and local sources, taxes provided \$284,585m., of which property taxes (mainly imposed by local governments) yielded \$89,253m or 32% of all tax revenue, and sales taxes, both general sales taxes and selective excises, provided \$100,247m (35%).

State tax revenue totalled \$171,440m in fiscal year 1983 Largest sources of state tax revenue are general sales taxes (imposed during 1982 by 45 states), motor fuel sales taxes (all states), individual income (44 states), motor vehicle and operators' licences (all states), corporation income (46 states), tobacco products (all states) and alcoholic beverage sales taxes (all states)

General revenue of local units from own sources in fiscal year 1982-83 totalled \$179,143m In addition they received \$119,399m from state and federal aids Property taxes provided 29% of total general revenue

Total expenditures of state and local governments were \$566,567m in 1982-83, of which approximately 71% was for current operation Education took \$163,876m. in current and capital expenditure, highways, \$36,665m., welfare (chiefly public assistance), \$58,735m, and health and hospitals, \$44,118m Capital outlays (construction, equipment and land purchases) totalled \$67,984m

Gross debt of state and local governments totalled \$454,501m or \$1,942 per capita at the close of their 1982-83 fiscal year. Total cash and investment assets of state and local governments were \$585,848m, about 20% being in cash and deposits, and the remainder in investments, mainly non-governmental securities.

National Income. The Bureau of Economic Analysis of the Department of Commerce prepares detailed estimates on the national income and product of the United States. The principal tables are published monthly in Survey of Current Business, the complete set of national income and product tables are published in the Survey regularly each July, showing data for recent years The National Income and Product Accounts of the United States, 1929–1976 Statistical Tables (1981) and the July 1982, July 1983 and July 1984 Survey contain complete sets of tables from 1929 through 1983. The July 1985 Survey contains a limited set of tables through 1984. The conceptual framework and statistical methods underlying the US accounts were described in National Income, 1954 Subsequent limited changes were described in US Income and Output (1958), and in Survey of Current Business (Aug. 1965, Jan. 1976 and Dec 1980).

System had been on the gold standard for more than 50 years. An Act of 14 March 1900 required the Secretary of the Treasury to maintain at a parity with gold all forms of money issued by the USA. For a description of these, see The States-

man's Year-Book, 1934, p 491.

The old gold dollar had a par value of 49 32d., or \$4.8666 to the £ sterling, it contained 25 8 grains (or 1 6718 grammes) of gold 0 900 fine By the act of 12 May 1933 the President of the USA was given authority to reduce the gold content of the dollar by not more than 50% and by the Gold Reserve Act of 30 Jan. 1934 the minimum reduction which he could make was fixed at 40%, on 31 Jan 1934 he fixed its value at 59 06%, or 15½ grains of gold 0 900 fine. This was equal to a price for gold of \$35 a fine oz (old price, \$20 67183) The President's power to alter the gold content of the dollar to 50% of its value, which was extended by Congress in 1937, 1939 and 1941, was not yet again extended in 1943.

The Par Value Modification Act (Public Law 92–268), enacted on 31 March 1972, authorized and directed the Secretary of the Treasury to take the steps necessary to establish a new par value of the dollar of \$1 = 0 818513 gramme of fine gold or \$38 per fine troy oz. of gold The Secretary of the Treasury, pursuant to the statutory directive, proposed the new par value for the US dollar to the International Monetary Fund, which par value became effective on 8 May 1972.

In Public Law 93-110, enacted on 21 Sept. 1973, Congress amended the Par Value Modification Act of 1972, and authorized and directed the Secretary of the Treasury to take the steps necessary to establish a new par value of \$1 equals 0.828948 Special Drawing Right or 1/42% of a fine troy ounce of gold. Pursuant to the statutory directive, the Secretary of the Treasury notified the International Monetary Fund that, effective 18 Oct 1973, the par value of the dollar would be changed from 1/38 to 1/42% a fine troy ounce of gold Expressed in terms of gold, the new par value of the dollar was 0 736662 gramme of gold per dollar, or \$42.2222 per fine troy ounce of gold. Expressed in percentage, the change in the par value of the dollar amounted to a reduction of 10% in the former gold content of the dollar. This is the equivalent to an 11 1% increase in the former dollar price of gold.

The USA, on 1 April 1978, accepted the second amendment to the Articles of Agreement of the International Monetary Fund. The par value of the dollar is no longer defined in terms of the Special Drawing Right and gold, and the USA is not

obliged to establish and maintain a par value for the dollar.

At the time of the banking crisis in March 1933 gold payments by banks and the Treasury were suspended by the Government, and an embargo was placed on gold exports. Steps were taken to withdraw from circulation all gold coin and gold certificates and to prohibit the private ownership of all gold certificates, gold bullion and gold coin except for numismatic purposes Public Law 93-373, 14 Aug. 1974, amended the Par Value Modification Act so as to provide for the termination of all governmental restrictions on private ownership of gold, including gold coins, no later than 31 Dec 1974.

Currency in the USA for many years has comprised several varieties. Prior to May 1933 the legal tender qualities of the classes varied, but in that month all types of currency were made equally legal tender. Under the Coinage Act of 1965, all coins and currencies of the USA, regardless of when coined or issued, are legal tender for all debts, public and private.

Only one of the eight kinds of notes outstanding is now significant. Federal Reserve notes in denominations of \$1, \$2, \$5, \$10, \$20, \$50 and \$100. The issue of (a) \$500, \$1,000, \$5,000 and \$10,000 Federal Reserve notes; of (b) silver certificates, and of (c) \$100, \$5 and \$2 US notes have been discontinued, although they are still outstanding. The following issues were stopped many years ago and have been in process of retirement: (1) Federal Reserve Bank notes; (2) National Bank notes; (3) Treasury notes of 1890; (4) fractional currency.

Federal Reserve notes are obligations of the USA and a first lien on the assets of the Federal Reserve Banks, through which they are issued. Each of the 12 banks

issues them against the security of an equal volume of collateral.

Gold coins (of the old weight and fineness) were \$20, \$10, \$5 and \$2½ pieces called double eagles, eagles, half-eagles and quarter-eagles. The old eagle weighed 258 grains or 16.7181 grammes 0.900 fine, and therefore contained 232.2 grains or 15 0463 grammes of fine gold. Except for collector's holdings, these are no longer in circulation. The stock of gold bullion held by the Treasury on 31 Aug. 1982 was 264m. fine oz., valued at \$11,100m.; stock of silver bullion was 38.7m. fine oz. (excluding 137.5m. fine oz. held for defence stockpile). Estimated stock of domestic coin in circulation on 30 June 1983 was \$13,909m., including standard silver dollars and silver and other subsidiary coin.

The silver dollar weighs 412 5 grains or 26.7296 grammes 0 900 fine, and contains 371 25 grains or 24 0566 grammes of fine silver. Subsidiary, 0.900 fine, silver coins contain 347 22 grains of fine silver per dollar. These are the half-dollar, quarter-dollar and dime (one-tenth). Minor coins currently issued are the cupronickel 5-cent piece and the bronze 1-cent piece Pursuant to the Coinage Act of 1965, Congress authorized the minting and issuance of new silver clad half-dollars containing 40% silver and cupro-nickel quarter-dollars and dimes containing no silver In an amendment to the Coinage Act enacted on 31 Dec. 1970, Congress provided that all coins minted thereafter, including dollar and half-dollar coins, be made of cupro-nickel composition. However, a provision in the 1970 law permitted the coining of 1 500 inch dollar coins containing 40% silver. These dollar coins, which bear the likeness of the late President Eisenhower, are sold at premium price to coin collectors. In Oct 1978 there was authorization of a new dollar bearing the likeness of suffragette Susan B Anthony The new dollars, which are 1 043 inches in diameter and weigh 8 1 grammes, replace the cupro-nickel Eisenhower dollars. In 1981 the Mint began producing 1-cent coins made of 97 6% zinc and 2 4% copper (zinc and copper alloy blanks, barrel electro-plated with copper), pursuant to its authority under 31 USC 317(b) to alter the composition of the alloy of the 1-cent coin In 1983 it was in the process of phasing out production of bronze cents and will shortly only be producing zinc cents

On 22 July 1982, the Olympic Commemorative Coin Act authorized the limited issue of not more than 50m. one dollar silver coins and 2m. ten dollar gold coins to commemorate the 1984 Olympics. The coins are to be minted in proof and uncirculated condition. The 1 500 inch dollar coins containing 90% silver will be issued in 1983 and 1984. The 1983 Olympic silver dollar will feature the classic Greek discus thrower, while the 1984 Olympic silver dollar will depict the gateway for the entrance to the Los Angeles Memorial Coliseum. The 1 06 inch 1984 ten dollar gold coin weighs 16 718 grammes of an alloy of 90% gold, 10% copper. It features two Olympic Torch bearers and will be the first US coin to carry the 'W' mint mark of the US. Bullion Depository, West Point, N.Y. The coins are being sold at a premium price with the surcharge above the cost of manufacturing and marketing going to support equally the efforts of the US. Olympic Committee and the Los Angeles Olympic Organizing Committee.

Banking. On 30 June 1985 there were 14,579 insured commercial banks and insured mutual savings banks with deposits of \$1,777,076m. filing report of condition and income statements with the Federal Reserve Board

The Federal Reserve System, established under an Act of 1913, comprises the Board of 7 Governors, the 12 regional Federal Reserve Banks with their 25 branches, the Federal Open Market Committee and the Federal Advisory Council The 7 members of the Board of Governors are appointed by the President with the consent of the Senate Each Governor is appointed to a full term of 14 years or an unexpired portion of a term, one term expiring every 2 years. No two may come from the same Federal Reserve District. The Board supervises the Reserve Banks and the issue and retirement of Federal Reserve notes; it designates 3 of the 9 directors of each Reserve Bank and designates the Chairman and Deputy Chairman, it passes on the admission of state banks to the System and has power to correct unsound conditions in State member banks or violations of banking law by them, including, if necessary, disciplinary action to remove officers and directors for unsafe or unsound banking practices or for continuous violations of banking laws; it also authorizes State member bank branches and approves mergers and consoli-

dations if the acquiring, assuming or resulting bank is to be a State member; and it has power to control the expansion of bank holding companies and to require divestment of certain non-banking interests. The 12 members of the Federal Open Market Committee include the 7 members of the Board of Governors and 5 of the 12 Federal Reserve Bank presidents. The latter serve 1-year terms on the Committee in rotation except for the President of the Federal Reserve Bank of New York, who is a permanent member. The Federal Open Market Committee influences credit market conditions, money and bank credit, by buying or selling US Government securities; and it also supervises System operations in foreign currencies for the purpose of helping to safeguard the value of the dollar in international exchange markets and facilitating co-operation and efficiency in the international monetary system. The Board also influences credit conditions through powers to set reserve requirements, to approve discount rates at Federal Reserve Banks, and to fix margin requirements on stock-market credit.

The Reserve Banks advance funds to depository institutions, issue Federal Reserve notes, which are the principal form of currency in the US, act as fiscal agent for the Government, and afford nation-wide cheque-clearing and fund transfer arrangements. They may discount paper for depository institutions and increase or reduce the country's supply of reserve funds by buying or selling Government securities and other obligations at the direction of the Federal Open Market Committee. The purchase and sale of securities in the open market is conducted by the Federal Reserve Bank of New York. Their capital stock is held by the member banks, but it carries no voting rights except in the election of directors.

Every member bank is required to subscribe to stock in the Reserve Bank of its district in an amount equal to 6% of its paid-up capital and surplus. Only one-half of the par value of the stock is paid in, the other half remaining subject to call by the Board of Governors. However, no call has been made for the second half of the subscription. All depository institutions with certain transaction accounts and time deposits are required to hold reserves with the Federal Reserve.

From 1968, the Congress passed a number of consumer financial protection acts, the first of which was the Truth in Lending Act, for which it has directed the Board to write implementing regulations and assume partial enforcement responsibility Others include the Equal Credit Opportunity Act, Home Mortgage Disclosure Act, Consumer Leasing Act, Fair Credit Billing Act, and Electronic Fund Transfer Act To manage these responsibilities the Board has established a Division of Consumer and Community Affairs. To assist it, the Board consults with a Consumer Advisory Council, established by the Congress as a statutory part of the Federal Reserve System.

The Consumer Advisory Council was established by Congress in 1976 at the suggestion of the Board of Governors. Representing both consumer/community and financial industry interests, the Council meets several times a year to advise the Board on its implementation of consumer regulations and other consumer related matters.

Another statutory body, the Federal Advisory Council, consists of 12 members (one from each district); it meets in Washington at least four times a year to advise the Board of Governors on general business and financial conditions.

Following the passage of the Monetary Control Act of 1980, the Board of Governors established the Thrift Institutions Advisory Council to provide information and views on the special needs and problems of thrift institutions. The group is comprised of representatives of mutual savings banks, savings and loan associations, and credit unions.

Banks which participate in the federal deposit insurance fund have their deposits insured against loss up to \$100,000 for each depositor. The fund is administered by the Federal Deposit Insurance Corporation established in 1933; it obtains resources through annual assessments on participating banks.

All members of the Federal Reserve System are required to insure their deposits through the Corporation, and non-member banks may apply and qualify for insurance. On 31 Dec. 1984, 14,506 commercial banks and 267 mutual savings banks with insured deposits of \$1,400,000m, were members of the insurance fund. There are also 37 cooperative Farm Credit Banks, supervised by the Farm Credit Administration, that make agricultural and rural housing loans as well as loans to farmer

cooperatives and to businesses providing on-farm services. In this system, farm mortgage loans are originated by local federal land bank associations, while farm production loans are made by local production credit associations. Moreover, the Federal Home Loan Bank System, which includes 12 district banks, is one of several government-sponsored agencies established for the public purpose of assisting home ownership. The Federal Home Loan Banks borrow in the financial markets and lend these funds to savings and loan associations and savings banks, which hold most of their assets in home mortgages. The Federal Home Loan Bank System is privately owned and does not receive any direct federal funding, although it seems to carry an implicit promise of financial support from the federal government because of its public purpose.

Weights and Measures. British weights and measures are usually employed, but the old Winchester bushel and wine gallon are used instead of the new or Imperial standards Wine gallon = 0 83268 Imperial gallon; Bushel = 0 9690 Imperial bushel. Instead of the British cwt of 112 lb, one of 100 lb. is used; the short or net ton contains 2,000 lb, the long or gross ton, 2,240 lb

The two world wars and record levels of industrial production have hastened the depletion of once abundant supplies of metal and US is increasingly an importer. US is wholly or almost wholly dependent upon imports for industrial diamonds, bauxite, tin, chromite, nickel, strategic-grade mica and long-fibre asbestos, it imports the bulk of its tantalum, platinum, manganese, mercury, tungsten, cobalt and flake graphite, and substantial quantities of antimony, cadmium, arsenic, fluor-spar, zinc and bismuth.

In 1983 precious metals were mined mainly in Idaho, Nevada, Montana, Utah and Arizona (in order of combined output of gold and silver). US output of gold (troy oz.), 1930-39, 31,453,370, 1940-49, 24,171,646; 1950-59, 18,817,241, total 1792-1970, 316,620,436. Agriculture. Agriculture in the USA is characterized by its ability to adapt to widely varying conditions, and still produce an abundance and variety of agricultural products. From colonial times to about 1920 the major increases in farm production were brought about by adding to the number of farms and the amount of land under cultivation. During this period nearly 320m acres of virgin forest were converted to crop land or pasture, and extensive areas of grass lands were ploughed Improvident use of soil and water resources was evident in many areas.

During the next 20 years the number of farms reached a plateau of about 6 5m, and the acreage planted to crops held relatively stable around 330m acres. The major source of increase in farm output arose from the substitution of power-driven machines for horses and mules. Greater emphasis was placed on development and improvement of land, and the need for conservation of basic agricultural resources was recognized. A successful conservation programme, highly coordinated and on a national scale—to prevent further erosion, to restore the native fertility of damaged land and to adjust land uses to production capabilities and needs—has been in operation since early in the 1930s.

Following the Second World War the uptrend in farm output has been greatly accelerated by increased production per acre and per farm animal. These increases are associated with a higher degree of mechanization; greater use of lime and fertilizer; improved varieties, including hybrid maize and grain sorghums, more effective control of insects and disease; improved strains of livestock and poultry; and wider use of good husbandry practices, such as nutritionally balanced feeds, use of superior sites and better housing. During this period land included in farms decreased slowly, crop land harvested declined somewhat more rapidly, but the number of farms declined sharply.

Some significant changes during these transitions are:

All land in farms totalled less than 500m. acres in 1870, rose to a peak of over 1,200m. acres in the 1950s and declined to 1,232m. acres in 1982, even with the addition of the new States of Alaska and Hawaii in 1960. The number of farms

declined from 6 35m. in 1940 to 2 37m. in 1983, as the average size of farms doubled. The average size of farms in 1983 was 437 acres, but ranged from a few acres to many thousand acres. In 1978, 215,088 farms (128,254 in 1974) were less than 10 acres, 475,241 (379,543), 10-49 acres, 814,689 (827,884), 50-179 acres, 596,356 (616,098), 180-499 acres, 215,112 (207,297), 500-999 acres, 98,521 (92,712), 1,000-1,999 acres, 63,635 (62,225) 2,000 acres or more

Farms operated by owners or part-owners, 1978, were 2,165,000 (87% of all farms), by all tenants, 314,000 (13%) The average size of farms in 1978 was 235 acres for full-owners, 792 acres for part-owners and 396 acres for tenants. Farms with white operators numbered 2,398,726, and those with operators who were black or of other races were 79,916 A higher proportion of blacks and operators of other races were tenants and operated a significantly smaller acreage than white

operators

In 1983 (with 1960 figures in parentheses) large-scale, highly mechanized farms with sales of agricultural products totalling \$20,000 and over per farm made up 39 5% (8 6%) of all farms and accounted for 93 2% (48 3%) of the value of farm products sold. Farms selling between \$19,999 and \$2,500 worth of products per farm were 39.1% (44 8%) of all farms and sold 6.2% (43 3%) of all sales. The remaining 21 4% (46 6%) of all farms sold less than \$2,500 worth of products per farm, 0 6% (8.4%) of total sales. Operators in every sales category received off-farm income, but operators selling less than \$20,000 per year received more of their average income from non-farm sources than from farming in 1983. Total income per operator: farms with sales of \$500,000 and over, \$444,808 (of which \$416,205 is from farm sources), sales \$200,000–\$499,999, income \$50,007 (\$35,397), sales \$20,000–\$39,999, income \$13,850 (\$303), sales under \$5,000, income \$20,407 (farm losing \$687)

A century ago three-quarters of the total US population was rural, and practically all rural people lived on farms. In April 1980 26% of the population was rural,

and 6m Farm residents accounted for 3% of the total population.

Hired farm workers, July 7-13, 1985, 3 9m, and farm family workers, including operators, about 2.2m In 1950 there were nearly 10m, farm workers. At that time each farm worker supplied farm products for 15 people, in 1974, 55 people, in 1977, 60 people and in 1982, 76 people

Total value of livestock, excluding poultry and goats and, from 1961, horses and mules (in \$1 m) on farms in the USA on 1 Jan was 1930, 6,061, 1933 (low point of the agricultural depression), 2,733, 1970, 22,886, 1978, 31,952, 1979, 50,612, 1980, 60,598, 1981, 60,016, 1982, 53,601, 1983 (preliminary), 52,148

In 1982 the production of shorn wool was 105m lb from 13 1m sheep (average 1970-74, 320m lb from 18 2m. sheep), of pulled wool, 1 15m lb (1970-74, 10 1m lb)

Forestry. In 1977 the US forest lands, including Alaska and Hawaii, capable of producing timber for commercial use, covered 482,485,900 acres (more than onefifth of the land area), classified as follows: Saw-timber stands, 215,435,700 acres, pole timber stands, 135,609,900 acres, seedling and sapling stands, 115,032,100 acres, non-stocked and other areas, 16,408,200 acres. Ownership of commercial forest land is distributed as follows: Federal government, 99,410,400 acres, state, county, municipal and Indian, 36,311,200 acres, privately owned, 346,764,300 acres, including 115,777,100 acres on farms. Of the saw-timber stand (2,578,940m. bd ft) Douglas fir constitutes 514,317, Southern pine, 321,563, Western yellow (ponderosa and jeffrey) pine, 192,070, other softwoods, 957,458, hardwoods, 255,189 In 1976 growing stock timber removals amounted to 14,229,023,000 cu ft compared to net annual growth of about 21,664,316,000 cu. ft Saw-timber removals amounted to 65,176,618,000 bd ft against an annual growth of 74.620.832.000 bd ft. The net area of the 156 national forests and other areas in USA and Puerto Rico administered by the US Department of Agriculture's Forest Service, including commercial and non-commercial forest land, was in Oct 1985, 191m acres.

Fire takes a heavy annual toll in the forest, total area burned over in 1984 was 2,121,922 acres, 1,500m, acres of land are now under organized fire-protection service. The area planted or seeded in forest and wind barrier nursery stock in the year ending 30 Sept. 1984 was 463,398 acres.

The main fishing industries are in California (anchovy, tuna and sole); Alaska (notably salmon), Washington (salmon and halibut), Florida (the main source of turtles and sponges), Massachusetts, Maine, North Carolina and Oregon Total catch, 1981 (preliminary), 5,977m. lb valued at \$2,388m

Tennessee Valley Authority. Established by Act of Congress, 1933, the TVA is a multiple-purpose federal agency which carries out its duties in an area embracing some 41,000 sq miles, in 125 counties (aggregate population, about 4 7m) in the 7 Tennessee River Valley states. Tennessee, Kentucky, Mississippi, Alabama, North Carolina, Georgia and Virginia In addition, 76 counties outside the Valley are served by TVA power distributors. Its 3 directors are appointed by the President, with the consent of the Senate, headquarters are in Knoxville, Tenn. There were 32,778 employees in July 1985.

In the 1930s and 1940s, the Tennessee Valley offered the world a model of the first effort to develop all resources of a major river valley under one comprehensive programme, the Tennessee Valley Authority The multipurpose development of the Tennessee River for flood control, navigation, and electric power production was the first big task for TVA But there were other needs; controlling erosion on the land, introducing better fertilizers and new farming practices, eradicating malaria, demonstrating ways electricity could lighten the burdens in the home and increase production on the farm, and a multitude of potential job-producing enterprises

In the depression year, 1933, the average per capita income in the Valley was \$168, compared with the national average of \$375. Through the years, TVA has placed a strong emphasis on the economic development of the Valley. An abundant supply of reasonably priced power, combined with a reliable navigation system, has provided a strong incentive for industry to locate in the Valley By 1983, the region's per capita income had multiplied over 53 times to \$8,940, while the national average had increased 31 times.

Taming the Tennessee River has had two positive effects on the Valley flood damages averted by river control now total more than \$3,000m, and a navigable channel system 650 miles long, connecting with the American system of inland waterways, provides a readily accessible transportation system for industry. In 1983, 29m. (estimate) tons of barge-traffic travelled the TVA river system.

Another activity is experimentation in the development and manufacture of chemical fertilizers, accompanied by programmes designed to encourage proper fertilizer use in all parts of the United States and the world TVA's National Fertilizer Development Center is recognized world-wide for its expertise in fertilizer technology TVA also works closely with other federal agencies, and with state and local authorities in combating soil erosion, improving forest resources, improving agriculture, and in the development of local industries based on natural resources

In recent years, attention has focused mainly on TVA's power programme TVA supplies electric power to 160 local distribution systems serving 2 9m customers. The power system originated with the water-power development of the Tennessee River, but has become predominantly a coal-fired system as power requirements have outgrown the region's hydro-electric potential. In fiscal year 1984, the TVA system generated 113,667m kwh. Installed capacity in 1984 was 32 1m kw, with another 5.2m. kw under construction at TVA's nuclear plants.

Because of the ever-increasing cost of energy in today's world, TVA has focused a good deal of its attention and resources on the research and demonstration of new and alternative energy sources. TVA is playing a lead rôle in the development of atmospheric fluidized bed combustion (AFBC) technology, an innovative process of burning high-sulphur coal cleanly and cheaply TVA is continuing its research and demonstrations into solar energy, both for residential and commercial uses, energy from wood and waste products, and electric vehicle development. Other TVA activities include demonstration of effective ways of reclaiming strip-mined areas and development of new and improved methods of controlling air and water pollution.

Power operations are financially self-supporting from revenues. In fiscal year 1984 power revenues were \$4,453m. Power facilities are financed from revenues and the sale of revenue bonds and notes, and TVA is repaying appropriations previously invested in power facilities. Other TVA resource development programmes continue to be financed from congressional appropriations, which amount to \$129.5m. in 1985–86

#### INDUSTRY AND TRADE

Industry. The following table presents industry statistics of manufactures as reported at various censuses from 1909 to 1982 and from the Annual Survey of Manufactures for years in which no census was taken. The figures for 1958 to 1982 include data for some establishments previously classified as non-manufacturing. The figures for 1939, but not for earlier years, have been revised to exclude data for establishments classified as non-manufacturing in 1954. The figures for 1909–33 were previously revised by the deduction of data for industries excluded from manufacturing during that period.

The statistics for 1958, 1963, 1967, 1972, 1977 and 1982 relate to all establishments employing 1 or more persons anytime during the year, for 1950, 1956–57, 1959–62, 1966 and 1968–74 on a representative sample of manufacturing establishments of 1 or more employees; for 1929 through 1939, those reporting products valued at \$5,000 or more, and for 1909 and 1919, those reporting products valued at \$500 or more. These differences in the minimum size of establishments included in the census affect only very slightly the year-to-year comparability of the figures.

The annual Surveys of Manufactures carry forward the key measures of manufacturing activity which are covered in detail by the Census of Manufactures. The estimate for 1950 is based on reports for approximately 45,000 plants out of a total of more than 260,000 operating manufacturing establishments, those for 1956-57 on about 50,000, and those for 1959-62, 1966 and 1968-74 on about 60,000 out of about 300,000. Included are all large plants and representative samples of the much more numerous small plants. The large plants in the surveys account for approximately two-thirds of the total employment in operating manufacturing establishments in the US.

<sup>&</sup>lt;sup>1</sup> For the period 1954-67 value added represents adjusted value added and for earlier years unadjusted value added. Unadjusted is obtained by subtracting cost of materials supplies and containers, fuel, electricity and contract work from the value of shipments for products manufactured plus receipts for services rendered. Adjusted value added also takes into account value added by merchandizing operations plus net change in finished goods and work-in-process inventories between the beginning and end of the year.

For comparison of broad types of manufacturing, the industries covered by the Census of Manufactures have been divided into 20 general groups according to the Standard Industrial Cassification

The iron and steel industry in 1984 employed 170,684 wage-earners (compared with 449,888 in 1960), who worked an average of 38 hours per week and earned an average of \$15.34 per hour. total wages were \$5,205m and total salaries for 65,308 employees were \$2,332m

Labour. The American labour movement comprises about 190 national and international labour organizations plus a large number of small independent local or single-firm labour organizations. In 1980 total membership was approximately 23 9m, including 1 7m. Canadian workers affiliated with American labour organizations and under 120,000 others outside the USA. The American Federation of Labor (founded 1881 and taking its name in 1886) and the Congress of Industrial Organizations merged into one organization, named the AFL-CIO, in Dec. 1955, representing 16.8m. workers in 1980.

Unaffiliated or independent labour organizations, inter-state in scope, including those organizing coalminers, teamsters and government employees and railroad workers, had an estimated total membership excluding all foreign members (1980) of about 6 8m

Labour organizations represented 21 6% (19 9m.) of the labour force in 1984, 18 8% (17.3m.) were actual members of unions

The Labor-Management Relations (Taft-Hartley) Act, 1947, applicable to industries affecting inter-state commerce, prohibits the closed shop, but permits union shop arrangements except where forbidden by state laws Statutes regulating, restricting or prohibiting union shop or other types of union security agreements are in effect in 20 states (Alabama, Arizona, Arkansas, Florida, Georgia, Iowa, Kansas, Louisiana, Mississippi, Nebraska, Nevada, North Carolina, North Dakota, South Carolina, South Dakota, Tennessee, Texas, Utah, Virginia and Wyoming). Colorado and Wisconsin ban all-union agreements unless a certain percentage of employees have voted for them; in Hawaii an all-union agreement may be entered into unless a majority of employees votes against it. Thirteen states have acts to prevent industrial disputes between public utilities and their employees by means of compulsory arbitration or seizure; however, a number of these laws have been declared unconstitutional in so far as industries in inter-state commerce are concerned. Laws to restrict or regulate picketing or other strike

activities have been enacted in over half the states. About one-half of the states also prohibit certain types of strikes, as 'sit down', jurisdictional or sympathy strikes.

The Employee Retirement Income Security Act of 1974 protects the interests of workers and their beneficiaries who are entitled to benefits from employee pension and welfare plans. The law requires disclosure of plan provisions and financial information and establishes standards of conduct for trustees and administrators of welfare and pension plans. It provides funding, participation and vesting requirements for pension plans and makes termination insurance available for most pension plans. The law does not require a company to establish a welfare or pension plan.

Minimum wage laws governing private employers are in operation in 45 jurisdictions 41 states, the District of Columbia, Guam, Puerto Rico and the Virgin Islands have minimum wage laws and minimum wage rates. As of 1 Aug. 1978, all but one of the laws cover men, women and, usually, minors The exception covers only women and minors The minimum wage rate under federal law is \$3 35 per hour for employees who are engaged in commerce, in the production of goods for commerce or in certain enterprises which are engaged in commerce as well as federal employees.

A total of 62 strikes and lockouts of 1,000 workers or more occurred in 1984, involving 376,000 workers and 8 5m idle days, the number of idle days was 0.04% of the year's total working time of all workers

There are 3 federal agencies which provide formal machinery for the adjustment of labour disputes (1) The Federal Mediation and Conciliation Service, now an independent agency, whose mediation services are available 'in any labor dispute in any industry affecting commerce'; under Executive Order 11491, as amended, to federal agencies and organizations of federal employees involved in negotiation disputes; and in state and local government collective bargaining disputes when adequate dispute resolution machinery is not available to the parties. Its aim is to prevent and minimize work stoppages (2) The National Mediation Board (1934) provides much the same facilities for the railroad and air-transport industries pursuant to the Railway Labor Act. (3) The National Railroad Adjustment Board (1934) acts as a board of final appeal for grievances arising over the interpretation of existing collective agreements under the Railway Labor Act; its decisions are binding upon both sides and enforceable by the courts.

The National Labor Relations Act, as amended by the Labor-Management Relations (Taft-Hartley) Act, 1947 (see The Statesman's Year-Book, 1955, p. 617), was amended by the Labor-Management Reporting and Disclosure Act, 1959, and again amended in 1974. The 1959 Act requires extensive reporting and disclosure of certain financial and administrative practices of labour organizations. employers and labour relations consultants. In addition, certain powers are vested in the Secretary of Labor to prevent abuses in the administration of trusteeships by labour organizations, to provide minimum standards and procedures for the election of union officers and to establish rules prescribing minimum standards for determining the adequacy of union procedures for the removal of officers Other provisions impose a fiduciary responsibility upon union officers and provide for the exclusion of those convicted of certain named felonies from office for specified periods, more stringently regulate secondary boycotts and banning of 'hot' cargo agreements; put limitations upon organizational and recognition picketing and permit States to assert jurisdiction over labour disputes where the National Labor Relations Board declines to act The Act also contains a 'Bill of Rights' for union members (enforceable directly by them) dealing with such things as equal rights in the nomination and election of union officers, freedom of speech and assembly subject to reasonable union rules, and safeguards against improper disciplinary action.

The Bureau of Labor Statistics estimated that in 1984 the labour force was 115,241,000 (64 7% of those 16 years and over); the resident armed forces accounted for 1,697,000 and the civilian labour force for 113 54m., of whom 105,005,000

were employed and 8,539,000—or 7 4%—were unemployed. The following table shows civilian employment by industry and sex and percentage distribution of the total

The 'most favoured nation' treatment in commerce between Great Britain and US was agreed to for 4 years by the treaty of 1815, was extended for 10 years by the treaty of 1818, and indefinitely (subject to 12 months' notice) by that of 1827

Tourism. In 1984, 20 8m. tourists visited the USA and spent over US\$11,400m. They came mainly from Canada (11m), Europe (3m), Mexico (2 3m) and Asia (2 3m.). Approximately 27 5m US tourists travelled abroad, mainly to Canada (11.7m.), Europe (5 7m), Mexico (4 1m.) and the Caribbean and Central America (3.4m.).

## **COMMUNICATIONS**

Roads. On 31 Dec. 1984 the total US public road<sup>1</sup> mileage, including rural and urban roads, amounted to 3,891,781 miles, of which 3,485,112 miles were surfaced roads. The total mileage cited includes 817,813 miles of rural roads under control of the states, 2,226,188 miles of local rural roads, 267,320 miles of federal park and

forest roads, and 673,685 miles of urban roads and streets. Expenditures for construction and maintenance amounted to \$34,541 m in 1983.

By the end of 1984, toll roads, financed by private capital through bond issues and administered by state toll authorities, totalled 4,773 miles (including some under construction) compared with 344 miles in 1940

Motor vehicles registered in the calendar year 1984 were (Federal Highways Administration) 166,497,670, including 127,866,900 automobiles, 583,671 buses and 36,547,781 trucks.

Inter-city trucks (private and for hire) averaged 502,000m revenue net ton-miles in 1982. Of the 583,671 buses in service in 1984, 471,461 were school buses. Intercity service operated a total of 1,140m bus-miles and carried a total of 390m revenue passengers in 1982.

There were 44,237 deaths in road accidents in 1984

<sup>1</sup> Public road mileage excludes that mileage not open to public travel, not maintained by public authority, or not passable by standard four-wheel vehicles. This excluded mileage was reported to the US Federal Highway Administration prior to 1981.

Railways. Railway history in the USA commences in 1828, but the first railway to convey both freight and passengers in regular service (between Baltimore and Ellicott's Mills, Md., 13 miles) dates from 24 May 1830 Mileage rose to 52,922 miles in 1870, to 167,191 miles in 1890, and to a peak of 266,381 miles in 1916, falling thereafter to 261,871 in 1925, 246,739 in 1940 and 222,164 in 1969 (these include some duplication under trackage rights and some mileage operated in Canada by US companies). The ordinary gauge is 4 ft 8½ in. (about 99 6% of total mileage). The USA has about 29% of the world's railway mileage.

In addition to the independent railroad companies, railway service is provided by two federally-assisted organizations, the National Railroad Passenger Corporation (Amtrak), and the Consolidated Rail Corporation (Conrail)

Amtrak was set up on 1 May 1971 to maintain a basic network of inter-city passenger trains with government assistance, and is responsible for almost all non-commuter services with 27,000 miles of route. From 1 Jan. 1983, an Amtrak commuter division took over from Conrail all commuter services not acquired by State or regional agencies.

Conrail was established on 1 April 1976 to run freight services in the industrial north-east formerly operated by the bankrupt Penn Central, Reading, Lehigh Valley, Central of New Jersey, Erie Lackawanna, Lehigh & Hudson railroads, and Pennyslvania-Reading Seashore Lines which is being returned to the private sector in 1985

Aviation. In civil aviation there were, on 31 Dec. 1984, 722,376 certified pilots (including 150,081 student pilots) and 271,488 registered civil aircraft.

Airports on 31 Dec. 1984: Air carrier, 681, general aviation, 15,398. Of these airports, 12,648 were conventional land-based, while 384 were seaplane bases, 2,982 were heliports and 65 stolports (STOL—Short Take-Off and Landing)

Statistics from the Department of Transportation indicate that for 12 months ended June 1985 on US flag carriers in scheduled international service there were 24m, enplanements with 319 8m aircraft miles (excluding all-cargo) for a total of 62,900m revenue passenger-miles. The non-scheduled airlines had a total of 14,700m, revenue passenger-miles internationally and domestically Domestically US scheduled airlines in 1985 had 339 2m enplanements with a total of 2,783 1m aircraft miles for 258,000m revenue passenger-miles (A revenue passenger-mile is one paying passenger carried per mile.).

Shipping. On 1 Sept. 1985 the US merchant marine included 746 sea-going vessels of 1,000 gross tons or over, with aggregate dead-weight tonnage of 24m. This included 262 tankers of 15 6m. DWT.

On 1 Sept 1985 US merchant ocean-going vessels were employed as follows Active, 402 of 16 6m DWT, of which 165 of 5 8m tons were foreign trade, 169 of 9 3m. tons in domestic trade and 68 of 1 5m tons in other US agency operations Inactive vessels totalled 8m. DWT, 98 of 4 6m DWT privately owned were laid up and 246 of 2 9m. tons were Government-owned National Defense reserve fleet Of the total vessels in the US fleet, 490 of 21m DWT were privately owned

US exports and imports carried on dry cargo and tanker vessels in the year 1984 totalled 677 3m long tons, of which 29 4m long tons or 4 3% were carried in US flag vessels.

Post and Broadcasting. Until the beginning of 1984 the telephone business was largely in the hands of the American Telephone and Telegraph Company (AT & T) and its telephone operating subsidiaries, which together were known as the Bell System. Pursuant to a government anti-trust suit, the Bell System was broken up, with the telephone operating companies being divested from AT & T to create seven regional companies for providing local service. There are also many hundreds of smaller telephone companies having no common ownership affiliation with the Bell companies, but which connect with them for universal service, countrywide and worldwide. In addition, several new entrants have begun to compete with AT & T in the long-distance telephone market. The message telegraph and telex services are in the hands of The Western Union Telegraph Company, and the international record carriers, which compete with the telephone industry in providing leased private lines. Western Union also provides an inter-city telephone service.

The number of telephones in service in the USA has increased in the period since 1945 at a much faster rate than has the population. Among principal reasons are the significant increase in the percentage of households with telephone service and the enormous growth in the number of extension telephones.

In marked contrast, the number of public telegrams has decreased by a substantial amount. Telegrams have lost favour due to shifts in user preference to the airmail and to the telephone. The telex services of the telegraph company have also found broad acceptance in place of telegrams for business purposes. The following table contains key data items on a comparative basis for the domestic telephone and message telegraph services.

International communication services, providing overseas connexions with all parts of the world, are furnished principally by the American Telephone and Telegraph Company and three telegraph companies. The old submarine cable telegraph systems have all been abandoned in favour of using telegraph circuits derived from voice channels in the newer telephone ocean cables, which have also made inroads on the use of high-frequency radio. More recently, satellite communications facilities have been utilized not only for telephone and telegraph services but for television and data transmission as well.

International overseas telegrams, inbound to and outbound from the continental US, numbered 9 2m. in 1982 (11 7m. in 1980). This service has tended to decline in volume in recent years. It first lost ground to the air-mail and then to the telex and telephone services. For the US and its possessions the volume of international overseas telephone calls has grown enormously with the availability of the excellent voice-transmission qualities provided in the telephone ocean cables and in the satellite radio relays. Whereas international telephone calls were 990,000 in 1955, the last year in which there was no cable service available, there were 149 6m. such calls in 1980.

On 1 Jan. 1975 there were in the USA and Territories, 7,068 authorized commercial radio stations, 711 commercial television stations of non-commercial stations 717 were for radio, 241 for television.

Cinemas. Cinemas increased from 17,003 in 1940 to 20,239 in 1950 and decreased to 42,187 in 1967.

Newspapers. Of the daily newspapers being published in the USA in 1971, 339 were morning papers with a circulation of 26,116,000, and 1,425 were evening papers with a circulation of 36,115,000. The 590 Sunday papers had a total circulation of 49.7m.

## JUSTICE, RELIGION, EDUCATION AND WELFARE

Justice. Legal controversies may be decided in two systems of courts: the federal courts, with jurisdiction confined to certain matters enumerated in Article III of the Constitution, and the state courts, with jurisdiction in all other proceedings. The federal courts have jurisdiction exclusive of the state courts in criminal prosecutions for the violation of federal statutes, in civil cases involving the government, in bankruptcy cases and in admiralty proceedings, and have jurisdiction concurrent with the state courts over suits between parties from different states, and certain suits involving questions of federal law.

The highest court is the Supreme Court of the US, which reviews cases from the lower federal courts and certain cases originating in state courts involving questions of federal law. It is the final arbiter of all questions involving federal statutes

and the Constitution; and it has the power to invalidate any federal or state law or executive action which it finds repugnant to the Constitution. This court, consisting of 9 justices who receive salaries of \$94,700 a year (the Chief Justice, \$100,700), meets from Oct. until June every year and disposes of about 4,450 cases, deciding about 380 on their merits. In the remainder of cases it either summarily affirms lower court decisions or declines to review. A few suits, usually brought by state governments, originate in the Supreme Court, but issues of fact are mostly referred to a master.

The US courts of appeals number 12 (in 11 circuits composed of 3 or more states and 1 circuit for the District of Columbia), the 132 circuit judges receive salaries of \$77,300 a year. Any party to a suit in a lower federal court usually has a right of appeal to one of these courts. In addition, there are direct appeals to these courts from many federal administrative agencies. In the year ending 30 June 1983,

29,630 appeals were filed in the courts of appeals.

The trial courts in the federal system are the US district courts, of which there are 89 in the 50 states, 1 in the District of Columbia and 1 each in the territories of Puerto Rico, Virgin Islands, Guam and the Northern Marianas. Each state has at least 1 US district court, and 3 states have 4 apiece. Each district court has from 1 to 27 judgeships. There are 515 US district judges (\$73,100 a year), who handle about 241,850 civil cases and 48,450 criminal defendants every year.

In addition to these courts of general jurisdiction, there are special federal courts of limited jurisdiction. US Claims Court (6 judges at \$77,300 a year) decides claims for money damages against the federal government in a wide variety of matters, the Court of International Trade determines controversies concerning the classifica-

tion and valuation of imported merchandise.

The judges of all these courts are appointed by the President with the approval of the Senate, to assure their independence, they hold office during good behaviour and cannot have their salaries reduced. This does not apply to the territorial judges, who hold their offices for a term of years. The judges may retire with full pay at the age of 70 years if they have served a period of 10 years, or at 65 if they have 15 years of service, but they are subject to call for such judicial duties as they are willing to undertake. Only 9 US judges up to 1984 have been involved in impeachment proceedings, of whom 3 district judges and 1 commerce judge were convicted and removed from office.

Of the 241,842 civil cases filed in the district courts in the year ending 30 June 1983, about 95,295 arose under various federal statutes (such as labour, social security, tax, patent, securities, antitrust and civil rights laws), 34,210 involved personal injury or property damage claims; 67,276 dealt with contracts; and 8,812

were actions concerning real property.

Of the 35,872 criminal cases filed in the district courts in the year ending 30 June 1983, about 1,900 were charged with alleged infractions of the immigration laws, 3,400, the transport of stolen motor vehicles; about 3,400 larceny and theft,

7,650, embezzlement and fraud; and 7,650 narcotics laws.

Persons convicted of federal crimes are either fined, released on probation under the supervision of the probation officers of the federal courts, confined in prison for a period of up to 6 months and then put on probation (known as split sentencing) or confined in one of the following institutions. 3 for juvenile and youths, 7 for young adults, 7 for intermediate term adults; 7 for short-term adults, 2 for females; 1 hospital and 15 community service centres. In addition, prisoners are confined in centres operated by the National Institutes of Mental Health. In addition, prisoner drug addicts may be committed to US Public Health Service hospitals for treatment. Prisoners confined in institutions operated by the US Bureau of Prisons for the year ending 30 Sept. 1982, numbered 28,133.

The state courts have jurisdiction over all civil and criminal cases arising under state laws, but decisions of the state courts of last resort as to the validity of treaties or of laws of the US, or on other questions arising under the Constitution, are subject to review by the Supreme Court of the US. The state court systems are generally similar to the federal system, to the extent that they generally have a number of trial courts and intermediate appellate courts, and a single court of last resort. The highest court in each state is usually called the Supreme Court or Court of Appeals with a Chief Justice and Associate Justices, usually elected but some-

times appointed by the Governor with the advice and consent of the State Senate or other advisory body; they usually hold office for a term of years, but in some instances for life or during good behaviour. Their salaries range from \$24,000 to \$84,584 a year. The lowest tribunals are usually those of Justices of the Peace, many towns and cities have municipal and police courts, with power to commit for trial in criminal matters and to determine misdemeanours for violation of the municipal ordinances, they frequently try civil cases involving limited amounts.

The death penalty is illegal in Alaska, Hawaii, Iowa, Maine, Minnesota, Oregon, West Virginia, Wisconsin and Michigan; in North Dakota it is legal only for treason and first-degree murder committed by a prisoner serving a life sentence for first-degree murder, in Rhode Island only for murder committed by a prisoner serving a life sentence and in Vermont and New York for the murder of a peace officer in the line of duty and for first-degree murder by those who kill while serving a life sentence for murder. The death penalty is legal in 37 states. Until 1982 it had fallen into disuse and had been abolished de facto in many states. The US Supreme Court had held the death penalty, as applied in general criminal statutes, to contravene the eighth and fourteenth amendments of the US constitution, as a cruel and unusual punishment when used so irregularly and rarely as to destroy its deterrent value.

In 1967 only 2 persons were executed under civil authority; both for murder There were no executions 1968-76. In 1977 a convicted murderer requested that he should be executed and after a lengthy legal dispute the sentence was carried out at Utah state prison. Six persons were executed between 1977 and 1982. In Jan 1983, 1,050 prisoners in 31 states were reported under sentence of death

The total number of civilian executions carried out in the US from 1930 to 1982 was 3,866

Federal 'Political' Crimes Prosecutions for what may be loosely described as 'political' offences, or crimes directed towards the overthrow by violence of the federal government, which were somewhat numerous in the early 1950s, have declined sharply over the last 20 years and are now exceedingly rare

Religion. The Yearbook of American and Canadian Churches for 1984, published by the National Council of the Churches of Christ in the USA, New York, presents the latest figures available from official statisticians of church bodies. The large majority of reports are for the calendar year 1982, or a fiscal year ending 1982. The 1982 reports indicated that there were 139,603,059 (140,816,385 in 1985) members with 341,111 local churches. There were 329,802 clergymen serving in local congregations. The principal religious bodies (numerically or historically) or groups of religious bodies are shown below

Education. Under the system of government in the USA, elementary and secondary education is committed in the main to the several states. Each of the 50 states and the District of Columbia has a system of free public schools, established by law, with courses covering 12 years plus kindergarten. There are 3 structural patterns in common use; the K8-4 plan, meaning kindergarten plus 8 elementary grades followed by 4 high school grades; the K6-3-3 plan, or kindergarten plus 6 elementary grades followed by a 3-year junior high school and a 3-year senior high school; and the K6-6 plan, kindergarten plus 6 elementary grades followed by a 6-year high school. All plans lead to high-school graduation, usually at age 17 or 18 Vocational education is an integral part of secondary education. In addition, some states have, as part of the free public school system, 2-year colleges in which education is provided at a nominal cost Each state has delegated a large degree of control of the

educational programme to local school districts (numbering 15,747 in autumn 1983), each with a board of education (usually 3 to 9 members) selected locally and serving mostly without pay. The school policies of the local school districts must be in accord with the laws and the regulations of their state Departments of Education. While regulations differ from one jurisdiction to another, in general it may be said that school attendance is compulsory between the ages of 7 to 16.

The Census Bureau estimates that in Nov. 1979 only 1m. oi 0 6% of the 170m. persons who were 14 years of age or older were unable to read and write, in 1930 the percentage was 4 8. In 1940 a new category was established—the 'functionally illiterate', meaning those who had completed fewer than 5 years of elementary schooling; for persons 25 years of age or over this percentage was 2 7 in March 1985 (for the non-white population alone it was 6%); it was 0.8% for white and 0.5% for non-whites in the 25–29-year-old group. The Bureau reported that in March 1985 the median years of school completed by all persons 25 years old and over was 12.6, and that 19.4% had completed 4 or more years of college. For the 25–29-year-old group, the median school years completed was 12.9 and 22.2% had completed 4 or more years of college.

In the autumn of 1983, 12,465,000 students (6,024,000 men and 6,441,000 women) were enrolled in 3,284 colleges and universities, 2,444,000 were first-time students. About 26% of the population between the ages of 18 and 24 were efficient in colleges and universities.

Public elementary and secondary school revenue is supplied from the county and other local sources (45 2% in 1983–84), state sources (48 1%) and federal sources (6 6%) In 1983–84 expenditure for public elementary and secondary education totalled about \$127 5m., including \$115 6m. for regular day school programmes, \$2.2m for other programmes, \$6,900m for capital outlay and \$2 8m. for interest on school debt. The current expenditure per pupil in average daily attendance was about \$3,173. The total cost per pupil, also including capital outlay and interest, amounted to about \$3,440. Estimated total expenditures, for private elementary and secondary schools in 1983–84 were about \$11,500m. In 1982–83 the 3,280 universities and colleges expended \$77,792m. from current funds, of which \$50,830m was spent by institutions under public control. The federal government contributed 12 6% of total current-fund revenue; state governments, 29%, student tuition and fees, 22 4%, and all other sources, 36%.

Vocational education below college grade, including the training of teachers to conduct such education, has been federally aided since 1918. During the school year 1979-80 enrolments in the vocational classes were Agriculture, 879,000, distributive occupations, 961,000, health occupations, 834,000, home economics, 3,938,000, trade and industry, 3,216,000, technical education, 499,000; office occupations, 3.4m., other programmes, 2,726,000. Federal support funds were \$745,481,000

Most of the private elementary and secondary schools are affiliated with religious denominations. Of the children attending private elementary and secondary

schools in 1983, nearly 3,200,000 or 55.7% were enrolled in Roman Catholic schools.

During the school year 1982-83 high-school graduates numbered about 2,890,000 (about 49% boys and 51% girls). Institutions of higher education conferred 969,504 bachelor's degrees for the academic year 1982-83, 479,136 to men and 490,368 to women; 289,921 master's degrees, 144,697 to men and 145,224 to women; 32,775 doctorates, 21,902 to men and 10,873 to women; and 73,136 first professional degrees, 51,310 to men and 21,826 to women.

During the academic year, 1983-84, 338,900 foreign students were enrolled in American colleges and universities. The percentages of students coming from various areas in 1983-84 were: South and East Asia, 39; Middle East, 17 9; Latin America, 15.5; Africa, 12 3; Europe, 9 4, North America, 4 6; Oceania, 1.2.

School enrolment, Oct. 1983, embraced 95% of the children who were 5 and 6 years old; 99% of the children aged 7–13 years; 95% of those aged 14–17, 50% of those aged 18 and 19, 32% of those aged 20 and 21, and 17% of those aged 22–24 years.

The US National Center for Education Statistics estimates the total enrolment in the autumn of 1985 at all of the country's elementary, secondary and higher educational institutions (public and private) at 56,930,000 (56,980,000 in the autumn of 1984), this was 23 9% of the total population of the USA as of 1 Sept. 1985

Enrolment at the elementary and secondary school level was expected to rise by 0.1% in autumn 1985 and total enrolment in the colleges and universities to decline by about 0.8%.

The number of teachers in regular public and private elementary and secondary schools in the autumn of 1985 was expected to increase slightly to 2,465,000. The average annual salary of the public school teachers was about \$23,500 in 1984-85.

Health and Welfare. Admission to the practice of medicine (for both doctors of medicine and doctors of osteopathic medicine) is controlled in each state by examining boards directly representing the profession and acting with authority conferred by state law. Although there are a number of variations, the usual time now required to complete basic training is 8 years beyond the secondary school with up to 3 years of additional graduate training. Certification as a specialist may require between 3 and 5 more years of graduate training plus experience in practice. In academic year 1981–82 the 141 US schools (15 osteopathic and 126 allopathic) graduated 16,669 physicians. About 30 2% of first-year students were women. In Dec. 1981 the estimated number of active physicians (MD and DO—in all forms of practice) in the US, Puerto Rico and outlying US areas was 467,700 (1 active physician to 504 population). The distribution of physicians throughout the country is uneven, both by state and by urban—rural areas.

In 1981-82 the 60 dental schools graduated 5,371 dentists. Active dentists in Dec. 1982 numbered 132,000 (1 active dentist to 1,766 population).

In academic year 1981-82, there were 1,422 registered nursing programmes in the US and 74,975 graduates. In Dec 1981 registered nurses employed full- or part-time were 1 to 188 population

Number of hospitals listed by the American Hospital Association in 1980 was 6,965, with 1,365,000 beds and 38,892,000 admissions during the year, average daily census was 1 06m. Of the total, 359 hospitals with 117,000 beds were operated by the federal government, 1,835 with 212,000 beds by state and local government; 3,339 with 693,000 beds by non-profit organizations (including church groups); 730 with 87,000 beds are proprietary. The categories of non-federal hospitals are 5,904 short-term general and special hospitals with 992,000 beds; 157 non-federal long-term general and special hospitals with 39,000 beds,

534 psychiatric hospitals with 215,000 beds; 11 tuberculosis hospitals with 2,000 beds

Social welfare legislation was chiefly the province of the various states until the adoption of the Social Security Act of 14 Aug. 1935. This as amended provides for a federal system of old-age, survivors and disability insurance; health insurance for the aged and disabled; supplemental security income for the aged, blind and disabled, federal state unemployment insurance, and federal grants to states for public assistance (medical assistance for the aged and aid to families with dependent children generally) and for maternal and child-health and child-welfare services The Social Security Administration of the Department of Health and Human Services has responsibility for the programmes—old-age, survivors and disability insurance, supplemental security income and aid to families with dependent children. The Health Care Financing Administration, an agency of the same Department, has federal responsibility for health insurance for the aged and disabled (Medicare) and medical assistance (Medicaid). The Department's Office of Human Development administers human service programmes for such groups as the elderly, children, youth, native Americans and persons with developmental disabilities, and its Public Health Service supports maternal and child-health services. Unemployment insurance is the responsibility of the Department of Labor

The Social Security Act provides for protection against the cost of medical care through the two-part programme of health insurance for people 65 and over and for certain disabled people under 65, who receive disability insurance payments or who have permanent kidney failure (Medicare). During fiscal year 1982, payments totalling \$34,343m. were made under the hospital insurance part of Medicare on behalf of 29 1m people. During the same period, \$14,806m was paid under the voluntary medical insurance part of Medicare on behalf of 28 4m people

In 1982 about 116m persons worked in employment covered by old-age, sur-

vivors and disability insurance.

In Dec. 1982 over 35 8m. beneficiaries were on the rolls, and the average benefit paid to a retired worker (not counting any paid to his dependants) was about \$419 per month.

Benefits paid during calendar year 1982 totalled \$156,173m., including

\$17,339m. paid to disabled workers and their dependants.

In Dec 1982, 10 5m. persons (adults and children) were receiving payments under aid to families with dependent children (average monthly payment, \$310 per family). Total payments under aid to families with dependent children were \$12,941m. for the calendar year 1982.

In Dec 1982, about 3 8m persons were receiving supplementary security income payments, including over 1 5m. persons aged 65 or over, 77,000 blind persons, and over 2.2m. disabled persons. Payments, including supplemental

amounts from various states, totalled \$9,200m. in 1982

In 1981, block grants supplanted some categorical grants to states for services. In 1982, federal appropriations for the social services block grant amounted to \$2,400m. In addition, 1982 federal appropriations for human services to selected target groups totalled \$2,296m Included in this amount were \$1,416m. for children and youth, \$729m. for the elderly; \$58m for persons with developmental disabilities, and \$28m. for native Americans. During 1982, the public Health Services awarded a total of \$373 8m for maternal and child health services, \$316 2m as block grants to the states and the remaining \$57 6m. for special projects of regional and national significance. In addition, approximately \$2 6m. was spent for research and \$28 3m. for training in the fields of maternal and child health.

#### I. STATISTICAL INFORMATION

Within the federal government of the USA, responsibilities for the collection, compilation, analysis and publication of statistics are decentralized among a number of agencies, with specified responsibilities for general-purpose statistics in particular areas. In addition, most agencies of the Government collect statistical data as a by-product of their administrative or operating responsibilities in specific fields. Responsibility for co-ordinating the decentralized statistical activities rests in the Office of Statistical Standards Bureau of the Budget Washington 25, D C, as a part of the Executive Office of the President. This Office reviews all proposed collections of statistical data to avoid duplication or overlapping, promotes the use of improved statistical techniques, develops standard definitions and classifications so that the data collected by different agencies are comparable, serves as liaison between federal agencies and international organizations and as an information centre on government statistical programmes. The Division does not itself collect or publish statistics.

The major general-purpose statistical agencies and their principal areas of responsibility are

- (1) Bureau of the Census in the Department of Commerce (A Ross Eckler, Director) Decennial censuses of population and housing and quinquennial censuses of agriculture manufactures and business, current statistics on population and the labour force, manufacturing activity and commodity production, retail and wholesale trade and services, foreign trade, and state and local government finances and operations
- (2) Bureau of Labor Statistics in the Department of Labor (Geoffrey H Moore, Commissioner) Current statistics on employment, earnings, man-hours, labour turnover, industrial accidents, work stoppages, wage rates, collective bargaining agreements, construction, industrial productivity, wholesale prices, retail prices and urban consumers' price indexes, income and expenditures of urban families
- (3) Statistical Reporting Service and Economic Research Service in the Department of Agriculture Statistics on crop and livestock production and inventories, crop forecasts, food processing and food consumption, farm population, labour and wages, farm management, farm ownership values, transfers, taxation and finance, prices farmers pay and receive, farm income, accidents, studies of land and water uses
- (4) National Center for Health Statistics in the Public Health Service, Department of Health, Education and Welfare (Theodore D Woolsey, Chief) Current statistics on births, deaths, marriages and divorce
- (5) Bureau of Mines in the Department of the Interior (John F O'Leary, Director) Statistics on production, consumption and stocks of metals and minerals, and on injuries in mineral industries

Other agencies in which statistics are an important by-product of regulatory or other administrative functions include Social Security Administration in the Department of Health, Education and Welfare; Internal Revenue Service in the Treasury Department, Federal Power Commission, Federal Trade Commission, Interstate Commerce Commission, and the Securities and Exchange Commission

Among the more important statistical publications of a fairly general nature are

Statistical Abstract of the United States, published by the Bureau of the Census, Department of Commerce. Annual Important summary statistics on the industrial, social, political and economic organization of the USA, with a representative selection from most of the important statistical publications. Survey of Current Business, published by the Office of Business Economics, Department of Commerce Monthly Interpretative text and charts reviewing business trends, etc., official estimates of national income. Economic Inducators prepared by the Council of Economic Advisers and published by the Congressional Joint Committee on the Economic Report Monthly Tables and charts presenting current data on the total output of the economy, prices, employment and wages, production and business activity, purchasing power, money, banking and federal finance. Monthly Labor Review, published by the Bureau of Labor Statistics, Department of Labor Federal Reserve Bulletin, published by the Board of Governors of the Federal Reserve System Monthly Current data on money and banking and selected other economic series. Federal Reserve indexes of industrial production, etc., international financial statistics. Treasury Bulletin, published by the Office of the Secretary. Department of the Treasury. Monthly, Current coverage of federal fiscal statistics, inter-

national capital movements Minerals Yearbook, published by the Bureau of Mines, Department of the Interior Annual Agricultural Statistics, published by the Department of Agriculture Annual Crops and Markets, published by the Bureau of Agricultural Economics in the Department of Agriculture Monthly Crop report and market statistics Foreign Agriculture, published by the Office of Foreign Agriculture Service, Department of Agriculture Monthly Foreign agricultural production, foreign government policies relating to agriculture and international trade in agricultural products Vital Statistics of the United States, published by the Public Health Service, US Department of Health, Education and Welfare Monthly and Annual Natality and mortality data tabulated by place of occurrence, with supplemental tables for Puerto Rico and the Virgin Islands, and tabulated by place of residence

An annotated bibliography of about 100 periodical statistical publications is included in Statistical Services of the United States Government, a pamphlet issued by the Division of Statistical Standards, Bureau of the Budget, describing the general organization of the statisti-

cal system of the USA and the principal types of economic statistics

ALABAMA 1421

Against the names of the Governors and the Secretaries of State, (D.) stands for Democrat and (R.) for Republican

Figures for the revenues and expenditures of the various states are those of the Federal Bureau of the Census unless otherwise stated, which takes the original state figures and arranges them on a common pattern so that those of one state can be compared with those of any other

Official publications of the various states and insular possessions are listed in the Monthly Check-List of State Publications, issued by the Library of Congress since 1910. Their character and contents are discussed in J. K. Wilcox's Manual on the Use of State Publications (1940). Of great importance bibliographically are the publications of the Historical Records Survey and the American Imprints Inventory, which record local archives, official publications and state imprints. These publications supplement those of state historical societies which usually publish journals and monographs on state and local history. An outstanding source of statistical data is the material issued by the various state planning boards and commissions, to which should be added the annual Governmental Finances issued by the US Bureau of the Census

#### JUSTICE, RELIGION, EDUCATION AND WELFARE

Justice. The prison population on 30 Sept 1984 was 10,301

From 1 Jan 1927 to 1 June 1983 there were 154 executions (electrocution). 122 for murder, 25 for rape, 5 for armed robbery, 1 for burglary and 1 for carnal knowledge Before 1 Jan. 1927, persons executed in Alabama were hanged locally by the sheriffs in the counties of their conviction.

In 41 counties the sale of alcoholic beverage is permitted, and in 26 counties it is prohibited

Religion. Chief religious bodies (in 1980) are: Southern Baptist Convention (about 1,182,018), Churches of Christ (113,919), United Methodist (about 344,790), Roman Catholic (106,123), African Methodist Episcopal Zion (139,714), Christian Methodist Episcopal (about 53,493) and Assemblies of God (48,610)

Education. In 1983 the 1,400 public elementary and high schools required 31,550 teachers to teach 721,900 pupils enrolled in grades K-12. In 1983 there were 15 senior public institutions with 102,769 students and 4,160 faculty members. In 1982 the 21 junior colleges had 38,858 students and 1,250 teachers, 22 technical schools had 24,743 students and 822 teachers.

Health. In Sept. 1984 there were 137 hospitals (21,102 beds) licensed by the State Board of Health In 1982–83 hospitals for mental diseases had 2,545 beds. Facilities for the mentally retarded (1 Sept. 1983) had 1,455 cases.

Pensions and Security. In Aug. 1984 Alabama paid supplements (to federal welfare payments) to 13,992 recipients of old-age assistance, receiving an average of \$59.76 each, 5,244 permanently and totally disabled, \$63.78, 131 blind, \$60.54 Combined state—federal aid to dependent children was paid to 54,752 families, average \$111.40 per family.

## **ALASKA**

HISTORY. Discovered in 1741 by Vitus Bering, its first settlement, on Kodiak Island, was in 1784. The area known as Russian America with its capital (1806) at Sitka was ruled by a Russo-American fur company and vaguely claimed as a Russian colony. Alaska was purchased by the United States from Russia under the treaty of 30 March 1867 for \$7 2m It was not organized until 1884, when it became a 'district' governed by the code of the state of Oregon By Act of Congress approved 24 Aug. 1912 Alaska became an incorporated Territory; its first legislature in 1913 granted votes to women, 7 years in advance of the Constitutional Amendment

Alaska officially became the 49th state of the Union on 3 Jan. 1959.

AREA AND POPULATION. Alaska is bounded north by the Beaufort Sea, west and south by the Pacific and east by Canada. It has the largest area of any state, being more than twice the size of Texas. The gross area (land and water) is 591,004 sq. miles; the land area is 586,412 sq. miles of which 85% was in federal ownership in 1984. Census population, 1 April 1980, was 401,851, including military personnel, an increase of 33 5% over 1970 Estimate (1983), 510,600 Births, 1984, were 12,247 (24 5 per 1,000 population), deaths, 1,993 (4), infant deaths, 147 (12 per 1,000 live births), marriages, 6,519 (13); divorces, 3,904 (7 8)

Population in 5 census years was

	White	Negro	All Others	Total	Per sq mile
1940	39,170		33,354	72,524	0 13
1950	92,808		35,835	128,643	0 23
1960	174,649		51,518	226,167	0 40
1970	236,767	8,911	54,704	300.382	0 53
1980	309,728	13.643	78,480	401.851	0 70

Of the total population in 1980, 53.01% were male, 64 34% were urban and 68.57% were aged 21 years or over.

The largest city is Anchorage, which had a 1980 census area population of 174,430 (1983 estimate, 227,100). Other census area populations, 1980 (and 1983 estimate), Fairbanks North Star, 53,983 (64,800); Juneau, 19,528 (26,000); Kenai Peninsula, 25,282 (34,900), Ketchikan Gateway, 11,316 (12,700); Kodiak Island, 9,939 (12,900); Matanuska-Susitna 17,816 (29,800). There are 11 boroughs and 142 incorporated cities.

CLIMATE. Anchorage Jan 12°F (-11 1°C), July 57°F (13 9°C). Annual rainfall 15" (371 mm) Fairbanks. Jan. -11°F (-23 9°C), July 60°F (15 6°C). Annual rainfall 12" (300 mm). Sitka. Jan. 33°F (0 6°C), July 55°F (12 8°C). Annual rainfall 87" (2,175 mm). See Pacific Coast, p 1371.

CONSTITUTION AND GOVERNMENT. An important provision of the Enabling Act is that the state has the right to select 103 55m. acres of vacant and unappropriated public lands in order to establish 'a tax basis'; it can open these lands to prospectors for minerals, and the state is to derive the principal advantage in all gains resulting from the discovery of minerals. In addition, certain federally administered lands reserved for conservation of fisheries and wild life have been transferred to the state. Special provision is made for federal control of land for defence in areas of high strategic importance.

The constitution of Alaska was adopted by public vote, 24 April 1956 The state legislature consists of a Senate of 20 members (elected for 4 years) and a House of Representatives of 40 members (elected for 2 years). The state sends 2 senators and 1 representative to Congress The franchise may be exercised by all citizens over

The capital is Juneau. A new capital site near Anchorage was chosen in 1976. In the 1984 presidential election Reagan polled 138,392 votes, Mondale, 62,018

Governor William Sheffield (D.), 1983–86 (\$81,648). Lieut - Governor Steve McAlpine (D.) 1983–86 (\$76,188). ALASKA 1425

#### **ECONOMY**

**Budget.** Total state government revenue for the year ended 30 June 1984 (Annual Financial Report figures) was \$3,935 8m. (\$2,914m from petroleum revenue, \$109 4m from taxation) Total expenditure was \$3,931 3m

In 1976 a Permanent Fund was set up for the deposit of at least 25% of all mineral-related revenue, total assets at 30 June, 1984, \$5,530 8m

General obligation bonds at 30 June 1984, \$169 5m

Per capita income (1983) was \$16,820

Banking. Total bank assets 1981, \$2,782m, total deposits \$2,216m.

#### **ENERGY AND NATURAL RESOURCES**

Oil and Gas. Commercial production of crude petroleum began in 1959 and by 1961 had become the most important mineral by value. Production 1961, 6 3m bbls (of 42 gallons), 1976, 67m bbls; 1977, 169m. bbls, 1981, 587m. bbls, 1984, 630m bbls Oil comes mainly from Prudhoe Bay, the Kuparuk River field and several Cook Inlet fields Natural gas marketed production, 1984, 200,296,680m cu. ft Value of crude oil and gas (1981), \$12,479m Alaska receives 84% of its total revenue from petroleum Revenue to the state from oil production in 1984 was \$2,861 6m from corporate petroleum tax \$265 1m and from royalties \$1,047 5m, severance tax, \$1,393.1m., property tax, \$131m, bonus sale, \$10.1m, rents, \$3 8m, intergovernmental receipts, \$11 1m

Oil from the Prudhoe Bay arctic field is now carried by the Trans-Alaska pipeline to Prince William Sound on the south coast, where a tanker terminal has been built at Valdez.

Minerals. Value of production, 1983 gold (169,000 troy oz.) \$67 6m, antimony (22,400 lb.) \$25,000; platinum \$100,000, silver (33,200 troy oz.) \$332,000, tin (215,000 lb.) \$1·1m., jade and soapstone (2 3 tons) \$42,000, sand and gravel (50m short tons) \$120m., building stone (5 27m. short tons) \$25m., coal (803,000m short tons) \$18m. Total value, \$232,399,000.

Agriculture. In some parts of the state the climate during the brief spring and summer (about 100 days in major areas and 152 days in the south-eastern coastal area) is suitable for agricultural operations, thanks to the long hours of sunlight, but Alaska is a food-importing area. In 1982 about 2m acres was farmland, 90% of this was unimproved pasture primarily government leases for grazing of sheep and beef cattle in south-west Alaska. In 1980 (preliminary) there were 8,400 cattle, 1,100 milch cows, 1,800 hogs and 4,300 sheep stock.

Farm income in 1983 \$19m. of which \$11m was from crops (mainly hay and potatoes) and \$8m. from livestock and dairy products

There were about 25,000 reindeer in western Alaska in 1980, owned by individual Eskimo herders except for 750 at Nome owned by the Government

Forestry. In south-eastern Alaska timber fringes the shore of the mainland and all the islands extending inland to a depth of 5 miles. The state's enormous forests could produce an estimated annual sustained yield of 1,500m bd ft of lumber, nearly twice Alaska's record 1973 cut. Alaska has 2 national forests: the Tongass of 16 9m. acres and the Chugach of 5 9m acres An estimated total of 446m. bd ft was cut in 1981, of which 387 5m came from national forests and 53,687,000 from state forests, 4,275,000 from land held by the Bureau of Indian Affairs and 362,000 from the Bureau of Land Management Alaska has 2 large pulp-mills at Ketchikan and Sitka

Fisheries. The catch for 1982 was 1,300m lb. of fish and shellfish having a value to fishermen of \$600m and a wholesale value of over \$1,000m. King crab, 39m. lb, snow (tanner) crab, 69m. lb., herring, 52m lb, shrimp, 17m. lb. Salmon accounts for more than half of the US catch

INDUSTRY. Main industries with employment, 1984: Government, 66,400, trade, 44,700; services, 42,300, contract construction, 22,200; manufacturing, 9,600, mining including oil and gas, 7,900; transport, communication and utilities,

19,600; finance, insurance and property, 11,400, agriculture, forestry and fishing, 1,360 in 1982

The major manufacturing industry was food processing, followed by timber industries. Total non-agricultural employment, 1984, 224,100 Total wages and salaries, 1983, \$6,075 7m.

TOURISM. About 691,200 tourists visited the state in 1984

#### **COMMUNICATIONS**

Roads. Alaska's highway and road system, 1984, totalled 15,315 miles, including marine highway systems, local service roads, borough and city streets, national park, forest and reservation roads and military roads Registered motor vehicles, 1983, 475,378.

The Alaska Highway extends 1,523 miles from Dawson Creek, British Columbia, to Fairbanks, Alaska. It was built by the US Army in 1942, at a cost of \$138m The greater portion of it, because it lies in Canada, is maintained by Canada

Railways. There is a railway of 111 miles from Skagway to the town of Whitehorse, the White Pass and Yukon route, in the Canadian Yukon region (this service was suspended in 1982 but may reopen). The government-owned Alaska Railroad runs from Seward to Fairbanks, a distance of 471 miles. This is a freight service with only occasional passenger use A passenger service operates from Anchorage to Fairbanks via Denali National Park in the tourist season.

Aviation. In 1982 the state had about 1,070 airports, of which about half were publicly owned. Commercial passengers by air from Alaska's largest international airports Anchorage and Fairbanks numbered 1 1m at Anchorage and 273,512 at Fairbanks. General aviation aircraft in the state per 1,000 population was about ten times the US average.

Shipping. Regular shipping services to and from the US are furnished by 2 steamship and several barge lines operating out of Seattle and other Pacific coast ports. A Canadian company also furnishes a regular service from Vancouver, BC Freight handled at the Port of Anchorage, 1981 (short tons): Bulk petroleum, 365,999; vans, flats and containers, 1,154,060; cement and drilling mud, 32,497, vehicles, 39,822; total 1.65m.

A 1,435 nautical-mile ferry system for motor cars and passengers (the 'Alaska Marine Highway') operates from Seattle, Washington and Prince Rupert (British Columbia) to Juneau, Haines (for access to the Alaska Highway) and Skagway A second system extends throughout the south-central region of Alaska linking the Cook Inlet area with Kodiak Island and Prince William Sound

## JUSTICE, RELIGION, EDUCATION AND WELFARE

Justice. There is no death penalty in Alaska.

Religion. Many religions are represented, including the Russian Orthodox, Roman Catholic, Episcopalian, Presbyterian, Methodist and other denominations

Education. During 1984 there were 100,000 pupils at public schools, 3,868 at private schools. The Bureau of Indian Affairs schools had 1,005 pupils attending schools in the state The University of Alaska (founded in 1922) had (Spring 1984) 11,808 students in Fairbanks, Anchorage and Juneau and 19,296 in community colleges. Other colleges had 1,775 students in 1984.

Health. In 1982 there were 28 acute care hospitals with 1,397 beds, of which 7 were federal public health hospitals; there was 1 mental hospital; there were 24 mental health clinics.

Welfare. Old-age assistance was established under the Federal Social Security Act, in 1982 and to dependent children covered a monthly average of 6,617 households, payments, an average of \$409 per month; and to the blind and to the disabled was given to a monthly average of 2,170 persons receiving on average \$185 per month An average of 5,492 people per month received Medicaid.

CONSTITUTION AND GOVERNMENT. The state constitution (1910, with 103 amendments) placed the government under direct control of the people through the Initiative, Referendum and the Recall. The state Senate consists of 30 members, and the House of Representatives of 60, all elected for 2 years. Arizona sends to Congress 2 senators and 5 representatives. In the 1984 presidential election Reagan polled 669,353 votes, Mondale, 325,924

The state capital is Phoenix. The state is divided into 15 counties

Governor Bruce Babbitt (D.), 1978-(\$62,500). Secretary of State Rose Mofford (D.) (\$35,000).

**BUDGET.** General revenues, year ending 30 June 1984 (US Census Bureau figures), were \$1,939 8m (taxation, \$1,748 2m), general expenditures, \$2,737m. (education, \$1,112m, transport \$334m, and public health and welfare, \$627 5m)

Per capita income (1982) was \$10,173

#### NATURAL RESOURCES

Minerals. The mining industries of the state are important, but less so than agriculture and manufacturing. By value the most important mineral produced is copper Production (1984): Copper (822,833 short tons); gold and silver are both largely recovered from copper ore. Other minerals include sand and gravel (19,231,000 short tons in 1982) and lead (359 tonnes in 1982) Total value of minerals mined in 1984 was \$1,483 5m

Agriculture. Arizona, despite its dry climate, is well suited for agriculture along the water-courses and where irrigation is practised on a large scale from great reservoirs constructed by the US as well as by the state government and private interests Irrigated area, 1984, 1 07m. acres The wide pasture lands are favourable for the rearing of cattle and sheep, but numbers are either stationary or declining compared with 1920.

In 1983 Arizona contained 7,334 farms and ranches with 1 05m acres of crop land, out of a total farm and pastoral area of 37 7m. acres. The average farm was estimated at 5,148 acres Farming is highly commercialized and mechanized and concentrated largely on cotton picked by machines and by Indian, Mexican and migratory workers.

Area under cotton (1984), 479,300 acres, 1,185,000m bales (of 480 lb) of cotton were harvested.

Cash income, 1984, from crops, \$830 4m, from livestock, \$766 7m Most important cereals are wheat, corn and barley; other crops include oranges, grape-fruit and lettuce On 1 Jan 1984 there were 980,000 all cattle, 82,000 milch cows, 306,000 sheep and (1983) 150,000 swine

Forestry. The national forests in the state had an area (1983) of 11 22m acres

**INDUSTRY.** In 1982 there were 3,041 manufacturing establishments with 154,278 production workers, earning \$3,076m

**TOURISM.** In 1982 15 7m tourists visited Arizona, direct employment, 71,700, indirect, 114,600, state tax revenue, \$204m

#### COMMUNICATIONS

**Roads.** In 1982 there were 76,290 miles of public roads and streets, 2,215,549 motor vehicles were registered in the state

Aviation. Airports, 1984, numbered 251, of which 82 were for public use, 6,079 aircraft were registered.

## JUSTICE, RELIGION, EDUCATION AND WELFARE

Justice. A 'right-to-work' amendment to the constitution, adopted 5 Nov. 1946, makes illegal any concessions to trade-union demands for a 'closed shop'.

The Arizona prisons 30 June 1983 held 6,889. There have been no executions since 1963; from 1930 to 1963 there were 38 executions (lethal gas) all for murder, and all men (28 whites, 10 Negro).

Religion. The leading religious bodies are Roman Catholics and Mormons (Latter Day Saints); others include Methodists, Presbyterians, Baptists and Episcopalians. No recent statistics of membership are available.

Education. School attendance is compulsory to grade 9 (from 1985–86) and to grade 10 (from 1986–87). In autumn 1984 there were 577,355 pupils enrolled in grades K-12. The state maintains 3 universities: the University of Arizona (Tucson)

with an enrollment of 32,962 in autumn 1984; Arizona State University (Tempe) with 38,317, Northern Arizona University (Flagstaff) with 11,935.

Health. In 1983 there were 80 hospitals reported by the State Department of Health, capacity 12,125 beds, the hospitals had 582 physicians and dentists, 9,015 registered nurses and 2,508 licensed practical nurses

Social Security. Old-age assistance (maximum depending on the programme) is given, with federal aid, to needy citizens 65 years of age or older. In June 1984, federal Social Security Insurance payments of \$6,802,000 went to 10,448 aged, 598 blind, 19,643 disabled, 2,412 persons receive state-administered supplementation Average weekly benefit for total unemployment was \$102.41 in 1983, average weekly number of beneficiaries 16,762

### **ENERGY AND NATURAL RESOURCES**

Minerals. California is one of the three most important petroleum-producing states of the US (Texas and Louisiana being the other two), crude oil output was estimated at 375m. bbls in 1983. Output of natural gas was 400,872m. cu. ft, of natural gas liquids, (1983) 259m. bbls. Gold output was 6,300 troy oz (1981), asbestos, boron minerals, diatomite, tungsten, sand and gravel, salt, magnesium compounds, lead, zinc, copper and iron ore are also produced. The estimated value of all the minerals produced (other than fuels) was \$1,831m. in 1983.

Agriculture. Extending 700 miles from north to south, and intersected by several ranges of mountains, California has almost every variety of climate, from the very wet to the very dry, and from the temperate to the semi-tropical.

In 1982 there were 82,000 farms, comprising 32m. acres; average farm. 390 acres. Cotton, fruit, poultry and vegetables are important. Cash receipts, 1983,

from crops, \$8,054m.; from livestock and poultry, \$4,160m. Dairy produce, cattle, grapes, cotton, hay, nursery products (in that order) are the main sources of farm income

Production of cotton lint, 1983, was 473,000 short tons; other field crops included sugar-beet (4.0m. short tons). Cereal crops include maize, 1m. short tons, wheat, 1 4m short tons, and rice, 1.2m. short tons. Principal crops include wine, table and raisin grapes (4 9m short tons); peaches (527,000 short tons); pears (267,700 short tons); apricots (91,000 short tons); prunes (145,000 short tons); plums, nectarines, avocados, olives and cherries Citrus fruit crops were oranges, 2.9m. short tons; lemons, 756,000 short tons, grapefruit, 238,000 short tons.

On 1 Jan. 1984 the farm animals were. 962,000 milch cows, 5m. all cattle, 900,000 sheep and 155,000 swine

Forestry. Total forest area in 1979 was 32,558,000 acres, of which 15,795,000 acres were commercial forest California ranks third to Oregon and Washington in volume of standing timber; total annual cut is about 3,358m bd ft (1983) National forest service land in 1982 was 19 6m. acres.

Fishery. California ranks fourth as a fishing state (by value of fishery products) The catch in 1983 was 641 m lb, leading species were anchovy, tuna and mackerel

INDUSTRY. In 1983, manufacturing employed about 2m The fastest-growing industries were instruments and related products, non-electrical machinery, electric and electronic equipment, transport equipment and fabricated metal products. The aerospace industry is important, as is also food-processing

#### COMMUNICATIONS

Roads. In 1983 California had 53,891 miles of roads inside cities and 120,142 miles outside. In 1983 there were about 13.8m. registered cars and over 3.7m commercial vehicles, leading all states in all items by a wide margin.

Railways. Total mileage of railways, 1 Jan 1977, was 7,600 miles. There are 2 systems. Amtrak and Southern Pacific Railroad commuter trains. Amtrak carries about 900,000 passengers per year, Southern Pacific about 5m Amtrak services run from Oakland (San Francisco) to Seattle, Chicago, Bakersfield and Los Angeles, and also from Los Angeles to San Diego Southern Pacific runs the Caltrains commuter route from San Francisco to San José There is a metro (BART) and light rail (Muni) system in San Francisco, and a light rail line in San Diego

Aviation. In 1980 there were 311 public airports and 950 private airstrips

Shipping. The chief ports are San Francisco and Los Angeles

### JUSTICE, RELIGION, EDUCATION AND WELFARE

Justice. State prisons, 1 Jan. 1984, had 36,653 male and 1,811 female inmates. From 1893 to 1942, 307 inmates were executed by hanging From 1938 to 1976, 194 inmates were executed by lethal gas. No further death sentences were passed until 1980.

Religion. The Roman Catholic Church is much stronger than any other single church; next are the Jewish congregations, then Methodists, Presbyterians, Baptists and Episcopalians.

Education. Full-time attendance at school is compulsory for children from 6 to 16 years of age for a minimum of 175 days per annum, and part-time attendance is required from 16 to 18 years. In autumn 1983 there were 4m pupils enrolled in elementary and secondary schools. Estimated expenditure on public schools, 1983-84, was \$12,897m.

Community Colleges had 1,102,834 students in autumn 1984.

California has two publicly supported higher education systems: the University of California (1868) and the California State University and Colleges. In autumn 1984, the University of California with campuses for resident instruction and research at Berkeley, Los Angeles, San Francisco and 6 other centres, had 133,762 full-time students. California State University and Colleges with campuses at Sacramento, Long Beach, Los Angeles, San Francisco and 15 other cities had 200,089 full-time students. In addition to the 28 publicly supported institutions for higher education there are 117 private colleges and universities which had a total estimated enrolment of 207,557 in the autumn of 1984.

Health. In 1985 there were 581 general hospitals; capacity, 114,043 beds. On 30 June 1984 state hospitals for the mentally disabled had 5,142 patients and state hospitals for the developmentally disabled had 7,451 patients

Social Security. On 1 Jan. 1974 the federal government (Social Security Administration) assumed responsibility for the Supplemental Security Income/State Supplemental Program which replaced the State Old-Age Security. The SSI/SSP provides financial assistance for needy aged (65 years or older), blind or disabled persons. An individual recipient may own assets up to \$1,500, a couple up to \$2,250, subject to specific exclusions. There are federal, state and county programmes assisting the aged, the blind, the disabled and needy children. In July 1984, 462,000 families with one or more children were receiving an average of \$439 per month per family

## CONNECTICUT

HISTORY. Connecticut was first settled in 1634 and has been an organized commonwealth since 1637. In 1629 a written constitution was adopted which, it is claimed, was the first in the history of the world formed under the concept of a social compact. This constitution was confirmed by a charter from Charles II in 1662, and replaced in 1818 by a state constitution, framed that year by a constitutional convention.

AREA AND POPULATION. Connecticut is bounded north by Massachusetts, east by Rhode Island, south by the Atlantic and west by New York Area, 5,018 sq miles (147 sq. miles being inland water)

Census population, 1 April 1980, 3,107,576, an increase of 2 5% since 1970 Estimate (1983) 3,138,000. Births (1984) were 39,237 (12 4 per 1,000 population), deaths, 27,633 (8 8), infant deaths, 320 (8 2 per 1,000 live births), marriages, 25,080 (8), divorces, 11,226 (3 6)

Population in 5 census years was

CONSTITUTION AND GOVERNMENT. The 18!8 Constitution was revised in June 1953 effective 1 Jan. 1955 On 30 Dec. 1965 a new constitution went into effect, having been framed by a constitutional convention in the summer of 1965 and approved by the voters in Dec. 1965.

The 1965 Constitution provides for 30 to 50 members of the Senate (instead of 24 to 36) and for 125 to 225 members of the House of Representatives, to be elected from assembly districts, rather than 2 or 1 from each town, as in the former constitution. The convention has added a new provision for a 3-day session following each regular or special session, solely to reconsider bills vetoed by the Governor.

The General Assembly consists of a Senate of 36 members and a House of Representatives of 151 members. Members of each House are elected for the term

of 2 years (annual salary \$9,500 first year, \$7,500 second year; expenses \$2,000 and mileage allowance). Legislative sessions are annual The Governor and Lieut-Governor are elected for 4 years. All citizens (with necessary exceptions and the usual residential requirements) have the right of suffrage.

Connecticut is one of the original 13 states of the Union The state is represented

in Congress by 2 senators and 6 representatives

In the 1984 presidential election Reagan polled 883,486 votes, Mondale, 560,712. The state capital is Hartford

# DISTRICT OF COLUMBIA

HISTORY. The District of Columbia, organized in 1790, is the seat of the Government of the US, for which the land was ceded by the states of Maryland and Virginia to the US as a site for the national capital. It was established under Acts of Congress in 1790 and 1791. Congress first met in it in 1800 and federal authority over it became vested in 1801. In 1846 the land ceded by Virginia (about 33 sq miles) was given back.

AREA AND POPULATION. The District forms an enclave on the Potomac River, where the river forms the south-west boundary of Maryland. The area of the District of Columbia is 68 68 sq. miles, 6 sq. miles being inland water.

District of Columbia is 68 68 sq. miles, 6 sq. miles being inland water.

Census population, 1 April 1980, was 638,333, a decrease of 16% from that of 1970. Estimate (1983) 623,000. Metropolitan statistical area of Washington, D.C.-Md-Va. (1980), 3m. Density of population in the District, 1980, 10,453 per sq. mile Births, 1984, in the District were 19,123 (30.7 per 1,000 population), resi-

dent deaths, 8,302 (13 3), infant deaths, 393 (20 6 per 1,000 live births); marriages, 5,488 (8 8), divorces, 2,874 (4 6).

GOVERNMENT. Local government, from 1 July 1878 until Aug 1967, was that of a municipal corporation administered by a board of 3 commissioners, of whom 2 were appointed from civil life by the President, and confirmed by the Senate, for a term of 3 years each. The other commissioner was detailed by the President from the Engineer Corps of the Army Reorganization Plan No 3 of 1967 submitted by the President to Congress on 1 June 1967 abolished the Commission form of government and instituted a new Mayor Council form of government with officers appointed by the President with the advice and consent of the Senate. On 24 Dec 1973 the appointed officers were replaced by an elected Mayor and councillors, with full legislative powers in local matters as from 1974 Congress retains the right to legislate, to veto or supersede the Council's acts. The 23rd amendment to the federal constitution (1961) conferred the right to vote in national elections, in the 1984 presidential election Mondale polled 172,459 votes, Reagan, 26,805. On 23 Aug. 1978 the Senate approved a constitutional amendment giving the District full voting representation in Congress. In order to become part of the constitution the amendment must be ratified by 38 state legislatures within 7 years. It would give the District 2 senators and a number of representatives according to population.

**BUDGET.** The District's revenues are derived from a tax on real and personal property, sales taxes, taxes on corporations and companies, licences for conducting various businesses and from federal payments. In financial year 1982 the Council authorized a budget of \$1,513,255,700

The District of Columbia has no bonded debt not covered by its accumulated sinking fund *Per capita* personal income, 1983, \$16,409

INDUSTRY. The District's main industries (1983) are government service (260,000 workers), services (192,000), wholesale and retail trade (59,000), finance, real estate, insurance (34,000), communications, transport and utilities (26,000), total workforce, 1983, 596,000

**TOURISM.** About 17m visitors stay in the District every year and spend about \$1,000m

# **COMMUNICATIONS**

Roads. Within the District are 340 miles of bus routes There are 1,101 miles of streets maintained by the District, of these, 673 miles are local streets, 262 miles are major arterial roads

Railways. There is a rapid rail transit system including a town subway system. This coordinates with the bus system and connects with Union railway station and the National Airport. Nine rail lines serve the District.

Aviation. The District is served by 3 general airports, across the Potomac River in Arlington, Va., is National Airport, in Chantilly, Va., is Dulles International Airport and in Maryland is Baltimore—Washington International Airport

# JUSTICE, RELIGION, EDUCATION AND WELFARE

Justice. Since 1958 there have been no executions; from 1930 to 1957 there were 40 executions (electrocution) including 3 whites for murder and 35 Negroes for murder and 2 for rape. The death penalty was declared unconstitutional in the District of Columbia on November 16, 1973

The District's Court system is the Judicial Branch of the District of Columbia It is the only completely unified court system in the United States, possibly because of the District's unique city-state jurisdiction. Until the District of Columbia Court Reform and Criminal Procedure Act of 1970, the judicial system was almost entirely in the hands of Federal Government. Since that time, the system has been similar in most respects to the autonomous systems of the states.

Religion. The largest churches are the Protestant and Roman Catholic Christian churches, there are also Jewish, Eastern Orthodox and Islamic congregations

Education. In 1981–82 there were about 90,000 pupils in secondary and elementary schools. Expenditure on public schools, 1984, \$349m In 1984, public school teachers' average salary was \$27,700. There are also 17,560 pupils in private elementary and secondary schools. Higher education is given through the Consortium of Universities of the Metropolitan Washington Area, which consists of six universities and three colleges: Georgetown University, founded in 1795 by the Jesuit Order (12,000 students in 1982); George Washington University, nonsectarian founded in 1821 (17,000), Howard University, founded in 1867 (11,000), Catholic University of America, founded in 1887 (7,700, American University (Methodist) founded in 1893 (12,500), University of D.C., founded 1976 (13,500); Gallandet College, founded 1864 (1,000), Mount Vernon College, founded 1875 (500), Trinity College, founded 1897 (1,000) There are altogether 18 institutes of higher education with total enrollment (1982), 83,000

All benefit from such facilities as the 12 museums of the Smithsonian Institution, the Library of Congress, National Archives, and the Legal Libraries of the US Supreme Court and Department of Justice

Social Security The District government provides primary health care for residents, mainly through its Department of Human Services, (about 6,280 employees) Departmental budget, 1981, \$470m. of District, Federal and other funds.

Justice. Prisons on 12 Nov 1985 had about 12,500 men and 410 women, the total equalled 297 per 100,000 population, a high rate, which may be explained by the fact that Maryland incarcerates domestic relations law violators in state prisons, state prisons also receive a considerable number of persons committed for misdemeanours by magistrates' courts of the counties as well as from Baltimore's court system

Since 1930 there have been 68 executions (by lethal gas since 1957, earlier by

hanging)—7 whites and 37 Negroes for murder, and 6 whites and 18 Negroes for rape. Last execution was June 1961

Maryland's prison system has conducted a work-release programme for selected prisoners since 1963. All institutions have academic and vocational training pro-

In accordance with the 1950 Supreme Court decisions declaring segregation unconstitutional, the University of Maryland and other public and private colleges admitted Negro students in Sept 1956. Elementary and secondary schools accept the ruling, and gradual integration is under way in all counties under different methods.

**Religion.** Maryland was the first US state to give religious freedom to all who came within its borders. Present religious affiliations of the population are approximately Protestant, 32%, Roman Catholic, 24%, Jewish, 10%, remaining 34% is non-related and other faiths.

**Education.** Education is compulsory from 6 to 16 years of age. In Sept. 1984 the public elementary schools (including kindergartens and secondary schools) had 721,841 pupils. Teachers and principals in the elementary and secondary schools numbered 40,289. Average salary, teachers and principals (1983-84) was \$24,692 Current expenditure by local school boards on education, 1983–84, was \$2,528m, of which the state's contribution was \$999m.

In 1984 there were 33 degree-granting 4-year institutions and 22 2-year colleges. The largest two were the University of Maryland system, with 63,963 students (Sept. 1984) and Towson State College with 15, 108 students (Sept. 1984)

Health. In March 1985, 84 hospitals (22,666 beds) were licensed by the State

Department of Health and Mental Hygiene

The Maryland State Department of Health, organized in 1874, was in 1969 made part of the Department of Health and Mental Hygiene which performs its functions through its central office, 23 county health departments and the Baltimore City Health Department. For the financial year 1984 the department's budget was \$1,108.2m, of which \$748 6m were general funds and \$27m, special funds appropriated by the General Assembly The balance of the budget, \$332 6m, derives from federal funds

During financial year 1984 Maryland's programme of medical care for indigent and medically indigent patients covered an average of 341,622 persons. The programme, which covers in-patient and out-patient hospital services, laboratory services, skilled nursing home care, physician services, pharmacy services, dental services and home health services, cost approximately \$572m.

Social Security. Under the supervision of the Department of Human Resources, local social service departments administer public assistance for needy persons. In June 1985 families with dependent children received \$19,520,397 (190,714 recipients, average actual monthly payment \$102.35), general public assistance payments were \$2,426,218 (19,598 recipients, average actual monthly payments \$121 23)

Aviation. Airports (1980) numbered 205 licensed airports, 88 certified but not licensed and 23 air carrier airports

#### JUSTICE, RELIGION, EDUCATION AND WELFARE

Justice. The 1963 Constitution provides that no person shall be denied the equal protection of the law, nor shall any person be denied the enjoyment of his civil or political rights or be discriminated against in the exercise thereof because of religion, colour or national origin A Civil Rights Commission was established, and its powers and duties were implemented by legislation in the extra session of 1963 Earlier statutory enactments guaranteeing civil rights in specific areas are as follows. An Act of 1885, last amended in 1956, orders all places of public accommodation and resort, etc., to furnish equal accommodations without discrimination. An Act of 1941, as last amended, forbids the Civil Service in counties with population exceeding 1m. to discriminate against employees or applicants on the ground of political, racial or religious opinions or affiliations. An Act of 1881 incorporated into the school code of 1955 forbids any discrimination in school facilities. An Act of 1893 incorporated in the insurance code of 1956 prohibits insurance companies from discriminating between white and coloured persons.

In 1951 the legislature restored the unique one-man grand jury system abandoned in 1949.

Religion. Roman Catholics make up the largest body; largest Protestant denominations, Lutherans, United Methodists, United Presbyterians, Episcopalians.

Education. Education is compulsory for children from 6 to 16 years of age. The operating expenditure for graded and ungraded public schools for the fiscal year 1984, was \$5,640m. In 1982-83 there were 573 school districts (elementary and secondary schools) with 1,742,831 pupils and 78,814 teachers. Teachers' salaries in 1984 averaged \$28,900.

In 1982 there were 92 institutes of higher education with 508,000 students. Universities and students (1983):

Founded	Name	Students
1817	University of Michigan	34,593
1849	Eastern Michigan University	18,880

# **NEW YORK STATE**

HISTORY. From 1609 to 1664 the region now called New York was claimed by the Dutch; then it came under the rule of the English, who governed the country until the outbreak of the War of Independence On 20 April 1777 New York adopted a constitution which transformed the colony into an independent state, on 26 July 1788 it ratified the constitution of the US, becoming one of the 13 original states New York dropped its claim to Vermont after the latter was admitted to the

Union in 1791 With the annexation of a small area from Massachusetts in 1853, New York assumed its present boundaries.

AREA AND POPULATION. New York is bounded west and north by Canada with Lake Erie, Lake Ontario and the St Lawrence River forming the boundary; east by Vermont, Massachusetts and Connecticut, south-east by the Atlantic, south by New Jersey and Pennsylvania. CONSTITUTION AND GOVERNMENT. The present constitution dates from 1894, a later constitutional convention, 1938, is now legally considered merely to have amended the 1894 constitution, which has now had 93 amendments. The Constitutional Convention of 1967 (4 April through 26 Sept) was composed of 186 delegates who proposed a new state constitution, however this was rejected by the registered voters on 7 Nov 1967. The Senate consists of 60 members, and the Assembly of 150 members, both elected every 2 years. The Governor and Lieut.-Governor are elected for 4 years. The right of suffrage resides in every adult who has been a citizen for 90 days, and has the residential qualifications; new voters must establish, by certificates or test, that they have had at least an elementary education.

The state is represented in Congress by 2 senators and 34 representatives.

In the 1984 presidential election Reagan polled 3,525,266 votes, Mondale, 3,013,521

The state capital is Albany. For local government the state is divided into 62 counties, 5 of which constitute the city of New York. New York leads in state parks and recreation areas, covering 252,984 acres in 1979.

Cities are in 3 classes, the first class having each 175,000 or more inhabitants and the third under 50,000. Each is incorporated by charter, under special legislation. The government of New York City is vested in the mayor (Edward Koch), elected for 4 years, and a city council, whose president and members are elected for 4 years. The council has a President and 37 members, each elected from a state senatorial district wholly within the city. The mayor appoints all the heads of departments, except the comptroller, who is elected. Each of the 5 city boroughs (Manhattan, Bronx, Brooklyn, Queens and Richmond) has a president, elected for 4 years. Each borough is also a county bearing the same name except Manhattan borough, which, as a county, is called New York, and Brooklyn, which is Kings County

CLIMATE. 1984. Oklahoma City. Jan. 34°F(1 1°C), July 81°F(27 2°C) Annual rainfall 33.6" (853 mm) Tulsa. Jan 34°F (1 1°C), July 82°F (27 7°C) Annual rainfall 48 7" (1,237 mm). See Central Plains, p 1371

CONSTITUTION AND GOVERNMENT. The present constitution, dating from 1907, provides for amendment by initiative petition and legislative referendum, it has had 114 amendments

The Legislature consists of a Senate of 48 members, who are elected for 4 years, and a House of Representatives elected for 2 years and consisting of 101 members The Governor and Lieut.-Governor are elected for 4-year terms, the Governor can only be elected for two terms in succession. Electors are (with necessary exceptions) all citizens 18 years or older, with the usual qualifications

The state is represented in Congress by 2 senators and 6 representatives

In the 1984 presidential election Reagan polled 793,258 votes, Mondale, 362,771.

The capital is Oklahoma City. The state has 77 counties.

Governor George Nigh (D.), 1983-86 (\$70,000).

Lieut - Governor Spencer Bernard (D.), 1983-86 (\$40,000)

Secretary of State Jeanette B. Edmondson (D.), 1983-86 (\$37,500)

BUDGET. Total revenue for the year ending 30 June 1984 (State Budget Office figures) was \$4,605 2m Total expenditure, \$4,529 6m

Bonded indebtedness for the year ending 30 June 1984, \$1,652 8m. Per capita personal income (1984) was \$11,187.

#### **ENERGY AND NATURAL RESOURCES**

Minerals. Resources include petroleum, natural gas, coal (bituminous), cement, gypsum, sand, gravel, gem stones, clays, pumice, feldspar, lime, salt, tripoli, iodine and stone. Production for 1984 was. Petroleum, 153 25m. bbls; natural gas, 1,560,154.7m. cu. ft. In 1984 there were 100,377 oilwells and 23,230 natural gaswells in production. Total value of mineral production, 1982, fuels \$10,537m., non-fuels \$225m.

Agriculture. In 1984 the state had 74,000 farms with a total area of 35m. acres, average farm was 476 acres with an average gross income (1983) of \$46,959 In 1982, 2.2% of the population were engaged in farming or ranching. Of these, 58% were full-time farmers or ranchers, 32% part-owners and 10.78% tenants

Cattle and calves rank first in agricultural products, valued, 1984, at \$1,677 5m., winter wheat is second (1983), at \$534.3m.

Cash income from crops and livestock products 1983, \$2,691 5m. The most valuable crop is winter wheat (production, 1983, 150.5m. bu.). Other crops included hay (3.7m. tons), cotton (145,000 bales of 480 lb.), grain sorghums (11 88m. bu.), peanuts (176.54m. lb.) and soybeans (3.91m. bu.). Production of cattle and calves, 1984, 5.5m. head, chickens, 4,175m.; hogs and pigs, 290,000; milk 1,160m. lb.; eggs, 841 m.

The Oklahoma Conservation Commission is the responsible body, working with 91 conservation districts, universities, state and federal government agencies. The early work of the conservation districts, beginning in 1937, was limited to flood and erosion control: since 1970, they include urban areas also.

Irrigated production has increased in the Oklahoma 'panhandle'. The Ogalala aquifer is the primary source of irrigation water there and in western Oklahoma, a finite source because of its isolation from major sources of recharge. Declining groundwater levels necessitate the most effective irrigation practices

Forestry. There are 8 5m acres of forest, one half considered commercial. The forest products industry is concentrated in the 18 eastern counties. There are 3 forest regions: Ozark (oak, hickory); Ouachita highlands (pine, oak), Cross-Timbers (post oak, black jack oak). Southern pine is the chief commercial species, at almost 80% of saw-timber harvested annually.

Replanting is essential and encouraged by a federal investment tax credit (10%) to non-industrial forest land owners, the federal Forestry Incentives Program is also available in 7 counties, for planting on non-industrial private land

INDUSTRY. The wholesale and retail trade industries employed 24 6% of the working population in June 1985. Among other industries the most important by payroll employment (1985) were: manufacturing (172,000); mining (72,000); construction (48,900); transport and utilities (63,700); finance, insurance and real estate (66,400); services (225,900); government (249,100). In June 1985 the civilian non-agricultural labour force was 1,192,900.

#### **COMMUNICATIONS**

Roads. In 1982 there were 12,423 52 miles of inter-state, federal and state highway open, this included 10,846 09 miles of rural roads, 799 97 municipal, 777 46 urban Motor vehicle registrations, 1984, 3,600,742

Railways. In 1985 Oklahoma had 4,184 miles of railway operated by 14 companies.

Aviation. Airports, 1985, numbered 327, of which 129 were publically owned Seven cities were served by commercial airlines.

Shipping. The McClellan-Kerr Arkansas Navigation System provides access from east central Oklahoma to New Orleans through the Verdigris, Arkansas and Mississippi rivers. The Tulsa port of Catoosa handled 1.66m tons inward and outward in 1984, over 60% arose from international trade Muskogee handled 250 000 tons inward, 375,000 outward.

**Broadcasting.** In 1985 there were 145 radio and 15 television broadcasting stations Newspapers. In 1985 there were 51 daily and 186 weekly newspapers

## JUSTICE, RELIGION, EDUCATION AND WELFARE

Justice. Penal institutions, 30 Sept 1985, held 7,492 inmates There were 13 correction centres and 8 community treatment centres

The death penalty was suspended in 1966 and re-imposed in 1976. Since 1915 there have been 83 (52 whites, 27 Negroes, 4 other races) executions. Electrocution was replaced (1977) by lethal injection.

Religion. The chief religious bodies in 1980 were Baptists, 674,766, United Methodists, 248,635, Roman Catholics, 122,820; Churches of Christ, about 80,000, Assembly of God, 63,992, Disciples of Christ, 45,070; Presbyterian, 38,605, Lutheran, 33,664; Nazarene, 22,090; Episcopal, 21,500

Education. In 1983-84 there were 568,467 pupils enrolled in grades 1-12 and 49,417 in kindergartens. There were 39,949 teachers at elementary and secondary schools on average salaries of \$19,700. Total expenditure on public schools, \$1,583.6m. In 1982-83 total expenditure for vocational-technical education was

\$132,923,081, for 1983-84, total for higher education was \$449m; research and similar allocations, \$78 9m.

Institutions of higher education with over 3,000 students:

Total enrolment in institutions of higher education, spring 1985, 161,454

Health. In 1982 there were 142 hospitals (17,700 beds)

Welfare. On 30 June 1984, there were under supervision and/or maintenance by the state 150 delinquent children at 3 centres, 60 children at the psychiatric treatment centre for children and youth, 120 children at 3 schools for the developmentally disabled and mentally retarded, one school for the blind, and one school for the deaf. There were 240 children adjudicated delinquent, in need of supervision, in need of treatment, or deprived, at 17 group homes, 10 mini-group homes, and 18 residential child care facilities. There are two emergency shelters, in Oklahoma

In 1983 social security payments were being drawn by 484,000 persons, receiving an average monthly payment of \$407 This includes retired workers, disabled workers, and widows and widowers. In 1983-84 the Oklahoma Dept of Human Services delivered assistance payments to an average 146,000 persons per month, food stamps to 270,000, and social services to 48,000 (\$232 75m), children and youth services to 12,000 (\$62 14m.); developmental disability services to 3,000 (\$47 48m.), medical services to 65,000 (\$443 01m.), rehabilitation services to 28,000 (\$32 58m), services for the ageing to 50,000 (\$19 12m) Expenditure on teaching hospitals, \$146 17m.; administration, management and construction, \$50 24m Total state welfare expenditure 1983-84, \$1.033 49m

# OREGON

**HISTORY.** Oregon was first settled in 1811 by the Pacific Fur Co at Astoria, a provisional government was formed on 5 July 1834; a Territorial government was organized, 14 Aug. 1848, and on 14 Feb 1859 Oregon was admitted to the Union.

OREGON 1515

AREA AND POPULATION. Oregon is bounded north by Washington, with the Columbia River forming most of the boundary, east by Idaho, with the Snake River forming most of the boundary, south by Nevada and California and west by the Pacific. Area, 97,073 sq. miles, 889 sq. miles being inland water. The federal government owned (1976) 32,370,216 acres (52 55% of the state area). Census population, 1 April 1980, 2,633,105, an increase of 541,720 or 26% since 1970. Estimated population (1983), 2,662,000. In 1984 births numbered 39,536 (14 8 per 1,000 population); deaths, 23,229 (8 7), infant deaths 415 (10 5 per 1,000 live births), marriages, 22,594 (8 4), and divorces, 15,463 (5 8)

Population at 5 federal censuses was:

	White	Negro	Indian	Asiatic	lotal	Per sq mile
1910	655,090	1,492	5,090	11,093	672,765	7 O
1930	938,598	2,234	4,776	8,179	953,786	99
1960	1,732,037	18,133	8,026	9,120	1,768,687	18 4
1970	2,032,079	26,308	13,510	13,290	2.091,385	217
1980	2,490,610	37,060	27,314	34,775	2,633,105	27 3

Of the total population in 1980, 1,296,566 were male, 1,788,354 persons were urban. Those 18 years and older numbered 1,910,048.

The US Bureau of Indian Affairs (area headquarters in Portland) administers (1976) 742,151 74 acres, of which 597,222 94 acres are held by the US in trust for Indian tribes, and 144,928 8 acres for individual Indians.

The largest towns, according to 1980 census figures, are: Portland, 366,383, Eugene, 105,664; Salem (the capital), 89,233; Corvallis, 40,960; Medford, 39,603, Springfield, 41,621; Beaverton, 31,926; Albany, 26,678. Metropolitan areas (1980). Portland, 1,236,294, Eugene-Springfield, 273,114; Salem, 249,655.

CLIMATE. Portland. Jan. 39°F (3 9°C), July 67°F (19 4°C). Annual rainfall 44" (1,100 mm). See Pacific Coast, p. 1371.

CONSTITUTION AND GOVERNMENT. The present constitution dates from 1859; some 80 items in it have been amended. The Legislative Assembly consists of a Senate of 30 members, elected for 4 years (half their number retiring every 2 years), and a House of 60 representatives, elected for 2 years. The Governor is elected for 4 years. The constitution reserves to the voters the rights of initiative and referendum and recall. In Nov. 1912 suffrage was extended to women

The state sends to Congress 2 senators and 5 representatives.

In the 1984 presidential election Reagan polled 618,824 votes, Mondale, 496,237

The capital is Salem There are 36 counties in the state

Governor Victor Atiyeh (R.), 1983-86 (\$53,394 plus \$1,000 monthly for expenses).

Secretary of State Barbara Roberts (D.) (\$45,619).

BUDGET. Oregon has 2-year financial periods Total resources for the biennium 1981-83 were \$13,957,634,165 (federal funds, \$1,003m., individual taxes, \$2,123 7m, business taxes, \$1,587.4m.); total expenditures, \$10,052,272,033 (education, \$2,451 9m.; economic development and consumer services, \$2,983 5m.; human resources, \$2,398 6m.).

In Feb 1983 the outstanding bonded debt was \$6,000 m

Per capita personal income (1983) was \$10,920

# ENERGY AND NATURAL RESOURCES

Electricity. On 1 Jan. 1982 four privately owned utilities, 11 municipally owned utilities, 18 co-operatives and 4 utility districts provided electricity in the state. The privately owned companies provided 73% of the electricity Hydroelectricity plants (67 in 1983) have an installed capacity of 5m. kw., of which multi-purpose federal projects like the Bonneville Power Administration accounted for 3.5m. kw. The Trojan Nuclear plant has a capacity of 1,080mw., and Boardman coal-fired plant, 530mw

Minerals. Oregon's mineral resources include gold, silver, nickel copper, lead, mercury, chromite, sand and gravel, stone, clays, lime, silica, diatomite, expansible shale, scoria, pumice and uranium. There is geothermal potential. Value of mineral products, 1982, was \$108m

Agriculture. Oregon, which has an area of 61,557,184 acres, is divided by the Cascade Range into two distinct zones as to climate. West of the Cascade Range there is a good rainfall and almost every variety of crop common to the temperate zone is grown, east of the Range stock-raising and wheat-growing are the principal industries and irrigation is needed for row crops and fruits.

There were, in 1983, 37,000 farms with an acreage of 18 3m (29 7% of the land area), average farm size was 492 acres, most are family-owned corporate farms

Average value per acre, \$580.

Cash receipts from crops in 1983 amounted to \$1,145m., and from livestock and livestock products, \$555m, of which cattle and calves made most. Principal crops are hay (1 3m. tons), wheat (65 6m. bu), potatoes, peppermint, ryegrass seed, pears, onions, snap beans, sweet corn and barley.

Livestock, 1 Jan 1983 Milch cows, 100,000, cattle and calves, 1 7m, sheep and

lambs, 500,000, swine, 90,000

Forestry. About 29.8m. acres is forested, almost half of the state Of this amount, 24.2m is commercial forest land suitable for timber production, ownership is as follows (acres): US Forestry service, 11.6m (48%), Forest Industry, 5.5m (22.8%), Small non-industrial landowners, 3.6m (14.7%), US Bureau of Land Management, 2.2m (9%); State of Oregon, 820,000 acres (3.4%) and other owners (city, county, Indian), 496,000 acres (2.1%). Oregon's commercial forest lands provided an estimated 1982 harvest of 5,200m bd ft of logs, as well as the benefits of recreation, water, grazing, wildlife and fish. Trees vary from the coastal forest of hemlock and spruce to the state's primary species, Douglas-fir, throughout much of western Oregon. In eastern Oregon, ponderosa pine, lodgepole pine and true firs are found. Here, forestry is often combined with livestock grazing to provide an economic operation. Along the Cascade summit and in the mountains of northeast Oregon, alpine species are found.

Production, 1981 plywood, 5,561m. sq ft (value \$9915m), Douglas Fir lumber, 3,842m. bd ft (\$9483m); Ponderosa Pine lumber, 1,273m bd ft

(\$386m); pulp and paper, 4.8m. tons (\$8.5m.)

Fisheries. All food and shellfish landings in the calendar year 1981 amounted to a value of \$58m. The most important are, tuna, crabs, bottom fish, shrimp.

INDUSTRY. Forest products manufacturing is Oregon's leading industry, and provides for 20% of the country's softwood lumber needs, 40% of its plywood and more than 25% of the hardboard More than one-third of the economy depends directly or indirectly on timber industries, about 78,130 (1981) people are employed The payroll was \$1,600m and value of production, \$3,490m During 1983, manufacturing employed 187,000, trade, 242,000, services, 194,000, government, 193,000

**TOURISM.** In 1982, 14,391,400 out-of-state tourists visited Oregon, the total income from tourism was estimated to be \$1,300m.

#### COMMUNICATIONS

Roads. The state maintains (1982) 7,555 miles of primary and secondary highways, almost all surfaced; counties maintain 27,697 miles, and cities 6,913 miles, there were 79,167 miles in national parks and federal reservations. Registered motor vehicles, 31 Dec. 1981, totalled 2 3m.

Railways. The state had (1980) 19 common carrier railways with a total mileage of 4.428.

Aviation. In Oct. 1982 there were 4 public-use and 85 personal-use heliports, 5

OREGON 1517

public-use seaplane bases, 206 personal-use airports, 110 public-use airports including 37 state-owned airports.

Shipping. Portland is a major seaport for large ocean-going vessels and is 101 miles inland from the mouth of the Columbia River. In 1982 the port handled to 6m short tons of cargo, main commodities for this and other Columbia River ports are grain and petroleum.

Post and Broadcasting. In Dec. 1982 there were 137 commercial radio stations and 13 educational radio stations. There were 14 commercial television stations and 6 educational television stations. There were also 5 campus limited radio stations and 1 subscription radio station.

Newspapers. In 1982 there were 21 daily newspapers with a circulation of 653,392 and 89 non-daily newspapers

# JUSTICE, RELIGION, EDUCATION AND WELFARE

Justice. There are 3 correctional institutions in Oregon, all in Salem The Oregon State Penitentiary, on 30 June 1982, held 1,779 males, the Women's Correctional Center had a resident population of 73, and the Oregon Correctional Institution, which is for first offenders, had a population of 926. The Oregon Correctional Division's Release Center in Salem held 323 inmates, 110 inmates were held in Oregon State Hospital wards and 16,174 offenders were on parole or probation

The sterilization law, originally passed in 1917, was amended in 1967. The amendments changed the number of persons on the Board of Social Protection from 15 to 7 and provided that the Public Defender would automatically represent all persons examined. The basis on which a person would be subject to examination by the Board are: (a) if such person would be likely to procreate children having an inherited tendency to mental retardation or mental illness, or (b) if such person would be likely to procreate children who would become neglected or dependent because of the person's inability by reason of mental illness or mental retardation to provide adequate care.

Religion. The chief religious bodies are Catholic, Baptist, Lutheran, Methodists, Presbyterian and Mormon.

Education. School attendance is compulsory from 7 to 18 years of age if the twelfth year of school has not been completed, those between the ages of 16 and 18 years, if legally employed, may attend part-time or evening schools. Others may be excused under certain circumstances. In 1981–82 the public elementary schools had 330,810 students and the secondary schools, 148,458. Total expenditure on elementary and secondary education (1984) was \$1,654m.; teachers' average salary (1984), \$23,000.

Leading state-supported institutions of higher education (autumn 1982) included

	Students
University of Oregon, Eugene	15,467
Oregon Health Sciences University	1,431
Oregon State University, Corvallis	16,759
Portland State University, Portland	14,541
Western Oregon State College, Monmouth	2,473
Southern Oregon State College, Ashland	4,161
Eastern Oregon State College, La Grande	1,764
Oregon Institute of Technology, Klamath Falls	2,653

Largest of the privately endowed universities are Lewis and Clark College, Portland, with (1982) 3,054 students; University of Portland, 2,872 students, Willamette University, Salem, 1,859 students; Reed College, Portland, 1,122 students, and Linfield College, McMinnville, 1,496 students. There are 13 community colleges and 1 area education district with an estimated enrolment of 293,886 students in 1981–82

Health. In Oct 1982 there were 91 licensed hospitals. In Oct. 1979 there were 4 state hospitals for mentally ill and mentally retarded (2 for mentally ill, 1 for mentally retarded and 1 with both programmes). On 30 June 1982 there were 931 mentally ill patients and 1,629 mentally retarded.

Social Security. Old-age assistance is provided for all needy persons 65 years or older who meet certain eligibility requirements. In financial year 1979–80, 3,598 cases per month received average payments of \$5.36 cash and \$87.54 services. For the same period 98,278 persons in 36,166 families with dependent children received an average \$279.74 per month; 552 blind recipients \$38.56 cash and \$62.52 services, 7,009 disabled \$15.94 cash and \$41.86 services, 4,501 general assistance cases \$134.73 cash and \$5.45 services.

Medical assistance and mental health costs averaged \$14,494,000 per month A system of unemployment benefit payments, financed by employers, with administrative allotments made through a federal agency, started 2 Jan 1938

# WISCONSIN

HISTORY. Wisconsin was settled in 1670 by French traders and missionaries Originally a part of New France, it was surrendered to the British in 1763 and in 1783, when ceded to the US, became part of the North-west Territory. It was then contained successively in the Territories of Indiana, Illinois and Michigan. In 1836 it became part of the Territory of Wisconsin, which also included the present states of Iowa, Minnesota and parts of the Dakotas. It was admitted into the Union with its present boundaries on 29 May 1848

AREA AND POPULATION. Wisconsin is bounded north by Lake Superior and the Upper Peninsula of Michigan, east by Lake Michigan, south by Illinois, west by Iowa and Minnesota, with the Mississippi River forming most of the boundary Area, 56,153 sq. miles, including 1,727 sq miles of inland water, but excluding any part of the Great Lakes Census population, 1 April 1980 4,705,335, an increase of 6 5% since 1970 Estimated population (1984), 4,779,021 Births in 1984 were 73,050 (15 3 per 1,000 population), deaths, 40,962 (8 6), infant deaths, 723 (9 9 per 1,000 live births), marriages, 41,101 (8 6), divorces and annulments, 16,625 (3 5)

Population in 5 census years was

### **GUAM**

HISTORY. Magellan is said to have discovered the island in 1521, it was ceded by Spain to the US by the Treaty of Paris (10 Dec. 1898). The island was captured by the Japanese on 10 Dec. 1941, and retaken by American forces from 21 July 1944. Guam is of great strategic importance, substantial numbers of naval and air force personnel occupy about one-third of the usable land.

AREA AND POPULATION. Guam is the largest and most southern island of the Marianas Archipelago, in 13° 26′ N lat, 144° 43′ E long The length is 30 miles, the breadth from 4 to 10 miles, and there are about 209 sq miles (541 sq km) Agaña, the seat of government is about 8 miles from the anchorage in Apra Harbour The census on 1 April 1980 showed a population of 105,979, an increase of 20,983 or 24 7% since 1970, those of Guamanian ancestry numbered about 50,794, foreign-born, 28,572, density was 507 per sq mile Estimated population (1984), 115,756 On 1 July 1980 transient residents connected with the military were estimated at 20,000 The Malay strain is predominant. The native language is Chamorro, English is the official language and is taught in all schools

CLIMATE. Tropical maritime, with little difference in temperatures over the year Rainfall is copious at all seasons, but is greatest from July to Oct Agaña Jan 81°F (27 2°C), July 81°F (27 2°C) Annual rainfall 93" (2,325 mm)

CONSTITUTION AND GOVERNMENT. Guam's constitutional status is that of an 'unincorporated territory' of the US Entry of US citizens is unrestricted, foreign nationals are subject to normal regulations. In 1949-50 the President transferred the administration of the island from the Navy Department (who held it from 1899) to the Interior Department. The transfer conferred full citizenship on the Guamanians, who had previously been 'nationals' of the US. There was a referendum on status, 30 Jan. 1982. 38% of eligible voters voted, 48.5% of those favoured Commonwealth status.

The Governor and his staff constitute the executive arm of the government. The Legislature is unicameral, its powers are similar to those of an American state legislature. At the general election of Nov. 1982, the Democratic Party won 14 seats and the Republicans 7. All adults 18 years of age or over are enfranchised. Guam returns one non-voting delegate to the House of Representatives.

Governor Ricardo Bordallo (D), 1982-85 (\$50,000) Lieut -Governor Edward D. Reyes (D), 1982-85

# TRUST TERRITORY OF THE PACIFIC ISLANDS

HISTORY. Under the Treaty of Versailles (1919) Japan was appointed mandatory to the former German possessions north of the Equator In 1946 the US agreed to administer the former Japanese-mandated islands of the Caroline, Marshall and Mariana groups (except Guam) as a Trusteeship for the United Nations, the trusteeship agreement was approved by the Security Council 27 April 1947 and came into effect on 18 July 1947 The Trust Territory was administered by the US Navy until 1951, when all the islands except Tinian and Saipan in the Marianas were transferred to the Secretary of the Interior. In 1962 the Interior Department assumed responsibility for them also On 17 June 1975 the voters of the Northern Mariana Islands, in a plebiscite observed by the UN, adopted the covenant to establish a Commonwealth of the Northern Mariana Islands in Union with the USA In April 1976 the US government approved the convenant and separated the administration of the Northern Marianas from that of the rest of the Trust Territory; the group has a constitution and a constitutional government, installed 9 Jan 1978 The rest of the Trust Territory is divided into 3 entities, each with its own constitution. The US Congress agreed compacts of free association for the Marshall Islands and the Federated States of Micronesia (Yap, Kosrae, Truk and Pohnpei) in 1985, that for the Republic of Palau was to be agreed in 1986 Free association gives the USA the authority to control military and defence activities in return for federal government assistance and budget supports to the autonomous constitutional governments Termination of the UN Trusteeship Agreement is contingent upon US Congress agreement regarding Palau, and final action by the UN Security Council

AREA AND POPULATION. The Trust Territory extends from 1° to 22° N lat and from 142° to 172° E long. The area is generally known as Micronesia, or 'land of the small islands' (Guam, Kiribati and Nauru, not part of the Trust Territory, are also ethnically and geographically Micronesian), total land area 890 sq miles including the Northern Marianas

The census population of the 6 administrative districts as of Sept 1980 (and estimate, 1984) was. Federated States Truk, 37,742 (44,596), Pohnpei, 22,319 (26,922), Yap, 8,172 (10,595), Kosrae, 5,522 (6,262) Marshall Islands, 31,042 (34,923), Palau, 12,177 (13,000). Population of the Northern Marianas (1980 census), 16,800, (1984 estimate), 19,635. Nine different languages are spoken, each with variations, English is used in the schools and is the official language.

CLIMATE. Marked by high temperatures throughout the year and high rainfall Marshall Islands, Jaluit Jan 81°F (27 2°C), July 82°F (27 8°C). Annual rainfall 161" (4,034 mm) Caroline Islands, Ponape Jan 80°F (26 7°C), July 79°F (26 1°C) Annual rainfall 194" (4,859 mm)

CONSTITUTION AND GOVERNMENT. Constitutional governments are functioning in the Mariana Islands (1978), the Marshall Islands (1979), the Federated States of Micronesia (1979) and the Republic of Palau (1981). Each of the 4 entities is autonomous from the other 3 but all are still legally under the Trust Territory system. The citizens are Trust Territory citizens until the termination of the Trusteeship. Majuro is the capital of the Marshall Islands. Kolonia, Ponape, is the capital of the Federated States, Koror is the headquarters of Palau and Saipan is

the capital of the Commonwealth of the Northern Marianas, as well as the US administrative headquarters.

High Commissioner Janet J McCoy

INDUSTRY. Tourism is the main source of income from overseas, industrial development is limited. There is some commercial fishing and agriculture, a coconut-processing plant and a tuna-freezing plant. Small scale manufacturing has begun, mainly of garments, buttons (from trochus shell) and handicraft goods

### COMMUNICATIONS

Aviation. The Island groups are served by Continental Air Micronesia, Japan Airlines and Air Nauru providing connexions to the South Pacific, Taiwan, the Philippines, Japan, Hawaii and Guam. Several small commuter airlines connect Guam and the Northern Marianas, Yap and Ulithi, Pohnpei and Kosrae, Pingelap and Mokil. Air Marshall Islands serves the Marshall Islands, Kosrae and Pohnpei. There are connexions to international routes in Guam.

### JUSTICE, RELIGION, EDUCATION AND WELFARE

Justice. Local constitutions and government statutes are the basis for law; the Trust Territory Code operates if a local constitution or statute fails to cover a particular area which the Code covers The Trust Territory High Court is confined to specific areas of responsibility, most areas are covered by the constitutional courts. Local customs are recognized and protected in legal practice, when not in conflict with higher law.

**Religion.** Freedom of religion is guaranteed in the Trust Territory Code and all constitutions.

Education. Education is free and compulsory through elementary school (grades 1-8) There are public and private elementary and secondary schools and government post-secondary education The College of Micronesia (2-year) serves the Marshalls, the federated States and Palau, the Northern Marianas College is also 2-year.

Health. The public health system, which includes 7 main hospitals as well as other hospitals in population centres and dispensaries on outlying islands, is carried on by a staff consisting chiefly of trained Micronesian medical and dental officers and assistants, US doctors, UN volunteers and local support staff.

# **AMERICAN SAMOA**

HISTORY. The Samoan Islands were first visited by Europeans in the 18th century; the first recorded visit was in 1722. On 14 July 1889 a treaty between the USA, Germany and Great Britain proclaimed the Samoan islands neutral territory, under a 4-power government consisting of the 3 treaty powers and the local native government. By the Tripartite Treaty of 7 Nov 1899, ratified 19 Feb 1900, Great Britain and Germany renounced in favour of the US all rights over the islands of the Samoan group east of 171° long west of Greenwich, the islands to the west of that meridian being assigned to Germany (now the Independent State of Western Samoa, see p. 1589). The islands of Tutuila and Aunu'u were ceded to

the US by their High Chiefs on 17 April 1900, and the islands of the Manu'a group on 16 July 1904. Congress accepted the islands under a Joint Resolution approved 20 Feb. 1929 Swain's Island, 210 miles north of the Samoan Islands, was annexed in 1925 and is administered as an integral part of American Samoa.

AREA AND POPULATION. The islands (Tutuila, Aunu'u, Ta'u, Olosega, Ofu and Rose) are approximately 650 miles east-north-east of Fiji. The total area of American Samoa is 76 1 sq. miles (197 sq. km); population, 1980, 32,297, nearly all Polynesians or part-Polynesians. The island's 3 Districts are Eastern (population, 1980, 17,311), Western (13,227) and Manu'a (1,732). There is also Swain's Island, with an area of 1.9 sq. miles and 29 inhabitants (1980), which lies 210 miles to the north west. Rose Island (uninhabited) is 0.4 sq. mile in area. In 1981 there were 1,158 births and 153 deaths

CLIMATE. A tropical maritime climate with a small annual range of temperature and plentiful rainfall Pago-Pago. Jan 83°F (28 3°C), July 80°F (26.7°C). Annual rainfall 194" (4,850 mm).

CONSTITUTION AND GOVERNMENT. American Samoa is constitutionally an unorganized unincorporated territory of the US administered under the Department of the Interior Its indigenous inhabitants are US nationals and are classified locally as citizens of American Samoa with certain privileges under local laws not granted to non-indigenous persons. Polynesian customs (not inconsistent with US laws) are respected.

Fagatogo is the seat of the Government

The islands are organized in 15 counties grouped in 3 districts, these counties and districts correspond to the traditional political units. On 25 Feb. 1948 a bicameral legislature was established, at the request of the Samoans, to have advisory legislative functions. With the adoption of the Constitution of 22 April 1960, and the revised Constitution of 1967, the legislature was vested with limited law-making authority. The lower house, or House of Representatives, is composed of 20 members elected by universal adult suffrage and 1 non-voting member for Swain's Island. The upper house, or Senate, is comprised of 18 members elected, in the traditional Samoan manner, in meetings of the chiefs.

### **ECONOMY**

Planning. The first formal Economic Development and Planning Office completed its first year in 1971 Much has been done to promote economic expansion within the Territory and a large amount of outside investment interest has been stimulated

The Office initiated the first Territorial Comprehensive Plan. This plan when completed will, with periodic updating, provide a guideline to territorial development for the next 20 years. The planning programme was made possible under a Housing and Urban Development '701' grant programme, and Economic Development Administration '302' planning programmes.

The focus will be on physical development and the problems of a rapidly increasing population with severely limited labour resources.

Budget. The chief sources of revenue are annual federal grants from the US, and local revenues from taxes, and duties, and receipts from commercial operations (enterprise and special revenue funds), utilities, rents and leases and liquor sales. During the financial year 1983-84 the Government had a revenue of \$76 6m. including local appropriations of \$9 5m., federal appropriations of \$39 6m and enterprise funds of \$17 5m

Banking. The American Samoa branch of the Bank of Hawaii and the American Samoa Bank offer all commercial banking services. The Development Bank of

American Samoa, government owned, is concerned primarily through loans and guarantees with the economic advancement of the Territory

### ENERGY AND NATURAL RESOURCES

Electricity. Net power generated (financial year 1981) was 72.2m. kwh., of which 23 1m kwh. was supplied to large power users and 20 2m. kwh. to householders All the Manu'a islands have electricity

Agriculture. Of the 48,640 acres of land area, 11,000 acres are suitable for tropical crops; most commercial farms are in the Tafuna plains and west Tutuila Principal crops are taro, bread-fruit, yams, bananas and coconuts Local sales (1982) taro, 770,315 lb., bananas, 1 m. lb., vegetables, 584,143 lb.

Livestock (1984) Pigs, 10,000, goats, 8,000, poultry, 45,000

### INDUSTRY AND TRADE

Industry. Fish canning is important, employing the second largest number of people (after government). Attempts are being made to provide a variety of light industries. Tuna fishing and local inshore fishing are both expanding

Commerce. In 1982 American Samoa exported goods valued at \$186,782,060 and imported goods valued at \$119,416,918 Chief exports are canned tuna, watches, pet foods and handicrafts. Chief imports are building materials, fuel oil, food, jewellery, machines and parts, alcoholic beverages and cigarettes

### COMMUNICATIONS

Roads. There are (1983) about 76 miles of paved roads and 16 miles of unpaved within the Federal Aid highway system. There are 21 miles of other unpaved roads. Motor vehicles registered, 1983, 3,657.

Aviation. South Pacific Island Airways and Polynesian Airlines operate daily services between American Samoa and Western Samoa South Pacific Island Airways also operates between Pago Pago and Honolulu, and between Pago Pago and Tonga. The islands are also served by Air Nauru which operates between Pago Pago, Tahiti and Auckland, and Air Pacific (Fiji and westward). South Pacific and Manu'a Air Transport run local services

Shipping. The harbour at Pago Pago, which nearly bisects the island of Tutuila, is the only good harbour for large vessels in Samoa. By sea, there is a twice-monthly service between Fiji, New Zealand and Australia and regular service between US, South Pacific ports, Honolulu and Japan.

Post and Broadcasting. A commercial radiogram service is available to all parts of the world through 2 principal trunks, United States and Western Samoa. Commercial phone and telex services are operated to all parts of the world on a 24-hour service. Number of telephones (Sept. 1983), 6,029; telex subscribers, 78

### JUSTICE, EDUCATION AND WELFARE

Justice. Judicial power is vested firstly in a High Court. The trial division has original jurisdiction of all criminal and civil cases. The probate division has jurisdiction of estates, guardianships, trusts and other matters. The land and title division decides cases relating to disputes involving communal land and Matai title court rules on questions and controversy over family titles. The appellate division hears appeals from trial, land and title and probate divisions as well as having original jurisdiction in selected matters. The appellate court is the court of last resort. Two American judges sit with 5 Samoan judges permanently. In addition there are temporary judges or assessors who sit occasionally on cases involving Samoan customs. There is also a District Court with limited jurisdiction and there are 69 village courts.

Education. Education is compulsory between the ages of 6 and 18. The Government (1983) maintains 24 consolidated elementary schools, 5 senior high schools

with technical departments, I community college, special education classes for the handicapped and 92 Early Childhood Education Centres for pre-school children. Total elementary and secondary enrolment (1983), 8,300, in ECE schools, 1,611, classes for the handicapped, 68, total elementary and secondary classroom teachers, 480. Ten private schools had 2,108 students. Learning is by a variety of media including television

Health. The Department of Health provides the only curative and preventive medical and dental care in American Samoa It operates a general hospital (173 beds including 49 bassinets), 3 dispensaries on Tutuila, 4 dispensaries in the Manu'a group, I on Aunu'u and I on Swain's Island A \$3 5m tropical medical centre was completed and placed in service in 1968. This now embraces the general hospital as well as preventive health services and out-patient clinics for surgery, obstetrics, gynaecology, emergencies, family practice, internal medicine, paediatrics, there are clinics for treatment of the eye, ear, nose and throat, dental and public health departments

In 1983 there were 27 doctors, 7 dentists, 2 optometrists, 3 nurse anaesthetists, and 3 physician assistants. Total number of health service employees, 397

# COMMONWEALTH OF PUERTO RICO

HISTORY. Puerto Rico, by the treaty of 10 Dec. 1898 (ratified 11 April 1899), was ceded by Spain to the US The name was changed from Porto Rico to Puerto Rico by an Act of Congress approved 17 May 1932 Its territorial constitution was determined by the 'Organic Act' of Congress (2 March 1917) known as the 'Jones Act', which ruled until 25 July 1952, when the present constitution of the Commonwealth of Puerto Rico was proclaimed.

AREA AND POPULATION. Puerto Rico is the most easterly of the Greater Antilles and lies between the Dominican Republic and the US Virgin Islands. The island has a land area of 3,459 sq. miles and a population, according to the census of 1980, of 3,196,520, an increase of 484,487 or 17 9% over 1970. Of the population in 1970 about 529,000 were bilingual, Spanish being the mother tongue and (with English) one of the two official languages. Urban population (1980) 2,134,365 (66 8%).

Vital statistics (1982–83): Births, 65,742 (20 1 per 1,000 population); deaths, 21,498 (6 6); deaths under 1 year, 1,140 (17 3 per 1,000 live births). Chief towns (1980) are: San Juan, 434,849, Bayamon, 196,207; Ponce, 189,046;

Carolina, 165,954, Caguas, 117,959; Mayaguez, 96,193, Arecibo, 86,766.

The Puerto Rican island of Vieques, 10 miles to the east, has an area of 51 7 sq. miles and 7,662 inhabitants. The island of Culebra, with 1,265 inhabitants, between Puerto Rico and St Thomas, has a good harbour.

CONSTITUTION AND GOVERNMENT. Puerto Rico has representative government, the franchise being restricted to citizens 18 years of age or over, residence (1 year) and such additional qualifications as may be prescribed by the Legislature of Puerto Rico, but no property qualification may be imposed. Women were enfranchised in 1932 (with a literacy test) and fully in 1936. Puerto Ricans do not vote in the US presidential elections, though individuals living on the mainland are free to do so subject to the local electoral laws. The executive power resides in a Governor, elected directly by the people every 4 years. Fourteen heads of departments form the Governor's advisory council, also designated as his Council of Secretaries. The legislative functions are vested in a Senate, composed of 27 members (2 from each of the 8 senatorial districts and 11 senators at large), and the House of Representatives, composed of 51 members (1 from each of the 40 representative districts and 11 elected at large). Puerto Rico sends to Congress a Resident Commissioner to the US, elected by the people for a term of 4 years, but he has no vote in Congress. Puerto Rican men are subject to conscription in US services.

On 27 Nov. 1953 President Eisenhower sent a message to the General Assembly of the UN stating 'if at any time the Legislative Assembly of Puerto Rico adopts a resolution in favour of more complete or even absolute independence' he 'will immediately thereafter recommend to Congress that such independence be granted'.

For an account of the constitutional developments prior to 1952, see The STATESMAN'S YEAR-BOOK, 1952, p. 742. The new constitution was drafted by a Puerto Rican Constituent Assembly and approved by the electorate at a referendum on 3 March 1952. It was then submitted to Congress, which struck out Section 20 of Article 11 covering the 'right to work' and the 'right to an adequate standard of living', the remainder was passed and proclaimed by the Governor on 25 July 1952

At the election on 4 Nov. 1984 the Popular Democratic Party, headed by Rafael Hernández Colon, polled 822,783 votes (47.8% of the total); the New Progressive Party, headed by Carlos Romero Barceló, polled 768,742 votes (44.6% of the total); the Independence Party (full independence by constitutional means), 61,316 (3.6% of the total); Renewal Puerto Rican Party, 69,865 votes (3.6% of the total).

Governor Rafael Hernández Colon (Popular Democratic Party), 1985-89 (\$35,000).

# VIRGIN ISLANDS OF THE UNITED STATES

HISTORY. The Virgin Islands of the United States, formerly known as the Danish West Indies, were named and claimed for Spain by Columbus in 1493. They were later settled by Dutch and English planters, invaded by France in the mid-17th century and abandoned by the French (1700, by which time Danish influence had been established. St Croix was held by the Knights of Malta between two periods of French rule

They were purchased by the United States from Denmark for \$25m in a treaty ratified by both nations and proclaimed 31 March 1917 Their value was wholly strategic, inasmuch as they commanded the Anegada Passage from the Atlantic Ocean to the Caribbean Sea and the approach to the Panama Canal. Although the inhabitants were made US citizens in 1927, the islands are, constitutionally, an 'unincorporated territory'.

AREA AND POPULATION. The Virgin Islands group, lying about 40 miles due east of Puerto Rico, comprises the islands of St Thomas (28 sq miles), St Croix (84 sq. miles), St John (20 sq. miles) and about 50 small islets or cays, mostly uninhabited The total area of the 3 principal islands is 132 sq miles, of which the US Government owns 9,599 acres as National Park

The population, according to the census of 1 April 1980, was 95,591, an increase of 33,123 or 53% since 1970 Estimate (1984) 100,000 Population had slowly declined since 1835, when it stood at 43,000, but began to recover in the 1940s, and increased greatly after 1960. Population of St Croix, 49,013, St Thomas, 44,218, St John, 2,360. About 20–25% are native-born, 35–40% from other Caribbean islands, 10% from mainland USA and 5% from Europe St Croix has over 40% of Puerto Rican origin or extraction, Spanish speaking. In financial year 1984, live births were 2,445 and deaths, 590.

The capital and only city, Charlotte Amalic, on St Thomas, had a population (1980) of 11,756, there are two towns on St Croix Christiansted with 2,856 and Frederiksted with 1,054.

CLIMATE. Average temperatures vary from 77°F to 82°F throughout the year, humidity is low. Average annual rainfall, about 45 inches The islands lie in the hurricane belt; tropical storms with heavy rainfall can occur in late summer, but hurricanes rarely.

CONSTITUTION AND GOVERNMENT. The Organic Act of 22 July 1954 gives the US Department of the Interior full jurisdiction, some limited legislative powers are given to a single-chambered legislature, composed of 15 senators elected for 2 years representing the two legislative districts of St Croix and St Thomas-St John.

The Governor is elected by the residents. Since 1954 there have been four attempts to redraft the Constitution, to provide for greater autonomy. Each has been rejected by the electorate. The latest was defeated in a referendum in Nov. 1981, 50% of the electorate participating

For administration, there are 13 executive departments, 12 of which are under

commissioners and the other, the Department of Law, under an Attorney-General. The US Department of the Interior appoints a Federal Comptroller of government revenue and expenditure

The franchise is vested in residents who are citizens of the United States, 18 years of age or over. In 1984 there were 30,430 voters, of whom 22,274 (or 73 2%) participated in the local elections that year.

They do not participate in the US presidential election but they have a non-voting representative in Congress

The capital is Charlotte Amalie, on St Thomas Island

Governor Juan Luis (\$52,400)

Lieut -Governor Julio A Brady (\$47,000)

### **ECONOMY**

Budget. Under the 1954 Organic Act finances are provided partly from local revenues—customs, federal income tax, real and personal property tax, trade tax, excise tax, pilotage fees, etc —and partly from Federal Matching Funds, being the excise taxes collected by the federal government on such Virgin Islands products transported to the mainland as are liable

Budget for financial year 1985, \$245m

Currency and Banking. United States currency became legal tender on 1 July 1934 Banks are the Chase Manhattan Bank, the Bank of Nova Scotia, the First Federal Savings and Loan Association of Puerto Rico, Barclays Bank International, Bank of America, Citibank. First Pennsylvania Bank, Banco Popular de Puerto Rico, and the Royal Bank of Canada

### ENERGY AND NATURAL RESOURCES

Electricity. The Virgin Islands Water and Power Authority provides electric power from generating plants on St Croix and St Thomas, St John is served by power cable and emergency generator

Water. There are 6 de-salinization plants with maximum daily capacity of 8 7m gallons of fresh water. Three others are being established. Rain-water remains the most reliable source. Every building must have a cistern to provide rain-water for drinking, even in areas served by mains (10 gallons capacity per sq. ft of roof for a single-storey house).

Agriculture. With the phasing out of the sugar-cane industry in St Croix, and the accelerated construction activities carried on in all three islands, the number of farms decreased, but there has recently been a revival of interest in food crops

Land for fruit, vegetables and animal feed is available on St Croix, and there are tax incentives for development Sugar has been terminated as a commercial crop and over 4,000 acres of prime land could be utilized for food crops.

Livestock (1985): Cattle, 5,792, goats, 4,600, pigs, 2,300, sheep, 2,889

Fisheries. There is a fishermen's co-operative with a market at Christiansted There is a shellfish-farming project at Rust-op-Twist, St Croix

### INDUSTRY AND TRADE

Industry. The main occupations on St Thomas are tourism and government service, on St Croix manufacturing is more important. Manufactures include rum (the most valuable product), watches, pharmaceuticals and fragrances. Industries in order of revenue: tourism, refining oil, watch assembly, rum distilling, construction. The Martin Marietta Alumina plant processed bauxite from Africa for refining in mainland USA, it closed in 1985. The Amerada Hess oil refinery has a capacity of 700,000 bbls per day.

The Virgin Islands offer liberal tax exemptions to persons, firms or companies prepared to invest \$50,000 in new industries or in the promotion of tourism

Commerce. Exports, calendar year 1984, totalled \$3,600m. and imports \$4,700m.

Total trade between the US Virgin Islands and UK (financial years, British Department of Trade returns, in £1,000 sterling):

	1982	1983	1984	1985
Imports to UK	137	9,706	56,871	514
Exports and re-exports from UK	27,450	4.981	3,657	4,060

**Tourism.** Tourism is the most important business. There were about 1 32m visitors in 1985 spending \$445m

About 541,640 tourists came on cruise ships which made 790 calls, mainly at St Thomas which has a good, natural deepwater harbour About 698,562 came by air

### COMMUNICATIONS

Roads. The Virgin Islands have (1985) 660 miles of roads, and 44,901 motor vehicles registered

CONSTITUTION AND GOVERNMENT. Since 1900 Uruguay has been unique in her constitutional innovations, all designed to protect her from the emergence of a dictatorship. The favourite device of the group known as the 'Batllistas' (a Colorado faction) which, until defeated at the 1958 elections, held the majority for over 90 years, has been the collegiate system of government, in which the two largest political parties were represented.

One such pattern lasted from 1917 to 1933, when it was abolished by a dictator who re-established the system of an individual President Until 1951 Presidents were elected every 4 years and they selected their own Cabinet Ministers (see list of Presidents in The Statesman's Year-Book, 1956, p. 1493)

Presidential elections were held on 25 Nov 1984 and Julio Maria Sanguinetta of the Colorado Party was elected. The first-choice candidates of the National (Blanco) Party and the Broad Front Party were vetoed by the military government

Gen. Gregorio Alvarez resigned on 12 Feb 1985 and a return to civilian rule took place on 1 March 1985.

President Julio Maria Sanguinetta (sworn in on 1 March 1985)

The Cabinet in Dec. 1985 was as follows:

Vice-President Enrique Tarigo.

Defence Juan Vicente Chiarino. Foreign Affairs Enrique Iglesias Interior Carlos Manini Rios. Economy Ricardo Zerbino Public Health Dr Raul Ugarte Industry and Energy Carlos Piran. Transport and Public Works Jorge Sanguinetti Labour Hugo Fernandez Agriculture Roberto Vasquez Platero Justice, Education and Culture. Dr Adela Reta.

# VATICAN CITY STATE

Stato della Città del Vaticano

HISTORY. For many centuries the Popes bore temporal sway over a territory stretching across mid-Italy from sea to sea and comprising some 17,000 sq miles, with a population finally of over 3m. In 1859–60 and 1870 the Papal States were incorporated into the Italian Kingdom. The consequent dispute between Italy and successive Popes was only settled on 11 Feb. 1929 by three treaties between the Italian Government and the Vatican. (1) A Political Treaty, which recognized the full and independent sovereignty of the Holy Sec in the city of the Vatican. (2) a Concordat, to regulate the condition of religion and of the Church in Italy, and (3) a Financial Convention, in accordance with which the Holy Sec received 750m. Irre in cash and 1,000m. Irre in Italian 5% state bonds. This sum was to be a definitive settlement of all the financial claims of the Holy Sec against Italy in consequence of the loss of its temporal power in 1870. The treaty and concordat were ratified on 7 June 1929. The treaty has been embodied in the Constitution of the Italian Republic of 1947. A revised Concordat between the Italian Republic and the Holy Sec was subsequently negotiated and came into force on 3 June 1985.

The Vatican City State is governed by a Commission appointed by the Pope The reason for its existence is to provide an extra-territorial, independent base for the

Holy See, the government of the Roman Catholic Church

In 1930 the issue of Papal coinage was resumed, after a lapse of 60 years. In virtue of a special convention between the Vatican City and the Italian Government (last renewed in 1962), each state allows the currency of the other to circulate in its territory. The Vatican City has, however, given an undertaking that the total value of its coins issued in ordinary years will not exceed 100m. lire, 200m lire in years of 'Sede vacante' or holy years, or 300m. in the year of the opening of a Council.

AREA AND POPULATION. The area of the Vatican City is 44 hectares (108 7 acres) It includes the Piazza di San Pietro (St Peter's Square), which is to remain normally open to the public and subject to the powers of the Italian police. It has its own railway station (opened Nov 1932), postal facilities, coins and radio Twelve buildings in and outside Rome enjoy extra-territorial rights, including the Basilicas of St John Lateran, St Mary Major, St Paul without the Walls and the Pope's summer villa at Castel Gandolfo. On 8 Oct. 1951 extra-territorial rights were also granted to a new Vatican radio station on Italian soil Radio Vaticana broadcasts an extensive service in 34 languages from transmitters in the Vatican City and in Italy.

The Vatican City has about 1,000 inhabitants.

CONSTITUTION. The Pope exercises sovereignty and has absolute legislative, executive and judicial powers. The judicial power is delegated to a tribunal in the first instance, to the Sacred Roman Rota in appeal and to the Supreme Tribunal of the Signature in final appeal.

The Pope is elected by the College of Cardinals, meeting in secret conclave. The election is by scrutiny and requires a two-thirds majority.

ROMAN CATHOLIC CHURCH. The Roman Pontiff (in orders a Bishop, but in jurisdiction held to be by divine right the centre of all Catholic unity, and consequently Pastor and Teacher of all Christians) has for advisers and coadjutors the Sacred College of Cardinals, consisting in May 1985 of 152 Cardinals appointed by him from senior ecclesiastics who are either the bishops of important Sees or the heads of departments at the Holy See In addition to the College of Cardinals, the Pope has created a 'Synod of Bishops'. This consists of the Patriarchs and certain Metropolitans of the Catholic Church of Oriental Rite, of elected representatives of the national episcopal conferences and religious orders of the world, of the Cardinals in charge of the Roman Congregations and of other persons nominated by the Pope The Synod meets as and when decided by the Pope An extraordinary session of the Synod was called for Oct. 1985 to mark the 20th anniversary of the Vatican Council The next Synod is due to meet in 1987.

The central administration of the Roman Catholic Church is carried on by a number of permanent committees called Sacred Congregations, each composed of a number of Cardinals and diocesan bishops (both appointed for 5-year periods), with Consultors and Officials Besides the Secretariat of State and the Council for Public Affairs of the Church (which deals with external relations) there are now 10 Sacred Congregations, viz. Doctrine, Oriental Churches, Bishops, the Sacraments, Divine Worship, Clergy, Religious, Catholic Education, Evangelization of the Peoples and Causes of the Saints. There are also 3 Secretariats. for Christian Unity, Non-Christians and Non-Believers; a Prefecture of Economic Affairs, a Prefecture of the Pontifical Household and a Statistical Office. Furthermore, the Roman Curia contains 3 tribunals, the Apostolic Penitentiary, the Supreme Tribunal of the Apostolic Signature and the Sacred Roman Rota, and, lastly, various other councils and commissions dealing with the Laity, Justice and Peace, Women, the Family, the Information and Revision of Canon Law, Social Communications, Migration and Tourism and Culture. The Pontifical Academy of Sciences was revived by Pius XI in 1936 with 10 members.

More than 2,500 Roman Catholic prelates and 99 observer-delegates from 27 other Christian Churches attended the Second Vatican Council which met 11 Oct 1962 and 8 Dec. 1965 Sixteen Constitutions and Decrees were approved at the Council, and 7 commissions were set up to implement these decisions

### **DIPLOMATIC REPRESENTATIVES**

In its diplomatic relations with foreign countries the Holy See is represented by the Council for Public Affairs of the Church. It maintains permanent observers to the UN in New York and Geneva and to UNESCO and FAO. The Holy See is a member of IAEA and the Vatican City State is a member of UPU and ITU. It therefore attends as a member those international conferences open to State members of the UN and specialized agencies.

Other large towns (1980) are Petare (334,800), Ciudad Guyana (212,000), Baruta (180,100), Cabimas (162,300), Acangua (126,000), Maiquetiá (120,200), Valera (115,000), Chacao (101,900), Puerto Cabello (94,000), Carúpano (82,000) and Puerto La Cruz (81,800).

Venezuela is the most urbanised Latin American nation; in 1985, 86% of the population lived in urban areas. Over half the population live in the valleys of Carabobo and Valencia (once the capital). At the 1981 census, 69% were of mixed ethnic origin (mestizo), 20% white, 9% black and 2% amerindian.

Vital statistics (1981 estimates): 510,000 births, 102,000 marriages, 81,000 deaths. Life expectancy (1981) 68 years with 40 5% of population under 15 years

CLIMATE. The climate ranges from warm temperate to tropical. Temperatures

vary little throughout the year and rainfall is plentiful. The dry season is from Dec. to April Caracas. Jan. 65°F (18·3°C), July 69°F (20 6°C). Annual rainfall 32" (833 mm). Ciudad Bolivar. Jan. 79°F (26 1°C), July 81°F (27 2°C). Annual rainfall 41" (1,016 mm). Maracaibo. Jan. 81°F (27·2°C), July 85°F (29 4°C). Annual rainfall 23" (577 mm)

CONSTITUTION AND GOVERNMENT. The constitution of 1961 provides for popular election for a term of 5 years of a President, a National Congress, and State and Municipal legislative assemblies, and guarantees the freedom of labour, industry and commerce Aliens are assured of treatment equal to that extended to nationals.

Congress consists of a Senate and a Chamber of Deputies At least 2 Senators are elected for each State and for the Federal District Senators must be Venezuelans by birth and over 30 years of age. Deputies must be native Venezuelans over 21 years of age, there is 1 for every 50,000 inhabitants. The territories, on reaching the population fixed by law, also elect deputies. Voting (by proportional representation) is compulsory for men and women over 18. Owing to the high rate of illiteracy, voting is by coloured ballot cards.

The President must be a Venezuelan by birth and over 30 years of age, he has a qualified power of veto

President Dr Jaime Lusinchi, elected 4 Dec. 1983 with 57% of the votes, assumed office on 2 Feb. 1984

Foreign Minister Simón Alberto Consalvi. Finance Minister Manuel Azpurua

At the Congressional elections held 4 Dec 1983, 112 of the 200 seats in the Chamber of Deputies were won by Acción Democrática, 61 by COPEI (the Social Christians) and 27 by other parties

The city of Caracas is the capital. The 20 states, autonomous and politically equal, have each a legislative assembly and an elected governor. The states are divided into 156 districts and 613 municipalities. There are also 2 federal territories with 7 departments, and a federal district with 2 departments and 2 parishes. Each district has a municipal council, and each municipio a communal junta. The federal district and the 2 territories are administered by the President of the Republic.

National flag Three horizontal stripes of yellow, blue, red, with an arc of 7 white stars in the centre, and the national arms in the canton

National anthem Gloria al bravo pueblo (1811; words by Vicente Salias, tune by Juan Landaeta).

**DEFENCE.** All Venezuelans on reaching 18 years of age are liable for 2 years in the Armed Forces.

Army. The Army consists of 1 armoured and 1 Ranger brigades; 1 horsed cavalry, 26 infantry and 5 engineer battalions; and 5 artillery groups. Equipment includes 75 AMX-30 main battle and 40 AMX-13 light tanks. Army aviation comprises 16 helicopters and 18 aircraft. Strength (1986) 34,000

Navy. Strength includes 3 diesel-powered patrol submarines (2 modern built in

Federal Republic of Germany and 1 very old ex-US submarine), 8 frigates built in Italy (6 new and 2 old), 6 fast missile-armed patrol craft built in Britain in 1974–75, 6 patrol vessels, 6 tank landing ships, 1 medium landing ship, 1 transport landing ship (ex-repair ship), 2 new utility landing craft, 12 minor landing craft, 1 survey ship, 2 survey launches, 2 transports, 1 training ship and 3 tugs Coastal patrol boats operated by the National Guard (Fuezzas Armadas de Cooperacion) now number 46, and there are some 40 service craft.

New construction planned includes 4 corvettes, 2 more submarines from the Federal Republic of Germany, 6 fast patrol craft, 6 mine countermeasures vessels, 2 landing ships and 1 survey ship.

There is a naval academy and sail training ship for the training of officer cadets and a school of staff studies and various technical training schools. Personnel in 1986 totalled, 13,500 officers and men including the Marine Corps, the Coastguard and pilots and crew of the Naval Air Arm comprising 8 S-2E Trackers, 5 Aviocars and 1 Dash-7, 12 Agusta AB-212 shipborne helicopters, 2 Bell 47s helicopters and 4 light twin aircraft for various and coastguard duties

Air Force. Formed in 1920, the Air Force of some 4,500 officers and men is a small, but well-equipped service with a total of about 200 aircraft. There are 8 combat squadrons. Two are equipped with 18 F-16A and 6 F-16B Fighting Falcons. Two others have 14 Canadair CF-5A fighter-bombers and 6 two-seat CF-5Ds, and one has 17 Mirage III/5s respectively. Two bomber squadrons are equipped with 19 modernized Canberra jet-bombers and a single reconnaissance Canberra. Another operational squadron has 15 OV-10E Bronco twin-turboprop counter-insurgency aircraft. A helicopter force consists of more than 40 Bell JetRangers, 212s, 214STs and 412s, UH-1B/D/H Iroquois and Alouette IIIs. Transport units are equipped with 12 C-123 Providers, 5 C-130H Hercules and 6 Aeritalia G222s. Communications aircraft are Queen Airs and other types. T-34 Mentors are used for training, together with 20 T-2D Buckeye advanced jet trainers, which have a secondary attack role. A battalion of paratroops comes within Air Force responsibility. There is a staff college and a cadet academy.

National Guard, a volunteer force of some 15,000 under the Ministry of Defence, is broadly responsible for internal security. It includes customs and forestry duties among its tasks.

### INTERNATIONAL RELATIONS

Membership. Venezuela is a member of UN, OAS, LAIA (formerly LAFTA), OPEC and the Andean Group

### **ECONOMY**

Planning. The sixth 5-year plan (1981–85) aimed to achieve economic growth but with a reorientation of priorities towards social programmes. Education, housing and public services. There were 5 major projects: Caracas metro, Gurn hydro-electric scheme, INOS water supply, major housing schemes and the Corpozulia coal and steel complex. Total investment, Bs 255,853m

Budget. The revenue and expenditure for calendar years were, in Bs.1m, as follows.

<b>'S.</b>	1979	1980	1981	1982	1983
Revenue	50,588	71,508	94,865	82,10!	87,978
Expenditure	51,236	72.868	94 544	86.884	86,110

Currency. The bolivar (Bs.) is divided into 100 céntimos. Gold coins, 100 (pachanos), 20 and 10 bolivars have been minted but are no longer in circulation; silver coins are 5 (fuerte), 2, 1 bolivars, nickel, 50 (real), 25 (medio) and 12 5 céntimos (locha), coppernickel, 5 céntimos (puya).

The bank-notes in circulation are 500, 100, 50, 20 and 10 bolivars. The circulation of foreign bank-notes is forbidden.

In March 1986, £1 = Bs.26.61; US\$1 = 18 08.

Banking. The major banks include: Banco Industrial de Venezuela, Banco de

Venezuela, Banco nacional de Descuento, Banco Unión, Banco Mercantil y Agricola, Banco de los Trabajadores de Venezuela, Banco Provincial SAICA, Banco Latino, Banco de Maracaibo, Banco Unido.

### **ENERGY AND NATURAL RESOURCES**

Oil. The oil-producing region around Maracaibo, covering some 30,000 sq. miles, produces about three-quarters of Venezuelan petroleum Deposits in the Orinoco region are likely to prove one of the largest heavy oil reserves in the world. Nationalization of the privately owned oil sector in 1976 has proved successful New distribution channels have been established, with the result that the major transnational companies which took 80% of Venezuela's oil in 1976 handled only 50% in 1980. Crude oil production (1985) 88 5m. tonnes.

Proven reserves in mid-1979 stood at 18,500m bbls, probable reserves at 15,000m, and possible at 102,000m. However, these are considered conservative estimates and new fields off-shore have estimated reserves of 6,000-40,000m bbls. The Orinoco tar sands belt has reserves variously estimated at between 700,000m bbls and 3,000,000m bbls.

Gas. Production (1983) 550,000m cu ft

Minerals. Bauxite is being exploited in the Guayana region by Bauxien, a state agency There are important goldmines in the region south-east of Bolivar State, and new deposits have been discovered near El Callao (1959) and Sosa Méndez (1961) in the Guayana region Output, 1982, amounted to 902 kg Diamond output, from Amazonas territory, was 687,000 carats in 1977 Manganese deposits, estimated at several million tons, were discovered in 1954 Phosphate-rock deposits (yielding from 64 to 82% tricalcium phosphate) are found in the state of Falcón, reserves of 15m. tons of high-quality rock have been established The state of Sucre has large sulphur deposits. Coal is worked in the states of Táchira, Aragua and Anzoátegui. Coal proven reserves in Zulia (160m. tons) are to be developed to service a new thermal power station in the Maracaibo area. An important nickel deposit (at Loma de Hierro near Teierías) is estimated to equal 600,000 tons of pure nickel Saltmines are now worked by the Government on the Araya peninsula Asbestos and copper pyrite are being exploited. There were proven reserves (1984) of bauxite totalling 200m, tonnes and production of about 3m, per annum are scheduled from 1986

Iron ore is exploited in Bolívar State by the Orinoco Mining Co and Iron Mines of Venezuela, subsidiaries respectively of the US Steel Corp. and the Bethlehem Steel Co Proven reserves at the end of 1980 were 1,800m. tonnes. National output of iron ore, 1983, 9 3m. tonnes of which 7 4m. was exported.

Agriculture. Venezuela is divided into 3 distinct zones—the agricultural, the pastoral and the forest zone. In the first are grown coffee, cocoa, sugar-cane, maize, rice, wheat (grown in the Andes), tobacco, cotton, beans, sisal, etc., the second affords grazing for more than 6m. cattle and numerous horses; and in the third, which covers a very large portion of the country, tropical products, such as caoutchouc, balatá (a gum resembling rubber), tonka beans, dividivi, copaiba, vanilla, growing wild, are worked by the inhabitants. The 1984 livestock estimate showed cattle, 12,283,000; pigs, 2,584,000; goats, 1,335,000; sheep, 379,000; poultry, 43m. Area under cultivation is 5,530,898 acres. Over 50% of all farmers are engaged in subsistence agriculture and growth rates in agricultural production have not kept pace with the high population increase. Government has introduced a programme of price support, tax incentives and price increases but cattle farming is at present the only profit opportunity.

Production (1983, in 1,000 tonnes) rice, 509; maize, 429; cassava, 365; sugarcane, 5,132; bananas, 944; oranges, 365; potatoes, 238; tomatoes, 130; coffee, 61; sesame seed, 51; tobacco, 16; cocoa, 14.

The coffee plantations number 62,673, covering 543,400 acres with 135m. bushes. The Venezuelan cocoa, from 13,000 plantations, is considered to be of high quality; it is grown chiefly in the states of Sucre and Miranda. The sugar industry has 6 government and 20 privately owned mills.

Forestry. Resources have been barely tapped, 600 species of wood have been identified

Fisheries. Total catch (1982) was 213,400 tonnes

### INDUSTRY AND TRADE

Industry. Production (1982): Steel, 1 99m. tonnes, aluminium, 273,000; ammonia, 535,000, fertilizers, 630,000, cement, 5 43m., paper, 481,000, vehicles (units) 155,000.

Industrial development is concentrated in capital intensive areas where it can have a competitive advantage within the Andean Group, whereas in more labour intensive industries, the low labour costs of other member countries gives them an advantage However, Venezuela currently produces 90% of its requirements of processed food, beverages, tobacco, clothing and textiles.

**Labour.** The labour force in 1983 was 6m, 19 5% were in agriculture, 18 8% in manufacturing and 9 6% in construction.

Wages are the highest in Latin America, there is a high turnover of labour and a

corresponding rate of absenteeism

45% of the labour force is unionized. The most powerful confederation is the CTV (Confederacion de Trabajadores de Venezuela, formed 1947), which is dominated by the Accion Democratica party. Estimated membership, I Im., claims 2m. Comprises 68 regional and industrial federations with over 6,000 unions, including. FCV (peasants), 700,000, FETRACONS (construction workers), Im., FETRASALUD (health workers), 45,000, FETRAMETAL (metal workers and miners), 32,000, the very important FEDEPETROL (oil workers), 6,000, Federacion Venezolana de Maestros (teachers).

Other confederations are CUTV (Confederacion Unitaria de Trabajadores Venezolanos, formed 1963). Estimated membership, 40,000, claims 100,000 Comprises 8 regional and 5 industrial federations in 185 local unions, and, CODESA (Confederacion de Sindicatos Autonomos de Venezuela, formed 1964) Estimated membership, 10,000, claims 35,000. Dominated by COPEI party Comprises 120 local unions, including textile, petrol distribution, public health and education workers' federations

Commerce. Venezuela's exports and imports (in US\$1 m).

	1980	1981	1982	1983
Exports	19,281	20,100	16,549	16,180
Imports	11,318	12,400	13,200	6,115

Main export markets in 1982 were USA, Netherlands Antilles because of its oil refining and transhipment facilities, Canada, Puerto Rico, Italy and Spain

Principal imports are machinery and equipment, manufactured goods, chemical products, foodstuffs.

The USA supplied 47% of all imports in 1982, followed by Federal Republic of Germany, Japan, Italy and the UK.

Total trade between UK and Venezuela (British Department of 1 rade returns, in £1,000 sterling)

_	<i>1981</i>	1982	1983	1984	1985
Imports to UK	124,020	141,892	183,731	253,770	238,879
Exports and re-exports from UK	125,315	148,666	87,937	102,400	165,268

Tourism. 1,000,300 tourists visited Venezuela in 1980.

### **COMMUNICATIONS**

Roads. There were, 1983, 61,059 km of road fit for traffic the year round; of these 20,000 km are paved. There are 10,097 km of high-speed 4-lane motorway type. The motorway system runs from Caracas to Puerto Cabello via Valencia and will shortly be linked direct with one from La Guaira to Caracas.

Railways. Plans have existed since 1950 for large-scale railway construction but only the Puerto Cabello to Barquisimeto line (175 km-1,435 mm gauge) has been

completed. A metro is under construction in Caracas the first section of which was opened in March 1983

Aviation. In 1984 there were 7 international airports, 51 national and over 200 private airports. The chief Venezuelan airlines are LAV (Líneas Aéreas Venezolanas), a government-owned concern, and AVENSA (Aerovías Venezolanas) Both operate numerous internal services. VIASA operates international routes in conjunction with KLM. There are also 3 specialist air freight companies. In all there are over 100 commercial aircraft in operation. In addition to Venezuelan international services, a number of US and Latin American and European lines operate services to Venezuela. British Airways operates twice-weekly flights between London and Caracas.

Shipping. Foreign vessels are not permitted to engage in the coasting trade, except by special concessions or by contract with the Government La Guaira, Maracaibo, Puerto Cabello, Puerto Ordaz and Guanta are the chief ports. In Dec. 1978 the merchant fleet had an aggregate gross tonnage of 824,000; this included tankers of 368,000 gross tons.

The principal navigable rivers are the Orinoco and its tributaries Apure and Arauca, from San Fernando to Tucupita through Ciudad Bolívar, Puerto Ordaz and San Félix, San Juan from Caripito to the Gulf of Paria, and Esculante in Lake Maracaibo

Post and Broadcasting. There were 1,021,136 telephones in 1984 An international telex service operates in the Caracas metropolitan zone. There is a submarine telephone link with USA.

In 1983 there were 5m radio receivers and there were 77 radio stations at Caracas, Maracaibo, Maracay and other towns. There were 3 television stations in Caracas (two privately owned), of which 2 cover, with relays, most of the country In 1984 there were about 2m, homes with TV receivers

Cinemas (1977). There were 563 cinemas and 25 drive-ins

Newspapers (1983). There were 25 leading daily newspapers with a circulation of over 1.7m.

### JUSTICE, RELIGION, EDUCATION AND HEALTH

Justice. The Supreme Court, which operates in Divisions, each with 5 members, is elected by Congress for 5 years. The country is divided into 20 legal districts. They select their own President and Vice-President. The Federal Procurator-General is appointed for 5 years. There are lower federal courts.

Each state has a Supreme Court with 3 members, a superior court, or superior tribunal, courts of first instance, district courts and municipal courts. In the terntones there are civil and military judges of first instance, and also judges in the municipios. Finally, there is an income-tax claims tribunal.

Religion. The Roman Catholic is the prevailing religion, but there is toleration of all others. There are 4 archbishops, I at Caracas, who is Primate of Venezuela, 2 at Mérida and 1 at Ciudad Bolívar. There are 19 bishops. In the state primary schools instruction is given only to those children whose parents expressly request it Protestants number about 20,000.

Education. In 1982–83 there were 12,816 primary and secondary schools with 130,505 teachers and 2,998,803 pupils. The number of students in higher education was 282,274 with 25,268 teaching staff in the 106 establishments, including 17 universities.

Health. In 1976 there were 14,211 doctors and 386 hospitals and dispensaries with 36,126 beds

HISTORY. The history of Vietnam can be traced to the beginning of the Christian era Conquered by the Chinese in B.C. 111, it broke free of Chinese domination in 939, though at many subsequent periods it was a nominal Chinese vassal (For subsequent history until the cessation of hostilities with France at the Geneva Conference of July 1954 see The Statesman's Year-Book, 1985-86).

The Geneva conference stipulated that elections should take place in 1956 Ngo Dinh Diem became Prime Minister of South Vietnam (Republic of Vietnam) in 1954 and President in 1955 Elections were never held. In 1963 Diem was overthrown In 1965 Nguyen Van Thieu took power as chairman of a National Leadership Committee, becoming President in 1967. From 1959 the North promoted insurgency in the South, US involvement began in 1961

In Paris on 27 Jan 1973 an agreement was signed ending the war in Vietnam After the US withdrawal, however, hostilities continued between the North and the South until the latter's defeat in 1975 150,000–200,000 South Vietnamese fled the country, including the former President Thieu

For details of the former Republic of Vietnam, see The Statesman's Ylar-Book, 1975–76 After the collapse of Thieu's regime the Provisional Revolutionary Government established an administration in Saigon. A general election was held on 25 April 1976 for a National Assembly representing the whole country Voting was by universal suffrage of all citizens of 18 or over, except former functionaries of South Vietnam undergoing 're-education', of whom there were still approximately 100,000 in 1985. The unification of North and South Vietnam into the Socialist Republic of Vietnam took place formally on 2 July 1976. After previous vetoes in 1977 the USA indicated that it was not opposed to Vietnam's application to join the UN, and Vietnam was admitted unanimously and without a vote on 20 Sept. In 1978 Vietnam was admitted to Comecon and signed a 25-year treaty of friendship and co-operation with the USSR Relations with China correspondingly deteriorated, an exacerbating factor being the Vietnamese military intervention in Kampuchea. There has been occasional skirmishing along the China-Vietnam border.

AREA AND POPULATION. The country has a total area of 329,566 sq km and is divided administratively into 36 provinces and 1 special area. Areas and populations (in 1,000) at the census of Oct. 1979 were as follows:

• •

At the census of Oct. 1979 the population was 52,741,766 (25,580,582 male, 19 7% urban).

Population (1986), 58 3m (Ho Chi Minh 4m, (1986), Hanoi, 2m (1979), growth rate (1985) 2 4% per annum Contraception is encouraged, and women urged to confine their families to two children, one not before 22 and one 5 years later

84% of the population are Vietnamese (Kinh) There are also over 60 minority groups thinly spread in the extensive mountainous regions. The largest minorities are (1976 figures in 1,000) Tay (742), Khmer (651), Thai (631), Muong (618), Nung (472), Meo (349), Dao (294). In 1981 0 5m Vietnamese were living abroad, mainly in USA. There is a plan to resettle 12m inhabitants of the congested Red River Delta in the less populated highland and central districts

From 1979 to July 1984 59,730 persons emigrated legally. Between Apr. 1975 and Aug. 1984 a further 554,000 'boat people' succeeded in finding refuge abroad In 1985 it was estimated that 'boat people' were still leaving Vietnam at the rate of about 1,000 a month, putting some strain on the resources of the UN High Commission for Refugees and countries such as Indonesia, but in 1984 the number of people leaving legally under the UN's orderly departure scheme (30,000) for the first time exceeded the number of illicit refugees (For previous details see THE STATESMAN'S YEAR-BOOK, 1981-82) In Sept. 1984 the USA announced a plan to offer asylum to Vietnamese political prisoners and to accept all Asian-American children in Vietnam as refugees

**CLIMATE.** The humid monsoon climate gives tropical conditions in the south and sub-tropical conditions in the north, though real winter conditions can affect the north when polar air blows south over Asia. In general, there is little variation in temperatures over the year Hanoi. Jan 62°F (16 7°C), July 84°F (28 9°C) Annual rainfall 72" (1,830 mm)

CONSTITUTION AND GOVERNMENT. A new Constitution was adopted in Dec 1980 It states that Vietnam is a state of proletarian dictatorship and is developing according to Marxism-Leninisin.

At the elections for the new National Assembly held on 26 April 1981, 613 candidates stood and 496 were elected 70% of the candidates were standing for the first time.

Local government authorities are the people's councils, which appoint executive committees. Local elections were held in Ho Chi Minh City and the 38 provinces of the former South Vietnam on 5 May 1977.

The 1980 Constitution replaced the Presidency with the State Council, 'the standing organ of the National Assembly and presidium of the Republic'.

Chairman. Truong Chinh Vice-Chairmen Nguyen Huu Tho, Le Thanh Nghi, Chu Huy Man, Huynh Tan Phat.

Chairman of the National Assembly. Nguyen Huu Tho

All political power stems from the Communist Party of Vietnam (until Dec 1976 known as the Workers' Party of Vietnam), founded in 1930; it had 1 7m. members in 1986. In April 1986 the Politburo consisted of Le Duan (First Secretary); Truong Chinh; Pham Van Dong (Prime Minister); Pham Hung (Deputy Prime Minister and Minister of the Interior); Le Duc Tho, Gen. Van Tien Dung (Minister of Defence); Vo Chi Cong; Gen. Chu Huy Man; To Huu (First Deput) Prime Minister); Vo Van Kiet (Deputy Prime Minister and Chairman, State PlanVIETNAM 1583

ning Commission), Do Muoi (Deputy Prime Minister) Le Duc Anh, Nguyen Duc Tam. Candidate members: Nguyen Co Thach (Foreign Minister); Dong Si Nguyen (Deputy Prime Minister). Ministers not in the Politburo include Vo Nguyen Giap; Tran Quynh, Vu Dinh Lieu, (Deputy Prime Ministers); Chu Tham Phuc (Finance), Le Khac (Foreign Trade), Le Duc Thinh (Home Trade), Dong Si Nguyen (Transport), Mme Nguyen Thi Binh (Education), Nguyen Ngoc Triu (Agriculture), Phan Hien (Justice)

There are 2 puppet parties, the Democratic (founded 1944) and the Socialist (1946), which are unified with the trade and youth unions in the Fatherland

Front

National flag Red, with a yellow 5-pointed star in the centre National anthem 'Tien quan ca' ('The troops are advancing')

**DEFENCE.** Vietnam has the world's largest armed forces after USSR, China and USA Men between 18 and 35 and women between 18 and 25 are liable for conscription.

Army. The Army consists of 1 armoured division, 65 infantry divisions (of varying strengths), 8 engineer and 16 economic construction divisions, 10 marine brigades, 5 field artillery brigades, 4 engineer brigades, and 10 independent armoured regiments Equipment includes some 1,600 main battle and 450 light tanks Strength was (1986) about 1 m Paramilitary forces are Border Defence (60,000) and Militia (15m) In 1986 some 40,000 troops were stationed in Laos and 160,000 in Cambodia

Navy. Before the North Vietnamese victory in 1975 the Navy comprised 3 old coastal escorts, 2 fast missile boats, 28 fast torpedo boats, 22 fast motor gunboats, 34 small patrol boats, 24 landing craft, 4 minesweeping boats, 10 tenders, 100 auxiliaries and 200 armed junks. It also had 10 Mi-4 SAR helicopters

At least 1 frigate, several other major warships and a considerable number of

auxiliaries were captured after the South Vietnamese surrender

The fleet reportedly includes 5 ex-Soviet escorts, 2 old frigates, 2 old corvettes, 1 minesweeper, 6 old submarine chasers, 8 fast missile boats, 16 fast torpedo boats, 15 fast gunboats, 6 fast patrol craft, 5 seaward defence boats, 9 landing ships, 12 landing craft, 1 torpedo recovery vessel, 15 riverine craft, 24 minesweeping launches, 1 survey ship, 15 auxiliaries and 100 armed junks, but due to the lack of maintenance, spares and trials it is difficult to accurately assess the operational availability, fitness for sea or steaming capacity of this heterogeneous collection or the availability of trained personnel.

It is estimated that 4 missile craft, 6 torpedo boats, 22 gunboats, 3 minesweepers, 24 patrol craft, 25 coastguard cutters and 100 motor launches are non-operational together with 550 riverine craft, 100 landing craft, 30 monitors, 100 converted amphibious craft, 26 vedettes, 36 auxiliaries and 75 service craft

In 1986 there were an estimated 4,000 naval personnel regulars, with additional conscripts on three to four year terms.

Air Force. The Air Force, built up with Soviet and Chinese assistance, has about 12,000 personal and 350 combat aircraft (plus many stored), including modern US types captured in war. There are reported to be 6 squadrons of variable-geometry MiG-23s, 6 squadrons of MiG-17s and Su-20s, about 150 MiG-21 interceptors, An-2, Li-2, An-24, An-26 and Il-14 transports, and a strong helicopter force with UH-1 Iroquois, Mi-6 and Mi-8 helicopters 'Guideline', 'Goa' and 'Gainful' missiles are operational in large numbers

### INTERNATIONAL RELATIONS

Membership. Vietnam is a member of UN, Comecon and IMF

### **ECONOMY**

Planning. Long-term forward planning gives priority to self-sufficiency in agriculture and stimulating regional industry. The fourth 5-year plan covers 1986–90.

1584 VIETNAM

(For previous plans see The Statesman's Year-Book, 1985-86.).

Curtailment of Western aid, and resistance to Government measures have contributed to a shortage of consumer goods and widespread malnutrition. Economic reforms of Dec. 1984 aim at reducing centralization and increasing flexibility within the planning system, while cutting subsidies and strengthening the financial position of state enterprises.

Currency. The monetary unit is the dong. A currency reform of 14 Sept. 1985 substituted a new dong at a rate of 1 new dong = 10 (old) dong, and devalued the currency from US\$1 = 12 06 (old) dong to US\$1 = 15 new dong. Notes are issued for 1, 2, 5, 10, 20, 50, 100 and 500 new dong. (For former currency see This Statesman's Year-Book, 1985-86) In March 1986 £1 = 17 88 new dong, US\$1 = 12 39 new dong. Inflation was 55% in 1984

Banking. The bank of issue is the National Bank of Vietnam (founded in 1951) There is also a Bank for Foreign Trade (Vietcombank)

#### ENERGY AND NATURAL RESOURCES

Electricity. In 1984, 4,500m. kwh of electricity were produced. A hydro-electric power station with a capacity of 2m. kw. is being built at Hoa-Binh with Soviet assistance.

Minerals. North Vietnam is rich in anthracite, lignite and hard coal total reserves are estimated at 20,000m. tonnes. Anthracite production in 1975 was 5m tonnes Coal production was 5 3m tonnes in 1980. There are deposits of iron ore, manganese, titanium, chromite, bauxite and a little gold. Reserves of apatite are some of the biggest in the world. A Soviet-Vietnamese enterprise claimed to have struck oil in May 1984.

Agriculture. In 1980, 71% of the population was engaged in agriculture. In 1977 there were 15,200 co-operatives in the North averaging 300-500 hectares (less than 100 hectares in mountain regions) and a workforce of 1,000-2,000. The intemperate collectivization of agriculture in the South after 1977 had disastrous effects which the Government is now trying to rectify by a system of incentives to peasants which allows them small private plots and the right to market some of their own produce. There were 105 state farms employing in all 70,000 workers and with 55,000 hectares arable and 50,000 hectares of pasture. Other crops include maize, sugar-cane, sweet potatoes and cotton. The cultivated area in 1980 was 6.97m hectares (5.54m, hectares for rice)

In 1984 there were some 23,000 production collectives and 268 agricultural co-operatives in the South accounting for 47% of the cultivated area. There were about 300 state farms

Production in 1,000 tonnes in 1984: Soybeans (110), tea (29), rubber (55), maize (475), tobacco (27), potatoes (250), sweet potatoes (1,900) from 390,000 hectares, sorghum (44) from 32,000 hectares, beans (179) from 210,000 hectares, coffee (10). The main crop is rice. Cereals production was 14m. tonnes in 1982, 17m tonnes in 1983.

Livestock (1984). Cattle 2 01 m.; pigs, 11,202,000; goats, 256,000, poultry, 82m Animal products, 1980: Eggs, 1,129 m., meat, 427,000 tonnes

Forestry, 1,626,000 cu. metres of timber were produced in 1980.

Fisheries. Fishing is important, especially in Halong Bay In 1976, 6m tonnes of sea fish and 180,000 tonnes of freshwater fish were caught.

#### INDUSTRY AND TRADE

Industry. Next to mining, food processing and textiles are the most important industries; there is also some machine building. Older industries include cement, cotton and silk manufacture.

Private businesses were taken over in 1978. Foreign firms, principally French, are continuing to function, but all US property has been nationalized. There is little heavy industry. Most industry is concentrated in the Ho-Chi-Minh area.

VIETNAM 1585

Production (1980, in 1,000 tonnes) iron, 125, steel, 106; sulphuric acid, 6,700; caustic soda, 4,500; mineral fertilizer, 260; pesticides, 18,400; paper, 54,000; sugar, 94,000, cement, 705 1,500 tractors were built in 1980, and 621 railway coaches. Footwear production, 200,000 pairs Beer, 942,000 hectolitres

Labour. Average wage (1984) 200 dong per month. Non-agricultural workforce (1980) 3,587,000, of whom 2,238,000 in industry

Commerce. USSR and Japan are Vietnam's main trading partners, others are Singapore and Hong Kong Main exports are coal, farm produce, sea produce and livestock Imports: technical equipment, industrial raw materials, foodstuffs and medical supplies. There is an aid agreement with the USSR for 1986–90. In 1986 Vietnam's total indebtedness was estimated at US\$6,000m. In 1978 the IMF approved a virtually interest-free loan of US\$90m repayable over 50 years, but in April 1985 suspended all further credits to Vietnam Foreign investments are encouraged and guaranteed for 15 years. All capital may remain in foreign hands if goods are produced for export only; otherwise the Vietnamese Government will retain 51% of shares.

Trade between Vietnam and UK (British Department of Trade returns, in £1,000 sterling)

<b>6</b> ,	1982	1983	1984	1985
Imports to UK	133	603	1,154	1,758
Exports and re-exports from UK	876	951	1,787	2,077

#### **COMMUNICATIONS**

Roads. In 1973 there were about 9,500 km of roads in the North In 1970 there were 20,905 km of roads in the South Of these, 5,908 km were asphalted

Railways. Route length was 2,600 km in 1976 The Hanoi-Ho Chi Minh City line is being rebuilt in a programme of reconstruction and extension.

Aviation. Civil Aviation of Vietnam operates internal services from Hanoi to Ho Chi Minh City, Cao Bang, Na Son and Dien Bien, Vinh and Hue, and from Ho Chi Minh City to Ban Me Thuot and Da Nang, Can Tho, Con Son Island and Quan Long Aeroflot (USSR) operate regular services from Ho Chi Min City to Moscow and from Hanoi to Moscow, Rangoon and Vientiane, Interflug (German Dem Rep.) to Berlin, Moscow and Dacca and Air France to Paris.

Shipping. The major ports are Haiphong, which can handle ships of 10,000 tons, Ho Chi Minh City and Da Nang, and there are ports at Hong Gai and Haiphong Ben Thuy There are regular services to Hong Kong, Singapore, Kampuchea and Japan In 1953 there were 830 km of navigable waterways in the North and, in 1971, 4,783 km in the South

Cargo is handled by the Vietnam Ocean Shipping Agency; other matters by the Vietnam Foreign Trade Transport Corporation

Post and Broadcasting. In 1966 there were 1 4m radios. There were 46,509 telephones in the South in 1974 There were 2m TV sets in 1980.

Cinemas and theatres. 116 films were produced in 1980 (including 10 full-length). There were 145 theatres

Newspapers and books. The Party daily is Nhan Dan ('The People') circulation, 1984. 300,000. The official daily in the South is Giai Phong Two unofficial dailies, Cong Giao Va Dan Toc (Catholic) and Tin Sang (independent) are also published. 2,564 books were published in 1980 totalling 90 9m copies.

#### JUSTICE, RELIGION, EDUCATION AND WELFARE

Justice. A new penal code came into force 1 Jan. 1986 'to complete the work of the 1980 Constitution'. Penalties (including death) are prescribed for opposition to the people's power, and for economic crimes There are the Supreme People's Court, local people's courts and military courts The president of the Supreme Court is responsible to the National Assembly, as is the Procurator-General, who heads the Supreme People's Office of Supervision and Control

1586 VIETNAM

Religion. Taoism is the traditional religion but Buddhism is widespread. At a Conference for Buddhist Reunification in Nov. 1981, 9 sects adopted a charter for a new Buddhist church under the Council of Sangha. The Hoa Hao sect, associated with Buddhism, claimed 1 5m adherents in 1976 Caodaism, a synthesis of Christianity, Buddhism and Confucianism founded in 1926, has some 2m. followers There are some 3m Roman Catholics headed by Cardinal Trinh Van Can, Archbishop of Hanoi and 13 bishops. In 1983 the Government set up a Solidarity Committee of Catholic Patriots.

Education. Primary education consists of a 10-year course divided into 3 levels of 4, 3 and 3 years respectively. Numbers of pupils and students in 1980–81 nurseries, 2.66m., primary schools, 12 lm., complementary education, 2 l9m, vocational secondary education, 130,000. In 1980–81 there were 92,913 nurseries There were 11,400 schools and 280 vocational secondary schools, with 357,000 and 13,000 teachers respectively.

In 1980-81 there were 83 institutions of higher education (including 3 universities (Hanoi, Ho Chi Minh City, Central Highlands University at Ban Me Thuot), 13 industrial colleges, 7 agricultural colleges, 5 economics colleges, 9 teacher-training colleges, 7 medical schools and 3 art schools, in all with 16,000 teachers and 159,000 students. # WESTERN SAMOA

Capital Apia Population 159,000 (1984) GNP per capita US\$350 (1976)

Samoa i Sisifo

HISTORY. Western Samoa, a former German protectorate (1900 to the First World War), was administered by New Zealand from 1920 to 1961, at first under a League of Nations Mandate and since 1946 under a United Nations Trusteeship Agreement. In May 1961 a plebiscite held under the supervision of the United Nations on the basis of universal adult suffrage voted overwhelmingly in favour of independence as from 1 Jan 1962, on the basis of the Constitution, which a Constitutional Convention had adopted in Aug 1960 In Oct 1961 the General Assembly of the United Nations passed a resolution to terminate the trusteeship agreement as from 1 Jan 1962, on which date Western Samoa became an independent sovereign state

Under a treaty of friendship signed on 1 Aug 1962 New Zealand acts, at the request of Western Samoa, as the official channel of communication between the Samoan Government and other governments and international organizations outside the Pacific islands area Liaison is maintained by the New Zealand High Commissioner in Apia

AREA AND POPULATION. Western Samoa lies between 13° and 15° S lat and 171° and 173° W long It comprises the two large islands of Savai'i and Upolu, the small islands of Manono and Apolima, and several uninhabited islets lying off the coast. The total land area is 1,093 sq. miles (2,830 8 sq. km), of which 659 4 sq miles (1,707 8 sq. km) are in Savai'i, and 431 5 sq. miles (1,117 6 sq. km) in Upolu, other islands, 2 1 sq. miles (5 4 sq. km). The islands are of volcanic origin, and the coasts are surrounded by coral reefs. Rugged mountain ranges form the core of both main islands and rise to 3,608 ft in Upolu and 6,094 ft in Savai'i. The large area laid waste by lava-flows in Savai'i is a primary cause of that island supporting less than one-third of the population of the islands despite its greater size than Upolu.

The population at the 1981 census was 156,349, of whom 113,000 were in Upolu (including Manono and Apolima) and 42,218 in Savai'i The capital and chief port is Apia in Upolu (population 33,170 in 1981) Estimate (1984) 159,000

CLIMATE. A tropical marine climate, with cooler conditions from May to Nov and a rainy season from Dec to April The rainfall is unevenly distributed, with south and east coasts having the greater quantities Average annual rainfall is about 100" (2,500 mm) in the drier areas. Apia Jan 80°F (26 7°C), July 78°F (25.6°C) Annual rainfall 112" (2,800 mm)

CONSTITUTION AND GOVERNMENT. The Constitution provides for a Head of State known as 'Ao o le Malo', which position from 1 Jan. 1962 was held jointly by the representatives of the two royal lines of Tuiaana/Tuiatua and Malietoa On the death of HH Tupua Tamasese Mea'ole, CBE, on 5 April 1963, HH Malietoa Tanumafili II, CBE, became, as provided by the constitution, the sole Head of State for life. Future Heads of State will be elected by the Legislative Assembly and hold office for 5-year terms.

The executive power is vested in the Head of State, who appoints the Prime Minister and, on the Prime Minister's advice, the 8 Ministers to form the Cabinet which has general direction and control of the executive Government

The Legislative Assembly has 45 members elected from territorial constituencies on a franchise confined to matais or chiefs (of whom there are about 11,000) and 2 members elected on universal adult suffrage from the individual voters roll, which has replaced the old European roll (approximately 1,350 in 1971) One Member is elected as Speaker The Constitution also provides for a Council of Deputies of 3 members

In the elections held Feb 1985, the Human Rights Protection Party won 31 seats

The official languages are English and Samoan

Head of State HH Malietoa Tanumafili II, CBE.

The cabinet in Feb. 1986 was composed as follows

# YEMEN ARAB REPUBLIC

Capital San'a
Population 7 7m (1980)
GNP per capita US\$510(1983)

al Jamhuriya al Arabiya al Yamaniya

HISTORY. On the death of the Iman Ahmad on 18 Sept 1962, army officers seized power on 26–27 Sept, declared his son, Saif Al-Islam Al-Badr (Iman Mansur Billah Muhammad), deposed and proclaimed a republic The republican régime was supported by Egyptian troops, whereas the royalist tribes received aid from Saudi Arabia On 24 Aug. 1965 President Nasser and King Faisal signed an agreement according to which the two powers are to support a plebiscite to determine the future of the Yemen, a conference of republican and royalist delegates met at Haradh on 23 Nov. 1965, but no plebiscite was agreed upon. At a meeting of the Arab heads of state in Aug 1967 the President and the King agreed upon disengaging themselves from the civil war in Yemen. At the time there were still about 50,000 Egyptian troops in the country, holding San'a, Ta'iz, Hodeida and the plains, whereas the mountains were in the hands of the royalist tribes. By the end of 1967 the Egyptians had withdrawn.

AREA AND POPULATION. In the north the boundary between the Yemen and Saudi Arabia has been defined by the Treaty of Taif concluded in June 1934. This frontier starts from the sea at a point some 5 or 10 miles north of Maidi and runs due east inland until it reaches the hills some 30 miles from the coast, whence it runs northwards for approximately 50 miles so as to leave the Sa'da Basin within the Yemen. Thence it runs in an easterly and south-easterly direction until it reaches the desert area near Nejran. The area is about 73,300 sq. miles (195,000 sq. km) with a population of 7,160,851, census 1981. There were 1,395,123 citizens working abroad mainly in Saudi Arabia and the United Arab Emirates not included in the census total. The capital is San'a with a population of (1981) 277,817. Other important towns are the port of Hodeida (population, 126,386), and Ta'iz (119,572), other towns are Ibb, Yerim, Dhamar and the ports of Mokha and Loheiya.

CLIMATE. A desert climate, modified by relief San'a Jan 57°F (13 9°C), July 71°F (21 7°C). Annual rainfall 20" (508 mm).

CONSTITUTION AND GOVERNMENT. A provisional Constitution was promulgated on 19 June 1974 by the Command Council, which later established a 99-member People's Constituent Assembly on 6 Feb 1978 (membership raised to 159 on 8 May 1979) before dissolving itself on 22 April 1978. The Assembly elects the President of the Republic, who appoints a Prime Minister and other members of the Cabinet. A General People's Congress met in 1982 composed of 1,000 members (700 elected).

President of the Republic Col. Ali Abdullah Saleh (elected 17 July 1978; reelected 22 May 1983).

The Council of Ministers in Dec. 1985 was composed of:

#### **ENERGY AND NATURAL RESOURCES**

Electricity. Production (1984) 409m kwh

Agriculture. Agriculture is the main occupation of the people. This is largely of a subsistence nature, sorghum, sesame and millet being the chief crops, and wheat and barley widely grown at the higher elevations. Of increasing importance,

however, are the cash crops which have been developed since the Second World War, by far the most important of which is the Abyan long-staple cotton, now the country's major export.

Owing to paucity of rainfall, cultivation is largely confined to fertile valleys and flood plains on silt, built up and irrigated in the traditional manner. These traditional methods are being augmented and replaced by the use of modern earth moving machinery and pumps. Irrigation schemes with permanent installations are in progress. Production (1983 in 1,000 tonnes): Millet, 80, wheat, 15, cotton lint, 5, cotton seed, 10, sesame, 4, barley, 2

Livestock (1984). Cattle, 130,000, sheep, 1 m, goats, 1 38 m, poultry, 2 m

Fisheries. There is a thriving fisheries industry, fish being the Republic's major export after cotton Catch (1985) 80,000 tonnes

#### INDUSTRY AND TRADE

**Industry.** Light industry is being established and paint, match and textile factories are in production.

Commerce. Trade is mainly transhipment and entrepôt, Aden serving as a centre of distribution to and from neighbouring territories. Transit trade is mainly in cotton piece-goods, grains, coffee, hides and skins, and cheap consumer goods. Importation of all commodities specified for local consumption is subject to a prior import licence from the Ministry of Trade and Supply Importation of any commodities is completely forbidden except by virtue of a valid import licence.

In 1984 imports totalled 283m dinar, exports and re-exports, 9m dinar

Total trade between Republic of Yemen and UK (British Department of Trade returns, in £1,000 sterling)

	1981	1982	7983	1984	1985
Imports to UK	7,272	26,631	10,627	18,238	7,938
Exports and re-exports from UK	31,480	35,577	36,673	45,221	34,827

#### **COMMUNICATIONS**

Roads. There are 1,150 miles of roads, by 1990, 2,240 km Registered motor vehicles in 1981 numbered 18,533

Aviation. Nine airlines operate scheduled services Alyemda, Air-India, Ethiopian Airlines, Middle East Airlines, Yemen Airlines, Aeroflot, Saudi Airlines, Kuwait Airways, and Air Diibouti

Shipping. Because of its favourable geographical position and its efficient service to ships, Aden used to be one of the busiest oil-bunkering ports in the world, handling some 550 ships a month

Post and Broadcasting. The automatic telephone system provided service to about 28,000 subscribers in 1984

In 1985 there were 180,000 radio and 30,000 television receivers

Cinemas (1971) There were 19 cinemas with a seating capacity of about 20,000

# JUSTICE, RELIGION, EDUCATION AND WELFARE

Justice. There is a Supreme Court and Magistrates' Courts In some areas Moslem and local Common Law are administered

Religion. The majority of the population is Moslem. There are small numbers of Christians and Hindus.

Education. There were (1982, estimate) 229,000 primary school pupils and 28,600 secondary school pupils. A state university was founded in 1975 and the number of students is increasing. In 1985, 400,000 students were studying at schools at various levels. Efforts are being made to eradicate illiteracy among adults.

Welfare, There were (1984) 50 hospitals with 3,805 beds and about 406 doctors.

Socijalistička Federativna Republika Jugoslavija— Socialist Federal Republic of Yugoslavia

HISTORY. In 1917 the Yugoslav Committee in London drew up the Pact of Corfu, which proclaimed that all Yugoslavs would unite after the first world war to form a kingdom under the Serbian royal house. The Kingdom of Serbs, Croats and Slovenes was proclaimed on 1 Dec 1918 In 1929 the name was changed to Yugoslavia. During the Second World War Tito's partisans set up a provisional government (AVNOJ) which was the basis of a Constituent Assembly after the war. On 29 Nov. 1945 Yugoslavia was proclaimed a republic.

The peace treaty with Italy, signed in Paris on 10 Feb 1947, stipulated the cession to Yugoslavia of the greater part of the Italian province of Venezia Giulia, the

commune of Zara and the island of Pelagosa and the adjacent islets

By an agreement of 10 Nov 1975 the city of Trieste ('Zone A') was recognized as Italian and the Adriatic coastal portion of the former Free Territory of Trieste ('Zone B') as Yugoslav A free industrial zone was set up in the Fernetici-Sezana region on both sides of the frontier

The Yugoslav (*ie*, South Slav) languages proper are Slovene, Macedonian and Serbo-Croat, the latter having 2 variants (Serbian and Croatian) which are regarded as constituting one language. There are claims, largely politically-motivated, that Croatian is a separate language and Macedonian a dialect of Bulgarian. Macedonian is and Serbian may be written in the Cyrillic alphabet. There are also substantial Albanian and Hungarian-speaking minorities. Art 246 of the Constitution lays down that 'The languages of the nations and nationalities and their alphabets shall be equal throughout the territory of Yugoslavia'. In practice Serbo-Croat serves as a lingua franca throughout the country

CLIMATE. CONSTITUTION AND GOVERNMENT. The Constitution passed on 31 Jan 1946 declared the Federal Republic to be composed of 6 republics Serbia, Croatia, Slovenia, Bosnia and Herzegovina, Macedonia and Montenegro.

On 13 Jan 1953 a new Constitution (Fundamental Law) confirmed the management of all public affairs by the workers and their representatives (which was introduced in 1950) as the basis of the entire social, economic and political system of Yugoslavia

The Constitution promulgated 7 April 1963 changed the name of the country into the Socialist Federal Republic of Yugoslavia, composed of the socialist republics of Bosnia and Herzegovina, Croatia, Macedonia, Montenegro, Serbia and Slovenia, and the 2 socialist autonomous provinces of Kosovo and Vojvodina within the framework of Serbia.

Under this Constitution, social self-government was exercised by the representative bodies of communes, districts, autonomous provinces, republics and the Federation and the rights to self-government and distribution of income proclaimed in 1953 were extended to those employed in public services. The former Council of Producers, in which only workers and employees engaged in economic production were represented, was replaced by Councils of Working Communities representing the working people employed in every field of social activity

All the means of production and all natural resources are social property. Exceptions are peasants' holdings (up to 10 hectares of arable land) and handicrafts. Citizens may be owners of houses and dwellings for personal and family needs.

A new Constitution was proclaimed on 21 Feb. 1974 The political principle of this Constitution is the direct transfer of economic and political decision making power to the working people through the 'assembly system'. An assembly is defined (Art. 132) as 'a body of social self-management and the supreme organ of power within the framework of the rights and duties of its socio-political community'. Assemblies are based upon the work-place or community and take various forms depending upon the nature of employment. Art. 133 states, 'working people in basic self-managing organizations and communities and in socio-political organizations shall form delegations for the purpose of the direct exercise of their rights, duties and responsibilities and of organized participation in the perfor-

mance of the functions of the assemblies of the socio-political communities, and Art. 135, 'Candidates for members of delegations of basic self-managing organizations and communities shall be proposed and determined by the working people in these organizations and communities in the Socialist Alliance of the Working People .. or in trade union organizations' At the apex of the assembly system is the federal legislature, the Assembly of the Socialist Federal Republic of Yugoslavia which has 2 Chambers the Federal Chamber and the Chamber of Republics and Provinces

The Federal Chamber consists of 30 delegates of self-managing organizations, communities and socio-political organizations from each Republic, and 20 delegates from each Autonomous Province The Chamber of Republics and Provinces consists of 12 delegates from each Republican Assembly and of 8 delegates from each Provincial Assembly

Every citizen over the age of 18 has the suffrage (16 if employed) The last elections were held from Jan to April 1986

The State Presidency is elected every 5 years. It has 9 members. 8 representatives of the Republics and Autonomous Provinces, and the President of the President of the League of Communists ex officio. The annual President is head of state.

Membership of the state Presidency

# **BOSNIA AND HERZEGOVINA**

HISTORY. The country was settled by Slavs in the 7th century, the original clan system evolving between the 12th and 14th centuries into a principality under a Ban, during which time the Bogomil Christian heresy became entrenched. Bosnia was conquered by the Turks in 1463, and the majority of the Bogomils were converted to Islam. At the Congress of Berlin (1878) the territory was assigned to Austro-Hungarian administration under nominal Turkish suzerainty. Austria-Hungary's outright annexation in 1908 generated tensions which contributed to the outbreak of the first world war.

AREA AND POPULATION. The republic is bounded in the north and west by Croatia, in the east by Serbia and in the south-east by Montenegro. It is virtually land-locked, having a coastline of only 20 km with no harbours. Its area is 51,129 sq. km. The capital is Sarajevo.

Population at the 1981 census: 4,124,256 (2,073,343 females), of whom the predominating ethnic groups were Moslems (1,630,033), Serbs (1,320,738) and Croats (758,140). Population density per sq. km: 80.7. Population, 1984, 4.27m.

HISTORY. Until the middle of the 19th century the territory drained by the Congo River was practically unknown When Stanley reached the mouth of the Congo in 1877, King Leopold II of the Belgians recognized the immense possibilities of the Congo Basin and took the lead in exploring and exploiting it. The Berlin Conference of 1884–85 recognized King Leopold II as the sovereign head of the Congo Free State.

The annexation of the state to Belgium was provided for by treaty of 28 Nov 1907, which was approved by the chambers of the Belgian Legislature in Aug. and Sept and by the King on 18 Oct 1908 The law of 18 Oct. 1908, called the Colonial Charter (last amended in 1959), provided for the government of the Belgian Congo, until the country became independent on 30 June 1960 The country's name was changed from Congo to Zaire in Oct 1971 For subsequent history to 1977 see The Statesman's Year-Book, 1980-81, p 1613

AREA AND POPULATION. Zaire is bounded north by the Central African Republic, north-east by Sudan, east by Uganda, Rwanda, Burundi and Lake Tanganyika, south by Zambia, south-west by Angola, north-west by Congo There is a 40-km Atlantic coastline separating Angola's province of Cabinda from the rest of that country.

The area of the republic is estimated at 2,344,885 sq km (905,365 sq miles) The population is composed almost entirely of Bantu groups, with minorities of Sudanese (in the north), Nilotes (northeast), Pygmies and Hamites (in the east) In the census (1976) the population was 25,568,640 (18 2%, urban) Estimate (1985) 34 25. In 1985 there were about 329,000 refugees in Zaire including 265,000 from Angola.

The area (in sq km) and populations (estimate) 1981 of the regions were as follows, together with their capitals

		Population		Population

HISTORY. The independent Republic of Zambia (formerly Northern Rhodesia) came into being on 24 Oct 1964 after 9 months of internal self-government following the dissolution of the Federation of Rhodesia and Nyasaland on 31 Dec. 1963.

By an Order in Council dated 4 May 1911 the two provinces of North-eastern and North-western Rhodesia were amalgamated under the name of Northern Rhodesia, with effect from 17 Aug 1911

By an Order in Council dated 20 Feb 1924, the office of Governor was created, an executive council constituted and provision made for the institution of a legislative council which, since 1945, had an unofficial majority On 1 April 1924 the British South Africa Company was relieved of the administration of the territory by the Crown.

AREA AND POPULATION. Zambia is bounded by Tanzania in the north, Malawi in the east, Mozambique in the south-east and by Zimbabwe and South West Africa (Namibia) in the south The area is 290,586 sq miles (752,614 sq km) Population (1985 estimate) 6,650,000 of which 43% urban

The republic is divided into 9 provinces. Their names, headquarters, area (in sq km) and census population in 1980 were as follows.

Province	Headquari	ers Area	Population	Province	Headquarters	4rea	Population
Copperbelt	Ndola	31,328	1,248,888	Eastern	Chipata	69,106	656,381

The seat of Government is at Lusaka (population, 1980, 538,469); other large towns are Kitwe (314,794), Ndola (282,439), Mufulira (149,778), Chingola (145,869), Luanshya (132,164), Chililabombwe (61,928) and Kalulushi (59,213) on the Copperbelt; Kabwe, the oldest mining township (143,635); Livingstone, the old capital (71,987); and other provincial capitals at Kasama (38,093), Mansa (34,801), Chipata (32,291) and Mongu (24,919).

CLIMATE. The climate is tropical, but has three seasons. The cool, dry one is from May to Aug., a hot dry one follows until Nov., when the wet season commences Frosts may occur in some areas in the cool season. Lusaka Jan. 70°F (21 1°C), July 61°F (16 1°C). Annual rainfall 33" (836 mm). Livingstone. Jan. 75°F (23 9°C), July 61°F (16·1°C) Annual rainfall 27" (673 mm). Ndola Jan 70°F (21 1°C), July 59°F (15°C). Annual rainfall 52" (1,293 mm).

CONSTITUTION AND GOVERNMENT. The Constitution provides for a President, elected in the first instance by the General Conference of the ruling party, the United National Independence Party, and thereafter he is elected by the electorate. On 13 Dec. 1972 President Kaunda signed a new Constitution based on one-party rule.

The single political party is the United National Independence Party. Its full-time executive organ (headed by a Secretary-General) is the Central Committee, whose 24 members are elected by the General Conference of the Party. The Central Committee has precedence over the legislative body, the National Assembly, which is led by the Prime Minister and consists of 125 elected members and up to 10 nominated members, including a cabinet of 18 ministers.

Presidential elections were held in Oct. 1983 and on 30 Oct. President Kaunda was sworn in for a fifth 5-year term.

The Cabinet, as in Jan. 1986, was composed as follows:

There are 3 regional semi-commercial services, Radio 1, 2 and 3, in English, Shona and N'debele. Zimbabwe Television broadcasts one programme 45 hours a week via 8 transmitters. In June 1984 there were 90,500 television and 180,500 radio licences.

# JUSTICE, RELIGION, EDUCATION AND WELFARE

Justice. The general common law of Zimbabwe is the Roman Dutch law as it applied in the Colony of the Cape of Good Hope on 10 June, 1891, as subsequently modified by statute Provision is made by statute for the application of African customary law by all courts in appropriate cases.

The Supreme Court consists of the Chief Justice and at least two (in 1985 there were three) permanent Supreme Court judges. It is Zimbabwe's final court of appeal It exercises appellate jurisdiction in appeals from the High Court and other courts and tribunals; its only original jurisdiction is that conferred on it by the Constitution to enforce the protective provisions of the Declaration of Rights. The Court's permanent seat is in Harare but it sits regularly in Bulawayo also.

The High Court is also headed by the Chief Justice, supported by the Judge President and an appropriate number of High Court judges. It has full original jurisdiction, in both Civil and Criminal cases, over all persons and all matters in Zimbabwe. The Judge President is in charge of the Court, subject to the directions of the Chief Justice. The Court has permanent seats in both Harare and Bulawayo and sittings are held three times a year in three other principal towns.

Regional courts, established in Harare and Bulawayo but also holding sittings in other centres, exercise a solely criminal jurisdiction that is intermediate between

that of the High Court and the Magistrates courts.

Magistrates courts, established in twenty centres throughout the country, and staffed by full-time professional magistrates, exercise both civil and criminal jurisdiction.

The tribal courts and district commissioners' courts of colonial days were abolished in 1981, to be replaced by a system of primary courts, consisting of village courts and community courts. By 1982 1,100 village and 50 community

courts had been established. Village courts are presided over by officers selected for the purpose from the local population, sitting with two assessors. They deal with certain classes of civil cases only and have jurisdiction only where African customary law is applicable. Community courts are presided over by presiding officers in full-time public service who may be assisted by assessors. They have jurisdiction in all civil cases determinable by African customary law and also deal with appeals from village courts. They also have limited criminal jurisdiction in respect of petty offences against the general law.

Religion. The largest religious groups are the Anglicans and Roman Catholics. Other denominations include Presbyterians, the Methodist Church in Zimbabwe and the United Methodist Church. Islam, Hinduism and traditional indigenous religions are represented.

Education. Education is non-racial at all levels and is compulsory

All primary schools offer free tuition; government secondary schools charge from Z\$8-Z\$25 per term. All instruction is given in English. There are also over 3,800 private primary schools and over 950 private secondary schools, all of which must be registered by the Ministry of Education.

There are 10 teachers' training colleges, 8 of which are in association with the University of Zimbabwe. In addition, there are 4 special training centres for teacher trainees in the Zimbabwe Integrated National Teacher Education Course

The University of Zimbabwe provides facilities for higher education. In 1982 the total enrolment of full- and part-time students in the 9 Faculties of Agriculture, Arts, Commerce and Law, Education, Engineering, Medicine, Science, Social Studies and Veterinary Science, was 4,124 (1984), 3,136 full-time.

Health. In 1983 there were 161 hospitals, and 1985, 622 static rural clinics and health centres and 24 mobile rural clinics operated by the Ministry of Health All mission health institutions get 100% government grants-in-aid for recurrent expenditure. There was one medical practitioner for every 7,020 inhabitants in Zimbabwe. There is a medical school attached to the University of Zimbabwe in Harare, four government training schools attached to the 4 central hospitals for training state registered nurses, 14 training schools for medical assistants out of which 11 are administered by missions, and two for training maternity assistants, health assistants/health inspectors

Social Services. It is a statutory responsibility of the government in many areas to provide. Processing and administration of war pensions and old age pensions, protection of children; administration of remand, probation and correctional institutions; registration and supervision of welfare organisations
